Go to vod.divx.com for more information on how to complete your registration.

**Dynamic Noise Suppression from Audience**

Your phone is equipped with an advanced voice processing chip that delivers clear mobile calls by suppressing background noise, intermittent sounds (like a siren or nearby conversation), and echoes, allowing you to hear and be heard nearly anywhere.

**How Does It Work?**

Based on the intelligence of the human hearing system, the technology:

- Captures, evaluates and distinguishes all the sound signals surrounding your phone, and the person you’re speaking with.
- Then isolates the primary voice in conversation and filters out the background noise - so the person you’re calling hears only your voice, without disturbing background noise.
- Dynamically equalizes and adjusts voice volume to optimize your calling experience, so you can hear clearly and don’t need to speak louder to overcome surrounding noise.

The noise suppression technology is built-in and already enabled in your new mobile phone. So it’s ready to provide unsurpassed voice clarity with every call.

Index .................................................................. 348
Section 1: Getting Started

This section explains how to get started with your device by installing and charging the battery, installing the SIM card and optional memory card, and setting up your voice mail. Before using your phone for the first time, you'll need to install and charge the battery and install the SIM card. The SIM card is loaded with your subscription details, such as your PIN, available optional services, and many other features. If desired, you can also install an SD card to store media for use with your phone.

Understanding this User Manual

The sections of this manual generally follow the features of your device. A robust index for features begins on page 348. Also included is important safety information that you should know before using your phone. This information is available near the back of the guide, beginning on page 296.

This manual provides navigation instructions according to the default display settings. If you select other settings, navigation may be different.

Unless otherwise specified, all instructions in this manual assume you are starting from the Home screen and using the available keys.

Note: Instructions in this manual are based on default settings, and may vary from your device, depending on the software version on your device, and any changes to the device’s Settings.

Unless stated otherwise, instructions in this User Manual start with the device unlocked, at the Home screen.

All screen images in this manual are simulated. Actual displays may vary, depending on the software version of your phone and any changes to the device’s Settings.
**Special Text**

Throughout this manual, you’ll find text that is set apart from the rest. These are intended to point out important information, share quick methods for activating features, to define terms, and more. The definitions for these methods are as follows:

- **Notes**: Presents alternative options for the current feature, menu, or sub-menu.
- **Tips**: Provides quick or innovative methods, or useful shortcuts.
- **Important**: Points out important information about the current feature that could affect performance.
- **Warning**: Brings to your attention important information to prevent loss of data or functionality, or even prevent damage to your phone.

**Text Conventions**

This manual provides condensed information about how to use your phone. To make this possible, the following text conventions are used to represent often-used steps:

- Arrows are used to represent the sequence of selecting successive options in longer, or repetitive, procedures.

---

**Example**: From the Home screen, press 📞 (Menu) → Settings → Bluetooth.

**Battery Cover**

The battery, SIM card and SD card are installed under the battery cover.

**Important!** Before removing or replacing the battery cover, make sure the device is switched off. To turn the device off, hold down the ⌘ key until the Device options screen displays, then tap Power off.

**To remove the battery cover:**

1. Hold the device firmly and locate the cover release latch (1).
2. Place your fingernail in the opening and firmly “pop” the cover off the device (similar to a soda can).
3. Carefully begin to remove the cover along its edges (2) to remove it from the base (3).
To replace the battery cover:

1. Place the battery cover onto the back bottom of the phone (1) and press down (2).
2. Press all along the edge of the back cover until you have a secure seal (3).
**SIM Card Overview**

**Important!** Before removing or replacing the SIM card, make sure the device is switched off. To turn the device off, hold down the \( \text{POWER} \) key until the Device options screen displays, then tap **Power off**.

The SIM card is loaded with your subscription details such as your telephone number, PIN, available optional services, and many other features.

**Important!** The SIM card and its information can be easily damaged by scratching or bending, so be careful when handling, inserting, or removing the card. Keep all SIM cards out of reach of small children.

Some features on your device (such as Wi-Fi Calling) can be unlocked by using a new ISIM (IP Multimedia Services Identity Module) card. To use this new ISIM card, call or contact T-Mobile customer service for more information.

This card contains the necessary information for identifying and authenticating the user to the IMS (IP Multimedia Subsystem).

If available, you can remove the previous SIM and replace it with the new ISIM card.

**Installing and Removing the SIM card**

**To install the SIM card:**

1. Carefully slide the SIM card into the SIM card socket until the card clicks into place.

2. Make sure that the card’s gold contacts face into the device and that the upper-left angled corner of the card is positioned as shown.
To remove the SIM card:
1. Remove the battery cover.
2. Carefully place your fingernail into the end of the SIM slot and push the card slightly out.
3. Carefully slide the SIM card out of the SIM card socket.

**Note:** If the card is not inserted correctly, the device will not detect it and no service will be available. If this happens, turn off the device, remove the card, and reinstall the card in the correct orientation.

**Installing the microSD Memory Card**

Your device supports an optional (external) microSD™ or microSDHC™ memory card for storage of media such as music, pictures, video and other files. The SD card is designed for use with this mobile phone and other devices.

**Note:** microSD memory cards include capacities of up to 2GB. microSDHC™ memory card types can range from 4GB to up to 32GB.

1. Remove the battery cover.
2. Locate the microSD card slot on the inside of the phone.
3. Orient the card with the gold strips facing down.
4. Firmly press the card into the slot and make sure that it catches with the push-click insertion. For more information on how to use the SD card see “Using the SD Card” on page 68

**Important!** Be sure to align the gold contact pins on the card with the phone’s contacts.
Removing the microSD Memory Card

1. Remove the battery cover.
2. Firmly press the card into the slot and release it. The card should pop partially out of the slot.
3. Remove the card from the slot.
4. Replace the battery cover.

Battery

Before using your device for the first time, install the battery and charge it fully.

Important! Before removing or replacing the battery, make sure the device is switched off. To turn the device off, hold down the key until the Device options screen displays, then tap Power off.

Installing the Battery

1. Slide the battery into the compartment (1) so that the tabs on the end align with the slots at the bottom of the phone, making sure the connectors align.
2. Gently press down to secure the battery (2).
**Removing the Battery**

- Grip the battery at the top end (3) and lift it up and out of the battery compartment (4).

**Charging the Battery**

Your device is powered by a rechargeable Li-ion battery. A wall charger, which is used for charging the battery, is included with your phone. Use only approved batteries and chargers. Ask your local Samsung dealer for further details.

Before using your device for the first time, you must fully charge the battery. A discharged battery recharges fully in approximately 4 hours.

- Correct
- Incorrect

Charging Head

USB Cable
Note: Verify that the battery is installed prior to connecting the wall charger. If both the wall charger is connected and the battery is not installed, the handset will power cycle continuously and prevent proper operation. Failure to unplug the wall charger before you remove the battery, can cause the device to become damaged.

Important! It is recommended you fully charge the battery before using your device for the first time.

1. Connect the USB cable to the charging head.
2. Locate the Charger/Accessory jack.
3. Insert the USB cable into the device’s Charger/Accessory jack.
4. Plug the charging head into a standard AC power outlet. The device turns on with the screen locked and indicates both its charge state and percent of charge.

Warning! While the device is charging, if the touch screen does not function due to an unstable power supply unplug the USB power adapter from the power outlet or unplug the USB cable from the device.
Note: This illustration displays both the correct and incorrect orientation for connecting the charger. If the charger is incorrectly connected, damage to the accessory port will occur therefore voiding the phone’s warranty.

5. When charging is finished, first unplug the charger’s power plug from the AC wall outlet, then disconnect the charger’s connector from the phone.

Important! If your handset has a touch screen display, please note that a touch screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch screen may damage the tempered glass surface and void the warranty. For more information, refer to “Standard Limited Warranty” on page 320.

Low Battery Indicator

When the battery level is low and only a few minutes of talk time remain (~15% charge), a warning tone sounds and the “Battery low” message repeats at regular intervals on the display. In this condition, your device conserves its remaining battery power, by dimming the backlight.

When the battery level becomes too low, the device automatically turns off.

The on-screen battery charge is represented (by default) as a colored battery icon. You can also choose to display a percentage value. Having a percentage value on-screen can provide a better idea of the remaining charge on the battery.

- Press ➔ and then tap Settings ➔ Display ➔ Display battery percentage.

For more information, refer to “Display Settings” on page 266.
Extending Your Battery Life

Active applications, light levels, Bluetooth usage, and GPS functionality all act to drain your battery. The following is a list of helpful tips that can help conserve your battery power:

- Reduce your backlight on time.
- Turn Bluetooth off when not in use.
- Turn Wi-Fi off when not in use.
- Deactivate the GPS when not needed. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.
- Do not wait until your battery is completely depleted before charging your device. Repeating this process of a complete discharge and recharge can over time reduce the storage capacity of any battery.
- Turn off Automatic application sync.
- Use the Power Savings Widget to deactivate hardware functions such as Wi-Fi, Bluetooth, GPS, Synchronization, or LCD brightness setting.
- Check the Battery use screen to review what features or functions have been consuming your battery resources.

- Check the Running Services and close any unnecessary applications.
- Use the Task Manager feature to end/shutdown background applications that are still running. These minimized applications can, over time, cause your device to “slow down”.
- Turn off any streaming services after use (see Running Services).
- Animated wallpapers use processing power, memory, and more power. Change your Live Wallpaper to a non-animated Wallpaper gallery or Gallery image.

To conserve power by using the device’s power saving features, see “Power Saving Mode” on page 268.

Note: The Power save feature can also be activated/deactivated via the Notifications panel. For more information, refer to “Accessing Additional Panel Functions” on page 41.
Initial Device Configuration

1. Select a language from the associated field. English is the default language.
2. Tap Start.
3. Choose to either Sign in to your existing Google account, Get an account by creating a new one, or Not now to continue.
   - Once you log in to your account, if prompted to enable purchases, enter your credit card information and click Save.
   - or -
   Click Skip to continue without entering this information.
4. Select/deselect the desired Google location services and tap Next.
5. If prompted, select your Backup and Restore settings by placing a check mark alongside the associated field and tap Next.
6. Enter a First and Last name then tap Next. This will help to identify this as your device.
7. Read and agree to the Google services notice by tapping Next.
8. Tap Finish to complete the setup process.
9. Read the on-screen System Manager Application information.

Note: This software collects only diagnostic data from your device so that T-Mobile technicians can better troubleshoot issues with your device.

10. Select either More Info.. (to read additional information) or Close to close the message screen.

Important! Selecting Close only closes the current description screen and does not disable data collection. To disable data collection, go to Settings ➔ Backup and reset ➔ Collect diagnostics and turn off the Allow Diagnostics feature. For more information, refer to “Collect Diagnostics” on page 287.

Note: Enabling Google location services can drain battery power. For more information, refer to “Power Saving Mode” on page 268.
Confirming the Default Image and Video Storage Location

Although the device is configured to store new pictures and videos to locations such as Phone, it is a very good idea to confirm which location is being used before using your device.

Important! Too many users can overlook this storage location until something goes wrong. It is recommended that you verify this location or change it before initiating the use of the camera or camcorder features.

1. From the Home screen, tap (Camera).
2. From the viewfinder screen, tap (Settings) and scroll down to the Storage entry.
3. Tap this entry and select the desired default storage location for newly taken pictures or videos. Choose from: Phone or Memory card.

Note: It is recommended that you set the option to Memory card.

Creating a Samsung Account

Just as important as setting up and activating a Google account to help provide access to Maps, Latitude, Play Store, etc., An active Samsung account is required to begin accessing applications such as AllShare and Samsung Apps.

Note: The Samsung account application will manage your access to the previously mentioned applications, and there is no longer a need to remember different passwords for each application.

1. Tap (Applications) and tap any of the above mentioned applications (such as Samsung Apps).
   – or –
   In a single motion, touch and drag the Status bar down to the bottom of the screen to reveal the Notifications panel and tap (Samsung account).
2. If you have previously created a Samsung account, tap Sign in.
   – or –
   If this is your first time, tap Create new account.
3. Tap Terms and conditions and Privacy policy to read the legal disclaimers and related information.

4. If you agree to the terms, place a green check mark in the I accept all the terms above field and tap Agree.

5. Enter your the required information and tap Sign up.

Note: You may be prompted to confirm your credentials via email.

6. Verify your account via email by accessing the email address provided during setup and following the steps outlined to complete your registration.
   – or –
   If you have already setup your email account on the device, tap Go to Mailbox and follow the on-screen instructions.
   – or –
   If you have already verified your email address, tap Activate account.

7. Confirm the Samsung account icon no longer appears in the Notifications area at the top of the screen.

Note: Without confirming your email address and following the documented procedures, related applications will not function properly since it is Samsung account that is managing their username and password access.

Switching the Device On or Off

Once the device has been configured, you will not be prompted with setup screens again.

1. Press and hold (Power) until the device switches on.
   The device searches for your network and after finding it, you can make or receive calls.

Note: The display language is preset to English at the factory.
To change the language, use the Language menu. For more information, refer to “Language and Input Settings” on page 280.

2. Press and hold (Power) until the Device options screen appears.

3. Tap Power off ( ).
Restarting the Device

1. Press and hold \[Power\] until the Device options screen appears.
2. Tap \[Restart\].

Locking and Unlocking the Device

By default, the device screen locks when the backlight turns off.

For more information, refer to “Display Settings” on page 266.

- Place your finger on the screen and swipe the glass in any of the directions shown unlock the device.

Note: You can choose to configure lock settings to prevent unauthorized use of your device. For more information, refer to “Security” on page 275.

Creating a New Google Account

You should create a Google™ Account when you first use your device in order to fully utilize the functionality. This account provides access to several device features such as Gmail, Google Maps, Google Search, and the Play Store™ applications. Before you are able to access Google applications, you must enter your account information. These applications sync between your device and your online Google account.

To create a new Google Account from your phone:

1. From the Home screen, tap \[Play Store\].
2. Read the introduction and tap \[New\] to begin.
3. Follow the on-screen instructions to create a Google Account.
   - or –
   If this is not the first time you are starting the phone, tap \[Gmail\].

Note: If you already have a Google account, you only need to sign in.
To create a new Google Account from the Web:

1. From a computer, launch a Web browser and navigate to www.google.com.
2. On the main page, click Sign-in ➔ Create an account for free.
3. Follow the on-screen prompts to create your free account.
4. Look for an email from Google in the email box you provided, and respond to the email to confirm and activate your new account.

**Signing into Your Google Account**

1. Launch an application that requires a Google account (such as Play Store or Gmail).
2. Tap Existing.
3. Tap the Email and Password fields and enter your information.
4. Tap Sign in. Your device communicates with the Google servers to confirm your information.
5. If prompted, create a new Gmail username by entering a prefix for your @gmail.com email address.

**Retrieving your Google Account Password**

A Google account password is required for Google applications. If you misplace or forget your Google Account password, follow these instructions to retrieve it:

1. From your computer, use an Internet browser and navigate to http://google.com/accounts.
2. Click on the Can't access your account? link.
3. Follow the on-screen password recovery procedure.
Voice Mail

Setting Up Your Voice Mail

Your device automatically transfers all unanswered calls to voicemail, even if your device is in use or turned off. As soon as your battery is charged and the SIM card inserted, activate your voicemail account.

Important! Always use a password to protect against unauthorized access.

For new users, follow the instructions below to set up voicemail:

Note: Voicemail setup may be different depending on your network.

1. From the Home screen, tap \( \text{ } \) and then touch and hold \( \text{ } \) until the device dials voicemail. You may be prompted to enter a password.

2. Follow the tutorial to create a password, a greeting, and a display name.

Accessing Your Voice Mail

You can access your Voice Mail by either pressing and holding \( \text{ } \) on the keypad, or by using the phone’s Application icon, then tapping the Voice Mail application. To access Voice Mail using the menu:

1. From the Home screen, tap \( \text{ } \) and then touch and hold \( \text{ } \) until the device dials voicemail.

Note: Touching and holding \( \text{ } \) will launch Visual voicemail if it is already active on your device.

2. When connected, follow the voice prompts from the voicemail center.

Accessing Your Voice Mail From Another Phone

1. Dial your wireless phone number.

2. When you hear your voicemail greeting, press the asterisk key on the phone you are using.

3. Enter your passcode.
Visual Voicemail

Visual Voicemail enables users to view a list of people who left a voicemail message, and listen to any message they want without being limited to chronological order.

1. From the Home screen, tap (Applications) → (Visual Voicemail).
2. Read the on-screen information and tap Next.
3. Read the on-screen information and tap Done. A list of the voicemail messages displays.

**Important!** If this is your first time to access Visual Voicemail, you may be prompted to enter a new PIN code and tap Next to activate Visual Voicemail.

**Note:** You must subscribe to Visual Voicemail service to use this feature. Charges may apply. Please contact your service provider for further details.

4. Tap an on-screen voicemail message to play it back.

---

To check Visual Voicemail messages:

1. From the Home screen, tap (Applications) → (Visual Voicemail).
2. Tap the voicemail message you want to play.
3. Tap (Play).

To delete Visual Voicemail messages:

1. From the Home screen, tap (Applications) → (Visual Voicemail).
2. Tap the voicemail message you want to delete.
3. Tap (Delete) → OK.
**Task Manager**

Your device can run applications simultaneously, with some applications running in the background. Sometimes your device might seem to slow down over time, and the biggest reason for this are background applications. These are applications that were not properly closed or shutdown and are still active but minimized. The Task Manager not only lets you see which of these applications are still active in the background but also easily lets you choose which applications are left running and which are closed.

---

**Note:** The larger the number of applications running on your phone, the larger the energy drain on your battery.

---

**Task Manger Overview**

- From the Home screen, tap **Applications** → **Task manager**.
  - or –
  Press and hold **Home** then tap **Task manager**. This screen contains the following tabs:

  - **Active applications** display those currently active applications running on your phone.
  - **Downloaded** displays any installed packages or applications from the Market that are taking up memory space. Tap **Uninstall** to remove them from your phone.
  - **RAM**, which displays the amount of current RAM (Random Access Memory) currently being used and allow you to **Clear Memory**.
  - **Storage** displays a visual graph indicating the available and used space within the System storage, USB storage, and external SD card.
  - **Help** provides additional battery saving techniques.
Shutting Down an Currently Active Application

1. From the Home screen, tap ➔ Task manager.

2. From the Active applications tab, tap Exit to close selected applications.
   – or –
   Tap Exit all to close all background running applications.
Section 2: Understanding Your Device

This section outlines key features of your phone. It also describes the device’s keys, screen and the icons that display when the device is in use.

Features of Your Device

Your device is lightweight, easy-to-use and offers many significant features. The following list outlines a few of the features included in your device.

• Brilliant 5.3” wide-screen HD Super AMOLED™ display
• Touch screen with virtual (on-screen) QWERTY keyboard
• S Memo and S Pen apps provide free-flowing input techniques
• High Speed Packet Access Plus (HSPA+) delivering data speeds faster than the current 3G network technology.
• Android v 4.0, Ice Cream Sandwich Platform
• Wi-Fi ® Capability
• USB Tethering-capable
• Bluetooth enabled
• Full Integration of Google Mobile™ Services (Gmail, YouTube, Google Maps, Google Voice Search)

• Multiple Messaging Options: Text/Picture/Video Messaging, and Instant Messaging with Google Talk™
• Corporate and Personal Email
• 8 Megapixel Camera and Camcorder with autofocus, LED Flash, and digital zoom
• 2 Megapixel Front Facing camera
• Music Player with multitasking features
• Over 450,000 apps available to download from the Google Play™ Store
• Pre-loaded e-reader applications such as: Google Play™ Books and Zinio®
• Multiple Entertainment Applications including Media Hub, T-Mobile® TV, Slacker® Radio and Google Play™ Music
• Social Hub to integrate all of your favorite social networking sites.
• Polaris® Office for document viewing and editing
• Assisted GPS (TeleNav GPS Navigation and Google Navigation)
• Webkit-based browser
• 16GB built-in memory (~12GB available)
• Expandable memory slot - supports up to 32GB
• Mobile HotSpot Capability
• Lookout® Security (Security, Backup, Missing Device capabilities)
• T-Mobile® TV
• Slacker Radio®
• SWYPE™ text input technology
• Google Video Chat via Google Talk
• Compatibility with a new ISIM card
• Wi-Fi Calling via the use of an ISIM card
• Access to thousands of Movies and TV Shows with the Samsung Media Hub
• HD Video Player 720p
  – Codec: MPEG4, H.264, VC-1, DivX, VP8, WMV7/8, Sorenson Spark, MP43
  – Format: 3GP (MP4), WMV (ASF), AVI, FLV, MKV, and WebM
  – Video Player: 1080P
• DivX Certified® to play DivX® video up to HD 720p, including premium content
• Kies Air to wirelessly sync your PC with your phone via a Wi-Fi® connection
• AllShare™ to share your media content across DLNA certified devices

Front View
The following illustrations show the main elements of your device: The following list correlates to the illustrations.
1. **Receiver** allows you to hear the other caller and the different ring tones or sounds offered by your device.

2. **Volume key** allows you to adjust the ringer volume in standby mode (with the phone open) or adjust the voice volume during a call. When receiving an incoming call:
   - Pressing the volume key down mutes the ring tone.

3. **Menu key** displays a list of options available for the current screen. From the Home screen it displays Add, Wallpaper, Search, Notifications, Edit, and Settings options.

4. **Home key** displays the Home screen when pressed.

5. **USB Power/Accessory connector** allows you to connect a power cable or optional accessories such as a USB/data cable.

6. **Microphone** is used during phone calls and allows other callers to hear you clearly when you are speaking to them. There are two microphones on the device:
   - Bottom microphone: used during handset mode.
   - Top microphone: used while an active call is in the speakerphone mode and assists in noise cancellation (2 microphone solution).

7. **Quick search** is used to search the device for applications, contact information, or searches the internet for information.

8. **Back key** redisplay the previous screen or clears entries.

9. **Display** shows all the information needed to operate your phone, such as the connection status, received signal strength, phone battery level, and time.

10. **Power/End key** ends a call or switches the phone off and on. Press and hold for two seconds to turn toggle the Silent mode or Airplane mode states, turn the device on or off, or Restart.

11. **Front Facing Camera** allows you to take pictures while facing the screen and allows you to video conference.

**Note:** Video recorded in Portrait mode is reversed during playback.
12. **Proximity Sensor** detects how close an object is to the surface of the screen. This is typically used to detect when your face is pressed up against the screen, such as during a phone call.
   - While talking on the phone, the sensor detects talk activity and locks the keypad to prevent accidental key presses.

13. **Light Sensor** lets you use the ambient light level to adjust the screen brightness/contrast. This sensor decreases screen brightness in dim light.
   - In a bright light condition (outdoors), the sensors cause the device to increase the brightness and contrast for better viewing.
   - In dim light conditions, the device increases the screen brightness to compensate.

14. **Headset jack** allows you to connect a hands-free headset so you can listen to music.

**Back View**

The following illustration shows the external elements of your device:

1. **S Pen** is a built-in stylus that allows you to perform various functions. For more information, refer to “S Pen” on page 31.

2. **External speaker** allows you to hear ringers, music, and other sounds offered by your phone.

3. **microSD Card Slot** (internal) allows you to use a microSD card to expand the memory of your device.

4. **Flash** is used to take photos in low-light conditions.

5. **Camera lens** is used to take photos.
S Pen

The S Pen™ is a stylus that assists you in performing different functions. By using the Pen button, you can minimize having to switch between touch and pen input.

1. **Pen button**: by pressing the Pen button, you can add functionality to the S Pen. For more information, refer to “Using the S Pen” on page 32.

2. **Stylus tip**: the tip of the S Pen is used for tapping the screen.

---

Removing the S Pen from your Phone

The S Pen is stored within your device to make it easier to keep track of.

**To remove the S Pen:**

1. Use your fingernail or a sharp object to pull the end of the S Pen out of the phone (1).

2. Pull the S Pen out from the device (2).
Using the S Pen

There are several different functions you can perform by using the S Pen.

Back Button Function

To move to a previous screen:
1. Grasp the pen and press the Pen button.
2. In a single motion, touch on the screen for 1 second then drag the screen to the left. The previous screen is displayed. Holding it for 2 seconds takes a screen shot.

Menu Button Function

To display the menu from any screen:
1. Grasp the pen and press the Pen button.
2. In a single motion, touch on the screen and then drag the pen upward. The menu is displayed.
Launch S Memo

S Memo is an application that you can launch from any screen to take quick notes or jot down ideas.

To launch S Memo from any screen:
1. Grasp the pen and press the Pen button.
2. Double tap the screen to display the S Memo app.

Screen Capture

To take a screen capture of any screen:
1. Grasp the pen and press the Pen button.
2. Touch and hold the S Pen anywhere on the screen.
Files are saved in the My files ➔ Pictures ➔ Screenshots folder and  (Screen capture) appears in the Notifications area of the screen to indicate a screen capture has been taken.
Write on any Screen after Capture

To take a screen capture of any screen:

- With the screen capture shown, use the pen to draw or write on the screen. Saved files are saved in the My files → Pictures → Screenshots → Capture Edited folder.

For information on using your S Pen with the S Memo application, see “S Memo” on page 211.

Device Display

Your display provides information about the device’s status, and is the interface to manage features. It indicates your connection status, signal strength, battery status and time. Icons display at the top of the device when an incoming call or message is received and also alerts you at a specified time when an alarm was set.
The screen also displays notifications, and Application (or shortcut) bar with four primary shortcuts: Phone, Contacts, Messaging, and Applications.

Display settings
In this menu, you can change various settings for the wallpaper, cube, brightness or backlight.
- From the Home screen, tap (Applications) \(\rightarrow\) (Settings) \(\rightarrow\) Display. For more information, refer to “Display Settings” on page 266.

Status Bar
The Status Bar shows information about the connection status, signal strength, battery level, and time, and displays notifications about incoming messages, calls and other actions.
This list identifies the icons you see on your display screen:

---

Indicator Icons
This list identifies the symbols you’ll see on your device’s display and Indicator area:

**Note:** Some Notification icons can be hidden manually by toggling the status of the Notification panel function. For more information, refer to “Accessing Additional Panel Functions” on page 41.

- Displays your current signal strength. The greater the number of bars, the stronger the signal.
- Indicates that the Airplane Mode is active. You cannot send or receive any calls or access online information.
- Indicates there is no signal available.
- Displays when there is no SIM card in the phone.
- Displays when there is a system error or alert.
Displays when a call is in progress. Displayed in the Status bar when the current call is minimized.

Displays when a call is on hold. Displayed in the Status bar when the current call is minimized.

Displays when an active call is routed through a Bluetooth headset. Displayed in the Status bar when the current call is minimized.

Displays when you have missed an incoming call.

Displays when you device is set to automatically reject calls from your Reject list or all calls.

Displays when the speakerphone is on. Displayed in the Status bar when the current call is minimized.

Displays when the microphone is muted.

Displays when Call forwarding is set to Always forward. Displayed in the Status bar when the current call is minimized. For more information, refer to “Configuring Additional Voice Call Settings” on page 262.

Displays your current battery charge level. Icon shown is fully charged.

Displays when the current battery is 100 percent charged and the Display battery percentage option is enabled. This icon is followed by an audible beep.

Displays your battery is currently charging.

Displays your current battery charge level is low (Charge: ~28% - 15%).

Displays your current battery charge level is very low (Charge: ~15% - 5%).

Shows your current battery only has up to 4% power remaining and will soon shutdown. (Charge: ~4% - 1%).

Displays when connected to the EDGE network.

Displays when your device is communicating with the EDGE network.

Displays when connected to the 3G network. 3G indicator is only seen when roaming.
Displays when your device is communicating with the 3G network. 3G indicator is only seen when roaming.

Displays when connected to the HSPA+ network.

Displays when your device is communicating with the HSPA+ network.

Displays when the phone has detected an active USB connection and is in a USB Debugging mode.

Displays when there is a new text message.

Displays when an outgoing text message has failed to be delivered.

Displays when there is a new voicemail message.

Displays when there is a new visual voicemail message.

Displays in the notifications window when there is a new Email message.

Displays in the notifications window when there is a new Gmail message.

Displays when a new Google+ notification has been received.

Displays when the T-Mobile Name ID application did not recognize a recent number and would like to know whether you wish to Not add, or add as a New or Existing number.

Displays when the time and date for a Calendar Event has arrived. For more information, refer to “Calendar” on page 242.

Displays when an alarm is set.

For more information, refer to “Setting an Alarm” on page 244.

Displays when the device is in Silent mode.

All sounds except media and alarms are silenced, and Silent mode is set to Vibrate. For more information, refer to “Silent mode via Device Options Screen” on page 264.
Displays when the device is in Silent mode. All sounds are silenced, and Silent mode is set to Mute.

Displays when data synchronization and application sync is active and synchronization is in progress for Gmail, Calendar, and Contacts.

Displays when the Share shot option is enabled from within the Camera Shooting mode menu and images and being shared via Wi-Fi Direct. For more information, refer to “Camera Options” on page 155.

Displays when a screen capture has been taken and stored in the clipboard. For more information, refer to “Using the S Pen” on page 32.

Displays when Bluetooth technology is active and enabled.

Displays when Bluetooth technology is active and there is an available open and visible bluetooth device.

Displays when the Bluetooth technology is active and communicating with an external device.

Displays when an outbound file transfer is in progress.

Displays when a file or application download is in progress.

Displays when updates are available for download.

Displays when a Play Store download has completed.

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Displays when Wi-Fi is active and there is an available open wireless network.

Displays when the USB Tethering mode is active and communicating. For more information, refer to “USB Tethering” on page 238.
Displays when Wi-Fi is being used as a Mobile HotSpot feature is active and communicating. For more information, refer to “Mobile HotSpot” on page 239.

Displays when Wi-Fi Direct is active and configured for a direct connection to another compatible device in the same direct communication mode. For more information, refer to “Wi-Fi Direct Setup and Settings” on page 256.

Displays when the Wi-Fi calling feature is active. Minutes used while connected to the Wi-Fi network count against available rate plan minutes.

Displays when the Wi-Fi calling feature is active and you are using it with within your current active call.

Displays when there is an error in the use or 911 registration of the Wi-Fi Calling feature.

Displays in the notifications window when Bobsled Messaging is currently active.

Displays when your phone is connected to a PC using Kies air.

Displays when your phone is connected to a Digital Living Network Alliance (DLNA) certified device using the AllShare application.

Displays when you are currently in Emergency calling mode. You must exit this mode to resume normal calling function.

Displays in the notifications window when action is required within the Samsung account application.

Displays in the notifications window when there are too many on-screen notification icons to display. Tap to show more notifications.

Tap to select a text input method.

Displays in the notifications window when a song is currently playing within the Music Player.

Displays in the notifications window when a song is currently playing within the Play Music application.

Displays when your device’s GPS is on and communicating.
Displays when the external SD card (internal microSD) has been disconnected (unmounted) from the phone and is now ready for either removal or formatting.

Displays when the External SD card is being prepared for mounting to the device. This is required for communication with the External SD card.

Displays when the External SD card is safe to remove.

Displays when the External SD card has been removed and you are prompted to insert a new one.

Displays when the microSD card has been unexpectedly removed.

Displays when Power saving mode is enabled.

Displays when the Power saving alert notification has been activated. You are then prompted to view your current battery level.

Displays when TTY device has been inserted.

For more details on configuring your device’s settings, see “Changing Your Settings” on page 247.

**Notification Panel**

The Notification area indicates new message events (data sync status, new messages, calendar events, call status, etc). You can expand this area to provide more detailed information about the current on-screen notification icons.

1. In a single motion, touch and drag the Status bar down to the bottom of the screen to reveal the Notifications panel (1).
2. Tap a notification entry to open the associated application (2).

Note: The Notifications panel can also be opened on the Home screen by pressing and then tapping Notifications.

Clearing Notifications
1. Tap the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel
2. Tap Clear. The notifications are cleared from the panel.

Accessing Additional Panel Functions
In addition to notifications, this panel also provides quick and ready access to device functions. These can be quickly activated or deactivated.

The following functions can either be activated (green) or deactivated (white): Wi-Fi, Bluetooth, GPS, Sound/Vibrate/Mute, Screen rotation, or Power saving.
Function Keys

Your phone comes equipped with four main function keys that can be used on any screen: Home, Menu, Back and Search.

Home Key

The Home key takes you back to your Home screen (#4 of the 7 available screens).

- Press and hold to launch the Recent apps/Task manager screen. For more information, refer to “Accessing Recently-Used Applications” on page 61.

Menu Key

The Menu key ( ) activates an available menu function for the current screen or application. For more information, refer to “Home Screen Menu Settings” on page 44.

Back Key

The Back key ( ) returns you to the previously active screen. If the on-screen keyboard is currently open, this key closes the keyboard.

Search Key

The Search key ( ) displays the Google Search box that can be used to search for either a key term online.

Home Screen

The Home screen is the starting point for using the applications on your device. There are initially seven available panels, each populated with default shortcuts or applications. You can customize each of these panels.
- **Notification area** displays those icons associated with end-user notifications such as: email messages, calls (missed, call in progress), new voicemail, upcoming event, USB connection, emails, and Text/MMS messages.
  - These notifications appear at the top-left of the screen (within the Status bar area) and display important user information.
  - This information can be accessed by either swiping down from the Status bar (page 40) or by accessing the Notifications panel > Notifications.
- **Status area** displays those icons associated with the status of the device such as communication, coverage, Bluetooth, 4G/3G, Wi-Fi communication, battery levels, GPS, etc.
- **Home Screen** is a customizable screen that provides information about notifications and device status, and allows access to application Widgets.
- **Extended Home Screens** extend beyond the current visible screen width to provide more space for adding icons, widgets, and other customization features.
  - There are six available extended screens (panels) each of which may be populated with its own shortcuts or widgets. These screens share the use of the three Primary Shortcuts.
  - The current screen is indicated at the bottom by a larger circle. Up to seven (7) total screens are available.

**Note:** Both the status bar and primary shortcuts are visible across all screens.

- **Google search** is an on-screen Internet search engine powered by Google™. Tap to access the Voice Search feature where you can verbally enter a search term and initiate an online search.
  - Tap (Voice Search) to launch the Voice Search function from within this Google widget.
- **Widgets** are self-contained on-screen applications (not shortcuts). These can be placed onto any of the available screens (Home or extended).
- **Shortcuts** are icons that launch available device applications such as Camera, YouTube, Voicemail, Contacts, Phone, Email, Play Store, etc. These function the same as shortcuts on your computer.
  - Although some may already be found on the Extended Home screens, the majority can also be found within the Applications screens.
  - The Application screens can be accessed by tapping (Applications) from the Primary shortcuts area.
Shortcuts can be removed from a screen and added back any number of times.

**Primary Shortcuts:** are four shortcuts present throughout all of the available screens and can be used to both navigate within the device or launch any of the following functions:

- **Phone ( )** launches the phone-related screen functions (Keypad, Call log, Favorites, or Contacts).
- **Contacts ( )** launches the Contacts-related screens (Phone, Groups, Contacts, and Favorites).
- **S Memo ( )** launches the S Memo application that allows you to create on-screen memos. For more information, refer to “S Memo” on page 211.
- **Messaging ( )** launches the Messaging menu (create new messages or open an existing message string).
- **Applications/Home** toggles functionality between the Home and Application screens.
  - Tap **Applications** to access the Application screens loaded with every available local application.
  - While in the Applications screens, tap **Home** to easily return to the Home screen.

As you transition from screen to screen, the screen counter (located at the bottom) displays the current panel number in a circle.

### Home Screen Menu Settings

When on the Home screen, the following menu options are available:

- **Add** adds one of the following functions to a selected screen: Widgets, Shortcuts, Folders, and Wallpapers.
- **Wallpaper** lets you to customize the current screen’s wallpaper image by choosing from either Gallery, Live Wallpaper or Wallpaper gallery).
  - You can obtain images from either your Pictures folder, from any of the available images within the device’s Wallpaper gallery, or from the animated Live Wallpapers.

**Note:** Wallpapers supports the following image types: JPEG, PNG, GIF, BMP, and WBMP.
• **Search** displays the Google Search box that you can use to search for a key term online.

• **Notifications** allows you to expand popup notifications area to provide more detailed information about the current on-screen notification icons.

• **Edit** allows you to add or remove extended screens from your device. You can have up to six extended screens (one Home screen and six Extended screens).

• **Settings** provides quick access to the device’s settings menu.
  
  — The Settings menu can also be accessed by pressing 🏛️ and then tapping 📗 → **Settings**.

---

### Applications

The Application menu provides quick access to the most frequently used applications. Applications display on each of the four panels on the Applications screens.

#### Application Screen Menu Settings

When on the Apps screen, the following menu options are available:

1. Press 🏛️ and then tap 📗 (Applications).

2. Press 📗 and then select from the following options:
   
   • **Edit**: allows you to add a new folder to the Application screen and then drag/drop an existing application into it. This feature requires the view be set to Customizable view.
   
   • **View type**: allows you to customize the way the Application menu listing is shown. For more information, refer to “Adding and Removing Primary Shortcuts” on page 63.
   
   • **Share apps**: allows you to share information about selected applications with external users. For more information, refer to “Sharing Application Information” on page 63.

3. Press 🏛️ to return to the Home screen.
The following table contains a description of each application available via both the Primary shortcuts area and via the Applications screens. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided. For information on navigating through the Applications icons, see “Navigating Through the Application Menus” on page 59.

411 & More
Provides more than just single tap access to directory assistance and other portals. Available categories include: 411 Directory Assistance, Current Weather, and more.
For more information, refer to “411 & More” on page 187.

Access T-Mobile
This option provides you online access to account specific information such as your current activity, billing information, plan services, downloads, and other information.
For more information, refer to “Access T-Mobile” on page 188.

AllShare
Allows you to share your on-device media content with other external devices using DLNA (Digital Living Network Alliance) and built-in AllShare™ technology. Samsung’s AllShare makes staying connected easy. For more information, refer to “AllShare” on page 184.

Amazon
Provides access to Amazon.com via a built-in mobile application.
For more information, refer to “Amazon” on page 189.

Bobsled Messaging
The Bobsled™ Messaging mobile application makes it easy to stay in sync with individual friends or groups across devices, countries, and carriers.
For more information, refer to “Bobsled Messaging” on page 151.
Calculator
Launches the on-screen calculator application. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division. You can also use this as a scientific calculator.
For more information, refer to “Calculator” on page 189.

Calendar
Launches a calendar application that syncs to your Facebook™, Google™, or Microsoft Exchange work calendars.
For more information, refer to “Calendar” on page 242.

Camera
Launches the built-in 8.0 megapixel camera application from where you can take a picture with either the front or rear facing cameras.

Note: A micro SD card is no longer needed to take pictures or shoot video since there is already built-in storage.

Note: It is recommended that you store your pictures and videos on a microSD card. If something were to occur to the device, your files are still protected.

In addition to taking photos, the built-in camera also doubles as a camcorder that also allows you to record, view, and send high definition videos.
For more information, refer to “Using the Camera” on page 154. For more information, refer to “Using the Camcorder” on page 164.
Clock
Allows you to set an alarm, configure and view the World clock, use a stopwatch, set a timer, or Desk clock. The applications display in a tabular format and quickly accessed with the touch of a finger.
For more information, refer to “Clock” on page 190.

Contacts
The default storage location for saving phone numbers to your Contacts List is your phone’s built-in memory.
For more information, refer to “Contacts List” on page 109.

Crayon physics
A preloaded game that uses two-dimensional physics to guide a ball from a starting point so that it touches all of the stars placed on each level.
For more information, refer to “Crayon Physics” on page 191.

Downloads
Provides quick access to tabs containing a list of your current downloaded files (Internet and Other).
For more information, refer to “Downloads” on page 191.

Email
Provides access to both your Outlook (Exchange Server-based) work email and Internet email accounts (such as Gmail and Yahoo! Mail).
For more information, refer to “Email” on page 138.

Gallery
Displays a Gallery of camera images and video stored in the microSD card.
For more information, refer to “The Gallery” on page 169.

Gmail
Provides access to your Gmail account. Google Mail (Gmail) is a web-based email service. Gmail is configured when you first set up your phone.
For more information, refer to “Using Google Mail” on page 148.
Google +:
This application makes messaging and sharing with your friends a lot easier. You can set up Circles of friends, visit the Stream to get updates from your Circles, use Messenger for fast messaging with everyone in your Circles, or use Instant Upload to automatically upload videos and photos to your own private album on Google+.
For more information, refer to “Google +” on page 150.

Kies air
Allows you to sync your Windows PC wirelessly with your phone (as long as both are on the same Wi-Fi network). You can now have real-time access of your phone through your PC to view call logs, videos, photos, bookmarks, IMs, and even send SMS messages directly from your home computer.
For more information, refer to “Kies Air” on page 235.

Latitude
Lets you see your friends’ locations and share yours with them. The application also lets you see your friends’ locations on a map or in a list. It also lets you send instant messages and emails, make phone calls, and get directions to your friends’ locations.
For more information, refer to “Latitude” on page 193.

Lookout Security
Lookout Security™ provides mobile device-specific security features that are coupled with a minimal performance hit. For more information, refer to “Lookout Security” on page 195.

Maps
Launches a Web-based dynamic map that helps you find local businesses, locate friends, view maps and get driving directions.
For more information, refer to “Maps” on page 196.
Media Hub
Provides you with a one stop shop for the hottest movie and TV content. You can now rent or purchase your favorite content and then watch it from the convenience of anywhere.
For more information, refer to “Media Hub” on page 172.

Messenger:
Allows you to bring groups of friends together into a simple group conversation. When you get a new conversation in Messenger, Google+ sends an update to your phone.
For more information, refer to “Messenger” on page 150.

Messaging
Provides access to text and multimedia messaging (SMS and MMS).
For more information, refer to “Creating and Sending Messages” on page 129.

Mini diary
Allows you to create a mini diary where you can add a photo, and text to describe an event or other memorable life event.
For more information, refer to “Mini Diary” on page 199.

Mobile HotSpot
Provides access to the Tethering and portable HotSpot menu where you can use either the USB tethering or portable HotSpot functionality.
For more information, refer to “Mobile HotSpot” on page 200.

Music player
Launches the built-in Music player that allows you to play music files that you have stored on your microSD card. You can also create playlists.
For more information, refer to “Music Player” on page 181.
My files
Lets you view supported image files and text files on both your internal storage and microSD card. Organize and store data, images, and more in your own personal file folders. Files are stored to either the internal storage or memory card in separate (user defined) folders.
For more information, refer to “My Files” on page 201.

Navigation
Launches a Web-based navigation application.

Caution! Traffic data is not real-time and directions may be wrong, dangerous, prohibited, or involve ferries.

For more information, refer to “Navigation” on page 202.

News & Weather
Launches a Web-based news and weather feed based on your current location.
For more information, refer to “News & Weather” on page 204.

Photo editor
Provides basic editing functions for pictures you have taken on your phone. In addition to basic image tuning such as brightness, contrast, and color, it also provides several picture editing effects.
For more information, refer to “Photo Editor” on page 167.

Places
Displays company logos on a layer of Google Maps. When viewing an area you can quickly locate a business or person, find out more information about the business, see coupons, public responses, and more.
For more information, refer to “Places” on page 205.

Play Books
Provides access to read over 3 million ebooks on the go.
For more information, refer to “Play Books” on page 206.
Play Movies
Rent movies on Google Play™ and watch instantly using the Google Play Movies app.
For more information, refer to “Play Movies” on page 175.

Play Music (Google Music)
Launches the built-in Google Music Player that allows you to play music files that you have both downloaded from Google Music and stored on your microSD card.
For more information, refer to “Play Music” on page 176.

Play Store:
Formerly known as the “Android Market”, it provides access to downloadable applications, games, music, and movies. The Play Store also allows you to provide feedback and comments about an application, or flag an application that might be incompatible with your phone.
For more information, refer to “Play Store” on page 207.

Polaris Office
Polaris Office® Mobile for Android is a Microsoft Office compatible office suite. This application provides a central place for managing your documents online or offline.
For more information, refer to “Polaris Office” on page 210.

Pro Apps
Provides access to compatible productivity tools.
For more information, refer to “Pro Apps” on page 210.

S Memo
This application allows you to create memos using the keypad, the S Pen tool, or both. You can add images, voice recordings, and text all in one place.
For more information, refer to “S Memo” on page 211.

S Note
Use S Note to create notes with productivity tools that turn handwriting into typed text and correct drawn shapes, lines, and formulas to make them perfect.
For more information, refer to “S Note” on page 213.
Samsung Apps
Allows you to easily download an abundance of applications to your device. This includes games, news, reference, social networking, navigation, and more.
For more information, refer to “Samsung Apps” on page 214.

Search
Provides an on-screen Internet search engine powered by Google™.

Settings
Accesses the device’s built-in Settings menu.
For more information, refer to “Changing Your Settings” on page 247.

Slacker Radio
Slacker Radio® offers free, internet radio for mobile phones.
For more information, refer to “Slacker Radio” on page 215.

Social Hub
Allows you to easily and intuitively satisfy all of your communication needs from within a single-user interface. E-mails, instant messaging, social network contents, and calendar contents from all major service providers are available.
For more information, refer to “Social Hub” on page 215.

T-Mobile Name ID
Allows you to modify the on-screen Caller ID information.

T-Mobile TV
Allows you to watch live mobile TV on your phone. This application is a subscription service.
For more information, refer to “T-Mobile TV” on page 216.
Talk
Launches a Web-based Google Talk application that lets you chat and video conference with family and friends over the Internet for free.
For more information, refer to “Google Talk” on page 150.

Task manager
Use Task Manager to see which applications are running on your phone, and to end running applications to extend battery life.
For more information, refer to “Task Manager” on page 216.

TeleNav GPS
This driving aid provides both audible and visual navigation instructions for GPS navigation.
For more information, refer to “TeleNav GPS” on page 217.

Video player
Launches your device’s built-in video application that plays video files stored on your microSD card.
For more information, refer to “Using the Video Player” on page 170.

Visual Voicemail
Visual Voicemail enables users to view a list of people who left a voicemail message, and listen to the any message they want without being limited to chronological order.
For more information, refer to “Visual Voicemail” on page 24.

Voice Recorder
Allows you to record an audio file up to one minute long and then immediately send it as a message.
For more information, refer to “Voice Recorder” on page 218.
**Voice Talk**
Launches your phone’s built-in voice recognition system that allows you to initiate several common tasks without having to touch the phone. Features include: Call, Text, Navigate, Play music, Memo, and Driving mode.

For more information, refer to “Voice Talk” on page 219.

**Web**
Open the browser to start surfing the web. The browser is fully optimized and comes with advanced functionality to enhance the Internet browsing feature on your phone.

For more information, refer to “Web” on page 221.

**YouTube**
Launches the YouTube webpage via the browser.

For more information, refer to “YouTube” on page 186.

**Zinio**
Launches a digital magazine reader. Zinio® has transformed your favorite print magazines into digital format.

For more information, refer to “Zinio” on page 220.

**Screen Navigation**
Using the touch screen display and the keys, you can navigate the features of your device and enter characters. The following conventions are used in this manual to describe the navigation action in the procedures.
Navigating Through the Screens

Note: There are also several actions that can be done using the S Pen such as Back, Menu, Screen capture, etc. For more information, refer to “Using the S Pen” on page 32.

The following terms describe the most common hardware and on-screen actions.

- **Press and hold**: Pressing relates to use of the hardware keys and buttons to select or activate an item. For example: press the Navigation key to scroll through a menu. Some buttons and keys require you to press and hold them to activate a feature, for example, you press the Lock key to lock and unlock the phone.

- **Tap**: Use a brief touch to select items on the display or to enter text on the virtual QWERTY keyboard. For example: tap an Application icon to open the application. A light touch works best.

- **Touch and hold**: Touch and hold an icon or key to open the available options, or to access a pop-up menu. For example: press and hold from the Home screen to access a menu of customization options.

- **Flick**: Move your finger in lighter, quicker strokes than swiping. This finger gesture is always used in a vertical motion, such as when flicking through contacts or a message list.

- **Swipe or slide**: Quickly drag your finger vertically or horizontally across the screen. This allows you to move the area of focus or to scroll through a list. For example: slide your finger left or right on the Home screen to scroll among the seven panels.
• **Drag:** Press and hold your finger with some pressure before you start to move it. Do not release your finger until you have reached the target position.

• **Rotate:** Automatically change the screen orientation from portrait to landscape by turning the device sideways. For example: rotate to landscape orientation when entering text, to provide a larger keyboard, or when viewing web content to minimize scrolling.

• **Pinch:** “Pinch” the screen using your thumb and forefinger to zoom out when viewing a picture or a Web page. (Move fingers inward to zoom out.)

• **Spread:** “Spread” the screen using your thumb and forefinger to zoom in when viewing a picture or a Web page. (Move fingers outward to zoom in.)

**Note:** These screens can be re-arranged in any desired order. For more information, refer to “Customizing the Screens” on page 61.
Motion Navigation and Activation: The device comes equipped with the ability to assign specific functions to certain device actions that are detected by both the accelerometer and gyroscope.

Note: Motion must be enabled for this feature to be active. For more information, refer to “Motion Settings” on page 290.

Using Gestures

By activating the various gesture features within the Motion menu (page 290), you can access a variety of time saving functions.

To activate motion:
1. Press and then tap Settings → Motion → Motion activation.
2. Activate the feature by tapping the Motion activation field.
3. Tap the desired on-screen motion option.

The following is a description some of the most commonly used gestures:

- Tilt to zoom: Once enabled, you must be on a screen where content can be zoomed. In a single motion, touch and hold two points on the display then tilt the device back and forth to zoom in or out.
  - Within the menu, tap Sensitivity to adjust the slider and tap OK to store the new setting.
• **Pan to edit**: Once enabled, allows you to move an on-screen icon from one screen to another by simply holding it down then moving the device left or right. You can also adjust the sensitivity of this detection.
  – Within the menu, tap **Sensitivity** to adjust the slider and tap **OK** to store the new setting.

• **Double tap**: Once enabled, double tap the top of the device to activate the Voice command functionality.

• **Turn over to mute**: Once enabled, turn over the device (screen down) to mute incoming calls and currently playing sounds.

---

**Menu Navigation**

You can tailor the device’s range of functions to fit your needs using both menus and applications. Menus, sub-menus, and features are accessed by scrolling through the available on-screen menus. Your device defaults with seven screens.

**Navigating Through the Application Menus**

There are four default Application Menu screens available. As you add more applications from the Play Store, more screens are created to house these new apps.

1. Press 🏛️ and then tap 📦 (Applications). The first Application Menu displays.
   • To close the Applications screen, tap 🏛️ or press 🏛️ (Home).

2. Sweep the screen to access the other menus.

3. Tap any of the on-screen icons to launch the associated application.
**Using Sub-Menus**

Sub-menus are available from within most screen and applications.

1. Press . A sub-menu displays at the bottom of the screen.
2. Tap an available on-screen option.

**Using Context Menus**

Context menus (also called pop-up menus) contain options that apply to a specific item on the screen. They function similarly to menu options that appear when you right click your mouse on your desktop computer.

- Touch and hold an item on-screen to open its context menu.
Accessing Recently-Used Applications

1. Press and hold to open the recently-used applications window.

Note: This recent applications screen also provides access to the Task manager.

2. A pop-up displays the six most recently used applications.

3. Tap an icon to open the recent application.

Customizing the Screens

You can customize the Home screens (panels) to display the Widgets, Shortcuts, Folders, or Wallpapers. For example, one screen could contain the Music Player shortcut and other forms of media, while another screen might contain communication apps such as Gmail.

You can customize your Home screen by doing the following:
- Adding, Deleting, and Rearranging screens
- Assigning a New Home screen
- Adding and Removing Primary Shortcuts
- Sharing Application Information
- Managing Shortcuts
- Adding and Removing Widgets
- Creating and Managing Folders
- Changing the Background (Wallpapers)
Adding and Deleting Screens

Your phone comes with seven screens. You can delete these screens and then add them back later.

**Note:** These screens can be deleted and re-arranged.

**Important!** Your phone can only contain at most seven screens and at least one screen.

To delete a screen:
1. Press ➔ and then tap Edit.
2. Touch and hold, then drag the undesired screen down to the Remove tab ( ).
3. Press  to return to the main Home screen.

To add a screen:
1. Press ➔ and then tap Edit.
2. Tap (Add screen). The newly added screen appears as the last page.
3. Press  to return to the main Home screen.

Rearranging the Screens
1. Press ➔ and then tap Edit.
2. Touch and hold a screen and then drag it into its new location. Upper-left is screen position #1 and bottom-right is screen last screen.

Assigning a New Home Screen
1. Press ➔ and then tap Edit.
2. Drag a desired screen and place it in the center position on the Edit screen.

**Note:** Any screen occupying the center position is now the new Home screen.
Adding and Removing Primary Shortcuts

The device comes with five Primary shortcuts: Phone, Contacts, S Memo, Messaging, and Applications/Home.

As long as the Application menu is displayed in a Customizable grid, you can replace these shortcuts with other applications so you access the shortcuts that are most frequently used.

1. Press home and then tap (Applications).
2. Press Applications and then tap View type → Customizable grid.
3. Press Home and then tap Edit. The application pages then appear at the top of the screen, the primary shortcuts appear at the bottom, and you have the option to also generate a new folder or page to house these application shortcuts.
4. Scroll through the application pages at the top and locate the desired application.
5. Touch and hold the on-screen icon, then drag it over one of the four primary shortcuts to replace it.

• The new primary shortcut displays at the bottom of the screen. The previous primary shortcuts switches places with your selected icon.
6. Press home and then tap Save.
7. Tap home to return to the Home screen.

Sharing Application Information

The device’s Applications menu now comes with a feature that allows you to share information about your selected applications with external users.

1. Press home and then tap (Applications).
2. Press Applications and then tap Share apps.
3. Place a check mark alongside those applications you wish to share information about and tap Done.

Note: Most shared applications consist of those that have previously been downloaded from the Play Store.

4. Select a sharing method. Choose from: Bluetooth, Email, Gmail, Google+, Messaging, S Memo, Social Hub, and Wi-Fi Direct.
5. The recipient will be notified about the receipt of the new information.
Managing Shortcuts

Note: To move a shortcut from one screen to another, you must carefully touch and hold the shortcut and slowly drag it to the edge of the screen. As the shortcut turns light blue, you can begin to move it to the adjacent screen. If this does not work, delete it from its current screen. Activate the new screen and then add the selected shortcut.

To add a shortcut from the Applications screen:
1. Press \( \text{Home} \) to go to the Home screen.
2. Select a screen location for your new shortcut by scrolling across your available screens until you reach the desired one.
3. Tap Applications (\( \text{Apps} \)) to reveal all your current available applications. By default, applications are displayed as an Alphabetical grid.
4. Scroll across the screens and locate your desired application.
5. Touch and hold the on-screen icon. The new shortcut then appears to hover over the current screen.
6. While still holding the on-screen icon, position it on the current screen. Once complete, release the screen to lock the shortcut into its new position.
To add a shortcut via the Add to Home screen:
1. Press  to go to the Home screen.
2. Navigate to a screen with an empty area.
3. Touch and hold an empty area of the screen.
4. From the Add to home window tap Shortcuts.
5. Scroll up or down the list and tap a selection.

To delete a shortcut:
1. Press  to go to the Home screen.
2. Touch and hold the desired shortcut. This unlocks it from its location on the current screen.
3. Drag the shortcut over the Remove tab (  ) and release it.

Adding and Removing Widgets

Widgets are self-contained applications that can be placed on any screen. Unlike shortcuts, widgets appear as applications.

To add a Widget:
1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the Add to home window tap Widgets.
The available widgets appear within a scrollable area across the bottom of the screen.
4. Scroll left or right across the bottom of the screen and then tap an available Widget to place it on your current screen.
To remove a Widget:
1. Touch and hold a Widget until it unlocks from the current screen.
2. Drag the widget over the Remove tab (Trash) and release it.
   • As you place the Widget into the Trash, both items turn red.
   • This action doesn’t delete the Widget, it just removes it from the current screen.

To place a widget onto a different screen:
1. Touch and hold the widget until it becomes transparent.
2. Slowly drag it past the edge of the screen until the adjacent page appears highlighted and it then snaps onto the new page.
3. Drag the widget to its desired position on the new screen.
4. Repeat these steps to continue moving it to other screens.

Installing the Bonus Apps Widget
Provides the procedures necessary to install the T-Mobile Bonus Apps Widget that allows you to discover those applications that are compatible specifically with your phone.
1. Press to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the Add to home window tap Widgets ➔ (Bonus Apps).
4. Read the Widget installation and tap OK.
5. Once installed, locate the Widget on your screen and tap Launch.
6. Follow the on-screen prompts.

Creating and Managing a Folder
Folders hold items that you want to organize and store together on the workspace.

To create a new on-screen folder:
1. Press to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the Add to home window tap Folders.
4. Tap an available folder type and place it on the current screen.
Renaming a folder
1. Tap the desired folder you want to rename. This opens its contents on an on-screen popup window.
2. With the folder open, touch and hold the grey Folder title bar (top of the Folder window) until the Rename folder pop-up displays.
3. Enter a new title for this folder and tap **OK**.

Deleting a folder
1. Touch and hold a desired folder. This unlocks it from its location on the current screen.
2. Drag the folder over the **Remove** tab ( ) and release it.

Managing Wallpapers
Wallpapers consist of either Gallery images (user taken), Live wallpapers (animated backgrounds), or Wallpaper gallery (default phone wallpapers).

Note: Selecting animated Live wallpapers will require additional battery power.

To change the current wallpaper:
1. Press  to go to the Home screen.
2. Touch and hold an empty area of the screen.
3. From the **Add to home** window tap **Wallpapers**.
4. Select a Wallpaper:
   - Tap **Gallery** to select from a user image stored in the camera image gallery, crop the image, and tap **Save**.
   - Tap **Live wallpapers** to select from a list of animated backgrounds, once done tap **Set wallpaper**.
   - Tap **Wallpaper gallery**, scroll through the images, tap a wallpaper image, then tap **Set wallpaper**.
Section 3: Memory Card

Your device lets you use a microSD™ (SD) or microSDHC™ card (also referred to as a memory card) to expand available memory space. This secure digital card enables you to exchange images, music, and data between SD-compatible devices. This section addresses the features and options of your device’s SD functionality. The device has a USB SD card mode.

- microSD card storage: up to 2GB in size (not included)
- SDHC card storage: up to 32GB in size

Using the SD Card

There are several methods for using the SD card:

1. Connecting to your PC to store files (such as music, videos, or other types of files and media).
2. To activate the camera, video, music player, and other dependant media or applications.

Important! Your device can support SDHC cards up to 32GB capacity.

SD card Overview

After mounting an SD card in the device you can use your computer to access and manage the SD card.

Important! If access to the external SD card is not available, download and install the USB drivers.

microSD Icon Indicators

The following icons show your microSD card connection status at a glance:

- the card is being prepared for use and for mounting.
- the card is safe to remove.
- the card has been improperly removed.
**Important! DO NOT** remove a microSD card while the device is accessing or transferring files. Doing so will result in loss or damage of data. Make sure your battery is fully charged before using the microSD card. Your data may become damaged or lost if the battery runs out while you are using the microSD card.

---

**Mounting the SD Card**

To store photos, music, videos, and other applications. You must mount (install) the SD card prior to use. Mounting the SD card establishes a USB connection with your computer.

**Important!** You must enable USB storage to mount the SD card.

1. Press ➔ and then tap **Settings** ➔ **Storage**.
2. Tap **Mount SD card**.

---

**Communicating with the SD card**

1. Insert the SD card into the external, SD card slot (For more information, refer to “Installing the microSD Memory Card” on page 12.)
2. Verify the card is properly mounted.

**Note:** Your device is configured to be used as a mass storage/media device by default. If it does not respond properly, you will need to verify the Debugging mode is not enabled.

3. Configure the device for USB mass storage mode connection by verifying Debugging mode is not enabled:
   - Press ➔ and then tap **Settings** ➔ **Developer options**.
   - Remove a check mark from the **USB debugging** field, if present.
4. Connect the USB cable to the phone and connect the cable to the computer.
5. Confirm the new mounted drive appears as a new drive on your computer. As soon as the connection is established a drive letter is assigned to the phone’s storage device.

6. To disconnect the new drive, simply remove the USB cable from your device.

**Unmounting the SD card**

Unmounting the SD card prevents corruption and damage to the SD card while removing it from the slot.

1. Press and then tap Settings ➔ Storage.
2. Tap Unmount SD card ➔ OK.
3. After the “SD card will be unmounted” message displays and the Mount SD card now appears in the menu list, remove the SD card. For more information, refer to “Removing the microSD Memory Card” on page 13.

**SD card Memory Status**

To view the memory allocation for your external SD card:

- Press and then tap Settings ➔ Storage. The available memory displays under the Total space and Available space headings.

**Erasing Files from the SD card**

To erase files from the SD card using the device:

1. Ensure the SD card is mounted. For more information, refer to “Unmounting the SD card” on page 70.
2. Press and then tap Settings ➔ Storage ➔ Mount SD card.
3. Tap Format SD card ➔ Format SD card ➔ Delete all to format the SD card. The SD card formats and erases all the data stored on it.

**Factory Data Reset**

From this menu you can reset your phone and sound settings to the factory default settings.

1. Press and then tap Settings ➔ Back up and reset.
2. Tap Factory data reset. This action erases all data from your device except current system software and bundled applications, or SD card files such as music or photos.

**Note:** This feature provides an option to format the internal USB storage, not the microSD card.
3. Tap **Format USB storage** to erase all data stored on the device’s internal storage area.

4. Tap **Reset device ➔ Delete all**.
Section 4: Call Functions and Contacts List

This section describes features and functionality associated with making or answering calls, and the Contacts list, which is used to store contact information.

Displaying Your Phone Number

- Press 🏷️ ➔ 📞 and then tap Settings ➔ About phone ➔ Status. Your phone number displays in the My phone number field.

Note: The device’s Settings menu can also be activated by pressing 🏷️ and then tapping 📅 (Applications) ➔ 🏷️ (Settings).

Making a Call

You can store phone numbers that are regularly used to the SIM card or to the device’s memory. These entries are referred to as the Contacts list.

1. Press 🏷️ and then tap 📞.
2. Enter the phone number and then tap 📞.

- If you make a mistake while dialing, tap 📸 to clear the last digit. Touch and hold 📸 to clear the entire sequence.

Note: When you activate the Auto redial option in the Call settings menu, the device automatically redials up to 10 times when the person does not answer the call or is already on the device, provided your call is not sent to voicemail.

Note: If your screen goes black during your interaction with the device (Launching Keypad, etc.), you might be accidentally swiping over the front sensors.
Quick Dialing a Number from the Contacts List

1. From the Home screen, tap (Contacts).
2. Locate a contact from the list.
3. In a single motion, touch and drag your finger over the number by going to the right. This action places a call to the recipient.

Running a Call in the Background

If you exit the current call screen and return to the Home screen, you are visually notified that you are still on an active call by the green phone icon within the Status bar.

This is the best way to stay on your current call and do something else (multi-task) such as access the Contacts list, view a recent email, locate a picture, etc..

Ending a Call

- Briefly tap key to end the call.

Note: To redial a recent number, tap at the end of the call or locate the number from the Logs list, tap the entry and tap Call.
Ending a Call from the Status Bar

1. From an active call, you can launch a separate application or return to the Home screen. The current call is kept active in the background.

2. Tap the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel (1).

3. Tap **End** to end the currently active call (2).

Making Emergency Calls

If you do not have a SIM card installed the first time you turn on the device, the **Insert SIM card to make calls** message displays and an animated tutorial shows you how to install the SIM card.

Without a SIM card, you can only make an emergency call with the phone; normal cell phone service is not available.

**Making an Emergency Call Without a SIM card installed**

1. Tap **Emergency call** from the on-screen display to make an emergency call.

2. Enter 9-1-1 and tap **.** Complete your call. During this type of call, you will have access to the Speaker mode, Keypad, and End Call features.

**Note:** Selecting Location consent may drain battery power. For more information, refer to **“Power Saving Mode”** on page 268.

3. Tap **End call** to exit this calling mode.
Making an Emergency Call With a SIM card installed

The Emergency calling mode makes redialing an emergency number a 1-tap process. Before you can resume normal calling operations, you should first exit this mode.

1. Swipe the Lock screen to unlock the device.
2. Press  and then tap .
3. Enter the emergency number (ex: 911) and then tap .
4. Complete your call. During this type of call, you will have access to the Speaker mode, Keypad, and End Call features.
   - After completing your emergency call,  appears in the Notification area until you exit the Emergency calling mode.

Note: This mode can drain your battery power more rapidly than a normal calling mode.

5. At the Emergency Callback screen:
   - Tap  to callback 911 with a single tap.
   - Touch and slide  to the left return to the Home screen. This allows access other applications while staying in this mode.

Dialing Options

When you enter numbers on the Keypad, you will see three on-screen options.

From the keypad screen, use one of the following options:

- Call ( ) to call the entered number.
- Voice Mail ( ) to access your Voice Mail service.
- Text Message ( ) to send the current number a new text message.
- Delete ( ) to delete digits from the current number.
To view additional dialing options:

- Tap  and select one of the following options:
  - Send message to send the current caller a text message while still maintaining the current call active.
  - Add to Contacts to add the current number to either a new or existing Contacts entry.
  - Speed dial setting to provide you access to the speed dial settings screen.
  - Add 3-sec pause to insert a two-second pause to enter a 3-second delay within a number string (the phone continues dialing after 3 seconds without any additional keys being pressed).
  - Add wait to insert a hard pause within the number string (the phone waits for your input). A wait requires that any consecutive numbers be manually sent by tapping Send.
  - Enable/Disable one-handed operation to enable or disable the resize and reposition the keypad/dialer for either left or right handed operation.
  - Call settings to provide you access to the Call settings screen.

Answering a Call

When somebody calls you, the phone rings and displays the incoming call image.

The caller’s phone number, picture, or name if stored in Contacts List, displays.

- At the incoming call screen:
  - Touch and slide  to the right to answer the call.
  - Touch and slide  to the left to reject the call.
  - Touch and drag the Reject call with message tab upward and tap a predefined rejection message or tap Create new message to create a new custom outgoing response.

Pressing the Volume down button mutes the ringer.

If the incoming call is from a number stored in your Contacts, the entry’s name is displayed. You may also see the caller’s phone number, if available.
Managing Reject Calls

This feature allows you to categorize both known and unknown callers as rejected contacts. These Contacts are then added to your Rejection list which can be managed for individual entries from within the Contacts list or as a whole from the Call rejection screen.

1. From the Home screen, press and then tap Settings ➔ Call ➔ Call rejection.
   – or –
   From the Home screen, tap and then tap Call settings ➔ Call rejection.

2. Tap Auto reject mode to configure your automatic rejection settings. Rejected calls are routed automatically to your voicemail. Choose from:
   - **Off**: disables the automatic rejection feature. You must then manually reject incoming phone calls.
   - **All numbers**: enables the features for all known and unknown numbers, including those contacts that are not assigned to the rejection list.
   - **Auto reject numbers**: automatically rejects all entries assigned to the Reject list/Blacklist.

Adding numbers to the rejection list

Entries can be added to the list via either the Contacts menu or via the Auto reject list menu. The Contacts menu option assigns all numbers for an individual as rejected. The Auto reject list allows to assign individual numbers.

To assign multiple numbers as rejected via Contacts:

1. From the Home screen, tap (Contacts).
2. Locate an entry and tap it to open the Contact Overview Screen (page 116).
3. Press \[\text{Contacts} \] and then tap **Add to reject list**. All phone numbers associated with this entry are then added to the reject list.

**To assign single number as rejected via Auto reject list:**
1. From the Home screen, press \[\text{Settings} \] and then tap **Call → Call rejection → Auto reject list**.
2. Tap \[\text{Add} \] and either enter the phone number or select a Contact from your Logs or Contacts list.
3. Tap **Save** to complete the assignment.

**Using Voice Talk**

This is a voice recognition application used to activate a wide variety of functions on your device. This is a natural language recognition application.

This goes beyond the Google Search Voice Actions feature that simply recognizes Google commands and search terms. You can ask it questions (Is it raining in Dallas?) or give it commands (Show my where to find cheap gas).

1. From the Home screen, tap \[\text{Applications} \] → \[\text{Voice talk} \].
2. Read the on-screen Samsung Disclaimer information and tap **Confirm** to continue.
3. Read the on-screen Vlingo Terms of Service information and tap **Agree** to continue.
4. Read the on-screen overview information and tap **Next** to continue.
5. Navigate through the following on-screen tutorial screens by reading the information and tapping **Next**, or tap **Skip** to continue without reading the information.
6. Read the information on the **What can I say?** screen, then tap **Done**.
7. When the Voice talk windows displays you can either tap an on-screen icon and follow the prompts.  
   – or –
   Say “Hi Galaxy” to wake-up the device and start listening for actions/commands.
   – or –
   Tap **Tap & Speak** to say what you would like to do. Some commands include:
   - “Call John Doe”
   - “Call John Doe mobile,...”
   - “Text Katie Message Hey”
Voice Talk Settings

1. From the Home screen, tap (Applications) ➔ (Voice talk).
2. Press and then tap one of the following options:
   - Set wake-up command designates your Voice Talk wake-up commands. Tap Change and follow the on-screen prompts to create a new verbal command.
   - Driving mode on/off when enabled, activates a verbal readout of all on-screen activity, actions, notifications, etc..
   - Settings provides access to the Voice Talk settings.

Using Voice Talk

1. Tap (Speak) if the device does not hear you or to give it a command.

   Example:
   - I want to go online.
   - Tap and say “Surf the Web”. This launches an Internet browser.

   Example 2:
   - I want to find the nearest Starbucks.
   - Tap and say “Give me directions to Starbucks”. This launches the Navigation app and indicates where these are in relation to your current position.

International Calls

1. From the Home screen, tap and then touch and hold 0 + until the device shows “+” on-screen.
2. Use the on-screen keypad to enter the country code, area code, and phone number.
3. If you make a mistake, tap once to delete a single digit.
4. Touch and hold to delete all digits.
5. Tap .
Pause Dialing

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or financial phone numbers.

- **3 Second Pause** automatically sends the next set of numbers after a three-second pause. This is indicated in the number string as a comma (,).
- **Wait** sends the next set of numbers only after tapping Yes. This is indicated in the number string as a semicolon (;).

1. From the Home screen, tap and use the on-screen keypad to enter the phone number.
2. Press and then tap Add 3-sec pause. This feature adds an automatic two-second pause.
3. Use the keypad to enter the additional numbers that will be dialed automatically after the second pause.
4. Tap.

---

Tip: You can create pauses longer than three seconds by entering multiple 3-sec pauses.

---

Wait Dialing

Inserting a Wait into your dialing sequence means that the phone waits until it hears a dial tone before proceeding with the next sequence of numbers.

1. From the Home screen, tap and use the on-screen keypad to enter the phone number.
2. Press and then tap Add wait. This feature causes the phone to require your acceptance before sending the next set of entered digits.
3. Tap.
4. Once prompted to Send the following tones?, tap Yes to dial the remaining digits.

---

Redialing the Last Number

The device stores the numbers of the calls you’ve dialed, received, or missed if the caller is identified.

To recall any of these numbers:

1. From the Home screen, tap .
2. Tap the Call log tab to display the list of recent calls.
3. Tap the name/number and tap .
Speed Dialing

Once you have stored phone numbers from your Contacts List, you can set up to 8 speed dial entries and then dial them easily whenever you want, simply by touching the associated numeric key.

**Note:** Speed dial location #1 must be reserved for Voicemail use.

### Setting Up Speed Dial Entries

**Important!** Speed dial location #1 is reserved for Voicemail. No other number can be assigned to this slot.

1. From the Home screen, tap 📞.
2. Press 📞 and then tap Speed dial setting. The Speed dial setting screen displays a virtual keypad with the numbers 2 through 9.
3. Tap an unassigned number. The Contacts screen displays.
4. Tap a contact and select a number to assign it to the speed dial location. The selected contact number/image is displayed in the speed dial number box.

### Changing a Speed Dial Entry Order

1. From the Home screen, tap 📞.
2. Press 📞 and then tap Speed dial setting.

**Important!** The number 1 is reserved for Voicemail and another number cannot be assigned to this slot.

3. Press 📞 and then tap Change order.
4. In a single motion, touch and drag an entry over another location on the virtual keypad.
5. Tap Save to store the new assignment.
6. Press 🔄 to return to the previous screen.

### Removing a Speed Dial Entry

1. From the Home screen, tap 📞.
2. Press 📞 and then tap Speed dial setting.
3. Touch and hold a existing on-screen speed dial location and select Delete from the context menu.
   – or –
   Press 📞 and then tap Delete. Tap an entry and select Save.
4. Press 🔄 to return to the previous screen.
**Making a Call Using Speed Dial**

You can assign a short cut number to a phone number in the Contacts List for speed dialing.

1. From the Home screen, tap ☎️.
2. Touch and hold a speed dial location (numbers 2-9, or 1 if you are dialing voice mail) until the number begins to dial.
3. If you are not certain of the speed dial location, tap ➔ ➔ Speed dial setting and tap a speed dial number to view the assigned phone number.

**Wi-Fi Calling**

Wi-Fi Calling is a free feature for T-Mobile customers using this device with the new ISIM card. Wi-Fi Calling is an excellent solution for coverage issues in and around the home or wherever cellular coverage is limited. Minutes used while connected to the Wi-Fi network count against available rate plan minutes.

The benefits of Wi-Fi Calling include the following:
- Wi-Fi Calling provides a coverage option to improve upon your current in-home coverage experience
- Wi-Fi Calling works anywhere there is a Wi-Fi signal available

---

**Important!** A new ISIM card must be installed within the device prior to using this feature. Wi-Fi must first be active and communicating prior to launching Wi-Fi Calling.

**Note:** This feature is active by default. If you are in an active Wi-Fi call and go out of range of your Wi-Fi, the call will be dropped.

**Activating Wi-Fi**

1. Press 🏡 ➔ and then tap Settings.
2. Locate the Wi-Fi field and in a single motion touch and slide OFF to the right to turn it on ON. The slider color indicates the activation status.
3. Select a Wi-Fi network from the list of available networks. Follow the on-screen instructions to complete connection.

Wi-Fi Connected
Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).

Wi-Fi Communication Issue
Displays when Wi-Fi is active and there is an available open wireless network.

---

**Note:** To avoid international data roaming fees when using Wi-Fi calling when outside the United States, the Data Roaming feature on your device must be turned off.

**Note:** With certain rate plans, minutes used while connected to the Wi-Fi network count against available rate plan minutes.

---

**Activating Wi-Fi Calling**

1. Ensure that the **Wi-Fi connected** icon displays on the status bar.
   - If prompted with an on-screen “Did you know your phone can make calls over Wi-Fi” popup, tap **Learn** and follow the remaining on-screen instructions. Tap **Next** and tap **Done**.

2. Press **Home** and then tap **Settings** ➔ **More...** ➔ **Wi-Fi Calling**. The feature is active when there is a green check mark in the field.

3. If (Missing 911 Address) displays in the Status Bar, follow these steps to provide 911 an address for emergency situations:
   - Log into [my.t-mobile.com](http://my.t-mobile.com).
   - Click on **Your Profile** and edit the **Customer Information**.
   - Enter your emergency location information and complete the online registration.

4. Press **Home** and then tap **Settings** ➔ **More...** ➔ **Wi-Fi Calling Settings**.
5. Tap **Connection Preferences** and select a preference for use of the Wi-Fi Calling feature:
   - **Wi-Fi Preferred**: Wi-Fi network is preferred over cellular network when making calls. Calling requires you to stay in the Wi-Fi range.
   - **Wi-Fi Only**: Wi-Fi network is required for making calls. Calling requires you to stay in the Wi-Fi range.
   - **Cellular Preferred**: The cellular network is preferred over a Wi-Fi network when making calls.

6. Tap **OK** to save the setting.

7. Press ➔ and then tap **Settings ➔ More**...

8. Tap **Wi-Fi Calling** to toggle off the feature, then tap it again to reactivate the feature and re-register your device with the T-Mobile Network.

9. Confirm (Wi-Fi Calling Ready) displays in the Status Bar.

---

**Launching Wi-Fi Calling**

**Note:** Verify you are currently connected to a Wireless Access Point.

1. Ensure that the **Wi-Fi connected** icon displays on the status bar.

2. Confirm (Wi-Fi Calling Ready) displays in the Status Bar.

<table>
<thead>
<tr>

<td>There is an error in the use or 911 registration of the Wi-Fi Calling feature.</td>
<td></td>
</tr>
</tbody>
</table>
3. Use the phone Dialer, Call log, or Contacts list to make a call.
4. Go to the dialer and make a call. Make sure (Wi-Fi Calling in use) appears during the call.

**In Call Options**

Your phone provides a number of features that are available for use during a call.

**Adjusting the Call Volume**

During a call, use the Volume keys on the left side of the phone, to adjust the earpiece volume.

- Press the Up volume key to increase the volume level and the Down volume key to decrease the level.
- or –

During a call, press the Up Volume key on the side of the device.

From the Home screen, you can also adjust the ring volume using these keys.

**Placing a Call on Hold**

You can place the current call on hold whenever you want. If your network supports this service, you can also make another call while a call is in progress.

**To place a call on hold:**

1. Tap Hold to place the current call on hold.
2. Tap Unhold to activate the call that is on hold.

**To make a new call while a call is in progress:**

1. Enter the new phone number that you wish to dial or look it up in Call history.
2. Tap Add call to dial the second call.
3. Dial the new phone number and tap 📞.

To switch between the two calls:

- Tap Swap.
  The previous In call number turns gray and displays On hold.
  The new active call displays a green background behind the number.

**Turning the Speakerphone on and off**

While on a call, you can use your Speakerphone by following these steps:

1. Tap Speaker (Speaker off) to toggle the speakerphone on.

2. Tap Speaker (Speaker on) to toggle the speakerphone off.

**Tip:** When the speaker is turned On, the color of the speaker is green. When the speaker is turned Off, the color of the speaker is gray.

---

**Muting a Call**

1. Tap Mute (Mute off) to turn mute on so the other caller cannot hear you speaking.

2. Tap Mute (Mute on) to turn mute off and resume your conversation.

**Switching to Bluetooth Headset**

1. Pair the target Bluetooth headset prior to your call.

2. While on a call, switch to the Bluetooth headset instead of speaker by tapping Headset.

3. At the prompt, tap Turn on to enable Bluetooth if it is not already activated.

**More In-call Options**

During a call you can save the current caller’s information to the Contacts list, or create a Memo.

**Viewing the Contacts List**

During a call you can look up a number in the Contacts list.

1. Press 📞 and then tap Contacts.

2. Browse the Contacts list for the information you need.

3. Press ⬅️ to return to the active call.
Creating a Memo During a Call
During a call it may be necessary to record information (a Note).

1. Press \[\text{메모}\] and then tap Memo.
2. Use the keyboard to enter the note then tap Save.
   - If desired, press \[\text{색상}\] and select a new memo background color before saving.

Adjusting Noise Reduction
During a call it may be necessary to adjust the noise reduction feature. Activating this feature can improve the quality of your conversation by reducing ambient noise.

1. Press \[\text{음량}\] and then tap Noise reduction off to toggle the status and activate the feature.
2. Press \[\text{음량}\] and then tap Noise reduction on to toggle the status and deactivate the feature.

Multi-Party calls
Making a Multi-Party Call
A multi-party call is a network service that allows multiple people to participate in a multi-party or conference call.

For further details about subscribing to this service, contact T-Mobile customer service.

Setting up a Multi-Party Call

1. From the Home screen, tap \[\text{기분}\].
2. Dial the number for the first participant and tap \[\text{통화} \]
3. Tap \[\text{기분}\] (Add call), enter the second phone number and tap \[\text{통화} \]. The first caller is placed on hold.
4. Wait for the second caller to answer the incoming call and tap \[\text{기분}\] (Merge). The two calls are now joined into a multi-party call and display in the order in which they were called.
Important! A maximum of two callers can be joined to a single multi-party line. Additional callers participate in a new Multiparty session and are held in conjunction with the previous multiparty call. You can swap or place each multi-party call on hold.

**Having a Private Conversation With One Participant**

When you have several participants in a multi-party session, it might be necessary to place one of those participants on hold so that a private conversation can be held with a single caller. While you are in a multi-party call:

1. Press \[
\text{Split Caller}
\] and then tap Manage conference call.

2. Tap \[
\text{Split Caller}
\] adjacent to the participants you would like to split from the current multi-line call. The list displays the callers in the order they were dialed.

3. Tap the participant to which you want to speak privately.

   You can now talk privately to that person while the other participants can continue to converse with each other. If there is only one other participant, that person is placed on hold.

4. To return to the multi-party call, tap the Merge icon. All of the multi-party call participants can now hear each other.

**Dropping One Participant**

1. Press \[
\text{End Call}
\] and then tap Manage conference call.

2. Tap \[
\text{End}
\] to the right of the number to drop.

   The participant is disconnected and you can continue the call with the other participant.

3. Tap \[
\text{End Call}
\] to end your conversation with the remaining caller.
Call Waiting

You can answer an incoming call while you have a call in progress, if this service is supported by the network and you have previously set the Call waiting option to Activate.

You are notified of an incoming call by a call waiting tone. For more information, refer to “Configuring Additional Voice Call Settings” on page 262.

To answer a new call while you have a call in progress:

1. In a single motion, touch \( \text{ } \) and slide it to the right to answer the new incoming call.

2. Tap an option from the on-screen menu:
   - Putting xxx on hold to place the initial caller on hold while you answer the new incoming call.
   - Ending call with xxx to end the initial call and answer the new call.

Note: The new caller appears at the top of the list. The previous caller is placed on hold and appears at the bottom of the list.

3. Tap \( \text{Swap} \) (Swap) to switch between the two calls.

   This places the new caller on hold and activates the previous call.

**Important!** The currently active call is displayed as a large on-screen Contact image.

4. Tap \( \text{Swap} \) again to switch back.

Call Log Tab

The Call log tab is a list of the phone numbers (or Contacts entries) for calls you placed, accepted, or missed. The Call log tab makes redialing a number fast and easy. It is continually updated as your device automatically adds new numbers to the beginning of the list and removes the oldest entries from the bottom of the list.

The Notification area of the Home screen (upper-left) displays phone notifications, status, or alerts such as:

- Displays when a call is in progress.
- Displays when a call was missed.
Accessing the Call log Tab

1. From the Home screen, tap ➔ (Call log tab).
2. Tap an entry to view available options.

Note: The Call log tab only records calls that occur while the phone is turned on. If a call is received while it is turned off, it will not be included in your calling history.

Each entry contains the phone number (if it is available) and Contacts entry name (if the number is in your Contacts).

- Indicates all outgoing calls made from your device.
- Indicates any received calls that were answered.
- Indicates any received calls that were rejected.
- Indicates a missed call.

Accessing Call log from The Notifications Area

1. Locate ☞ from the Notifications area of the Status bar.
2. Tap the Status bar to reveal the Notifications tab, and then drag the tab to the bottom of the screen to open the Notifications panel (1).
3. Tap the Missed call entry to open the Call log screen (2).

Tip: From the Home screen, press ⌘ and tap Notifications to open the panel.
Call logs - Caller Overview

- Tap a contact entry name or number to reveal the Call options screen:
  - Create contact to save the number if it is not already in your Contacts.
  - Update existing to access the Contacts details and update the information.
  - View contact to view the Contacts details.
  - Call allows you to redial the entry by name or number.
  - Send message allows you to create a new text message to the selected entry.
  - Time provides the time and date of the call and its duration.
  - Edit number before call press to edit the selected number before you place your next outbound call.
  - Delete press to delete the Contacts entry.
  - Send contact information press to send the current Contacts entry information to an external recipient.
  - Add to reject list press to add the current phone number to an automatic rejection list. Similar to a block list, the selected caller will be blocked from making an incoming calls to your phone.
• Touch and hold an entry to display the entry-specific context menu:
  • **Call [Number]** to redial the current phone number.
  • **Send message** allows you to create a new text message to the selected entry.
  • **Edit number before call** to make alterations to the current phone number prior to redial.
  • **Delete** to delete the entry from the Logs list.
  • **Send contact information** to send the current Contacts entry information to an external recipient.
  • **Add to Contacts** to save the number if it is not already in your Contacts.
  • **View contact** to view the information for the currently stored Contacts entry.
  • **Add to reject list** to add the current phone number to an automatic rejection list. Similar to a block list, the selected caller will be blocked from making an incoming calls to your phone.

### Altering Numbers from the Call Log List

If you need to make a call from the Call Log screen and you need to alter the number prior to dialing, you can add the appropriate prefix by prepending the number.

1. From the Home screen, tap 📞 → Call log.
2. Touch and hold an entry to access the entry-specific context menu.
3. Tap **Edit number before call**.
4. Edit the number using the on-screen keypad or delete digits by pressing ✗ to erase the numbers.
5. Tap ✅ once the number has been changed.

### Erasing the Call Log List

You can delete either an individual call log entry or all current entries from the Call log list.

**To clear a single entry from the list:**

1. From the Home screen, tap 📞 → Call log.
2. Touch and hold an entry and select **Delete → OK**.

**To clear all entries from the list:**

1. From the Home screen, tap 📞 → Call log.
2. Press 📞 and then tap **Delete**.
3. Tap **Select all ✅ (Delete) → OK**.
**Viewing Missed Calls from Lock Screen**

When you are unable to answer a call for any reason and your screen is locked, the number of missed calls are displayed on the Lock screen immediately after a call is missed.

1. Press (Power) to reactivate the screen.
2. Touch and drag the button (with the number of missed calls on it) anywhere on the screen. The Call log tab is then displayed.
Section 5: Entering Text

This section describes how to select the desired text input method when entering characters into your phone. This section also describes the predictive text entry system that reduces the amount of key strokes associated with entering text.

Your phone comes equipped with an orientation detector that can tell if the device is being held in an upright (Portrait) or sideways (Landscape) orientation. This is useful when entering text.

Your device also provides several on-screen keyboard text entry options to make the task of text entry that much easier.

Text Input Methods

There are three text input methods available:

- **Google voice typing**: provides a voice to text interface.
- **Samsung keyboard**: an on-screen QWERTY keyboard that can be used in both portrait and landscape orientation.
- **Swype (default)**: a new way to enter text on touch screens. Instead of tapping each key, use your finger to trace over each letter of a word.

The on-screen QWERTY keyboard works the same in both portrait and landscape mode.

Selecting the Text Input Method

The Text Input Method can be assigned from within one of two locations:

**Settings Menu:**

- Press 🏛️ and then tap **Settings → Language and input → Default** and select an input method.

**Text Input field:**

1. From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen to reveal the Notifications panel.
2. Tap 📲 (Select input method) and select an available input method.
Entering Text Using Swype

Swype™ is the default text input method that allows you to enter a word by sliding your finger or stylus from letter to letter, lifting your finger between words. Swype uses error correcting algorithms and a language model to predict the next word. Swype also includes a touch predictive text system.

The on-screen keyboard options are different between the Android keyboard and Swype on-screen input methods.

Enabling and Configuring SWYPE

If you configure another text input method (Samsung keypad) you must re-enable Swype before using the Swype keyboard.

When Swype is enabled there can also be normal keyboard functionality.

1. Press and then tap Settings → Language and input.
2. Tap Default → Swype.

SWYPE Settings

To configure Swype settings:

1. Press and then tap Settings → Language and input (adjacent to the Swype field).
2. Tap Select Input Method to switch between keyboard types. Choose from either Samsung keypad or Swype.
3. Tap How to Swype to view an on-screen manual for Swype.
4. Tap Personal dictionary to access and manage your personal dictionary.
5. Tap Preferences to alter these settings:
   - Audio feedback: turns on sounds generated by the Swype application.
   - Vibrate on keypress: activates a vibration sensation as you enter text using the keypad.
   - Show tips: turns on a flashing indicator for quick help.
   - Auto-spacing: automatically inserts a space between words.

When you finish a word, just lift your finger or stylus and start the next word.
• **Auto-capitalization**: automatically capitalizes the first letter of a sentence.

• **Show complete trace**: once enabled, sets whether or not to display the complete Swype path.

• **Word suggestion**: suggests words as you are typing.

• **Speed vs. accuracy**: sets how quickly Swype responds to on-screen input. Move the slider between **Fast Response** (speed) or **Error Tolerant** (accuracy) and tap **OK**.

• **Reset Swype’s dictionary**: once enabled, deletes any words you have added to Swype’s dictionary.

• **Version**: displays the software version information.

6. Tap **Language Options** to activate and select the current text input language. Default language is US English.

---

**Swype Text Entry Tips**

You can access the SwypeTips application and watch a video or tutorial on using Swype. You can also use the following Swype text entry tips.

• Create a squiggle (like an S shape) to create a double letter (such as **pp** in apple).

• Touch and hold a key to view the punctuation menu then make a selection.

• Move your finger or stylus over the apostrophe to enter contractions.

• Double-touch on the word you want to change to correct a misspelled word, then touch the delete key to erase one character. Touch and hold the delete key to erase an entire word.
Selecting a Text Input Mode in Swype

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.

2. With Swype as your text entry method, select one of the following text mode options:
   - **123 ABC** to use Swype with alphanumeric characters from the on-screen keyboard.
   - **SYM** (Symbol) to enter numbers and symbols from the on-screen keyboard.

Note: After typing an initial uppercase character, the key changes to and all letters that follow are in lower case.

Swype Keyboard Overview

- **Recipients**: a field where you can enter the recipients of the current message. You can choose from Contacts, Call log, Groups, or Favorites.
- **Text Input field**: a field where text, number, or other characters can be entered.
- **CAPS/ALT key**: When in 123ABC mode, this key changes the capitalization of the subsequent entered characters. When in SYM mode, this key can show additional symbol characters.
- **SWYPE settings**: Touch and hold this button to access the Swype settings screen.
- **Text Input mode**: There are two available modes: 123ABC and SYM.
  - 123ABC mode contains alphanumeric characters and a few common punctuation marks. Text mode button indicates SYM.
  - SYM mode contains only symbols and numbers. Text mode button indicates 123ABC.
- **Voice actions**: Allows you to convert spoken words into text.
Using 123ABC Mode in SWYPE

In 123ABC mode, you can enter only letters and a few common punctuation marks from the on-screen keyboard. The text mode key shows 123 and +!$.

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.
2. Tap 123ABC to configure the keyboard for 123ABC mode (showing letters and numbers on the on-screen keys). Once in this mode, the text input type shows 123ABC.

Note: After typing an initial uppercase character, the key changes to CAPS/ALT and all letters that follow are in lower case.

3. Swipe your finger continuously over the letters to form a word.
   - If you make a mistake, tap to erase a single character. Touch and hold to erase an entire word.
4. Tap Send to send the message.

Entering Text
All lowercase
Displays when the next character is entered in lowercase. Pressing this while in 123SYM mode, reveals additional numeric-symbols keys.

Initial Uppercase
Displays when the first character of each word is entered as uppercase but all subsequent characters are lowercase.

All Uppercase
Displays when all characters will be entered as uppercase characters.

By default, the first letter of an entry is capitalized and the following letters are lower case. After a word is entered and you lift your finger, the cursor automatically adds a space after the word.

Note: If multiple word choices exist for your Swype entry, an on-screen popup appears to provide additional word choices.

Entering Numbers and Symbols in SWYPE

By using the on-screen keyboard in portrait mode, some symbols are not available (such as Emoticons or Smileys). In SYM mode using Swype, you can only enter symbols and numbers from the on-screen keyboard. Once in SYM mode, the text mode key shows .

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.
2. Tap ¬ to configure the keyboard for SYM mode. Once in this mode, the text input type shows .
3. Tap the on-screen key for the number or symbol you want to enter.
4. Touch and hold an on-screen key to enter the secondary symbol (above the main one on the same key).
5. Tap ↑ to choose from additional symbols.

For example:
- To enter &: tap ¬ and select the & key.
- To enter ~: tap ¬ and then touch and hold the + key.
Using the Samsung Keyboard

This QWERTY keyboard can be used to enter text in either a Portrait or landscape orientation. The only difference between the two orientations are the sizes of the keys. From a screen where you enter text, rotate your device counterclockwise to a landscape orientation. The on-screen QWERTY keyboard displays.

The Samsung Keyboard

This device has a built-in, QWERTY keyboard. Using the QWERTY keyboard, you can type letter, numbers, punctuation, and other characters.

To use the Samsung keyboard you must first configure the settings to default to the Samsung keyboard.

1. Press \ and then tap Settings ➔ Language and input ➔ Default ➔ Samsung keyboard.
   – or –
   From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select (Select input method) ➔ Samsung keyboard.

2. The virtual keyboard is then assigned to the Samsung keyboard configuration for all subsequent text input.
Changing the Text Input Mode in Keyboard

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.

2. With Samsung keyboard as your text entry method, select one of the following text mode options:
   - **Abc ABC**: to use alphabetic characters from the on-screen keyboard. In this mode, the text mode button displays `?#+`.
   - **Symbol/Numeric ?#+**: to enter numbers by pressing the numbers selecting them on the on-screen keyboard. In this mode, the text mode button displays `ABC`. There are up to 3 available pages of numeric symbols available by tapping `1/3`.

**Note:** After typing an initial uppercase character, tap `↑` to toggle capitalization.

- **All lowercase**
  Displays when the next character is entered in lowercase.

- **Initial Uppercase**
  Displays when the first character of each word is entered as uppercase but all subsequent characters are lowercase.

- **All Uppercase**
  Displays when all characters will be entered as uppercase characters.
By default, the first letter of a new entry is capitalized and the following letters are lowercased. After a character is entered, the cursor automatically advances to the next space.

**Using ABC Mode in Samsung Keyboard**

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard.
2. Tap ABC to configure the keyboard for ABC mode. Once in this mode, the text input type shows ?#+. 

   **Note:** After typing an initial uppercase character, the key changes to and all letters that follow are in lowercase.

3. Enter your text using the on-screen keyboard.
   - If you make a mistake, tap to erase a single character.
   - Touch and hold to erase an entire word.
4. Tap Send to send the message.

**Using Symbol/Numeric Mode**

Use the Symbol/Numeric Mode to add numbers, symbols, or emoticons. While in this mode, the text mode key displays ABC.

1. From a screen where you can enter text, tap the text input field to reveal the on-screen keyboard. Rotate the device counterclockwise to a landscape orientation, if desired.
2. Tap ?#+ to configure the keyboard for Symbol mode. Once in this mode, the text input type shows ABC.
3. Tap a number, symbol, or emoticon character.
4. Tap ABC to return to ABC mode.

**To enter symbols:**

1. Tap ?#+ to configure the keyboard for Symbol mode.
2. Tap the appropriate symbol key.
   - or –
   Tap 1/3 button to cycle through additional pages.
The first number on this key indicates which page (1, 2, or 3) of additional characters is active.

**Using the Handwriting Mode**

The device also provides you with the ability to use your S Pen to hand write on the screen and have it converted into text just as easily as the voice to text feature.

- Tap to enable the Handwriting to Text mode
- Tap to enable the Keyboard mode

1. From within the keyboard mode, tap to enable the Handwriting mode.
2. Remove your S Pen from its location at the bottom of the device.
3. Touch the screen within the handwriting area and begin to write either single letters or entire words.
4. Stop after each word and allow at least 1 second for the device to both recognize the characters and know you are done writing.
5. Press the spacebar to add a space and proceed writing your next set of characters.
6. Tap to return to the keyboard mode.
Using XT9 Predictive Text

XT9 is a predictive text system that has next-letter prediction and regional error correction.

Note: XT9 is only available when ABC mode is selected. XT9 advanced settings are available only if the XT9 field has been selected.

1. Press ➔ and then tap Settings → Language and input → (adjacent to the Samsung keyboard field).
   – or –
   From within an active text entry screen, tap from the bottom of the screen to reveal the Samsung keyboard settings screen.

2. Set any of the following options:
   - **Portrait keyboard types** allows you to choose a keypad configuration (Qwerty Keyboard [default] or 3x4 Keyboard).
   - **Input language** sets the input language. Tap a language from the available list. The keyboard is updated to the selected language.
   - **Pen detection** enables the handwriting pad whenever the S Pen is detected on the screen.
   - **One-handed operation** sets the on-screen keyboard to reposition and resize for use by either a single left or right hand operation.
   - **XT9** enables predictive text entry mode. This must be enabled to gain access to the advanced settings.
   - **XT9 advanced settings** configuration of more advanced XT9 features. For more information, refer to “Using XT9 Predictive Text” on page 105.
   - **Keyboard sweeping** allows changing between the input modes without having to use the Input Mode key. You can "sweep" the displayed keyboard aside, in a similar manner to scrolling through the Home screens.
   - **Auto-capitalization** automatically capitalizes the first letter of the first word in each sentence (standard English style).
   - **Voice input** activates the Voice input feature. This is an experimental feature that uses Google’s networked speech recognition application.
   - **Auto-full stop** automatically inserts a full stop by tapping the space bar twice.
• **Character preview** provides an automatic preview of the current character selection within the text string. This is helpful when multiple characters are available within one key.

• **Handwriting settings** allows you to modify available handwriting settings.

• **Tutorial** launches a brief on-screen tutorial covering the main concepts related to the Samsung keyboard.

• **Reset all settings** allows you to reset all keyboard settings (including those applicable to handwriting).

### Using XT9 Predictive Text

XT9 is a predictive text system that has next-letter prediction and regional error correction, which compensates for users pressing the wrong keys on QWERTY keyboards.

1. Press 

   ➔
   and then tap **Settings ➔ Language and input ➔** (adjacent to the Samsung keyboard field).
   – or –

   From within an active text entry screen, tap 

   ➔ from the bottom of the screen to reveal the **Samsung keyboard settings** screen.

2. Tap the **XT9** field. A checkmark indicates activation.

3. Tap the **XT9 advanced settings** and configure any of the following advanced options:

   • **Word completion** tells your device to attempt to predict how to complete the word you have started. (A green check mark indicates the feature is enabled.)

   • **Word completion point** sets how many letters should be entered before a word prediction is made. Choose from 2 letters, 3 letters, 4 letters, or 5 letters.

   • **Spell correction** enables the automatic correction of typographical errors by selecting from a list of possible words that reflect both the characters of the keys you touched, and those of nearby characters. (A green check mark indicates the feature is enabled.)

   • **Next word prediction** predicts the next word you are like to enter. (A green check mark indicates the feature is enabled.)

   • **Auto-substitution** allows the device to automatically replace misspelled or miskeyed words. This option reduce “typos.” (A green check mark indicates the feature is enabled.)

   • **Regional correction** automatically tries to correct errors caused when you tap keys adjacent to the correct keys. (A green check mark indicates the feature is enabled.)
• **Recapture** sets the device to redisplay the word suggestion list after selecting the wrong word from the list.

• **XT9 my words** allows you to add new words to the built-in XT9 dictionary.
  — Tap **Add word**.
  — Use the **Edit XT9 my words** field to enter the new word.
  — Tap **Add** to store the new word.

• **XT9 auto-substitution** allows you to create a word rule by adding words for automatic substitution during text entry (for example you’ve becomes you’ve).
  — Tap the XT9 auto-substitution field. Flick up or down to review the current list of word substitutions.
  — Press 📞 and tap **Add**.
  — Enter the original word that will be replaced in the **Shortcut** field (for example, you’ve).
  — Enter the substitute word that will be used in the **Substitution** field (for example, you’ve).
  — Tap **Add** to save the substitution rule.

4. Press 🔄 to return to the previous screen.

---

**Using the Google Voice Typing**

This feature uses Google voice recognition to convert your spoken words into on-screen text.

From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select 📞 (Select input method) → Google voice typing.

**Configure Google Voice Typing**

1. Press 🏛 → 🌐 and then tap **Settings → Language and input**.
2. Tap 🌐 (adjacent to the **Google voice typing** field).
3. Select a language by tapping **Select input languages** area.
4. Remove the check mark from the **Automatic** field. This allows you to select additional languages.
5. Select the desired languages.
6. Activate **Block offensive words** to block recognition of known offensive words or language. (A green check mark indicates the feature is active).
Using Google Voice Typing

1. From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select (Select input method) → Google voice typing. The virtual keyboard is then removed and all subsequent input to done via the microphone as text to speech.

2. Speak into the device’s microphone and watch your text being entered on-screen.

3. If the text is incorrect, tap DELETE.

4. Once you have completed entering your message, tap Done.
Section 6: Contacts

This section explains how to use and manage your Contacts List. You can save phone numbers to your device’s memory.

Accounts

From the Accounts menu you decide if you want applications to synchronize, send, and receive data at any given time, or if you want the applications to synchronize automatically. After determining how you want the accounts to synchronize, indicate which account to synchronize with your Contacts list.

1. Sign in to your Google account.
2. Press \( \rightarrow \) and then tap Settings \( \rightarrow \) Accounts and sync.
   – or –
   From the Home screen, tap \( \rightarrow \) (Applications) \( \rightarrow \) (Settings) \( \rightarrow \) Accounts and sync.
3. If not already active, in a single motion touch and slide to the right to turn it on.
   The slider color indicates the activation status.
4. Synchronize all accounts by tapping Sync all.
   – or –
   Tap \( \mathbb{C} \) next to the account you want to synchronize.
5. Tap Add account to create a new account.
6. Tap an account type to add.
7. Follow the on-screen instructions. The selected account type synchronizes with your Contacts list.
Contacts List

Creating a Contact

The default storage location for saving phone numbers to your Contacts List is your phone’s built-in memory.

If existing Google and Corporate email accounts have been synchronized to your phone, these will be made available to your device during the creation of new entries. These new Contacts entries can be assigned or saved to synced accounts such as Phone, SIM, Google, or Corporate.

Your device automatically sorts the Contacts entries alphabetically. You can create either a MobileLife Contacts, Google, SIM, Microsoft Exchange ActiveSync, or Phone contact.

Note: Before you can save a contact to the Phone, Contact settings must be set to Save new contacts to Phone.

Important! The Google and Microsoft Exchange ActiveSync account types are only visible after creating an email account of those types on your phone.

• MobileLife Contacts contacts are stored remotely on the MobileLife servers and can later be retrieved even if your phone has been damaged or reset.

• Google contacts are shared with your existing Google account and can also be imported to your phone after you have created a Google Mail account.

• SIM contacts are stored within the SIM Card.

Note: SIM contacts only store the Name and Phone number for an entry.

• Microsoft Exchange ActiveSync (also known as Work or Outlook) contacts are those contacts that are intended to be shared with either an Exchange Server or from within Microsoft® Outlook®.

• Phone contacts are stored locally on the device.

Note: If the phone is ever reset to its factory default parameters, contacts stored on the phone can be lost.

• Add new account lets you create a new account type. Choose from MobileLife Contacts, Microsoft Exchange ActiveSync, or Google.
Note: When storing an entry into your SIM card, note that only the Name, and Number are saved. To save additional information for a particular contact, such as notes, email, dates, etc., it is important to save that Contact into your phone’s onboard memory.

1. From the Home screen, tap (Contacts).
2. Tap to create a contact.

Note: You can also add a new contact by entering a number from the keypad and pressing and then tap Add to Contacts ➔ Create contact. Continue with step 3.

3. Tap a destination type (MobileLife Contacts, Google, SIM, Microsoft Exchange ActiveSync, or Phone) (depending on where you want to save the new contact information).
4. Tap the Name field and enter a name for this contact using the displayed keypad.
   • Tap to access additional name entries such as: Name prefix, First name, Middle name, Last name, and Name suffix.

5. Tap the image icon and select a photo for this contact. Selections are: Take photo, Select picture from Gallery, or S Memo.

Note: These label entries can change and are dependant on the selected destination type (ex: the Other and Custom might not appear with an Exchange ActiveSync account destination type).

6. Tap the label button (to the left of the Phone number field) and scroll through the list to select a category such as Mobile (default), Home, Work, Work Fax, Home Fax, Pager, Other, Custom, or Callback.

7. Tap a phone number field and enter a phone number.
   • Tap on the QWERTY keyboard to remove a previously entered phone number.
   • Tap to enter an additional phone number
   • Tap to remove a previously entered phone number.

8. Enter additional information such as: Email, Address, Events, Groups, Ringtone or tap Add another field to input additional category information.
- **Add another field** contains the following options: Phonetic name, Organization, IM, Notes, Nickname, Website, Internet call, or Relationship.
- Use your finger to slide the page up or down to see additional fields and categories.

9. Tap **Save** to complete and store the new entry.
   – or –
   Tap **Cancel** to delete the current entry.

**To save a Number from your Keypad:**

1. From the Home screen, tap **Phone**.
2. Enter a phone number using the on-screen dialpad.
3. Tap **Add to Contacts ➔ Create contact** or select the Contact entry from the on-screen list.
   – or –
   Press **Add** and then tap **Add to Contacts ➔ Create contact** or select the Contact entry from the on-screen list.
   - If you're updating an existing contact, tap the entry from the list and proceed to step 5.

4. Tap a destination type (MobileLife Contacts, Google, SIM, Microsoft Exchange ActiveSync, or Phone) (depending on where you want to save the new contact information).

5. Tap the **Name** field and enter a name for this contact using the displayed keypad.
   - Tap ✔️ to access additional name entries such as: Name prefix, First name, Middle name, Last name, and Name suffix.

6. Tap the image icon and select a photo for this contact. Selections are: **Take photo**, **Select picture from Gallery**, or **S Memo**.

---

**Note:** These label entries can change and are dependant on the selected destination type (ex: the Other and Custom might not appear with an Exchange ActiveSync account destination type).

7. Tap the label button (to the left of the **Phone number** field) and scroll through the list to select a category such as **Mobile** (default), **Home**, **Work**, **Work Fax**, **Home Fax**, **Pager**, **Other**, **Custom**, or **Callback**.
8. Tap a phone number field and enter a phone number.
   • Tap \[x\] on the QWERTY keyboard to remove a previously entered phone number.
   • Tap \[+] to enter an additional phone number
   • Tap \[-\] to remove a previously entered phone number.
9. Enter additional information such as: Email, Address, Events, Groups, Ringtone or tap Add another field to input additional category information.
   • Add another field contains the following options: Phonetic name, Organization, IM, Notes, Nickname, Website, Internet call, or Relationship.
   • Use your finger to slide the page up or down to see additional fields and categories.
10. Tap Save to complete and store the new entry.
    – or –
    Tap Cancel to delete the current entry.

Note: For further details about how to enter characters, see “Text Input Methods” on page 94.

Finding a Contact
You can store phone numbers and their corresponding names onto either your SIM card, your phone’s built-in memory, or an external location (such as Google, Exchange, or T-Mobile Backup). They are all physically separate but are used as a single entity, called Contacts.

Depending on the storage size of the particular SIM card, the maximum number of phone numbers the card can store may differ.

1. From the Home screen, tap \[\text{Contacts}\].
2. Swipe up or down until you see the contact displayed.
   – or –
   Tap the Find contacts field and begin entering the entry’s name. Matching entries are then displayed. This process filters through all of your current account Contact entries to only show you the matching entries.
   – or –
   In a single motion, touch and hold the letter tab area (on the right) until on-screen letters appear, then scroll through the list. You are then taken to that section of the Contacts list. Touch the contact entry.
Editing Contact Information

1. From the Home screen, tap ☑.

2. Tap a contact name from the list and tap ☑ (Edit).
   - or -
   Touch and hold a Contacts entry then tap Edit.

3. Edit the contact information then:
   - Tap ☑ (Save) to complete and store the new entry or
   - Tap ☒ (Cancel) to delete the current entry.
Adding a Number to an Existing Contact

1. From the Home screen, tap 
2. Touch and hold an entry and select (Edit) to reveal the Contact entry’s details screen.
3. Tap a phone number field and enter a phone number.
   - Tap on the QWERTY keyboard to remove a previously entered phone number.
   - Tap + to enter an additional phone number
   - Tap − to remove a previously entered phone number.
4. Enter additional information such as: Email, Address, Events, Groups, Ringtone, or tap Add another field to input additional category information.
5. Tap Save to complete and store the new entry.
   – or –
   Tap Cancel to delete the current entry.

Deleting Contacts

Important! Once Contacts list entries are deleted, they cannot be recovered.

1. From the Home screen, tap 
2. Touch and hold a contact name from the list and select Delete → OK.
Contact List Options

1. From the Home screen, tap  
2. Press  . The following options display:
   - **Delete**: allows you to delete 1 or more of your contacts.
   - **Speed dial setting**: allows you to set up speed-dialing.
   - **Import/Export**: imports or exports contacts to or from the USB storage location, SIM card or SD card, you can also send namecards via methods such as Bluetooth, Email, Gmail, Messaging, or Wi-Fi Direct.
   - **Merge with Google**: allows you to merge all of your current Contact entries with your active Google/Gmail account. If several of your contacts are from other sources such as Corporate email, Internet email, Facebook, etc., this allows you to “back them up” or copy them to your Gmail account. Tap **OK** to continue or **Cancel** to exit.
   - **Accounts**: allows you to add and manage mobile accounts on Bobsled Messaging, Google, Microsoft Exchange ActiveSync, MobileLife Contacts. This option also allows you to manually synchronize all of your current contacts with their respective accounts.
   - **Send email**: allows you to send an email using your Google account.
   - **Send message**: allows you to send a text or picture message.
   - **Contacts to display**: allows you to choose to display all contacts, only display contacts that are part of a customized list, MobileLife Contacts, Gmail, Microsoft Exchange email, display contacts stored to your SIM card, or display contacts stored on your device. For more information, refer to “Display Options” on page 123.
   - **Settings**: allows you to configure where you save new contacts to, or view your service numbers, or send contact information. Options include: Only contacts with phones, List by, Display contacts by, Service numbers, and Send contact.

Contact Menu Options

1. From the Home screen, tap  
2. Touch and hold an entry to reveal the context menu. The following options display:
   - **Edit**: allows you to edit the currently selected Contacts entry.
   - **Delete**: allows you to delete the currently selected Contacts entry.
• **Join contact**: allows you to link the current contact to another current contact. Similar to a “see also” feature. If you can’t remember a contact’s information, linking entries can help you find the person you are looking for.

• **Share contact information**: allows you to send the current entry info via text message.

• **Add to favorites**: allows you to copy the current Contacts entry to the list within the Favorites tab.

• **Remove from favorites**: allows you to remove the current Contacts entry from the Favorites tab.

• **Add to group**: allows you to add the current Contacts entry to an existing group.

• **Add to reject list/ Remove from reject list**: allows you to add or remove the current Contacts entry to a list of automatically rejected incoming phone numbers.

• **Send namecard via**: allows you to send the current Contact entry’s information to an external recipient via either Bluetooth, Email (Exchange or Internet), Gmail, Messaging, or Wi-Fi Direct.

• **Print namecard**: allows you to print selected information on a compatible Samsung printer.

---

**Contact Entry Options**

1. From the Home screen, tap 📞.

2. Tap an entry to reveal the **Contact entry’s Overview Screen**. This screen contains Name, contact numbers, email, and linked contact information.

3. Press ☰ to reveal the context menu specific to this entry.

4. Tap an available option.
Joining Contact Information

Most people now maintain multiple email accounts, social networking logins, and other similar account information. For example, a Facebook account login name might differ from a corporate email account login because they are maintained separately and for different groups of people.

This device can synchronize with multiple accounts. When you synchronize your phone with those accounts, each account creates a separate contact entry in the Contacts list. If one of your contacts (Amy Smith) has a regular email account that you maintain in Gmail, but also has a Facebook account under her maiden and married name, as well as a Video! chat account, when you merge those accounts into your Contacts list you can join all of her entries and view the information in one record.

Joining contact information makes sending messages easy. You can select any account email address or information all from one screen, versus searching multiple, individual screens to locate the desired account information.

Next time you synchronize your phone with your accounts, any updates contacts make to email account names, email addresses, etc. automatically update in your contacts list.

1. From the Home screen, tap 

2. Tap a contact name (the name you want to link to another entry) to reveal the Contact entry’s Overview Screen.

Note: Typically this is the same contact with a different name or account information.

3. Press and then tap Join contact.

4. Tap the second contact entry (the entry in which to link). The second contact is now linked with the first and the account information is merged into one screen.

Note: The information is still maintained in both entries, but displays in one record for easier viewing when you link the contacts.
Important! It is the second contact image that is displayed for both, but the first contact’s name that is used. For example: If Amy (original entry) is joined with Julie (second entry). Julie appears to disappear and only Amy remains. Tap the Amy entry (showing the Julie image) to view both.

5. Tap the main linked contact to view the contact information you linked. The contacts and information displays with an icon next to the contact name to indicate what type of account information is contained in the entry.

Unjoining a Contact

1. From the Home screen, tap ão.
2. Tap a contact name (the account name from which you want to unjoin an entry). This reveals the details for entry.

Note: Typically this is the same contact with a different name or account information.

3. Tap the Connections area.
– or –
Press  and then tap Separate contact.
4. Tap  next to the entry you want to unjoin and select OK. The contacts are “unjoined” or separated and no longer display in the merged record screen. Both contacts now go back to being separately displayed.
Marking a Contact as Default

When you use applications such as the Voice Dialer or other messaging type applications, the application needs to know which information is primary (default) in a contact entry list. For example, when you say “Call John Smith”, if you have three phone records for John Smith, the Voice dialer is looking for the “default” number or entry.

The Mark as default option marks one entry in a contact record to use as the default. This comes in handy when you have multiple entries for the same person.

1. From the Home screen, tap 📞.
2. Tap a Contact entry.
3. Press 📅 and then tap Mark as default. The Mark as default screen displays radio buttons next to the contact name, phone number, or other contact information.
4. Tap the radio button next to the entry information you want to be the primary information (such as name, phone number, or email) and select (Save).

Note: If there are multiple phone numbers assigned to an entry, assigning one as the default will automatically dial that number when the contact is selected for dialing.

Sending a Namecard

A Namecard contains contact information, and can be sent to recipients as a Virtual Business Card (V-card) attachment using Bluetooth, Google Mail, or as a message.

1. From the Home screen, tap 📞.
2. Tap a Contact entry.
3. Press 📅 and then tap Share namecard via and select a delivery method: Bluetooth, Email, Gmail, Messaging, or Wi-Fi Direct.

The Namecard attaches to the selected message type and is delivered when you send the message.

Note: Email appears as an option only after an Internet or Exchange email account has been created.
**Sending All Current Namecards**

Rather than selecting once Contact entry at a time, you can send all of your current entries at once.

1. From the Home screen, tap 📞.
2. Press 📱 and then tap Import/Export ➔ Send namecard via.
3. Tap Select all to place a check mark alongside all currently displayed Contact entries.
4. Tap Done and select a delivery method:
   - **Bluetooth** to transmit the contacts to another bluetooth-compatible device.
   - **Email** to attach the contact cards to a new outgoing email (Exchange or Internet).
   - **Gmail** to attach the contact cards to a new outgoing Internet-based email.
   - **Messaging** to attach the contact cards to a new outgoing text message.
   - **Wi-Fi Direct** to transmit the entries to another Wi-Fi Direct enabled device.

**Sending a namecard using Bluetooth**

You must create a Contact prior to sending a namecard to a recipient. For more information, refer to “Creating a Contact” on page 109.

1. From the Home screen, tap 📞.
2. Touch and hold the entry to reveal the on-screen context menu.
3. Tap Share namecard via ➔ Bluetooth.

**Important!** You must activate Bluetooth to use this feature.

4. Tap the Bluetooth device in which to send this name card. Bluetooth forwards the namecard to the recipient.
Copying Contact Information

Copying Contact Information to the SIM Card

The default storage location for saving phone numbers to your Contacts list is your phone’s built-in memory. This procedure allows you to copy numbers saved to the phone’s memory, onto the SIM card.

1. From the Home screen, tap 📞.
2. From the Contacts List, press 📞 and then tap Import/Export ➔ Export to SIM card.
3. Tap Select all to choose all current phone contact entries.
   – or –
   Select a specific entry by touching an entry. A check mark indicates a selection.
4. Tap 🔄 (OK). The name and phone number for the selected contact is then copied to the SIM.

Copying Contact Information to the microSD Card

This procedure allows you to copy entry information saved on the phone’s memory, onto the SIM card.

Note: These must be contacts stored on the phone. External entries (Google, Exchange, etc...) can not be transferred in this manner.

1. From the Home screen, tap 📞.
2. From the Contacts List, press 📞 and then tap Import/Export ➔ Export to SD card.
3. Tap OK to choose all current phone contact entries.
Synchronizing Contacts

Syncing data from your managed accounts allows you to add and manage a new or existing contact from your online or remote accounts to your phone. Prior to syncing, you must first have an active Google or Microsoft Exchange account with current Contact entries, and be signed into your account via the phone.

With syncing, any Contacts entries (with phone numbers, email addresses, pictures, etc.) are updated and synced with your phone. For more information about syncing existing managed accounts, see “Accounts and Synchronization” on page 273.

1. Press ➔ and then tap Settings ➔ Accounts and sync.

2. Locate the email account containing the contacts you wish to synchronize.

3. Tap ➔ within the adjacent account field to reveal the account’s synchronization settings screen.

4. To synchronize Contacts, tap Sync Contacts. A green checkmark indicates the feature is enabled.

Note: The process of updating your Contacts tab can take several minutes. If after 10-20 minutes, your list has not been updated, repeat step 2-3.

5. Your Contacts tab then reflects any updated Contact information.

Note: Syncing of contacts requires you are logged into your Gmail and Corporate accounts via the device.
Display Options

The Display options menu allows you to choose which contacts to display. You can also choose to display only contacts that have phone numbers.

Note: Once a display filter has been selected, only those Contact entries are shown until the All contacts option is re-selected.

1. From the Home screen, tap 📞.
2. Press ➔ and then tap Contacts to display. Select any of the following to filter according to the selection:
   - All contacts allows you to display all available Contacts.
   - Customized list allows you to enable which account categories are displayed. For example, on Google contacts, you can filter which Contact categories are shown (Friends, Family, etc.).
   - MobileLife Contacts lists those Contacts currently found within the MobileLife account.
   - Google lists those Contacts currently found within the Google account.
   - Microsoft Exchange ActiveSync lists those Contacts currently found within the Exchange account.
   - SIM lists those Contacts currently found only on your SIM card.
   - Phone lists those Contacts currently found only on your Phone.

Adding more Contacts via Accounts and Sync

When you synchronize applications such as Facebook, Twitter, MySpace, a corporate email account, or Google, using the Accounts and sync option synchronizes the data from the selected account type with your Contacts list.

1. Press ➔ and then tap Settings ➔ Accounts and sync ➔ Add account.
2. Determine which type of account information you want to synchronize with your Contact list. Selections are: Facebook, LinkedIn, Twitter, Bobsled Messaging, Email, Google, Microsoft Exchange ActiveSync, MobileLife Contacts, or Samsung account.
3. Tap an account type to add.
4. Follow the prompts. The selected account type synchronizes with your Contacts list.
5. After synchronizing accounts you may want to link contact information. For more information, refer to “Joining Contact Information” on page 117.

To add Facebook content to your Contacts list:
You can now add your Facebook contact information, such as pictures, email, and phone numbers directly to your Contacts list. All of their current contact information is then migrated over to your phone. If a Contacts entry already exists with a slightly different name, separate entries are created and can later be linked (joined) together into a single entry.

Important! This process not only synchronizes your contact information but also your status, events, and more.

1. Press 🏡 → 📞 and then tap Settings → Accounts and sync → Add account → Facebook.
2. Select your country, read and accept the terms of the Social Hub, then tap Agree.
3. Read the on-screen descriptions and tap Next.
4. Log into your Facebook account:
   • Enter your account’s access Email and Password information and tap Log in.
5. Tap those contact settings you wish to synchronize (all are enabled by default). A green circle indicates the feature is enabled.
   • Choose from: Sync Message or Sync Calendar.
6. Tap Done to complete the login and sync process.
7. Tap ✅ to confirm your Facebook contacts are now synchronized and appear in your Contacts list.

To resync Social Network Contacts:
1. Press 🏡 → 📞 and then tap Settings → Accounts and sync.
2. Tap ⏩ within the adjacent SNS account field to reveal the account’s synchronization settings screen.
3. Tap Sync Now.

Note: From the main Accounts and sync page you can also tap Sync all to resync all accounts.
Additional Contact Options

Sending an Email to a Contact

Note: Contacts must contain and email account and address before you can use the Send email feature.

1. From the Home screen, tap .
2. Press and then tap Send email. Contacts that contain an email address display.
3. Tap the contact(s) to which you want to send an email. A check mark displays next to the selection.
4. Tap Done.
5. Select an email account type.
6. Compose the email and tap Send.

Contact List Settings

From this menu you can determine the default storage location for Contacts, display your phone’s primary number, and view service numbers listed in your Contact list.

1. From the Home screen, tap .
2. Press and then tap Settings. Configure any of the following options:
   - Only contacts with phones allows you to display only those contacts containing phone numbers.
   - List by defines how the current list of Contacts are sorted: First name or Last name.
   - Display contacts by defines how the current list of Contacts are listed: First name first (ex: Steve Smith) or Last name first (Smith, Steve).
   - Service numbers lists the currently available service numbers.
   - Send contact allows you either Send all namecards or Send individual namecards to an external device.

Export/Import

For more information, refer to “Copying Contact Information” on page 121.
Groups

This feature allows you to add a new or existing contact to a call group. This group can be one of the already present groups (Family, Friends, or Work) or a user-created group.

Creating a New Caller Group
1. From the Home screen, tap ➔ (Groups tab).
2. Press ☑️ and then tap New.
3. Tap the Group name field and use the on-screen keypad to enter a new group name. For more information, refer to “Text Input Methods” on page 94.
4. Tap Group ringtone and select a ringtone for the group. Selections are: Default, Ringtones, or Go to My files.
5. Tap a group entry ➔ (Add group member).
6. Tap Save to store the newly created group.

Note: Some externally maintained group types (such as Google) can only be managed or updated remotely online vs via the device. These external types will not allow editing or deleting members locally via the phone.

Adding an Existing Entry to a Current Caller Group
1. From the Home screen, tap ➔ (Groups).
2. Tap a group entry ➔ (Add group member).
3. From the available list of contacts, tap the contact(s) you want to add. A check mark displays next to contact entry.
4. Tap Done. The selected contacts are added to the group.

Removing an Entry From a Caller Group
1. From the Home screen, tap ➔ (Groups).
2. Tap a group entry.
3. Press ☑️ and then tap Remove member.
4. Tap all of the contacts you want to remove from this group. A checkmark displays next to contact entry.
5. Tap Done. The contacts are removed from the group.
Editing a Caller Group

To edit a Group entry, there must be at least one member as part of the selected group.

1. From the Home screen, tap ➔ .
2. Touch and hold a group entry then select Edit group.
3. Make modifications to the Group name or Group ringtone fields. For more information, refer to “Creating a New Caller Group” on page 126.
4. Tap ✓ (Save).

Deleting a Caller Group

1. From the Home screen, tap ➔ .
2. Press ⬅ and then tap Delete.
3. Select either Select all or tap the desired group.
4. Tap Delete.

Sending a Message to a Group

1. From the Home screen, tap ➔ .
2. Tap an existing group, and press ✉ and then tap Send message.
   – or –
   Touch and hold a group entry and select Send message.
3. Select the recipients of the new message (indicated by a green checkmark). If an entry contains multiple phone numbers, each must be selected individually.
4. Tap ✓ (OK).
5. Type your message, and tap Send.

The Favorites Tab

The Favorites tab is a list of the phone numbers that have been designated as favorite contacts. For more information, refer to “Call Log Tab” on page 89.

1. From the Home screen, tap .
2. Tap (Favorites tab).

Adding a contact to your favorites list:

1. From within the Favorites tab, press ✉ and select Add to favorites.
2. Place a check mark alongside those current Contacts entries you wish to assign as favorites.
3. Tap Done to complete the process.
Section 7: Messages

This section describes how to send or receive different types of messages. It also explains the features and functionality associated with messaging.

Types of Messages

Your phone provides the following message types:

- Text Messages
- Multimedia (Picture, Video, and Audio) Messages
- Email and Gmail Messages
- Google+
- Google Talk
- Messenger
- Bobsled Messaging

The Short Message Service (SMS) lets you send and receive text messages to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s message service.

The Multimedia Messaging Service (MMS) lets you send and receive multimedia messages (such as picture, video, and audio messages) to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s multimedia message service.

Message Icons on the Status Bar

Icons are displayed on the Status Bar at the top of the display when new messages are received. For more information, refer to “Status Bar” on page 35.

Important! During the creation of a text message, adding an image, sound file, or video clip automatically changes it from a text message (SMS) to a multimedia message (MMS).

Note: The Messaging application can also be accessed by pressing 🏡 and then tapping 📍 (Applications) > 📬 (Messaging).
Creating and Sending Messages

1. From the Home screen, tap 📬 (Messaging) ➔ (Compose).

2. Tap the **Enter recipient** field to manually enter a recipient.
   – or –

3. Tap 👤 to select from one of the following:
   - **Contacts**: to select a recipient from your Contacts list (valid entries must have a wireless phone number or email address).
   - **Call log**: to select a recipient from a list of recently sent messages.
   - **Groups**: to select a recipient from the Group list.
   - **Favorites**: to select a recipient from the Favorites list.

4. If adding a recipient from either Call log, Contacts, or Group, tap the contact to place a checkmark alongside the entry and tap **Done**. The contact displays in the recipient field.

   *Note*: Delete any unnecessary members by tapping their name/number in the recipient area and selecting **Delete**.

5. Add more recipients by tapping either the **Enter recipient** field or 👤 and selecting recipients.

6. Tap the **Tap to enter message** field and use the on-screen keypad to enter a message. For more information, refer to “Text Input Methods” on page 94.

7. Review your message and tap **Send**.

8. If you have more than one recipient, the same text message is sent to all recipients in the Enter Recipients field.

   *Note*: If you exit a message before you send it, it will be automatically saved as a draft.

**Quick Messaging a Number from the Contacts List**

1. From the Home screen, tap 📞 (Contacts).

2. Locate an entry from the Contacts list.

3. In a single motion, touch and slide your finger over the number by going to the left. This action addresses a new text message to the selected recipient.
Message Options

Options before composing a message

1. From the Home screen, tap 📬 (Messaging).
2. Before composing a message, press 📫 from the main Messaging screen to display additional messaging options:

- **Search**: allows you to search through all of your messages for a certain word or string of words. Use the on-screen keypad to enter a word or phrase in which to search, then tap 📦. For more information, refer to “Message Search” on page 135.

- **Text templates**: displays your available text message reply templates. For more information, refer to “Text Templates” on page 138.

- **Settings**: allows you to access Messaging settings. For more information, refer to “Messaging Settings” on page 135.

- **Delete threads**: allows you to delete any message thread. Select the messages to delete and a green checkmark will appear next to the message. Tap Delete. For more information, refer to “Deleting a single message thread” on page 134.
Options while composing a message

1. From the Home screen, tap (Messaging).
2. From within an open message, press to display additional messaging options:
   • **Insert smiley**: allows you to add insert smiley icons (emoticons).
   • **Call**: places an outgoing call to the sender.
   • **Add text**: allows you to add text items from sources such as: Location, Contacts, S Memo, S Note, S Planner, and Text templates.
   • **View contact**: reveals the current Contact’s overview screen.
   • **Add to Contacts**: to add the new recipient to your current Contacts list.
   • **Add/Remove slide**: converts an SMS message into an MMS (Multimedia) message and allows you to attach an existing slideshow.
     — Once the message has been converted into an MMS message, press and reveal additional options such as: Preview and Duration (5 sec), and Layout (bottom).
   • **Add subject**: allows you to enter a subject.

   • **Delete messages**: allows you to erase either select specific message bubbles or all current messages bubbles.

Adding attachments to a message

To add an attachment to your message, tap (Attach) and select one of the following options:

• **Images**: allows you to tap an existing image from your Pictures list to add it to your message.
• **Take picture**: allows you to temporarily exit the message, take a photo with phone’s camera, and then add it to your message by tapping Save.
• **Videos**: allows you to choose an existing video from the Videos list, then add it to your message.
• **Record video**: allows you to temporarily exit the message, record a video clip using the phone’s camera, and then add it to your message by tapping Save.
• **Audio**: allows you to choose an existing audio file from the Audio list, then add it to your message by tapping the circle to the right of the audio so that it turns green, then tapping OK.
• **Record audio**: allows you to temporarily exit the message and record an audio clip using the phone’s microphone. It is then automatically attached to the message.
• **S Memo**: allows you to attach a current S Memo then add it by tapping the memo.
• **S Note**: allows you to attach an existing S Note entry.
• **Calendar**: allows you to attach an existing Calendar entry. Tap an entry and select **Done**.
• **Location**: allows you to attach a thumbnail of a map showing your location.
• **Contacts**: allows you to tap on an existing Address Book entry, then add it to your message by tapping **Done**.

### Adding Additional Text

You can copy text such as names, phone numbers, and events from your **Contacts**, **Calendar**, or a **Memo**.

1. While composing a message, press **Add text**.
2. At the Add text screen, select one of the following:
   • **Location**: allows you to add an address and the link to the location on Google Maps.
   • **Contacts**: allows you to add the name and phone number of any of your contacts to your message.
   • **S Memo**: allows you to select a current S Memo then add it by tapping the memo.

• **S Note**: allows you to select a current S Note entry and then add it by tapping the note.
• **S Planner**: allows you to select a current Calendar event then add it by tapping **Done**.
• **Text templates**: allows you to add pre-defined phrases and sentences. For more information, refer to “**Text Templates**” on page 138.

The information is added to your message.

### Viewing Newly Received Messages

When you receive a message, your phone notifies you by displaying 📩 within the Notification area at the top left of your Home screen.

**To read a message:**

1. Open the Notification Bar and select the message. For more information, refer to “**Notification Panel**” on page 40.
   – or –
   From the Home screen, tap 📩 then tap the new message to view its contents. The selected message displays on the screen.
2. Tap  to play a multimedia message.
   - To pause playback of the multimedia message, tap .
3. In a single motion, touch and scroll up or down the page to scroll through the message (if additional pages were added).

**Message Threads**

Sent and received text and picture messages are grouped into message threads. Threaded messages allow you to see all the messages exchanged (similar to a chat program) and displays a contact on the screen.

Message threads are listed in the order in which they were received, with the latest message displayed at the top.

---

**To reply to a text message:**

1. From the Home screen, tap .
2. While the message is open, tap the Tap to enter message field and then type your reply message.
3. Compose your reply. Your texts are colored Blue and your caller’s replies are Yellow.
4. Tap Send to deliver your reply.
   - or –
   Press and then select one of the available message options (page 130).
To access message thread options:
- From the main Messaging screen, touch and hold the message to display the following options:
  - **View contact**: displays the Contact’s Overview page.
  - **Add to contact**: begins the process of adding the new number to your Contacts list.
  - **Delete thread**: deletes the currently selected message thread.

To access additional Bubble options:
- Touch and hold the message bubble within an active message conversation to display the following options:
  - **Delete message**: deletes the currently selected message bubble from the thread.
  - **Add Number to Contacts**: adds the current caller to your Contacts list.
  - **Copy message text**: copies the currently selected message bubble from the thread.
  - **Lock/Unlock message**: locks or unlocks the currently selected message bubble from being accidentally deleted.
  - **Forward**: allows you to forward the currently selected message bubble to an external recipient.
  - **Copy to SIM**: copies the currently selected message bubble as a single text message within the SIM card.
  - **View message details**: displays details for the currently selected message bubble.

### Deleting Messages

#### Deleting a single message thread
1. From the Home screen, tap 📬.
2. Touch and hold a message from the Messages list, then select **Delete thread**.
3. At the prompt, tap **OK** to delete or **Cancel** to exit.

#### Deleting multiple message threads
1. From the Home screen, tap 📬.
2. Press 📚 and then tap **Delete threads**.
3. Tap each message thread you want to delete. A checkmark displays beside each selected message.
4. Tap **Delete**.
5. At the prompt, tap **OK** to delete or **Cancel** to end the process.
Deleting a single message bubble
1. From the Home screen, tap 📬.
2. Open a message to reveal the message string.
3. Touch and hold a message bubble, then select Delete message.
4. At the prompt, tap OK to delete or Cancel to exit.

Deleting multiple message bubbles
1. From the Home screen, tap 📬.
2. Open a message to reveal the message string.
3. Press 📞 and then tap Delete messages.
4. Place a check mark on the individual bubbles targeted for deletion or choose Select all.
5. Tap Delete to erase or Cancel to exit.

Message Search
You can search through your messages by using the Message Search feature.
1. From the Home screen, tap 📬.
2. Press 📞 and then tap Search.
3. Use the on-screen keypad to enter a word or phrase in which to search, then tap 🏷️.
4. All messages that contain the entered search string display.

Messaging Settings
To configure the settings for text messages, multimedia messages, Voice mails, and Push messages.
1. From the Home screen, tap 📬.
2. Press 📞 and then tap Settings.

The following Messaging settings are available:

Settings
- Message font size: enables the device to change the display size for the on-screen front. Choose from: Use device font sizes, Tiny, Small, Normal, Large, Huge.
- Text field color: allows you to change the background color used by the on-screen text fields. Choose from Black (default) or White.

Storage settings
- Delete old messages: deletes old messages when the limit is reached, rather than overwriting them.
- Text message limit: allows you to set a limit on how many text messages are allowed in one conversation.
• **Multimedia message limit**: allows you to set a limit on how many multimedia messages are allowed in one conversation.

• **Text templates**: provides a shortcut to the Text Templates menu. For more information, refer to “Text Templates” on page 138.

**Text message (SMS) settings**

• **Delivery reports**: when this option is activated, the network informs you whether or not your message was delivered.

• **Manage SIM card messages**: allows you to manage the messages stored on the SIM card.

• **Message center**: allows you to enter the number of your message center where your messages reside while the system is attempting to deliver them.

• **Input mode**: allows you to set the input mode for your text messages. Choose from: GSM Alphabet, Unicode, or Automatic.

**Multimedia message (MMS) settings**

• **Delivery reports**: when this option is activated, the network informs you whether or not your message was delivered.

• **Read reports**: when this option is activated, your phone receives a request for a read reply along with your message to the recipient.

• **Auto-retrieve**: allows the message system to automatically retrieve messages.

• **Roaming auto-retrieve**: allows the message system to automatically retrieve while roaming.

• **Creation mode**: allows you to select the creation mode: Free, Restricted, or Warning.
  
  — **Restricted**: you can only create and submit messages with content belonging to the Core MM Content Domain.
  
  — **Warning**: the phone will warn you via pop up messages that you are creating a multimedia message which does not fit the Core MM Content Domain.
  
  — **Free**: you may add any content to the message.

**Push message settings**

• **Push messages**: allows you to receive push messages from the network.

• **Service loading**: allows you to set the type of service loading notification. Choose from: Always, Prompt, or Never.
Notification settings

- **Notifications**: allows you to see message notifications on your status bar.
- **Select ringtone**: allows you to set the ringtone for your message notifications.
- **Emergency alerts**: allows you to configure emergency alert settings. You can enable/disable those alert categories you wish to receive. Choose from: Extreme alerts, Severe alert, and AMBER alerts.

**Note**: The Presidential alert can not be disabled.

- **Vibrate**: allows you to configure the vibration mode associated with message alerts. Choose from: Always, Only in silent mode, or Never.

---

Emergency Alert Configuration

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System (CMAS); which may also be known as the Personal Localized Alerting Network (PLAN). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider's coverage area. If you travel outside your provider's coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.

Emergency Alerts allows customers to receive geographically-targeted messages. Alert messages are provided by the US Department of Homeland Security and will alert customers of imminent threats to their safety within their area. There is no charge for receiving an Emergency Alert message.

There are three types of Emergency Alerts:

- Alerts issued by the President
- Alerts involving imminent threats to safety of life
- AMBER Alerts (missing child alert)

Customers may choose not to receive Extreme Alerts, Severe Alerts, and AMBER Alerts.
**Important!** Alerts issued by the President cannot be disabled.

**To disable Extreme, Severe, and AMBER Alerts:**

1. From the Home screen, tap 📨.
2. Press 📌 and then tap **Settings**.
3. Scroll to the bottom and select **Emergency alerts**. All alerts are enabled by default (checkmark showing).
4. Tap on an alert option to disable the alert and remove the checkmark.

**Text Templates**

This screen displays your available text message reply templates. This is a readily accessible list of both default and user-defined text snippets that can be used to quickly reply to incoming messages.

1. From the Home screen, tap 📨.
2. From the Messaging list, press 📌 and then tap **Text templates**.
3. Tap a message to immediately insert it into your current message conversation.

**To create your own text template:**

1. From the Home screen, tap 📨.
2. From the Messaging list, press 📌 and then tap **Text templates**.
3. Tap (Create template).
4. Enter a new text string and tap **Save**.

**Email**

Email (or Internet Email) enables you to review and create email using several email services. You can also receive text message alerts when you receive an important email. Your phone’s Email application lets you access and manage multiple email accounts simultaneously in one convenient location.

There are currently three main types of email accounts on your phone: Gmail, Internet-based email (Gmail, Yahoo, etc..), and Microsoft Exchange (Corporate email or Outlook®).

To send and receive email messages through an ISP (Internet Service Provider) account, or if you wish to use your device to access your corporate email through a VPN (Virtual Private Network), you will first need to set up an IMAP or POP account.
**IMAP** (Internet Message Access Protocol) - This protocol is frequently used in large networks and commercial settings. IMAP4 is the current standard.

**POP3** (Post Office Protocol) - This protocol is supported by most ISPs (Internet service providers) and common among consumer applications. POP3 is the current standard.

**Microsoft Exchange ActiveSync** - This protocol is frequently used with a large corporate email server system and provides access to email, contact, and calendar synchronization.

**Creating an Internet Email Account**

1. From the Home screen, tap (Applications) → (Email).

2. If you already have other email account setup:
   - Open an existing email account, press and then tap Settings → (Add new account).
   - or –

   Enter your Email address and Password information.

   - **Email address**: your Internet email address.
   - **Password**: typically your network access password (case-sensitive).

3. Tap Show password to display the password as you enter it in the associated field.

4. Tap Next.

5. At the Account options screen, select the frequency which the device should check for new email on the server and tap Next.

   - Tap the Notify me when email arrives field to receive new email notifications.
6. At the **Set up email** screen, name the account and enter a screen name to identify yourself on this account.
   - The unique account name is used to differentiate this account from other email accounts accessed by your device.

7. Tap **Done** to store the new account.

Messages for this account display on the Inbox tab. You can also view Personal information for this account, Receipts (if you setup the account to return receipts), Travel information, and more (if available).

**Opening an Email**

1. From the Home screen, tap ➔ (Email).
2. Tap the account name field (upper-left) to open the complete email account list page.
   - Selecting **Combined view** allows you to view all the emails for your current accounts, managed by the application, to be listed on a single screen.
3. Select an email account and tap an email message.

**Refreshing Email messages**

1. From the Home screen, tap ➔ (Email).
2. Select an email account.
   - If you are already in an email account, tap the account name field (upper-right) to open the complete email account list page.
   - Select an available email account.
3. Press 🔄 and then tap **Refresh**.

**Composing Email**

1. From the Home screen, tap ➔ (Email).
2. Tap the account name field (upper-right) to open the complete email account list page.
3. Tap Inbox ➔ (Compose).
4. Enter the recipient’s email address in the **To** field.
   - If you are sending the email message to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.
5. Press 🔄 and then tap **Add Cc/Bcc** to add additional carbon copy recipients.
   - Use the **Cc** field to carbon copy additional recipients.
   - Use the **Bcc** field to blind copy additional recipients.
6. Tap the **Subject** field and enter the email subject.
7. Tap the email text field and compose your email message.
   • To insert or attach an S Note, tap (S Note) (from the top of the screen).
   • To add an attachment (such as image, video, audio, etc.), tap (Attach) (from the top of the screen) and make a category selection.
     — Tap the file you wish to attach.
     — Tap to delete the attached file.
   • To save the current email, tap (Save) (from the top of the screen).
   • To cancel the current email, tap (Cancel) (from the top of the screen).

   **Note:** If you attach an image to your email, you have the option to resize it prior to delivery. Choose from: Original, Large (70%), Medium (30%), or Small (10%). Once chosen, tap OK.

8. Once complete, tap (Send).

---

**Configuring Email Settings**

1. From the Home screen, tap ➔ (Email).
2. Select an account.
3. Press and then tap Settings ➔ <account>.
4. Alter any of the following settings:
   • **Account name:** displays your uniquely created account display name.
   • **Your name:** displays the name used in the From field of your outgoing email messages.
   • **Add signature:** Lets you attach a customized signature to the bottom of all outgoing emails.
   • **Signature:** Lets you create an email signature for your outgoing Gmail email messages.
   • **Default account:** Assign this account as the default email account used for outgoing messages.
   • **Always Cc/Bcc myself** allows you to include your own email address in either the CC, Bcc, or None fields. Lets you always receive a copy of outgoing emails.
   • **Forward with files:** Lets you include attachments when forwarding an email.
• **Email check frequency**: adjusts the time interval used by your device to check your email account for new email messages.

• **Email notifications**: Activates the email notification icon to appear within the Notifications area of the status bar when a new email (Gmail, etc.) is received.

• **Select ringtone**: Plays a selected ringtone when a new email message is received.

• **Vibrate**: Activates a vibration when a new email message is received.

• **Incoming settings**: Lets you specify incoming email settings, such as User Name, Password, IMAP server, Security type, Port, and IMAP path prefix.

• **Outgoing settings**: Lets you specify outgoing email settings, such as SMTP server, Security type, Port, Require sign-in, User name, or Password.

### Microsoft Exchange Email (Outlook)

Your phone also provides access to your company’s Outlook Exchange server. If your company uses either Microsoft Exchange Server 2003 or 2007, you can use this email application to wirelessly synchronize your email, Contacts, and Calendar information directly with your company’s Exchange server.

### Setting Up a Microsoft Exchange Email account

1. From the Home screen, tap 📧 → 📧 (Email).

2. If you already have other email account setup:
   - Open an existing email account, press ☑️ and then tap Settings ➔ ☑️ (Add new account).
   - or –
   - Enter your **Email address** and **Password** information.
     - **Email address**: your Outlook work email address.
     - **Password**: typically your network access password (case-sensitive).

3. Tap **Show password** to display the password as you enter it in the associated field.
4. Tap Next. Consult your Network or IT Administrator for further details and support.

5. Tap Microsoft Exchange ActiveSync (from the add new email account screen).

Note: If prompted with an on-screen notification that the connection that the “Setup could not finish”, tap Edit details to continue with a manual update of necessary information.

6. When prompted to provide additional detailed information within the Exchange server settings screen, enter an updated Domain, and confirm your user name and Password information.

Important! Remember to manually place the cursor in the correct spot and enter a Domain name before the “[Domain]\[user name]” entry. Most servers only provide a username.

7. Update or re-enter your Exchange server information within the appropriate field. This field can often be populated with incorrect or out of date information provided by your server.
   - Exchange Server: your exchange server remote email address. Typically starts with mail.XXX.com. Obtain this information from your company network administrator.

Important! Do not accept the default entry as this is a guess based on returned information.

   - If your network requires SSL encryption, tap the Use secure connection (SSL) field to place a check mark in the box and activate this additional level. Most often, this option should be enabled.
If your network requires that you accept SSL certificates, tap the Accept all SSL certificates field to place a check mark in the box and activate this additional level. Most often, this option is not required. Confirm this information with your IT Administrator.

Important! If your Exchange server requires this feature, leaving this field unchecked can prevent connection.

8. Consult your IT Administrator if it is necessary to enable the Use client certification option.
9. With the new server information entered, tap Next.
10. Read the on-screen Activation disclaimer and, when prompted, tap OK. The device then verifies your incoming server settings.
11. If prompted, read the Remote security administration information and tap OK to accept the service and continue.
12. Adjust the various on-screen configuration fields and tap Next. It may take a few seconds for the next screen to load.
13. If prompted, read the Activate device administrator? screen and tap Activate to complete the email setup process.

Note: This process can take a few minutes. If the previous setup screen re-appears, ignore it and do not alter any fields during this process.

14. Identify your new work email account with a unique name (Ex: Work), then tap Done.

Opening an Exchange Email
1. From the Home screen, tap ➔ (Email).
2. Tap the account name field (upper-left) to open the complete email account list page.
3. Select an exchange email account and tap an email message.
**Refreshing Exchange Email**

1. From the Home screen, tap ➔ (Email).
2. Select an Exchange email account.
3. Press ❯ and then tap Refresh.

**Composing Exchange Email**

1. From the Home screen, tap ➔ (Email).
2. Press ➯ and then tap Accounts.
3. Select an exchange email account.
4. Tap Inbox and tap ✉️ (Compose).
5. Enter the recipient’s email address in the To field.
   - If you are sending the email message to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.
6. Press ➯ and then tap AddCc/Bcc to add additional carbon copy recipients.
   - Use the Cc field to carbon copy additional recipients.
   - Use the Bcc field to blind copy additional recipients.
7. Tap the Subject field and enter the email subject.

8. Tap the email text field and compose your email message.
   - To add a picture attachment, tap Attach and make a category selection.
   - Tap the file you wish to attach.
   - Tap to delete the attached file.

**Note:** If you attach an image to your email, you have the option to resize it prior to delivery. Choose from: Original, Large (70%), Medium (30%), or Small (10%). Once chosen, tap OK.

9. Once complete, tap Send.

**Deleting an Exchange Email Message**

- Touch and hold an email (from your inbox list) and select Delete from the on-screen context menu.
  - or –
  With the email message displayed, tap to delete.
Configuring Microsoft Exchange Email Settings

1. Press ➔ and then tap Settings ➔ Accounts and sync.
2. Tap adjacent to the Microsoft Exchange account field to reveal the account’s synchronization settings screen.
3. Toggle any of the available fields to force the device to manually resync the parameter.
   – or –
   From the current Email inbox listing, press ➔ and then tap Settings ➔ <Exchange email account> and specify the email settings you wish to synchronize:
   • Account name displays the name used by the device to track the account.
   • Add signature activates the email signature feature.
   • Signature allows you to create an outgoing email signature attached to new email messages sent from your device.
   • Default account assigns this account as the default used when sending out new email messages.
   • Always Cc/Bcc myself allows you to include your own email address in either the CC, Bcc, or None fields. Lets you always receive a copy of outgoing emails.
   • Forward with files: Lets you include attachments when forwarding an email.
   • Period to sync email to assign the sync range for your incoming and outgoing email messages between your phone and your external exchange server. How many days worth of email messages should the phone and server synchronize. Choose from: 1 day, 3 days, 1 week, 2 weeks, or 1 month.
   • Empty server trash: allows you to delete your email account’s trash bin remotely.
   • Sync schedule allows you to configure your email sync schedule.
   • Out of office settings allows you to both activate/deactivate your email’s out of office settings, and configure both the start/end dates and your outgoing message.
   • Size to retrieve emails configures the incoming email size allowed to pass through to your phone automatically without user interaction. Emails with attachments larger than configured will have to be retrieved manually.
• **Period to sync Calendar** assigns a period for your phone to sync calendar events. Choose from: **2 weeks, 1 month, 3 months, 6 months**, or **All calendar**.

• **Security options**: allows you to enable several security options such as: Encryption, Encryption algorithm, Sign, Sign algorithms, Email certificates, and Security policy list. These security policies could restrict some functions from corporate servers.
  – **Security policy list**: lists the current email’s security policy. These policies could restrict some functions from corporate servers.

• **In case of sync conflict** allows you to assign the master source on emails. If there is a conflict with the current email sync you can assign the server as the main source for all emails (Update to device) or assign the phone to be the main source and update the server accordingly (Update to server).

• **Auto resend times** enables the phone to resend an outgoing email a specified number of times if delivery fails.

• **Email notifications** enables the phone to display a status bar icon when new email messages have been received.

• **Select ringtone** assigns an audible ringtone when a new or upcoming event is pending.

• **Vibrate** assigns a vibration when a new or upcoming event is pending.

• **Exchange server settings** provides access to the Domain\user name, Password, and Exchange server settings.

• **Sync email** synchronizes emails between your device and the remote exchange server.

• **Sync contacts** synchronizes the contacts between your device and the remote exchange server.

• **Sync calendar** synchronizes your exchange calendar entries between your device and the remote exchange server.

• **Sync task** synchronizes your exchange tasks entries between your device and the remote exchange server.

4. Press ➔ to return to the previous page.
Using Google Mail

Google Mail (Gmail) is Google’s web-based email. When you first setup the phone, Gmail is configured. Depending on the synchronization settings, Gmail is automatically synchronized with your Gmail account.

Signing into Google Mail

1. From the Home screen, tap ➔ (Gmail).

Note: You must sign in to your Gmail account in order to access features such as Google Mail and Android Market.

2. Tap New if you do not have a Google account.
   – or –
   Tap Existing if you have a Google account.
   The Inbox loads conversations and email.

Opening Gmail

1. From the Home screen, tap ➔ (Gmail).
2. Tap an existing email message.

Refreshing Google Mail

- From within the Gmail message list, tap (Refresh) at the bottom of the screen to refresh the screen, send and receive new emails, and synchronize your email with the Gmail account.

Other Gmail Options

1. From the main Gmail screen, tap (Labels) at the bottom of the screen to set up and manage Labels for your Gmail messages.
2. From the main Gmail screen, tap (Search) at the bottom of the screen to search through your Gmail messages.

Composing a Gmail Message

1. From the Home screen, tap ➔ (Gmail).
2. From the Gmail Inbox, tap (Compose) at the bottom of the screen to create a new message.
3. Enter the recipients Email address in the To field.

Tip: Separate multiple recipient email addresses with a comma.
4. Press 📩 and select Add Cc/Bcc to add a carbon or blind copy.
5. Enter the subject of this message in the Subject field.
6. Tap the Compose email field and begin composing your message.
7. Once complete, tap ➤ (Send).

**Viewing a Gmail Message**

1. From the Gmail Inbox, tap a message to view the following options located at the bottom of the screen:
   - **Archive**: archives the selected Email.
   - **Delete**: deletes the currently selected Email.
   - **Labels**: assigns a label to the current Email.
   - **Mark as Unread**: tags the current message as unread and returns you to the Google Mail Inbox.
   - **Newer**: swiping to the right displays newer Emails.
   - **Older**: swiping to the left displays older Emails.
2. Press 📩 to select one of the following additional options:
   - **Mark important**: assigns the current email an important status.

• **Mute**: mutes the conversation.
• **Report spam**: reports the Email message as spam.
• **Settings**: allows you to configure the General, or Notification settings.
• **Help**: launches the browser and displays Google Mobile Help information.
• **Send feedback**: sends feedback to Google.

**Creating an Additional Gmail Account**

1. From the Home screen, tap 📱 → 📧 (Gmail).
2. Press 📩 and then tap Settings → ADD ACCOUNT and follow the same steps as referenced in the previous section. For more information, refer to “Signing into Google Mail” on page 148.
Google Talk

Google Talk™ is a free Windows and web-based application for instant messaging offered by Google. Conversation logs are automatically saved to a Chats area in your Gmail account. This allows you to search a chat log and store them in your Gmail accounts.

Note: Before using this application, you must first have an active Gmail account available and be currently logged in.

1. From the Home screen, tap ➔ (Talk).

Note: If you are not already logged into Google, refer to the instructions for signing in on page 148.

Note: The Network confirms your login and processes. This could take up to 5 minutes to complete.

Google +

Google+ makes messaging and sharing with your friends a lot easier. You can set up Circles of friends, visit the Stream to get updates from your Circles, use Messenger for fast messaging with everyone in your Circles, or use Instant Upload to automatically upload videos and photos to your own private album on Google+.

1. Sign on to your Google account. For more information, refer to “Creating a New Google Account” on page 21.

2. From the Home screen, tap ➔ (Google+).

3. Select the account you want to use to sign in to Google+.
   – or –
   Tap Create a new account to create another account.

4. Follow the on-screen instructions to use Google+.

Messenger

Messenger allows you to bring groups of friends together into a simple group conversation. When you get a new conversation in Messenger, Google+ sends an update to your phone.
1. Sign on to your Google account. For more information, refer to “Creating a New Google Account” on page 21.
2. From the Home screen, tap ➔ (Messenger).
   – or –
   From the Google+ application, select Messenger.
3. Select the account you want to use to sign in to Google+.
   – or –
   Tap Add account to create another account.
4. When prompted, configure the Sync contacts parameter (Sync contacts or Don’t sync) and tap Continue.
5. When prompted, configure the Instant Upload parameters as desired and tap DONE.
6. Follow any on-screen setup instructions.
7. At the Messenger screen, tap + to start a new message.
8. In the upper text field, enter a name, email address, or circle.
9. In the bottom message field, enter a message then tap ➔.
10. From the Messenger screen, tap Learn more for more detailed information.

Bobsled Messaging

This mobile application makes it easy to stay in sync with individual friends or groups across devices, countries, and carriers.

1. From the Home screen, tap ➔ (Applications) ➔ (Bobsled Messaging).
2. Enter Bobsled username and password and tap Log in.
   – or –
   Tap New User? to complete the new registration process.
3. Within a few minutes, read the Boblsed™ activation code text message.
4. Enter this activation code into the activation field and tap Done.
5. Read the Welcome screen and decide wether to sync both your old and existing text messages within Bobsled’s messaging service.
To start a new text message:

1. From the Home screen, tap (Applications) ➔ (Bobsled Messaging).
2. Enter Bobsled username and password and tap Log in.
3. Tap New Conversation.
4. Tap (Add Friends), select either a single or group of friends and tap Add selected contacts.
5. Tap Next and within the Type message here field use a text input method to compose your new message.
6. Tap Send to deliver the new message to your recipients.
Section 8: Multimedia

This section explains how to use the multimedia features of your phone, including the Camera/Camcorder, Music Player, and how to manage your photos, images and sounds.

You can take photographs and shoot video by using the built-in camera functionality. Your camera produces photos in JPEG format.

Important! Do not take photos of people without their permission.
Do not take photos in places where cameras are not allowed.
Do not take photos in places where you may interfere with another person's privacy.

Note: An SD card is no longer needed to take pictures or shoot video since there is already built-in storage.

Assigning the Default Storage Location

Important! Too many users can overlook this storage location until something goes wrong. It is recommended that you verify this location or change it before initiating the use of the camera or camcorder features.

1. From the Home screen, tap (Camera).
2. From the viewfinder screen, tap (Settings) and scroll down to the Storage entry.
3. Tap this entry and select the desired default storage location for newly taken pictures or videos. Choose from: Phone or Memory card.

Note: It is recommended that you set the option to Memory card.

4. Press to return to the Home screen.
Using the Camera

Taking Photos

Taking pictures with your device’s built-in camera is as simple as choosing a subject, pointing the camera, then pressing the camera key.

Note: When taking a photo in direct sunlight or in bright conditions, shadows may appear on the photo.

1. From the Home screen, tap (Camera).
2. Using the phone’s main display screen as a viewfinder, adjust the image by aiming the camera at the subject.

Note: Use the Up and Down volume keys to zoom in or out.

3. If desired, before taking the photo, use the left area of the screen to access various camera options and settings.
4. You can also tap the screen to move the focus to a desired area of interest.

5. Press (Camera key) until the shutter sounds. (The picture is automatically stored within your designated storage location (page 153). If no microSD is installed, all pictures are stored on the Phone.) For more information, refer to “Camera Options” on page 155.
**Camera Options**

Options are represented by icons across both sides of the screen.

The following shortcuts are available for the camera:

- **Focus area**: displays the area of the image used as the main focus area.
- **Self portrait**: allows you to set the front camera so you can take pictures of yourself or video chat.
- **Flash**: allows you to set the flash options to Off, On, or Auto flash.
- **Share shot - Share with**: lists the current participants sharing images with you via an active Share shot session.
- **Share shot - Shooting mode**: lists the current shooting modes available from with the Share Shot mode.

**Settings:**

- **Edit shortcuts**: allows you to set shortcut icons for the settings that you use the most.
- **Self-portrait**: allows you to set the front camera so you can take pictures of yourself or video chat.
- **Flash**: allows you to set the flash options to Off, On, or Auto flash.
- **Shooting mode**: allows you to set the shooting mode. Options are:
  - **Single shot**: takes a single photo and view it before returning to the shooting mode.
  - **Smile shot**: the camera focuses on the face of your subject. Once the camera detects the person’s smile, it takes the picture.
  - **Panorama**: takes a landscape photo by taking an initial photo and then adding additional images to itself. The guide box lets you view the area where the second part of the panoramic picture should fall within.
Settings (continued):

- **Share shot**: uses Wi-Fi Direct to share your pictures quickly with your friends. For more information, refer to “Enabling Share Shot” on page 159.
- **Action shot**: detects action and creates a panorama of the moving object.
- **Cartoon**: gives your photo a cartoon look.

**Scene mode**: allows you to set the Scene to help take the best pictures possible. Options include None, Portrait, Landscape, Night, Sports, Party/Indoor, Beach/Snow, Sunset, Dawn, Fall Color, Firework, Text, Candlelight, and Backlight. Helpful tips are shown for each scene mode at the bottom of the display screen.

**Exposure value**: allows you to adjust the brightness level by moving the slider.

**Focus mode**: allows you to set this option to Auto focus, Macro, or Face detection. Use Auto focus for all other focal situations.
- **Auto focus**: automatically focus the image based on the focus area.
- **Macro**: allows you to take close-up pictures.
- **Face detection**: causes the camera to automatically recognize if there is a face in the shot. It then optimizes the focus and exposure the face.

**Timer**: allows you to set a timer for how long to wait before taking a picture. Options include: Off, 2 sec, 5 sec, and 10 sec.

**Effects**: allows you to change the color tone or apply special effects to the photo. Options include: None, Negative, Grayscale, and Sepia.

**Resolution**: allows you to set the image size to either: 8M (3264x2448), W6.5M (3264x1968), 3.2M (2048x1536), W2.4M (2048x1232), W0.4M (800x480), or 0.3M (640x480).
Settings (continued):

White balance: allows you to set this option to one of the following choices: Auto, Daylight, Cloudy, Incandescent, or Fluorescent.

ISO: ISO determines how sensitive the light meter is on your digital camera. Choose from Auto, 100, 200, 400, or 800. Use a lower ISO number to make your camera less sensitive to light, a higher ISO number to take photos with less light, or Auto to let the camera automatically adjust the ISO for each of your shots.

Metering: allows you to set how the camera measures or meters the light source: Centre-weighted, Spot, or Matrix.

Anti-Shake: compensates for camera movement.

Auto contrast: provides a clear image even under backlight circumstances where intensity of illumination can vary excessively.

Blink detection: compensates for subject blinking by detecting if a subject’s eyes are open before taking the picture.

Guidelines: allows you to turn the guidelines On or Off.

Image quality: allows you to set the image quality to: Superfine, Fine, or Normal.

GPS tag: allows you to turn GPS On or Off (also known as Geotagging). The location of where the picture is taken is attached to the picture. (Only available in Camera mode.)

Shutter sound: allows you to set the Shutter sound to On or Off.

Save as flipped: allows you to flip the current image prior to saving it.

Storage: allows you to configure the default storage location for images or videos as either Phone or Memory card (if inserted).

Reset: allows you to reset all camera or camcorder settings to the default values.

Image viewer: allows you to access the Image viewer and the various viewing options for a selected picture. The last picture you took, will be displayed as a thumbnail in the Image viewer icon.
**Camera button**: takes a photo when pressed in Camera mode.

**Camera / Camcorder Mode**: allows you to take a photo in various modes. Once you change the mode, the corresponding indicator appears at the top left of the display. Slide the button up for Camera, or down for Camcorder.

**Storage location/Charge Status**: indicates the current storage location (Phone or Card) and the charge state of the device.

### Pictures and Videos Image Viewer Options

After you take a photo or record a video, you can access various options.
Sharing Pictures

Pictures are the best way of remembering the moment, but an even better treat is to share them with others. A new feature allows you to instantly share a series of pictures as they are taken.

Share Shot is a great way to instantly share a series of pictures among a group of users. The best example for this feature is having multiple users instantly sharing each others pictures at a company or family gathering. As each person takes a separate picture with their own device, they are all pooled together and instantly appear in each user’s Gallery. No more “Email your pictures to me later”. Each person walks out of the event with all the pictures taken by everyone.

This method of image transfer requires that both devices have Wi-Fi Direct active and be paired prior to use.

Enabling Share Shot

Share shot is a Wi-Fi Direct group sharing feature where multiple users can Wi-Fi connect their devices and then all share each others pictures in real-time. This is really useful in group events (ex: family gathering or company party) where you don’t want to have to email everyone later and make sure you all can share your pics at a later date.

For more information, refer to “Wi-Fi Direct Setup and Settings” on page 256.

The general process is:

- Enable Wi-Fi Direct communication
- Pair your device with other users
- Enable Share shot

To enable Wi-Fi Direct:

1. Press and then tap Settings → More... → Wi-Fi Direct.

2. In a single motion touch and slide the Wi-Fi Direct slider to the right to turn it on. A check mark displayed next to the feature indicating it is enabled.

3. Confirm appears at the top of the screen within the Notifications area.
4. Tap **Scan**. After scan, tap a device name to begin the connection process to another Wi-Fi Direct compatible device.

**Note:** The target device must also have Wi-Fi Direct service active and running before it can be detected by your device.

5. Tap the on-screen entry. Once the recipient taps **Accept**, the direct connection is then established. The status field now reads “Connected” and your connected device is listed within the Wi-Fi Direct devices listing.

**To enable Share shot on Camera:**
1. From the Home screen, tap **(Camera)**.
2. From the viewfinder screen, tap **(Settings)** ➔ **Shooting mode** ➔ **Share shot**.

**To configure your Share Shot options:**
- Confirm the Share Shot viewfinder is active (see below).

![Share Shot viewfinder](image)

- **Share With Profiles**
- **Share Shot Settings**
  - **User profile**
  - **Share shot while Wi-Fi Direct connected**
3. Tap  (Share with) to display list of current participants.
   • Stop sharing images with select participants by tapping their entry and removing the green check mark.
4. Tap  (Shooting mode) to choose a different shooting mode.
5. Tap  (Settings) to disable share shot while maintaining a Wi-Fi Direct connection.

To locate share shot images:
1. Press  (Camera key) until the shutter sounds.
2. From the Home screen, tap  (Applications) ➔  (Gallery) to locate your newly shot images located in their default storage location.
   • External users will be able to locate their images in a ShareShot folder.
3. Confirm you have received these images by locating  (Share shot images delivered/received) in the Notifications area of the screen.

Camera Gallery Options

The Gallery is where you can access the Gallery of stored camera images.
1. From the Home screen, tap  (Applications) ➔  (Gallery).
2. Select a folder location (ex: Camera) and select an image by tapping it once to place a green check mark on the file.
3. Press  from this main Gallery screen to reveal gallery-specific options Send via, Delete, and More.
Camera Image Options

1. From the Home screen, tap (Applications) ➔ (Gallery).

2. Select a folder location and tap a file to open it in the Image viewer. Touch and drag a picture to the left to see the next picture or to the right to see the previous picture.

3. Tap the on-screen image and use either of the following image menu options:
   - **Send via**: allows you to share a picture using Bluetooth, Email, Gmail, Messaging, Wi-Fi Direct, Kodak, or Snapfish.
   - **Delete**: allows you to delete the current image.

4. Press to select additional options.
   - **Share via**: allows you to share a picture using AllShare, Bobsled Messaging, Google+, Picasa, S Memo, or Social Hub.
   - **Set as**: allows you to assign the current image as either as Contact photo, Home screen wallpaper, or Lock screen wallpaper.
   - **More**: provides you with the additional options such as:
     - **Copy**: allows you to copy one or more pictures to a different folder.
     - **Print**: allows you to print the current image on a compatible Samsung printer.
     - **Edit**: launches the photo editor application. For more information, refer to “Photo Editor” on page 205.
     - **Crop**: provides an on-screen box that allows you to crop the current picture. Tap **Save** to update the image with the new dimensions or tap **Cancel** to ignore any changes.
     - **Motion**: launches the Motion settings page. For more information, refer to “Motion Settings” on page 290.
     - **Rotate left**: allows you to rotate the view of the current image in a counterclockwise direction.
     - **Rotate right**: allows you to rotate the view of the current image in a clockwise direction.
     - **Slideshow**: adds the selected photo to a custom slideshow.
     - **Rename**: allows you to rename the current file.
     - **Send to**: allows you to send the file to a Contacts entry, New Email address, or New Phone number.
     - **Set default destination**: allows you to assign a default action to take after taking an image (Contacts, New Email address, or New phone number). The default storage location for pictures is DCIM > Camera folder.
Assigning an Image as a Contact Photo

1. From the Home screen, tap 📷 (Applications) ➔ 📷 (Gallery).
2. Select a folder location and tap a file to open it.
3. With the image displayed, press 📷 and then tap Set as ➔ Contact photo.
4. Tap a contact to make a selection.
5. Crop the image and tap Save.

Assigning an Image as a Wallpaper

1. From the Home screen, tap 📷 (Applications) ➔ 📷 (Gallery).
2. Select a folder location and tap a file to open it.
3. With the image displayed, press 📷 and then tap Set as.
4. Select one of the two options:
   • **Home screen wallpaper** assigns the current image to the home screen background. This image is spread across all available screens.
   • **Lock screen wallpaper** assigns the selected image to the background for the lock screen.
5. Touch and drag the crop box anywhere on the picture. Touch and drag the sides of the crop box to zoom in or out to create a cropped area.
6. Tap Save to assign the wallpaper image.
   – or –
   Tap Cancel to stop without updating the wallpaper image.
Editing a Photo
You can edit your photos using the Photo editor application on your phone. For more information, refer to “Photo Editor” on page 167.

Using the Camcorder
In addition to taking photos, the camera also doubles as a camcorder that also allows you to record, view, and send high definition videos.

Note: To ensure the Camcorder can record the video, use an SDHC memory card.

Shooting Video

Tip: When shooting video in direct sunlight or in bright conditions, it is recommended that you provide your subject with sufficient light by having the light source behind you.

1. From the Home screen, tap (Camera) to activate the camera mode.
2. Tap and slide the Camera mode button down to Camcorder Mode.
3. Using the phone’s main display screen as a viewfinder, adjust the image by aiming the camcorder at the subject.
4. Tap the Video key ( ) to begin shooting video. The red light will blink while recording.
5. Tap the Video key ( ) again to stop the recording and save the video file to your Camera folder.
6. Once the file has been saved, tap the image viewer, then tap to play your video for review.
7. Press to return to the viewer.

Note: Zooming is not supported while recording Full HD video. Adjust to a lower resolution to regain this functionality.
Camcorder Options

You can change options using your keypad in capture mode. The following short cuts are available:

**Recording mode:** allows you to set the recording mode to: Normal, which is limited only by available space on the destination location, Limit for MMS, which is limited by MMS size restrictions, and Self-recording which activates the front-facing camera so you can video yourself.

**Flash:** allows you to set the flash options to Off or On. When you set the flash to On, it stays on continually while you are taking a video.

Settings:

**Edit shortcuts:** allows you to set shortcut icons for the settings that you use the most.

**Flash:** allows you to set the flash options to Off or On. When you set the flash to On, it stays on continually while you are taking a video.

**Recording mode:** allows you to set the recording mode to:

- **Normal:** is limited only by available space on the destination location.
- **Limit for MMS:** is limited by MMS size restrictions.
- **Self-recording:** activates the front-facing camera so you can video yourself.

**Exposure value:** allows you to adjust the brightness level by moving the slider.

**Timer:** allows you to set a timer for how long to wait before taking a video. Options include: Off, 2 sec, 5 sec, and 10 sec.
Settings (continued):

**Effects**: allows you to change the color tone or apply special effects to the photo. Options include: None, Negative, Grayscale, and Sepia.

**Resolution**: allows you to set the image size to either: 1920x1080, 1280x720, 720x480, 640x480, 320x240, or 176x144.

**White balance**: allows you to set this option to one of the following choices: Auto, Daylight, Cloudy, Incandescent, or Fluorescent.

**Video quality**: allows you to set the image quality to: Superfine, Fine, or Normal.

**Guidelines**: allows you to turn the guidelines On or Off.

**Save as flipped**: allows you to flip the video prior to saving.

**Storage**: allows you to configure the default storage location for images or videos as either Phone or Memory card (if inserted).

**Reset**: allows you to reset all camera or camcorder settings to the default values.

**Image viewer**: allows you to access the Image viewer and the various viewing options for a selected video. Image viewer options are described in the following section. The last video you took, will be displayed as a thumbnail in the Image viewer icon.

**Camcorder button**: shoots or stops video recording when pressed in Camcorder mode.

**Camera / Camcorder Mode**: allows you to take a photo in various modes. Once you change the mode, the corresponding indicator appears at the top left of the display. Slide the button up for Camera mode or down for Camcorder mode.

**Storage location/Charge Status**: indicates the current storage location (Phone or Card) and the charge state of the device.
**Accessing Videos**

When you shoot a video, the file is saved in the Camera folder. You can view your videos immediately or view them anytime in the Camera folder.

1. From the Home screen, tap 📷 (Applications) ➔ 📷 (Gallery).
2. Select a folder location and tap a video icon to begin video playback.

   – or –

   Touch and hold the video icon from the main Gallery to select the video (green check mark) and display the following video menu context options:

   - **Send via**: allows you to share a video using Bluetooth, Email, Gmail, Messaging, Wi-Fi Direct, Kodak, and Snapfish.
   - **Delete**: allows you to delete chosen/selected pictures. Tap the check mark, to turn it green, next to any file or folder you want to delete, then tap **Confirm deletions**.
   - **More**: provides you with the additional options such as:
     - **Share via**: allows you to share your file via YouTube.
     - **Play via**: allows you to play your selected file via AllShare.
     - **Rename**: allows you to rename one or more video files.
     - **Send to**: allows you to send the file to a Contacts entry, New Email address, or New phone number.
     - **Set default destination**: allows you to assign a default action to take after taking an image (Contacts, New Email address, or New phone number).
     - **Details**: displays video file information.

**Photo Editor**

The Photo editor application provides basic editing functions for pictures that you take on your phone. Along with basic image tuning like brightness, contrast, and color it also provides a wide variety of effects used for editing the picture.

1. From the Home screen, tap 📷 (Applications) ➔ 📷 (Photo editor).
2. Tap **Select image** to edit a picture in your Gallery.
   – or –
   Tap **Take picture** to take a picture with the camera.
3. Tap the picture and it is loaded into the Photo editor.
4. Use the following Photo editor controls to edit your picture:
Move: use the move feature to move a photo around when you are zoomed in and the entire photo is not showing on the screen.

Rotate: allows you to rotate a photo in all 4 directions. You can also mirror image a photo.

Crop: allows you to crop (cut-out) an area of a photo.

Selection: use the selection tool to mark an area for cropping, rotating, etc.

Selection Size: allows you to set the size of the selection tool to Small, Medium, or Large.

Previous: move to previous photo project.

Next: move to next photo project.

Color: allows you to adjust the Saturation, Contrast, Brightness, Grey-scale, Auto adjustment, Vintage, and Colour temperature of a photo.

Effects: allows you to add various effects to your photo.

Tools: allows you to Copy and Paste to different images. You can also use Warping, Fill selected areas, Pen, and Frames.

5. Press $\rightarrow$ to access the following options:
   - **New**: starts a new Photo editor project. Be sure and save the photo you are working on before starting a new project.
   - **Open**: opens another photo from your gallery.
   - **Save**: saves your photo to your gallery.
   - **Insert**: inserts an image from another location such as From clipboard or From Maps.
   - **Share**: allows you to share your photo via AllShare, Bluetooth, Bobsled Messaging, Email, Gmail, Google+, Messaging, Picasa, Social Hub, or Wi-Fi Direct.
   - **Tutorial**: provides an on-screen tutorial.
**My Files**

My files allows you to manage your sounds, images, videos, bluetooth files, Android files, and other memory card data in one convenient location. This application allows you to launch a file if the associated application is already on your phone (ex: MP4).

- From the Home screen, tap  
(Aplications)  
(My files).

For more information, refer to “My Files” on page 201.

**The Gallery**

The Gallery is where you view photos and play back videos. For photos, you can also perform basic editing tasks, view a slideshow, set photos as wallpaper or caller image, and share as a picture message.

**Note:** If the phone displays a memory full message when accessing the Gallery, access Files and remove some of the media files from the folders, and then open the Gallery.

**Opening the Gallery**

- From the Home screen, tap  
(Aplications)  
(Gallery). For more information, refer to “Camera Gallery Options” on page 161.

**Note:** If you stored your files in folders (directories) on the storage card, Gallery displays these folders as separate albums. The top left album contains all the pictures in the storage card.
Using the Video Player

The Video Player application plays video files stored on the SD card. This device is able to playback DivX videos.

1. From the Home screen, tap (Applications) ➔ (Video player). A list of available videos sorted on the SD card displays in the Video list.

2. Tap a video file to begin viewing.

Sharing Videos

1. From the Home screen, tap (Applications) ➔ (Video player).

2. Tap a video file to begin viewing.

3. Select (Share via AllShare) and follow the on-screen procedures to connect to an AllShare-ready device.

DivX Overview

This device is able to playback DivX videos. DivX Certified® to play DivX® video up to HD 720p, including premium content. If you try to play DivX VOD content not authorized for your device, the message “Authorization Error” will be displayed and your content will not play. Learn more at www.divx.com/vod.

Your device must first be registered to playback protected or purchased DivX content. DRM-free or unprotected content does not required DivX VOD registration.

Locating Your VOD Registration Number

1. Press ➔ and then tap (Settings) ➔ About phone ➔ Legal information ➔ License settings ➔ DivX® VOD > Register.

2. Write down your Registration code.

3. Tap OK.
Register Your DivX Device for VOD Playback of Purchased Movies

To play purchased DivX movies on your device, you will first need to complete a one-time registration using both your device and your computer.

1. Write down the DivX registration code that appears on-screen. Copy this 8 or 10-digit number down.
2. Verify you have the latest DivX software running on your computer. Download the free player (for your computer) from www.divx.com.
3. Open the DivX Player on your computer and from within the VOD menu, select Register a DivX Certified Device.
4. You are prompted to log in or create a DivX account if your account information has not already been saved in DivX Player.
5. Follow the instructions in DivX Player to enter the registration code from step 2 and create a device nickname (ex: “Pat or Pat’s Device”).
6. Select a location on your computer to download the DivX registration video with the same title as your device nickname (ex: Pat.divx).
7. Follow the on-screen instructions to download the file and initiate the transfer process. You will need to place this video file onto your device and play it back.
8. Connect your device to the computer via USB and transfer this video. For more information, refer to “Communicating with the SD card” on page 69.
9. From the **Registration** screen (Transfer), click Transfer Video now and select the location of the microSD card or **USB** (the device) as the target destination for the registration video (created in step 6) and click **Start**.  
   – or –  

Locate the created file, copy and paste it into the new drive letter corresponding to your device’s storage location.

10. From the Home screen, tap \( \text{(Applications)} \rightarrow \text{(My files)} \).

11. Locate your registration DivX video file and tap the file to play it. Once you play the registration file on your device, your registration is complete.

12. Return to the DivX VOD Manager screen (from within your computer’s DivX Player) and confirm both your computer and your new device appears in the list of registered DivX devices.

---

**Important!** There is no special registration or configuration necessary to playback DRM-free DivX movies. Registration of your device is only required for playback of protected DivX material.

---

**Media Hub**

Samsung Media Hub is your one stop for the hottest movie and TV content. With hundreds of titles available, entertaining your family on the go was never easier. You can rent or purchase your favorite content and watch from any location. Featuring the stunning viewing quality Samsung is known for, Samsung Media Hub is your gateway to mobile video like you’ve never experienced it before.

**You must have the Samsung Account application installed and registered prior to using Media Hub.**

**Note:** Media Hub usage is based on service availability.

---

**Important!** You must be using an active Wi-Fi/4G connection to preview and download a media file. The internal memory acts as a storage location for your downloaded rental or purchase.
Important! The Samsung account manages the access information (username/password) to several applications, such as AllShare and Media Hub.

Creating a New Media Hub Account

Before you can rent or buy media, you must first create an account. Enter the required information.

1. Confirm you have already logged in to your Samsung account. There should be no icon in the Notifications area of the screen.
2. From the Home screen, tap (Applications) ➔ (Media Hub).
3. If prompted, read the End-User License Agreement (EULA) and tap Accept to continue or Decline to exit.
4. Press and then tap My Profile.

Note: Your Media Hub account is managed by the Samsung account application. This application manages your user profile information.

5. Use the keypad to enter the required information, then tap Create new account. Follow the on-screen instructions to complete your registration for a new Samsung account.

Using Media Hub

1. From the Home screen, tap (Applications) ➔ (Media Hub).
2. Press and then tap My Profile.
3. Enter your profile information and tap Sign in.
4. At the Media Hub screen, scroll through What’s New.
   - What’s New: shows recently added media that is available for rent or purchase.
   - or –
   - Tap (Options) and select one of the following options:
     - Movies: displays movies that are available for rent or purchase. Scroll through the movie categories at the top of the screen. Touch a category and movies of that type display.
     - TV Shows: displays TV shows that are available for purchase. Scroll through the movie categories at the top of the screen. Touch a category and TV shows of that type display.
• **My Media**: allows you to view all of the media that you have purchased or rented. Touch a media entry to view it.

5. Scroll through the media listings and tap on an item you would like to purchase or rent.

6. Tap tap **Buy** or **Rent**.

7. Choose a payment method and then follow the on-screen instructions. The media stores to the **My Media** folder.

**Media Hub Notices**

- Any media item (Media Content) may be rented or purchased after you create an account in Media Hub.
- Media Content that is downloaded may be viewed concurrently on up to five (5) devices with Media Hub that are also registered to the same account.
- You may choose to remove a device from your account no more than once every 90 days.
- You may remove Media Content from a device as many times as you’d like. You will have the ability to re-download the Media Content at a later point in time subject to content re-download availability and studio permissions.
- You MUST be in network coverage to license Media Content you have acquired through the Service.
- You can use 3G, 4G, or Wi-Fi connectivity in order to download Media Content.
- Unlike purchased Media Content, rented Media Content will be viewable on only 1 device in your account.
- Media Content is downloaded and saved onto the SD card.
- Your Media Content may pause/stop or not download in networks where there is a weak signal.
- You may begin watching downloaded Media Content as soon as a) license acquisition has occurred and b) sufficient amount of the Media Content has been buffered.
- You must finish watching rented Media Content within 24 consecutive hours of start of playback.
  - Stopping, pausing or restarting rented Media Content does not extend the available viewing time.
• In no event will rented Media Content be available for a period of more than thirty (30) days (or shorter on a title-by-title basis) after the Media Content has been rented (e.g., if you begin viewing rented Media Content on the 29th day after the rental transaction, but do not finish viewing the entire title, that rented Media Content may not be available for the entire twenty-four (24) consecutive hour period if such period would extend the viewable time beyond the thirty (30) day rental window).

• You cannot play any media content downloaded from Media Hub through any output on your mobile phone, including All Share.

Play Movies
This application allows you to connect to the Play Store, download a movie and then watch it instantly. Choose from thousands of movies, including new releases and HD titles in the Play Store and stream them instantly on your Android phone or tablet.

Movies, previously rented via the Play Store are automatically added to your My Movies library across your devices.

Learn more about Google Play Movies at: http://play.google.com/about/movies.

1. From the Home screen, tap (Applications) ➔ (Play Movies).

2. Log on to your Google account if you have not already done so. A list of videos sorted on the SD card displays in the Video list.

3. Following the on-screen instructions for renting and viewing movies.

4. Tap the MY RENTALS tab to view movies you have rented.

5. Tap the PERSONAL VIDEOS tab to view movies you have on your phone or memory card.
Play Music

Also known as Google Music, allows you to browse, shop, and playback songs purchased from the Play Store. The music you choose is automatically stored in your Google Music library and instantly ready to play or download.

The Music application contains a music player that plays music and other audio files that you copy from your computer.

1. From the Home screen, tap ☰ (Applications) ➔ ☰ (Play Music).

   The Music app searches both your online library and your device’s internal storage for music and playlists; this can take from a few seconds to several minutes, depending on the amount of new music added since you last opened the application. It then displays a carousel view of your new and recent music, organized by album.

2. If prompted, follow the on-screen instructions to link your current account to Google Play Music.

3. Tap an on-screen account to add it or select Add account to use a new account.

4. At the free songs screen, select either Get free songs or Skip.

   • Get free songs are downloaded via either the Internet or Play Store.
   • Follow the on-screen download and installation instructions.

5. Swipe left or right to browse through your new and available music. Music, albums, and artists are grouped into categories.

6. Tap an on-screen album to open it and begin playback.

7. Return to the Library screen from most other screens in the Music application by tapping the Music application icon ☰ (Music notification icon) at the top-left of the Application bar.

Changing Library View

You can change the way you view the contents of your library.

1. From the Home screen, tap ☰ (Applications) ➔ ☰ (Play Music).

2. While in a selection or screen, tap ☰ (near the top-left of the Application bar) or the tab name to back up to the main Music App menu.
3. Available tabs include: RECENT, ARTISTS, ALBUMS, SONGS, PLAYLISTS, or GENRES.

Note: The contents of your library display in a scrolling grid or list view, depending on the view.

Searching for Music in Your Library
1. From the Home screen, tap (Applications) ➔ (Play Music).
2. Press ⏯ and then tap (Search) to search through your available songs.
   – or –
   Press .
3. Type the name of an artist, album, song, or playlist.
   Matching songs are displayed in a list below the search box.
4. Tap a matching song to play it, tap a matching album, artist or playlist to view a list of its’ songs.

Changing Music Settings
1. From the Home screen, tap (Applications) ➔ (Play Music).
2. Press and then make a selection.
   • Shuffle all: Play all songs in a random order.
   • Make available offline: Allows you to select desired files and copy them locally.
   • Offline music only: Allows you to display only those songs that can be played locally and are not tied to a remote location.
   • Settings: Provides access to the Play Music settings.
   • Help: Displays application help information.

Listening to Music
You can listen to music by using your device’s built-in speakers, through a wired headset, or through a wireless Bluetooth stereo headset.

Press the volume keys on the side of the device to activate on-screen volume control, then touch and drag on the scale to set volume.
Playing Music

1. From the Home screen, tap  (Applications) ➔  (Play Music).
2. Tap a song in your library to listen to it.
   – or –
   While viewing a list of songs, tap  (Options) next to a song and tap Play.
   – or –
   While viewing a list of albums, artists, playlists, or genres, tap  (Options) adjacent to the label and tap Play.

   The Now playing screen opens and the song you touched or the first song in the album or playlist starts to play. The tracks in the current list play in order until you reach the end of the list (unless you choose a repeat option). Otherwise, playback stops only if you stop it, even when you switch applications.

   **Note:** If you navigate away from the Now playing screen in the Music application, the Now Playing bar appears at the bottom of the screen.

Displaying the Now Playing Screen

If you navigate away from the Now playing screen, to return to the Now playing screen from other Music screens:

- Tap the name of the current song in the Now Playing bar.
- or –
   In a single motion, touch and drag  (Music notification icon) down from the System bar and tap the song title from the Notifications area. You can also pause and resume playback and skip to the next or previous song in the panel. For more information, refer to “Notification Panel” on page 40.

Tab Options

There are various options available from the various tabs:

1. From the Home screen, tap  (Applications) ➔  (Play Music).
2. Select one of the following tabs and tap  to access an available option.
   - **RECENT:** to display the most recently played songs and albums
   - **ARTISTS:** Play, Add to playlist, Shop for artist, or Search.
Options While Playing a Song

When you play a song, the Now playing screen displays. There are various options and controls available while a song is playing:

1. From the Home screen, tap (Applications) → (Play Music).
2. Tap an album or song.
3. From the Now playing screen, press (Menu) to display the following options:
   - **Sound effects**: Applies selected sound effects.
   - **Show options**: View additional playback features such as shuffle and repeat.
   - **Settings**: Allows you to view information such as Open source licenses, and Music version.

4. Tap ➔ Add to playlist to add the song to a playlist. – or –
   Tap ➔ ➔ Add to playlist to add the song to a playlist.

5. Tap the **ARTIST** name to view songs related to this artist.

6. Tap the **ALBUM** name to view or play other songs on the album.

The Now playing screen contains several buttons that you can tap to control the playback of songs, albums, and playlists:

- Tap to go back to the previous song. Touch and hold to scan backward through the current song.
- Tap to resume playback.
- Tap to pause playback.
- Tap to advance to the next song. Touch and hold to scan forward through the current song.
Creating a Playlist

1. From the Home screen, tap 📱 (Applications) → 🎵 (Play Music).
2. Tap an album or song list and play a song.
3. Tap 👈 adj. to the song name and select Add to playlist.
4. Tap New playlist → Playlist name field to enter a name for the playlist.
5. Tap OK to save the new playlist.

Adding Songs to Playlists

1. From the Home screen, tap 📱 (Applications) → 🎵 (Play Music).
2. Tap an album or song list and play a song.
3. Tap 👈 adj. to the song name and select Add to playlist.
4. Select the desired target playlist.

Playing a Playlist

1. From the Home screen, tap 📱 (Applications) → 🎵 (Play Music).
2. Select the PLAYLISTS tab.
3. Tap 🎼 next to a playlist title and tap Play.

Deleting a Playlist

1. From the Home screen, tap 📱 (Applications) → 🎵 (Play Music).
2. Display the PLAYLISTS library view.
3. Tap 🎼 next to a playlist title and tap Delete.

When Shuffle mode is enabled via Show Options, songs play in random order. When enabled, songs play in random order. Also visible when 🎶 is tapped.

Tap to repeat the current song, repeat all songs, or disable repeat mode. Also visible when 🎶 is tapped.
Music Player

Playing Music

1. From the Home screen, tap (Applications) ➔ (Music player). Music player tips display.
2. Tap a tab to select the music category: All, Playlists, Albums, Artists, or Folders.
3. Scroll through the list and tap an entry to begin playback.

Note: The 5.1 channel sound effect works when earphones or sound is connected through the headset jack only.

4. Use any of the following Music Player controls:
   - Pause the song.
   - Start the song after pausing.
   - Press and hold to rewind the song. Tap to go to previous song.
   - Press and hold to fast-forward the song. Tap to go to next song.
   - Volume control.
   - Allows you to listen to music using 5.1 Virtual Surround Sound.
   - Plays the entire song list once.
   - Replays the current list when the list ends.
   - Repeats the currently playing song.
   - Shuffles the current list of songs randomly.
   - Songs play in order and are not shuffled.
   - Lists the current playlist songs.
   - Displays the current song in the player window.

Making a Song a Phone Ringtone

1. From the Home screen, tap (Applications) ➔ (Music player).
2. Tap the All tab.
3. Touch and hold a song from the list to reveal the on-screen context menu.
4. Tap Set as ➔ Phone ringtone.
**Music Player Options**

The Music Player Settings menu allows you to set preferences for the music player such as whether you want the music to play in the background, sound effects, and how the music menu displays.

- With the music player application displayed and playing a song, press 📲 and select one of the following options:
  - **Add to quick list**: adds the selected music file to a quick playlist.
  - **Via Bluetooth**: plays the music through a Bluetooth stereo headset.
  - **Share music via**: shares a music file via AllShare, Bluetooth, Email, Gmail, Messaging, or Wi-Fi Direct.
  - **Set as**: sets this song as a Phone ringtone, Caller ringtone, or Alarm tone.
  - **Add to playlist**: adds a song to the playlist.
  - **Settings**: allows you to activate or deactivate the Equalizer, Sound effects, Music menu, Lyrics, or Music auto off.
  - **Details**: displays details about the selected music.

---

**Using Playlists**

Playlists are used to assign music files into groups for playback. These Playlists can be created using the Music player on this device, or using a third-party application (such as Windows Media Player) and downloading those files to an SD card inserted into the device.

**Creating a Playlist**

1. From the Home screen, tap 📱 (Applications) ➔ 📡 (Music player).
2. Tap the **Playlists** tab.
3. Press 📡 and then tap **Create**.
4. Backspace over the default playlist title and type a new name for this playlist, then tap **Save**.

**Adding Music to a Playlist**

1. From the Home screen, tap 📱 (Applications) ➔ 📡 (Music player).
2. Tap the **Playlists** tab.
3. Tap the playlist name in which to add music.
4. Press 🎧 and then tap Add to playlist.
   – or –
   Tap + (Add music). This option is available within user-created playlists.

Note: If a playlist is empty, add a song by touching a holding a song name from the main screen to open the context menu. Select Add to playlist and choose the playlist.

5. Tap a music file, or tap Select all to add all the music tracks to this playlist then tap Add.

Removing Music from a Playlist

1. From the Home screen, tap 📱 (Applications) ➔ 🎶 (Music player).
2. Tap the Playlists tab.
3. Tap the playlist name in which to delete music.
4. Touch and hold a song to reveal the on-screen context menu and tap Remove.
   – or –
   Press 🎧 and then tap Remove, select the desired songs, and tap Remove.

Editing a Playlist

Besides adding and removing music files in a playlist, you can also share, delete, or rename the playlist.

Note: Only those playlist you have created can be edited. Default playlists can not be renamed.

1. From the Home screen, tap 📱 (Applications) ➔ 🎶 (Music player).
2. Tap the Playlists tab.
3. Touch and hold a playlist entry to reveal the on-screen context menu.
4. Tap Edit title.
5. Enter a new name for this playlist and tap Save.
Transferring Music Files

Music files can be downloaded to the phone using one of two methods:

1. Downloaded to the device from the Play Store. Music files are directly stored on your phone.
2. Downloaded to the phone via a direct USB connection. Music files are stored into a Music folder on the SD card.

For more information, refer to “Communicating with the SD card” on page 69.

Removing Music Files

1. From the Home screen, tap (Applications) ➔ (Music player).
2. Tap the All tab.
3. Touch and hold a song entry to reveal the on-screen context menu.
4. Tap Delete ➔ OK. The music file(s) is deleted.

AllShare

This application wirelessly synchronizes your Samsung mobile phone with your TV, streams content and even keeps tabs on who calls or sends text messages with real-time, on-screen monitoring. Samsung’s AllShare makes staying connected easy.

Allows users to share their in-device media content with other external devices using DLNA certified™ (Digital Living Network Alliance) Devices. These external devices must also be DLNA-compliant. Wi-Fi capability can be provided to TVs via a digital multimedia streamer.

Important! You must activate Wi-Fi to use this application. For more information, refer to “Wi-Fi settings” on page 247.

1. From the Home screen, tap (Applications) ➔ (AllShare).
2. Follow the on-screen prompts.

The application contains two separate streaming media options:
• **My device** allows you to stream/share selected multimedia content from your device to DLNA compliant device connected to the same WAP.

• **Remote device** allows you to receive and playback media stored externally (server, laptop, etc.) directly on your device.

### Configuring AllShare Settings

The AllShare™ application must first be configured prior to its initial use. You must setup parameters such as connected Wi-Fi, Items to share, source server address, and external device acceptance rights.

1. From the Home screen, tap 📱 **(Applications) → AllShare**.
2. Press 📡 and then tap **Settings** and configure the following settings as desired:
   - **Device name**: defaults to your phone. Use the keypad to enter a new Media server if desired, and tap **Save**.
   - **Share videos/photos/music**: allows you to restrict what is shared from your phone. Tap the items you want to share.
   - **Upload from other devices**: allows you set the phone to select how uploads from other devices are started. Tap **Always accept**, **Always ask**, or **Always reject**.
   - **Default memory**: allows you to have media saved to your **Phone** or **Memory Card**. Tap an option.
   - **Subtitles**: allows you to see subtitles on shared media.

Depending on the setting you changed, a pop-up screen may display to restart AllShare. Tap **Yes** to continue.

### Transmitting Media via AllShare

1. Tap the **My device** tab, select **Videos**, **Photos**, or **Music**, and then tap on the media that you would like to share.
2. At the **Select device** screen, any devices that you can share with are displayed.
3. Tap on a device to share media.

### Receiving Media via AllShare

1. Tap the **Remote device** tab at the top of the screen. All devices that you can receive media from are displayed.
2. Tap a device name. Media that you can receive from the other device is listed.
   - Tap an item that you want to stream to your phone.
3. Press ⏪ to return to the previous page.
**T-Mobile TV**

T-Mobile TV is an application that allows you to get live TV and Video on Demand.

1. From the Home screen, tap (Applications) ➔ (T-Mobile TV). The T-Mobile Terms and Conditions page displays.

   **Note:** A data plan is required to use this feature. Charges may apply. Please contact your service provider for further details.

2. Tap Accept if you accept the Terms and Conditions.
   – or –
   Tap Exit to close the application.

   **Note:** T-Mobile TV must be initialized over a cellular network before it can be used. During this initial registration process, any current Wi-Fi connections must be disabled.

3. Tap Disable Wi-Fi if you currently have an active Wi-Fi connection.

4. Tap Start Trial to begin a free 30-day trial of the service.
   – or –
   Tap Continue to keep viewing the free content or Purchase Options to buy the paid features.

5. Tap any of the following categories to begin viewing: Live TV, On Demand, My Media, More Info, Browse, or Live Channels.

**YouTube**

YouTube is a video sharing website on which users can upload and share videos, and view them in MPEG-4 format.

1. From the Home screen, tap (Applications) ➔ (YouTube).

2. When the screen loads you can begin searching and viewing posted videos.

3. Press ➔ Settings ➔ General ➔ High quality on mobile if you prefer high quality output.
Section 9: Applications and Development

This section contains a description of each application that is available in the Applications Menu, its function, and how to navigate through that particular application. If the application is already described in another section of this user manual, then a cross reference to that particular section is provided.

Tip: To open applications quickly, add the icons of frequently-used applications to one of the Home screens.

For more information, refer to “Customizing the Screens” on page 61.

You can also add an application icon as a Primary Shortcut that will display on all Home screens. If you add an application as a primary shortcut, the application icon will not be displayed in the Applications menu. For more information, refer to “Adding and Removing Primary Shortcuts” on page 63.

Applications

The Applications list provides quick access to all the available applications on the phone.

411 & More

Provides more than just single tap access to directory assistance and other portals. Available categories include: 411 Directory Assistance, Current Weather, and more.

1. From the Home screen, tap (Applications) ➔ (411 & More).

Access T-Mobile

This option provides you online access to account specific information such as your current activity, billing information, plan services, downloads, and other information.

**Note:** Wi-Fi connection must be disabled prior to use, this application requires use of a T-Mobile network connection.

1. From the Home screen, tap (Applications) ➔ (Access T-Mobile).
2. Scroll to the bottom of the application screen and select one of three available options:
   - **My Account** provides access to account-specific features such as: Bill Cycle start date, Usage, and Detailed usage information.
   - **Billing** provides details about your current billing summary.
   - **Plans & Services** provides about both your current plan, other available plans and other related services.
   - **Other T-Mobile Links** provides links to other T-Mobile related information.

   - **Settings & Support** provides access to Settings options (ex: My Downloads, MobileLife, More for Me Settings) and Terms & Condition information.

AllShare

This application wirelessly synchronizes your Samsung mobile phone with your TV, streams content and even keeps tabs on who calls or sends text messages with real-time, on-screen monitoring. Samsung’s AllShare makes staying connected easy.

Allows users to share their in-device media content with other external devices using DLNA certified™ (Digital Living Network Alliance) Devices. These external devices must also be DLNA-compliant. Wi-Fi capability can be provided to TVs via a digital multimedia streamer.

**Important!** You must activate Wi-Fi to use this application. For more information, refer to “Wi-Fi settings” on page 247.

1. From the Home screen, tap (Applications) ➔ (AllShare).
2. Follow the on-screen prompts.

For more information, refer to “AllShare” on page 184.
Amazon

This mobile application provides a user with access to the online Amazon website.

1. From the Home screen, tap (Applications) ➔ (Amazon).
2. Log in to the site and follow the on-screen instructions.

Bobsled Messaging

This mobile application makes it easy to stay in sync with individual friends or groups across devices, countries, and carriers.

1. From the Home screen, tap (Applications) ➔ (Bobsled Messaging).
2. Enter Bobsled username and password and tap Log in.
3. Follow the on-screen instructions.

For more information, refer to “Bobsled Messaging” on page 151.

Calculator

Using this feature allows you to use your device as a calculator. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division. You can also use this as a scientific calculator.

1. From the Home screen, tap (Applications) ➔ (Calculator).
2. Enter the first number using the numeric keys.
3. Enter the operation for your calculation by tapping the Plus, Minus, Multiplication, or Division key.
4. Enter the next number.
5. To view the result, tap the = (equals) key.
6. Repeat steps 1 to 4 as many times as required.

Note: Place the screen in Landscape mode to reveal additional scientific functions.
Calendar

With the Calendar feature, you can consult the calendar by day, week, or month, create events, and set an alarm to act as a reminder. Google Calendar is built into the phone and synchronizes both new and existing entries between your phone and your online Google account.

Important! You should previously add an account (Facebook, Microsoft Exchange ActiveSync, or Google) prior to using the Calendar.

> From the Home screen, tap (Applications) ➔ (Calendar).

For more information, refer to “Calendar” on page 242.

Camera

Use your 8.0 megapixel camera feature to produce photos in a JPEG format. The Camcorder shoots High Definition video in an MP4 format.

Note: A microSD card is no longer necessary before you take pictures or shoot video. It is recommended that you confirm your default storage location for images and videos.

> From the Home screen, tap (Applications) ➔ (Camera).

For more information, refer to “Using the Camera” on page 154.

Clock

Here you can set an Alarm, configure and view the World clock, use a Stopwatch, set a Timer, or use a Desk Clock. The applications display in a tabular format and quickly accessed with the touch of a finger.

> From the Home screen, tap (Applications) ➔ (Clock).

For more information, refer to “Clock” on page 244.
Contacts
The default storage location for saving phone numbers to your Contacts List is your phone’s built-in memory.

- From the Home screen, tap (Contacts).

For more information, refer to “Contacts List” on page 109.

Crayon Physics
This is a preloaded game that uses two-dimensional physics (including gravity, mass, kinetic energy and transfer of momentum) to guide a ball from a starting point so that it touches all of the stars placed on each level.

1. From the Home screen, tap (Applications) ➔ (Crayon physics).
2. Follow the on-screen instructions.

Downloads
Provides quick access to tabs containing a list of your current downloaded files (Internet and Other).

1. From the Home screen, tap (Applications) ➔ (Downloads).
2. Tap an available file category tab (Internet downloads or Other downloads) and select the desired file. Compatible document formats can be opened by Polaris Office (page 210).

Email
Email enables you to review and create email using most email services. The device alerts you when you receive an email message.

- From the Home screen, tap (Applications) ➔ (Email).

For more information, refer to “Email” on page 138.
**Gallery**

The Gallery is where you view photos and play back videos. For photos, you can also perform basic editing tasks, view a slideshow, set photos as wallpaper or caller image, and share as a picture message.

- From the Home screen, tap 📷 (Applications) ➔ 📸 (Gallery).

For more information, refer to “The Gallery” on page 169.

**Gmail**

Google Mail (Gmail) is a web-based email service. Gmail is configured when you first set up your phone. Depending on your synchronization settings, Gmail can automatically synchronize with your Gmail account on the web.

- From the Home screen, tap 📧 (Applications) ➔ 📧 (Gmail).

For more information, refer to “Using Google Mail” on page 148.

**Google +**

Google+ makes messaging and sharing with your friends a lot easier.

1. Sign on to your Google account. For more information, refer to “Creating a New Google Account” on page 21.

2. From the Home screen, tap 📩 ➔ ⌂ (Google+).

For more information, refer to “Google +” on page 150.

**Kies air**

Kies air allows you to sync your Windows PC wirelessly with your phone provided they are both on the same Wi-Fi network. You can view and share call logs, videos, photos, music, bookmarks, ringtones, and even send SMS messages from your PC.

- From the Home screen, tap 📲 (Applications) ➔ 🌐 (Kies air).

For more information, refer to “Kies Air” on page 235.
**Latitude**

Google Latitude allows you and your friends share locations and status messages with each other. It also lets you send instant messages and emails, make phone calls, and get directions to your friends’ locations.

---

**Important!** You must sign in to your Google account, enable Wi-Fi, and enable the Location feature before you can use this application. For more information, refer to “Wi-Fi settings” on page 247.

---

**Note:** Although you do not have to enable location services in order to use Latitude, it is recommended for best accuracy.

---

1. From the Home screen, tap (Applications) ➔ (Latitude).

**Important!** For best results, it is recommended that you enable all of your location services. For more information, refer to “Location Services” on page 275.

---

2. Tap Wi-Fi Disabled - Click to enable connection to navigate to the Wi-Fi Settings menu where you can turn on Wi-Fi if it is not already enabled. For more information, refer to “Wi-Fi” on page 236.

3. If prompted with the Improve My Location screen, tap Settings to configure the necessary settings or Skip to continue on without making a change.

4. Tap MAP VIEW to return to the main application.

---

**Sharing your Location with Friends**

1. Locate the map view, if not already displaying Latitude icon at the top right, tap the bottom-right arrow from (Maps) ➔ (Latitude) to display your Latitude friends. At first, only your name is displayed.

2. From the bottom of the Latitude map screen, tap FRIENDS LIST ➔ (Add friends).
   - or –
   Tap (Add friends).

3. Tap Select from Contacts or Add via email address.

4. Tap a contact or enter an email address, then tap Add friends.
5. Tap **Yes** at the **Send sharing requests** prompt. Your friend will receive an email or text message with your location marked on a map. They will also receive instructions on how to view your location from the web or use Latitude on their phone or tablet provided it is available. Once they acknowledge your request, their location will display on your device. They can share their location from their computer, phone, or tablet. For more information, go to [http://www.google.com/latitude](http://www.google.com/latitude).

6. To view the map, tap **MAP VIEW**.

**Latitude Options**

- From the Latitude map screen (is shown in the upper-left) display, select either:
  - **FRIENDS LIST**: allows you to access and edit your current Freinds list.
  - or –
  - From the Latitude map screen, press and select one of the following:
    - **Clear Map**: allows you to remove all markings and layers from the map.
    - **Search**: allows you to search for a place of interest.
    - **Directions**: displays navigation directions to a location from a starting point.
    - **Layers**: allows you to switch map views:
      - **Traffic**: (available only in selected areas) Real-time traffic conditions are displayed over roads as color-coded lines. Each color represents how fast the traffic is moving.
      - **Satellite**: Maps uses the same satellite data as Google Earth. Satellite images are not real-time. Google Earth acquires the best imagery available, most of which is approximately one to three years old.
      - **Terrain**: combines a topographical view of the area’s terrain with the current map location.
      - **Transit Lines**: displays the overlapping transit lines on your map.
      - **Latitude**: allows you to see your friend’s locations and share your location with them.
      - **My Maps**: displays a list of your preferred maps.
      - **Bicycling**: displays the overlapping cycling trails on your map.
      - **Wikipedia**: displays any Wikipedia markers and info on your map.
• **Settings:** allows you to select the following additional options:
  - **Display:** allows you to enable/disable the Zoom Buttons and Scale Bar.
  - **Cache:** allows you to set options to pre-fetch map tiles when not using Wi-Fi and to clear the cache that holds the map tiles.
  - **Location settings:** lets you access and configure the location settings.
  - **Labs:** this is a testing ground for experimental features that aren’t ready for primetime. They may change, break or disappear at any time. Click on a Lab to enable or disable it.
  - **What's New:** provides access to the Play Store from where you can update the application manually.
  - **About:** displays general information about Google maps such as Version, Platform, Locale, Total data sent, Total data received, Free memory, etc.
  - **Feedback:** allows you to provide application feedback.
  - **Terms, Privacy & Notices:** displays the Terms and Conditions, Privacy Policy, or Legal Notices information. Select the desired information from the pop-up menu.
• **Help:** provides help information.

---

**Lookout Security**

Lookout Security™ provides mobile device-specific security features that are coupled with a minimal performance hit. Lookout Mobile Security provides key security options that are unique to the mobile market. Along with the antivirus and anti-malware tech, there’s a lost and stolen phone locator service, an application privacy adviser, and a backup service.

1. From the Home screen, tap (Applications) ➔ (Lookout Security).
2. Read the on-screen descriptions and tap **Get started** to begin your configuration.
3. Read the on-screen information about Security and if desired, tap the **Enable Security** field to activate the feature.
4. Tap **Next**.
5. Read the on-screen information about Backup and if desired, tap the **Enable Backup** field to activate the feature.
6. Tap **Next**.
7. Read the on-screen information about the feature that can help locate your missing phone and if desired, tap **New user** (to setup a new account) or **Existing user** (to log into your account field to activate the feature).

8. Tap **Start Lookout**.

From the main application, the main features are presented as buttons. Tap one to reveal a button that will run the feature.

**Maps**

Google Maps allow you to track your current location, view real-time traffic issues, and view detailed destination directions. There is also a search tool included to help you locate places of interest or a specific address. You can view locations on a vector or aerial map, or you can view locations at the street level.

**Important!** Before using Google Maps you must have an active data (3G/4G) or Wi-Fi connection. The Maps application does not cover every country or city.

- From the Home screen, tap **Applications** → **Maps**.

---

For best results, it is recommended that you enable all of your location services. For more information, refer to **“Location Services”** on page 275.

---

**Enabling a Location source**

Before you use Google Maps and find your location or search for places of interest, you must enable a location source. To enable the location source you must enable the wireless network, or enable the GPS satellites.

**Important!** The more location determining functions are enabled, the more accurate the determination will be of your position.

1. Press **Settings** → **Location services**.
2. Tap **Google location services** allows apps to use data from sources such as Wi-Fi and mobile networks to provide a better approximation of your current location.
3. Tap **GPS satellites** to enable the GPS satellite.
Tip: When using Google Maps you can turn on Location and Google search. Enabling this feature allows you to locate places of interest at the street-level. However, this also requires a clear view of the sky and uses more battery power.

Opening Maps

1. From the Home screen, tap (Applications) ➔ (Maps).
2. Tap the upper-right My location button to find your location on the map with a blinking blue dot.
3. From the Map view ( appears in the upper-left) locate the bottom row of the buttons to access additional options:
   • Search: allows you to search for a place of interest.
   • Directions: displays navigation directions to a location from a starting point.
4. Places: provides access to the places menu where you can quickly locate a business or person, find out more information about a business, see coupons, public responses, and more (page 205). Locate and tap one of the listed places (Restaurants, Cafes, Bars, and Attractions).
5. Layers: allows you to switch map views:
   • Traffic: (available only in selected areas) Real-time traffic conditions are displayed over roads as color-coded lines. Each color represents how fast the traffic is moving.
   • Satellite: Maps uses the same satellite data as Google Earth. Satellite images are not real-time. Google Earth acquires the best imagery available, most of which is approximately one to three years old.
   • Terrain: combines a topographical view of the area’s terrain with the current map location.
   • Transit Lines: displays the overlapping transit lines on your map.
   • Latitude: allows you to see your friend’s locations and share your location with them.
   • My Maps: displays a list of your preferred maps.
   • Bicycling: displays the overlapping cycling trails on your map.
— **Wikipedia**: displays any Wikipedia markers and info on your map.

— or —

Press and select one of the following options:

- **Clear Map**: allows you to remove all markings and layers from the map.

- **Settings**: allows you to select the following additional options:
  - **Display**: allows you to enable/disable the Zoom Buttons and Scale Bar.
  - **Cache**: allows you to set options to pre-fetch map tiles when not using Wi-Fi and to clear the cache that holds the map tiles.
  - **Location settings**: lets you access and configure the location settings.
  - **Labs**: this is a testing ground for experimental features that aren’t ready for primetime. They may change, break or disappear at any time. Click on a Lab to enable or disable it.
  - **What’s New**: provides access to the Play Store from where you can update the application manually.
  - **About**: displays general information about Google maps such as Version, Platform, Locale, Total data sent, Total data received, Free memory, etc.
  - **Feedback**: allows you to provide application feedback.
  - **Terms, Privacy & Notices**: displays the Terms and Conditions, Privacy Policy, or Legal Notices information. Select the desired information from the pop-up menu.
  - **Help**: provides help information.

---

### Media Hub

- From the Home screen, tap (Applications) ➔ (Media Hub).

For more information, refer to “Media Hub” on page 172.

---

### Messenger

Messenger allows you to bring groups of friends together into a simple group conversation. When you get a new conversation in Messenger, Google+ sends an update to your phone.

1. Sign on to your Google account. For more information, refer to “Creating a New Google Account” on page 21.

2. From the Home screen, tap (Messenger).

   — or —

   From the Google+ application, select **Messenger**.

For more information, refer to “Messenger” on page 150.
Messaging
This application allows you to use the Short Message Service (SMS) to send and receive short text messages to and from other mobile phones.
You can also use the Multi Media Service (MMS) to create multimedia messages to send and receive from other mobile phones.

From the Home screen, tap (Applications) ➔ (Messaging).

For more information, refer to “Messages” on page 128.

Mini Diary
This application allows you to create a mini diary where you can add a photo, and text to describe an event or other memorable life event.

1. From the Home screen, tap (Applications) ➔ (Mini diary). Any diary entries display in a list.
2. If prompted, tap Yes to allow required network connectivity.
3. Tap the Tap to add photo field to add a photo for this diary event and touch the source. Selections are: Camera, Gallery, or S Memo.
4. Tap the Add location area of the screen, enter text, then tap Done.
5. Tap the Tap to add text area of the screen and enter text then tap Done.
6. Tap the weather data icon in the upper, right corner (above the photo) and select a weather condition from the list to describe the weather conditions for this entry.
7. Tap Save.

Mini Diary settings
1. From the Home screen, tap (Applications) ➔ (Mini Diary).
2. From the main Diary listings page, press and then tap Settings.
3. Tap Auto update if you want the settings to automatically update.

Deleting a Mini Diary entry
1. From the Home screen, tap (Applications) ➔ (Mini Diary).
2. Press and then tap Delete all.
**Mini Diary options**

1. From the Home screen, tap ☻ (Applications) ➔ ☘ (Mini Diary).
2. Select a diary entry.
3. Press ⇔ and select one of the following options:
   - *Create*: creates a new diary entry.
   - *Delete*: deletes the displayed entry.
   - *Go to*: provides access to a calendar.
   - *Change photo*: replaces the photo in this entry by allowing you to take another photo or use another image.
   - *Delete photo*: deletes the photo from this entry when you touch Yes to confirm.
   - *Publish*: allows you to post the new diary entry to an SNS service such as Facebook.
   - *Send via*: to deliver the entry via either Email or Messaging.

**Mobile HotSpot**

Provides access to the Tethering and portable HotSpot menu where you can use either the USB tethering or portable HotSpot functionality.

1. From the Home screen, tap ☻ (Applications) ➔ ☘ (Mobile HotSpot).
2. Activate the desired connection method.

For more information see either see “USB Tethering” on page 238 or see “Mobile HotSpot” on page 239.
Music player

This application allows you to play music files that you have stored on your microSD card. You can also create playlists.

- From the Home screen, tap (Applications) ➔ (Music player).

For more information, refer to “Music Player” on page 181.

My Files

Organize and store data, images, and more in your own personal file folders. Files are stored to the memory card in separate (user defined) folders.

My files allows you to manage your sounds, images, videos, bluetooth files, Android files, and other memory card data in one convenient location. This application allows you to launch a file if the associated application is already on your phone (ex: MP4).

- From the Home screen, tap (Applications) ➔ (My files).

Note: Navigation in this viewer works on a hierarchy structure with folders, subfolders, etc.

Note: The application lets you view supported image files and text files on both your internal storage and microSD card.

Opening and Navigating within Files

DCIM is the default location for pictures or video taken by the device. These files are actually stored in the DCIM folder location.

1. From the Home screen, tap (Applications) ➔ (My files).

2. Tap a folder and scroll down or up until you locate your selected file.
   - Up tab allows you to back up into a higher directory.
   - Home tab allows you to back up to the root directory.
   - Press and then tap View by to change the way the files are displayed on-screen. Choose from: List, List and details, or Thumbnail.
   - Press for these additional options: Share, Create folder, Delete, View by, List by, Move, Copy, Rename, and Settings.
3. Once you have located your file, tap the file name to launch the associated application.

**Navigation**

Google Maps Navigation (Beta) is an Internet-connected turn-by-turn, GPS navigation system with voice guidance.

---

**Caution!** Traffic data is not real-time and directions may be wrong, dangerous, prohibited, or involve ferries.

---

**Important!** To receive better GPS signals, avoid using your device in the following conditions:
- inside a building or between buildings
- in a tunnel or underground passage
- in poor weather
- around high-voltage or electromagnetic fields
- in a vehicle with tinted windows

---

1. Press 🏛 ➔ and then tap 🛠️ ➔ Settings ➔ Location services.
2. Tap Google location services allows apps to use data from sources such as Wi-Fi and mobile networks to provide a better approximation of your current location.
3. Tap GPS satellites to enable the GPS satellite.

Tip: When using Google Maps you can turn on Location and Google search. Enabling this feature allows you to locate places of interest at the street-level. However, this also requires a clear view of the sky and uses more battery power.

---

**Navigation options**

1. From the Home screen, tap 🛋️ (Applications) ➔ 🛈 (Navigation). The navigation application can be configured from the main screen.
2. If prompted, read the on-screen disclaimer and tap Accept.
3. Choose from the following on-screen options:
Driving/Walking: tap to configure the method of travel. Selection of Walking would negate the need to track traffic jams and obstructions.

— Driving mode enables the Settings feature: allows you to configure your Route options such as: Avoid highways or Avoid tolls.

Maps: enables the on-screen real-time map functionality.

Speak Destination: allows you to use the voice recognition feature to search for matching locations in your area.

Type Destination: allows you to manually enter a destination address (via the on-screen keypad).

Contacts: allows you to receive turn-by-turn directions to the address stored for a selected Contacts entry.

Starred places: allows you to obtain directions to locations that have been starred within Google maps (maps.google.com).

Navigation Map options

Once on the map screen, you can access the following features:

— Destination: returns you to the previous Navigation options screen.

— Search by voice: Speak your destination instead of typing.

— Layers: allows you to switch map views:
  • Traffic view: (available only in selected areas) Real-time traffic conditions are displayed over roads as color-coded lines. Each color represents how fast the traffic is moving.
  • Satellite: Maps uses the same satellite data as Google Earth. Satellite images are not real-time. Google Earth acquires the best imagery available, most of which is approximately one to three years old.
  • Parking: displays parking information relative to your current location.
  • Gas Stations: displays gas station location relative to your current location.
  • ATMs & Banks: displays ATM and Bank locations relative to your current location.
• **Restaurants**: displays restaurant and eatery locations relative to your current location.

While on the map screen, press 🗺 to access additional options:
- **Exit navigation**: terminates the application.
- **Mute**: allows you to mute the audio readout and directional information.
- **Set destination**: returns you to the navigation options screen where you can access a destination by either Speaking, Typing, or selecting from a Contacts entry or Starred Place.
- **Search**: manually search for a destination address, place, name of business, or even a type of business.
- **Layers**: allows you to switch map views. See previous description.
- **Help**: provides on-screen help.
- **Settings**: provides access to both Power settings (Screen dimming) and Information (Terms, privacy & notices).

### News & Weather

The News & Weather application allows you to view the news and weather in your area.

1. From the Home screen, tap 📢 (Applications) ➔ 📰 (News & Weather).
2. Select from any of the available tabs: WEATHER, TOP STORIES, U.S., SPORTS, and ENTERTAINMENT.
3. Tap the temperature to display a graph mapping the days temperature and humidity.
4. While on the Weather screen, press 🗺 to display the following options:
   - **Refresh**: allows you to refresh the screen. Your location and the weather is updated if there have been any changes.
   - **Settings**: allows you to set weather, news, and refresh settings.
     - **Weather settings**: allows you to choose location(s) and set the metric for temperature displays.
     - **News settings**: allows you to choose topics, configure settings for fetching articles and images, and view the terms of service for news service.
     - **Refresh settings**: allows you to choose options for updating content.
— **Application version**: displays the application version number.

To access the settings:

1. Press 📢 and then tap **Settings**.

### Photo Editor

This application provides basic editing functions for pictures that you take on your phone. Along with basic image tuning like brightness, contrast, and color it also provides a wide variety of effects used for editing the picture.

- From the Home screen, tap 📡 (Applications) ➔ 📸 (Photo editor).

For more information, refer to “Photo Editor” on page 167.

---

### Places

Google Places displays company logos on a layer of Google Maps. When viewing an area you can quickly locate a business or person, find out more information about the business, see coupons, public responses, and more.

1. From the Home screen, tap 📡 (Applications) ➔ 📍 (Places).
2. Tap 🔍 (Search) and then use the **Search Maps** field to manually enter a desired place or choose from among the various categories. Matches are filtered by those closest to your current location.
3. Locate and tap one of the listed places (Restaurants, Cafes, Bars, Attractions, [user added searches], or IN THIS AREA) A list of places within this category displays.
4. Tap the Maps icon to launch the related maps feature.
5. Press 📢 and then tap **Add a search**. The functions adds additional search shortcuts to the places screen.
**Play Books**

Formerly known as Google Books, this application allows you to read over 3 million ebooks on the go.

Build your ebooks library in the cloud with Play Books: jump right into a bestseller or select from nearly 3 million free ebooks. Personalize the reader to your liking, pick up reading where you left off on your phone or computer, and settle down with a great book on your Android phone!

1. From the Home screen, tap 📍 (Applications) ➔ 📚 (Play Books).
2. If prompted, tap Turn sync on. This synchronizes your books you have previously selected between your Books account and your device.
3. Tap 🔍 to begin searching for both free and paid ebooks.
4. Follow the on-screen prompts to download the ebook to your device.

**Play Movies**

This application allows you to connect to the Play Store, download a movie and then watch it instantly.

Learn more about Google Play Movies at: [http://play.google.com/about/movies](http://play.google.com/about/movies).

- From the Home screen, tap 📽️ (Applications) ➔ 🎥 (Play Movies). A list of videos sorted on the SD card displays in the Video list.

For more information, refer to “Play Movies” on page 175.

**Play Music**

Also known as Google Music, allows you to browse, shop, and playback songs purchased from the Android Market. The music you choose is automatically stored in your Google Music library and instantly ready to play or download.

- From the Home screen, tap 🎵 (Applications) ➔ 🎧 (Music).

For more information, refer to “Play Music” on page 176.
Play Store
Formerly known as the “Android Market”, this application provides access to downloadable applications and games to install on your phone. The Play Store also allows you to provide feedback and comments about an application, or flag an application that might be incompatible with your phone. Before using the Play Store, you must have a Google Account.

Accessing the Play Store
1. From the Home screen, tap (Applications) ➔ (Play Store).
2. If not already logged in with your Google account, tap Next.
3. Tap Sign in and enter your Google account information.
4. Tap Accept to agree to the Play Store terms of service.

For more information, refer to “Downloading a New Google Application” on page 207.

Downloading a New Google Application
To download a new application, you will need to use your Google account to sign in to the Play Store. The home page provides several ways to find applications. The home page features applications and includes a list of item applications by category, a list of games, a link to search, and a link to My apps.

1. From the Home screen, tap (Applications) ➔ (Play Store).
2. Browse through the categories, find an application you're interested in, and tap the name.
3. Read the application descriptions.
Important! If the selected application requires access to data or control of a function on your device, the Play Store displays the information the application will access.
Tap OK if you agree to the conditions of the application. Once you tap OK on this screen you are responsible for using this application on the device and the amount of data it uses. Use this feature with caution.

4. Tap Install ➔ Accept & download.

Note: Use caution with applications which request access to any personal data, functions, or significant amounts of data usage times.

5. If prompted, follow the on-screen instructions to pay for the application.

6. Check the progress of the current download by opening the Notifications panel. The content download icon appears in the notification area of the status bar.

7. On the main Play Store screen, press and then tap My Apps, tap an installed application in the list, and then tap Open.

Tip: The newly downloaded applications display in the applications list and are shown in alphabetical order if the View Type is set to Alphabetical grid or Alphabetical list, or at the end of the list if View type is set to Customizable grid.

Note: A data plan is required to use this feature. Charges may apply. Please contact your service provider for further details.

Launching an Installed Google Application

1. From the Home screen, tap (Applications).

2. Tap the newly installed application. This application is typically located on the last Applications page.
**Unknown sources**

This feature can be used for Android application development. The feature allows developers to install non-Play Store applications.

- Press 🏛️ → 📱 and then tap **Settings** → **Security** → **Unknown sources**.

Unknown sources displays a check mark to indicate it is active.

**Note:** If Unknown sources is disabled, those applications without a certificate will not be allowed to download to your device.

**Manage applications**

This feature allows you to manage and remove installed applications. You can also view the amount of memory or resources used as well as the remaining memory and resources for each of the applications on your device and clear the data, cache, or defaults.

- Press 🏛️ → 📱 and then tap **Settings** → **Applications**.

**Clearing application cache and data**

1. Press 🏛️ → 📱 and then tap **Settings** → **Applications**.
2. Tap an application in which to clear the cache or data.
3. Tap **Force stop**, **Clear data**, **Clear cache**, or **Clear defaults**.

**Uninstalling third-party applications**

You can uninstall any application you downloaded and installed from the Play Store.

1. Press 🏛️ → 📱 and then tap **Settings** → **Applications**.
2. Tap the third-party application, and from the **Application info** screen, tap **Uninstall**.

**Moving Third-party Applications to your SD Card**

Your device’s built in memory is augmented by using a microSD card to store additional data. When the device’s built-in memory capacity is reached, it can be possible to move some applications over to the internal microSD card. Freeing up memory space on the device can help avoid any sluggish performance when the device has to work harder to manage memory resources.
Important! Only certain downloaded applications are capable of being moved from device to card.

1. Press and then tap Settings \rightarrow Applications.
2. Tap the Downloaded tab and select your desired application.
3. Tap Move to SD card (from within the Storage section of the App info page).

Once the application has been moved to the microSD card, this button now reads “Move to phone”.

Polaris Office

Polaris Office Mobile for Android is a Microsoft Office compatible office suite. This application provides a central place for managing your documents online or offline.

The application can also open Adobe PDF (Portable Document Format) files.

1. From the Home screen, tap (Applications) \rightarrow (Polaris Office).
2. Read the registration information and enter your Name and Email information (if desired).
3. Tap Later to ignore this registration or Register to complete the process.
4. On its initial launch, tap an available tab:
   - **New**: creates a new office document.
   - **My Files**: This is where you keep your documents on this device. You can manage documents, or send them to others, and upload the documents.
   - **Recent documents**: provides a list of recently opened documents.
   - **Web files**: This provides your online storage information at Box.net. You can also share your documents to others without using email attachments.
   - **Search**: allows you to search for document files by using a text string.

Pro Apps

Provides access to compatible productivity tools. These productivity packs can be accessed from anywhere.

**Note:** Access to these applications and packs requires you have an active Google account and are logged in prior to connection.
From the Home screen, tap (Applications) → (Pro Apps).

Select an application and follow the on-screen download and installation instructions.

**S Memo**

The S Memo application allows you to create memos using the keypad or S Pen. You can add images, voice recordings, and text all in one place.

**Creating a New Memo**

1. From the Home screen, tap (Applications) → (S Memo). The S Memo screen is displayed.
2. Tap an existing Memo to open it then tap the screen to enter edit mode.
   - or –
   Tap [+] to start a new memo in text mode with the keypad displayed or tap [+] to start a new memo in drawing mode using your finger or a compatible on-screen writing tool. You can change back and forth in a memo to add text with the keypad and the pen.

Note: If you delete the S Memo shortcut from any screen, you can still access the application by tapping (Applications) → (S Memo).

<table>
<thead>
<tr>
<th>Toolbar</th>
<th>Secondary Toolbar</th>
</tr>
</thead>
<tbody>
<tr>
<td>Show/Hide</td>
<td>Writing modes</td>
</tr>
<tr>

<td></td>
</tr>
</tbody>
</table>

The icons that you see displayed on the screen are described in the following table:
3. Press to access the following options:

Note: Depending on whether you have saved the memo, are in keypad mode, or in handwriting mode, the options will appear differently. The following is a list of the options you may see.

- **Save as**: allows you to change the current memo title.
- **Share via**: allows you to share your memo using Bluetooth, Bobsled Messaging, Wi-Fi Direct, Picasa, Messaging, Photo editor, Google+, Social Hub, Email, or Gmail.
- **Handwriting-to-text**: allows you to transcribe handwriting into text.
• **Add tag:** allows you to set tags to add in searches.
• **Link to S Planner:** allows you to link the memo to your S Planner.
• **Export:** allows you to save the memo to your Gallery or as a PDF.
• **Change background:** allows you to set the background for your memo. Swipe the screen to the left or right to select a background and then tap Set skin.
• **Lock:** allows you to lock an email by using a PIN number.
• **Print:** allows you to print the screen or web page on a Samsung printer using Wi-Fi.
• **Set as:** allows you to set a memo as a contact icon, Home screen wallpaper, Lock screen wallpaper, or a widget.

When you are finished creating your memo, tap Save on the top menu bar.

---

**S Note**

Use S Note to create notes with productivity tools that turn handwriting into typed text and correct drawn shapes, lines, and formulas to make them perfect.

1. From the Home screen, tap (Applications) ➔ (S Note).
2. Tap OK to remove the Learn about application pop-up.

**Tip:** Tap Menu ➔ Tutorial from the main S Note screen to learn more about the application.
**Samsung Apps**

Allows you to easily download an abundance of applications to your device. This includes games, news, reference, social networking, navigation, and more. Samsung Apps makes your device smarter.

**Note:** Access to this feature requires that you already be logged in to your Samsung account application. For more information, refer to “Creating a Samsung Account” on page 19.

1. From the Home screen, tap (Applications) ➔ (Samsung Apps).
2. If prompted, read the on-screen disclaimer and agree to the information.
3. Follow the on-screen instructions.

---

**Search**

Use “Google Search to search the Web.

- From the Home screen, tap (Applications) ➔ (Search) and enter the search text.
  - or –
  Tap on the Google Search bar and say the search information.

**Settings**

This icon navigates to the sound and phone settings for your phone. It includes such settings as: display, security, memory, and any extra settings associated with your phone.

- From the Home screen, tap (Applications) ➔ (Settings).
  - or –
  Press ➔ and then tap Settings.

For more information, refer to “Changing Your Settings” on page 247.
Slacker Radio
This application offers free, Internet radio for mobile phones.

1. From the Home screen, tap \( \text{(Applications)} \rightarrow \text{(Slacker Radio)} \).

**Important!** You must register and create a free account prior to using this service.

2. If prompted, enter your Email address and password.
   – or –
   Tap **Create Account** if you have not created an account.

3. Begin selecting the music you want to listen to.

Social Hub
Allows you to easily and intuitively satisfy all of your communication needs from within a single-user interface. E-mails, instant messaging, social network contents, and calendar contents from all major service providers are available.

1. From the Home screen, tap \( \text{(Applications)} \rightarrow \text{(Social Hub)} \). The Welcome to Social Hub page describes all of the available features.

2. Tap **Setup now** to setup your Social Hub account.

3. Tap on an account type that you would like to setup. Choose from either email accounts, SNS accounts, or other IM accounts.

4. If you choose an SNS account, read the SNS disclaimer, tap the **I accept all the terms above** checkbox, then tap **Agree** to continue.

5. Tap **Next**.

6. Follow the on-screen instructions for adding an account.
7. From the Social Hub main screen, tap the Feeds or Messages tabs to see information pertaining to your account.

8. To add another account, press ➔ Add account.

**T-Mobile Name ID**

Allows you to modify the on-screen Caller ID information. Name ID identifies unknown callers by Name, City, and State.

1. From the Home screen, tap (Applications) ➔ (T-Mobile Name ID).

2. Choose an on-screen option.

**T-Mobile TV**

T-Mobile TV is an application that allows you to get live TV and Video on Demand.

1. From the Home screen, tap (Applications) ➔ (T-Mobile TV).

For more information, refer to “T-Mobile TV” on page 186.

---

**Talk**

You can instant message with Google Talk. Google Talk allows you to communicate with other people who are also connected with Google Talk on the phone or on the web.

1. From the Home screen, tap (Applications) ➔ (Talk).

For more information, refer to “Google Talk” on page 150.

**Task Manager**

Sometimes your phone might seem to slow down over time, and the biggest reason for this are background applications. These are applications that were not properly closed or shutdown and are still active but minimized. The Task Manager not only lets you see which of these applications are still active in the background but also easily lets you choose which applications are left running and which are closed.
**Shutting Down Applications**

- From the Home screen, tap ☰️ (Applications) ➔ (Task manager).

  – or –

  Press and hold ☰️ then tap Task manager. This screen contains the following tabs:

  - **Active applications** display those currently active applications running on your phone.
  - **Downloaded** displays any installed packages or applications from the Market that are taking up memory space. Tap Uninstall to remove them from your phone.
  - **RAM**, displays the amount of current RAM (Random Access Memory) currently being used and allow you to Clear memory.
  - **Storage** displays a visual graph indicating the available and used space within the System storage location, USB storage, and SD card location.
  - **Help** provides additional battery saving techniques.

3. From the **Active applications** tab, tap Exit to close selected applications or tap Exit all to close all background running applications.

**TeleNav GPS**

TeleNav GPS Navigator is a driving aid that uses both audible and visual directions for GPS navigation.

1. From the Home screen, tap ☰️ (Applications) ➔ (TeleNav GPS).

2. If prompted, read the GPS Settings notification, tap GPS Settings button and follow the on-screen prompts to enable the necessary GPS location feature.

3. Read the agreement and tap Accept to accept the terms, or tap Exit to close the window. Wait for the application to load required first-time use files.

4. If prompted, select to either Upgrade to Premium (first 30 days or with Annual Plan) or use the Use Basic Navigation at no charge.

5. Use the available on-screen functions.
**Video Player**

The Video Player application plays video files stored on your microSD card.

1. From the Home screen, tap 🎥 (Applications) ➔ 🎬 (Video player).

For more information, refer to “Using the Video Player” on page 170.

**Visual Voicemail**

Visual Voicemail enables users to view a list of people who left a voicemail message, and listen to any message they want without being limited to chronological order.

1. From the Home screen, tap 🎥 (Applications) ➔ 💬 (Visual Voicemail).

For more information, refer to “Visual Voicemail” on page 24.

**Voice Recorder**

The Voice Recorder allows you to record an audio file up to one minute long and then immediately send it as a message.

1. From the Home screen, tap 🎥 (Applications) ➔ 🎬 (Voice Recorder).
2. Tap **Record** icon to record an audio file.
3. Tap **Stop** to stop recording. The file automatically saves to the Voice list.
4. From the Recorded files page, press 📞 and then tap **Share** and select a method in which to share this audio file. Selections are: Bluetooth, Email, Gmail, Messaging, or Wi-Fi Direct. Refer to each specific section, depending on the method you selected to send this voice recording.
Voice Talk

Launches your phone’s built-in voice recognition system that allows you to initiate several common tasks without having to touch the phone. Features include: Call, Message, Search, Memo, Schedule, Social update, Music, Navigate, or Open app.

- From the Home screen, tap (Applications) ➔ (Voice Talk).

For more information, refer to “Using Voice Talk” on page 78.

Web

Open the browser to start surfing the Web. The browser is fully optimized and comes with advanced functionality to enhance the Internet browsing feature on your phone.

- From the Home screen, tap (Applications) ➔ (Web).

For more information, refer to “Web” on page 221.

YouTube

YouTube is a video sharing website on which users can upload and share videos, and view them in MPEG-4 format.

1. From the Home screen, tap (Applications) ➔ (YouTube).

2. When the screen loads you can begin searching and viewing posted videos.

To configure YouTube Settings:

- Press and then tap Settings and configure the following parameters:
  - General
    - High quality on mobile, when enabled, allows you to start all videos in high quality mode while you are connected to a mobile network.
    - Caption font size allows you to set the font size used by on-screen captions. Choose from: Small, Medium, Large, or Huge.
    - Uploads specifies network preferences for uploads.
• Search
  — Clear search history allows you to clear previous YouTube searches from showing up in the YouTube search box.
  — SafeSearch filtering allows you to configure block settings for videos containing restricted content. This option blocks these videos from appearing within your search results. Choose from: Don’t filter, Moderate, or Strict blocking.

• About
  — Help provides answers to most YouTube questions.
  — Feedback allows you to provide user feedback to YouTube.
  — Google Mobile Terms of Service
  — YouTube Terms of Service
  — Google Mobile Privacy Policy
  — YouTube Privacy Policy
  — Open source licenses
  — App version displays the software version for the current YouTube application.

To watch a high quality video:
  ▶ Press and then tap Settings ➔ General ➔ High quality on mobile.

Zinio
Launches a digital magazine reader. Zinio has transformed your favorite print magazines into digital format.

  1. From the Home screen, tap (Applications) ➔ (Zinio).
  2. Tap sign in if you already have an account or tap create an account to continue.
  3. Follow the on-screen prompts.
Section 10: Connections

Your device is equipped with features that allow you to quickly connect to the Web.

Web

Your device is equipped with a Google browser to navigate the mobile Web. This section explains how to navigate the browser and use the basic features.

Accessing the Internet

To access the Browser:

- From the Home screen, tap (Applications) → (Web).

Note: You must disable your Wi-Fi connection if you wish to view the web2go® home page (http://home.web2go.com/).

Homepage

When you access the Browser, the web2go home page displays the following topics:

- **Google Search**: allows you to quickly search for online topics using the Google search engine.
- **Advertisement**: provides an on-screen scroll of today’s top stories.
- **Quick Links**: provides a series of application shortcuts. These shortcuts can be edit and managed.
- **Today**: provides an on-screen display of today’s top news and entertainment stories.
- **Recommended for you**: provides a series of applications that are compatible with your device and current top stories that might be interesting for you to read.
- **Hot Trends**: provides an on-screen list of today’s hot trends on movies, music, etc..
- **Weather**: displays current Weather information. These entries can be edit and configured.
- **Headlines**: displays current headline information. These entries can be edit and configured.
- **Directory**: provides access to additional directory service from: Sports, T-Mobile Services, Social/Chat, CNN News, Weather, and Entertainment.
Navigating with the Browser
1. To select an item, tap an entry.
2. To scroll through a website, sweep the screen with your finger in an up or down motion.
3. To return to the previous page, press 🔄.

Browser Options
1. From the top of the browser screen, select one of the three available options:
   - **Refresh**: reloads the current page.
   - **Bookmarks**: provides access to the Bookmarks screen.
   - **Windows**: displays a list of the windows you have open.
   
   – or –

   From the home page, press 🔄 to access the following options:
   - **Forward**: forwards the browser to another web page.
   - **New window**: launches a new Web page in a new window.
   - **Add bookmark**: allows you to add a URL to your bookmark list.
   - **Add shortcut to home**: adds a shortcut of the current page to your Home page.
   - **Share page**: allows you to share the page using Gmail or as a message.
   - **Find on page**: allows you to search in the current page.
   - **Desktop view**: allows you to assign the browser to display the current page in the desktop view (to closely mimic the display as it would appear on a Desktop computer).
   - **Save for offline reading**: allows you to store the current page in memory so that it can be read later even if you loose your Internet connection.
   - **Brightness and color**: allows you to manually adjust the screen brightness and set one of four available color levels associated with different power saving profiles. The higher the power saving level, the less intense the on-screen color saturation.

   **Note**: If the Automatic brightness feature is enabled (Settings ➔ Display ➔ Brightness), you can not modify the browser’s brightness setting.

   - **Downloads**: displays the download history.
   - **Print**: provides print access on compatible Samsung printers.
• **Settings**: allows you to change the way you view your web pages by changing these options. See “Browser Settings” on page 226.

**Entering a URL**

You can access a website quickly by entering the URL. Websites are optimized for viewing on your phone.

**To enter a URL and go to a particular website:**

- From the web2go homepage tap the **URL** field at the top of the screen, enter the URL and tap **[Search]**.

**Note**: This is not the same application as the Google Search Widget. The web2go screen can not be accessed via a Wi-Fi connection.

**Search the Internet**

**To perform an Internet search using keywords:**

1. From within the Google search application, tap the **Google** search field, enter the keyword(s) to search using the on-screen keypad.
2. Tap **[ ]** from the list of search results that are displayed.
3. Tap a link to view the website.

**Adding and Deleting Windows**

You can have up to eight Internet windows open at one time.

**To add a new window:**

1. From your browser window, tap **[ ]** (Windows) ➔ **[ ]** (New window). A new browser window displays.

**Note**: The number of currently open windows is displayed at the bottom of the Windows screen.

2. Scroll across the screen to view the currently active windows and tap an entry to launch the selected Internet window.

**To delete an existing window:**

1. From your browser window, tap **[ ]** (Windows).
2. Scroll across the available windows and locate your target window.
3. Tap **[ ]** next to the listing to delete the window.
Going Incognito

The incognito feature allows you to view Internet sites outside of the normal browsing. Pages viewed in this incognito window won’t appear within your browser history or search history, and no traces (such as cookies) are left on your device.

**Note:** Any downloaded files will be preserved and will stay on your device after you exit the incognito mode.

---

To add a new incognito window:

1. From your browser window, tap (Windows) ➔ (Incognito).
2. A new browser window displays.

**Note:** The incognito icon appears in the upper-left of the new browser window while you are in this mode.

---

To exit from the incognito window:

1. From your browser window, tap (Windows) ➔ (New window).
2. Scroll across the available windows and locate the incognito window.
3. Tap next to the incognito listing to delete this window.

---

Using Bookmarks

While navigating a website, you can bookmark a site to quickly and easily access it at a future time. The URLs (website addresses) of the bookmarked sites display in the Bookmarks page. From the Bookmarks page you can also view your Most visited websites and view your History.

1. From the webpage, tap . The Bookmarks page displays. Additional pages include History and Saved pages.
2. Press to display the following options:
   - **List/Thumbnail view:** Select Thumbnail view (default) to view a thumbnail of the webpage with the name listed, or select List view to view a list of the bookmarks with Name and URL listed.
   - **Create folder:** Creates a new folder in which to store new bookmarks.
   - **Change order:** Rearranges the current bookmarks.
   - **Move to folder:** Selected bookmarks are moved to a selected folder.
   - **Delete:** Erases selected bookmarks.
3. Tap a bookmark to view the webpage, or touch and hold a bookmark for the following options:

- **Open**: Opens the webpage of the selected bookmark.
- **Open in new window**: Opens the webpage in a new window.
- **Edit bookmark**: Allows you to edit the name or URL of the bookmark. For more information, refer to “Editing Bookmarks” on page 225.
- **Add shortcut to Home**: Adds a shortcut to the bookmarked webpage to your phone’s Home screen.
- **Share link**: Allows you to share a URL address via Bluetooth, Email, Gmail, Google+, Messaging, S Memo, Social Hub, or Wi-Fi Direct.
- **Copy link URL**: Allows you to copy the URL address to use in a message.
- **Delete bookmark**: Allows you to delete a bookmark. For more information, refer to “Deleting Bookmarks” on page 225.
- **Set as homepage**: Sets the bookmark to your new homepage.

### Adding Bookmarks

1. From the Home webpage, tap 🌟 → Add bookmark.
2. Use the on-screen keypad to enter the name of the bookmark and the URL.
3. Assign a folder location. **Home** is the default.
4. Tap Save. The new save page now appears on the Bookmarks page.

### Editing Bookmarks

1. From the Bookmarks page, touch and hold the bookmark you want to edit.
2. Tap Edit bookmark.
3. Use the on-screen keypad to edit the name of the bookmark or the URL.
4. Tap Save or Cancel to exit the operation.

### Deleting Bookmarks

1. From the Bookmarks page, touch and hold the bookmark you want to delete.
2. Tap Delete bookmark.
3. At the confirmation window, tap OK.
Emptying the Cookies
A cookie is a small file placed on your phone by a website during navigation. In addition to containing some site-specific information, a cookie can also contain some personal information (such as a username and password) which might pose a security risk if not properly managed. You can clear these cookies from your phone at any time.

1. From an active Web page, press and then tap Settings ➔ Privacy and security ➔ Clear all cookie data.
2. Tap OK to delete the cookies or tap Cancel to exit.

Using Web History
The History list displays a list of the most recently viewed websites. These entries can be used to return to previously unmarked web pages.

1. From the Home webpage, tap ➔ History tab.
2. Select a visited range category. Choose from: Today, Yesterday, or Most visited.
3. Tap an entry to display the webpage.
   – or –
   Press and then tap Clear history to delete the current History list.

Using Most Visited
The Most visited list provides you with a list of the most visited and bookmarked websites. These entries are used to return to previously unmarked web pages.

1. From the Home webpage, tap ➔ History ➔ Most visited tab.
   A list of your most frequently visited webpages displays. The most frequently visited web pages display at the top of the list.
2. Tap any entry to display the selected webpage.

Browser Settings
To configure browser settings:

1. From the Home screen, tap (Applications) ➔ (Web).
2. Press and then tap Settings.
3. Choose an option from the following categories:
   General:
   • Set home page: Sets the current home page for the Web browser.
   • Form auto-fill: Allows you to fill in Web forms with a single tap.
Auto-fill text: Allows you to set the text used for the Web form auto-fill feature.

Privacy and security:
- **Clear cache**: Deletes all currently cached data. Tap OK to complete the process.
- **Clear history**: Clears the browser navigation history. Tap OK to complete the process.
- **Show security warnings**: Notifies you if there is a security issue with the current website. Remove the check mark to disable this function.
- **Accept cookies**: Allows sites, that require cookies, to save and read cookies from your device.
- **Clear all cookie data**: Deletes all current browser cookie files.
- **Remember form data**: Allows the device to store data from any previously filled out forms. Remove the check mark to disable this function.
- **Clear form data**: Deletes any stored data from previously filled out forms. Tap OK to complete the process.
- **Enable location**: Allows websites to request access to your location.
- **Clear location access**: Clears location access for all websites. Tap OK to complete the process.
- **Remember passwords**: Stores usernames and passwords for visited sites. Remove the check mark to disable this function.
- **Clear passwords**: Deletes any previously stored usernames or passwords. Tap OK to complete the process.

Accessibility:
- **Force zoom**: Allows you to override a website's zoom setting and forces a zoom view.
- **Text size**: Allows you to manually adjust the size of the on-screen text size, double-tap zoom, and minimum font size via the use of an on-screen slider.
- **Inverted rendering**: Allows you to adjust the way a Web page is displayed to make it easier to view or read. Enabling this feature causes a page to rendered in reverse - Black becomes white and vice versa. On-screen white text is displayed as white text on a black background.
- **Contrast**: Allows you to adjust the on-screen contrast.

Note: The Contrast feature is disabled until the Inverted rendering function is active.
Advanced:

- **Select search engine**: Allows you to choose a default search engine for your phone. Choose from: Google, Yahoo!, or Bing.
- **Open in background**: New pages are launched in a separate page and displayed behind the current one. Remove the check mark to disable this function.
- **Enable JavaScript**: Enables javascript for the current Web page. Without this feature, some pages may not display properly. Remove the check mark to disable this function.
- **Enable plug-ins**: Allows the download of plug-ins such as Adobe Flash.
- **Default storage**: Sets the default storage to Memory card.
- **Website settings**: View advanced settings for individual websites.
- **Default zoom**: Adjusts the zoom feature. Set to Far, Medium, or Close.
- **Open pages in overview**: Displays an overview of recently viewed web pages.
- **Auto-fit pages**: Allows web pages to be resized to fit as much of the screen as possible.
- **Block pop-ups**: Prevents popup advertisement or windows from appearing on-screen. Remove the check mark to disable this function.
- **Text encoding**: Adjusts the current text encoding.
- **Reset to default**: Clears all browser data and resets all settings to default.

Bandwidth management:

- **Preload search results**: Allows the browser to preload high confidence search results in the background. If the device can accurately guess your in progress search, it will preempt you by beginning to load the matching Web page before you complete the search request.
- **Load images**: Allows web page images to load along with the other text components of a loaded website.

Labs:

- **Quick controls**: allows you to enable on-screen quick controls via the use of Swype thumb actions.
- **Full screen**: Allows Web pages to be resized to fit as much of the screen as possible.
Bluetooth

About Bluetooth

Bluetooth is a short-range communications technology that allows you to connect wirelessly to a number of Bluetooth devices, such as headsets and hands-free car kits, and Bluetooth-enabled handhelds, computers, printers, and wireless devices. The Bluetooth communication range is usually up to approximately 30 feet.

Turning Bluetooth On and Off

To turn Bluetooth on:
1. Press ➔ and then tap Settings.
2. In a single motion touch and slide the Bluetooth slider to the right to turn it on ON. The slider color indicates the activation status. When active, displays in the Status area.

To turn Bluetooth off:
1. Press ➔ and then tap Settings.
2. In a single motion touch and slide the Bluetooth slider to the left to turn it off OFF.

Bluetooth Status Indicators

The following icons show your Bluetooth connection status at a glance:

Displays when Bluetooth is active.

Displays when Bluetooth is connected (paired) and communicating.

Displays when Bluetooth technology is active and there is an available open and visible bluetooth device.

Bluetooth Settings

The Bluetooth settings menu allows you to set up many of the characteristics of your device’s Bluetooth service, including:

- Entering or changing the name your device uses for Bluetooth communication and description
- Setting your device’s visibility (or “discoverability”) for other Bluetooth devices
- Displaying your device’s Bluetooth address
To access the Bluetooth Settings menu:
1. Press ➔ and then tap Settings ➔ Bluetooth.
2. Verify Bluetooth is active (indicated by □ ON □).
3. Press ➔ and tap the Device name, Visible time-out, and Show received files fields to set the options.

To change your Bluetooth name:
1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap Device name.
3. Enter a new name.
4. Tap OK to complete the rename process.

To set visibility:
1. Verify your Bluetooth is active.
2. From the top of the Bluetooth settings page, toggle the state of the visibility check mark. Activating this feature enabled your device visible allows other devices to pair and communicate.

**Note:** Your device visibility is based on the time set within the Visible time-out field (2 Minutes, 5 Minutes, 1 Hour, or Never). This value appears as a countdown within this Visible time-out field.

To scan for Bluetooth devices:
1. Verify Bluetooth is active.
2. From the bottom of the Bluetooth settings page, tap Scan for devices to search for visible external Bluetooth-compatible devices such as headsets, devices, printers, and computers.

To review your Bluetooth received files:
1. Verify Bluetooth is active.
2. From the Bluetooth settings page, press ➔ and then tap Show received files.

**Pairing Bluetooth Devices**
The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device. When you pair devices, they share a passkey, allowing for fast, secure connections while bypassing the discovery and authentication process.

**Note:** Pairing between two Bluetooth devices is a one-time process. Once pairing is established the devices continue to recognize their partnership and exchange information without entering a passcode.
To pair your device with another Bluetooth device:

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, tap the **Visibility** field (shown by the device name).
   
   Your device must be visible to successfully pair with an external device. This is shown by a green check mark.

3. Tap **Scan for devices**. Your device displays a list of discovered in-range Bluetooth devices.

4. Tap a device from the list to initiate pairing.

5. Enter the passkey or PIN code, if needed, and tap **OK**.

6. The external device must accept the connection and enter your device’s PIN code.
   
   Once successfully paired to an external device, ![Bluetooth icon](image) displays in the Status area.

---

**Note:** Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.

---

**Disconnecting a Paired Bluetooth Device**

Disconnecting a paired device breaks the connection between the device and your phone, but retains the knowledge of the pairing. At a later point when you wish to reconnect the device, there is no need to setup the connection information again.

1. Verify your Bluetooth is active.

2. From the Bluetooth settings page, tap the previously paired device (from the bottom of the page).

3. Tap **OK** to confirm disconnection.
   
   — or —
   
   Tap **Cancel** to confirm current connection.

---

**Note:** Disconnections are manually done but often occur automatically if the paired device goes out of range of your phone or it is powered off.
Deleting a Paired Bluetooth Device

Deleting a device from your list removes its “connection record” and upon reconnection would require that you re-enter all the previous pairing information.

1. Verify Bluetooth is active.
2. From the Bluetooth settings page, select (Settings) located to the right of the paired device. This opens the connected device’s menu options.
3. Tap Unpair to delete the paired device.

Sending Contacts via Bluetooth

Depending on your paired devices’ settings and capabilities, you may be able to send pictures, Contact information, or other items using a Bluetooth connection.

Note: Prior to using this feature, Bluetooth must first be enabled on both your phone and the external device, and the recipient’s device must be visible.

1. Verify your Bluetooth is active and your phone is visible.
2. From the Home screen, tap (Contacts).
3. Touch and hold the entry from the list to display the on-screen context menu.
4. Tap Send namecard via → Bluetooth and select a paired external Bluetooth device.

Note: The external Bluetooth device must be visible and communicating for the pairing to be successful.

5. A Bluetooth share notification displays in your notifications list.
Enable Downloading for Web Applications

Important! Before you can download a web application you must insert an SD into the phone and enable the **Unknown sources** feature (enables downloading). For more information, refer to “Installing the microSD Memory Card” on page 12. Also, see “Mounting the SD Card” on page 69.

1. Press 🏛 ➔ and then tap **Settings ➔ Security ➔ Unknown sources** check box.
2. Tap **OK** to allow install of non-Market applications. Tap again to remove the check mark and disable the installation of non-market applications.

Warning! Not all web applications are safe to download. In order to protect your phone and data, use Android Market to install web applications. For more information, refer to “Downloading a New Google Application” on page 207.

PC Connections

You can connect your device to a PC using a PC data cable to utilize various USB connection modes. Mass storage is the default connection method.

**Mass storage**: allows you to use the onboard storage capacity of the phone to store and upload files. This option allows your computer to detect the phone as a removable storage drive.

**Kies air**: allows you to sync your Windows PC wirelessly with your phone provided they are both on the same Wi-Fi network.

Connecting as a Storage Device

You can connect your device to a PC as a removable disk and access the file directory. If you insert a memory card in the device, you can also access the files directory from the memory card by using the device as a memory card reader.

**Note:** The file directory of the memory card displays as a removable disk, separate from the internal memory.

1. Press ➔ and then tap Settings ➔ More... ➔ USB utilities ➔ Connect storage to PC.

**Note:** To use any downloaded application that requires a USB connection between your device and your PC, you should first set the USB setting to Mass storage.

2. Connect the USB cable to the phone and connect the cable to the computer.

3. Tap Turn on USB storage. Both the phone and computer display icons to show that the device is mounted. As soon as the connection is established a drive letter is assigned to the phone’s storage device.

4. Open the folder to view files.

5. Copy files from the PC to the memory card.

Prior to using Kies air for Phone Update

Before using Kies air to upgrade your device, it is recommended that you backup your personal data prior to use.

**To export a Contact list to your microSD card:**

1. From the Home screen, tap (Contacts).
2. Press and then tap Import/Export.
3. Tap Export to SD card ➔ OK. For more information, refer to “Export/Import” on page 125.

**Verify your images and videos are on your microSD card:**

1. From the Home screen, tap (Applications) ➔ (Gallery).
2. Verify the Gallery contains all of your pictures and videos.
3. Remove the back cover and remove the internal microSD card prior to initiating a Kies air update.
Enabling USB Debugging

USB debugging must be enabled before being able to use the Development feature.

1. Press ➔ and then tap Settings ➔ Developer options.
2. Tap the USB debugging field to verify the feature is active before connecting your USB cable.
3. Using an optional PC data cable, connect the multifunction jack on your device to a PC.

Kies Air

Kies Air allows you to sync your Windows PC wirelessly with your phone provided they are both on the same Wi-Fi network. You can view and share call logs, videos, photos, music, bookmarks, ringtones, and even send SMS messages from your PC.

Tip: Before beginning, it is recommended that you update the Java application running on your machine.

1. Sign onto the same Wi-Fi network from your phone and from your PC.

2. From the Home screen, tap (Applications) ➔ (Kies air).
3. From the Kies air home screen, tap Start.
4. If prompted, select a network. Choose from either Wi-Fi or Portable Wi-Fi hotspot.
5. Write down the on-screen URL address.

Important! Both your phone and your computer must be connected to the same Wireless Access Point (WAP).

6. From your computer, enter the URL in your Web browser.
7. If prompted, an Access Request prompt is displayed on your device. Tap Allow to permit connection between the computer and device.
8. On your computer, you may be prompted to run a Java plugin for a TransferManagerApplet. Click Run.
9. Tap the Remember for today checkbox if you will be using Kies air with the same PC later.
10. From your PC, a security warning may be displayed asking if you want to run this application. Click Run to continue.

11. On your PC, the Kies air screen is displayed. On your phone, the icon appears at the top of your screen.

12. Follow the on-screen instructions to view and share information between your phone and PC.

13. Click a link from the left navigation pane to access one of several device file categories such as:
   - [Device Name] - provides an overview of all the main categories.
   - Photos/Videos/Music
   - Ringtones
   - Bookmarks
   - Messages/Call Log/Contacts
   - File Explorer
   - Language settings

14. To exit the Kies air application, tap Stop on your device, then close out the Web browser on your computer.

---

**Wi-Fi**

**About Wi-Fi**

Wi-Fi (short for "wireless fidelity") is a term used for certain types of Wireless Local Area Networks (WLAN). Wi-Fi communication requires access to an existing and accessible Wireless Access Point (WAP). These WAPs can either be Open (unsecured) as within most Hot Spots, or Secured (requiring knowledge of the Router name and password).

---

**Note:** After you complete a connection to an active Wi-Fi network, the Wi-Fi Calling feature will automatically be enabled.

---

**Activating Wi-Fi**

By default, your device’s Wi-Fi feature is turned off (deactivated). Activating Wi-Fi allows your device to discover and connect to compatible in-range WAPs (Wireless Access Points).

1. Press and then tap Settings.
2. In a single motion touch and slide the Wi-Fi slider to the right to turn it on. A check mark indicates that Wi-Fi is active. The device scans for available in-range wireless networks and displays them under Wi-Fi networks on the same screen.

Connecting to a Wi-Fi Network
1. Press ➔ and then tap Settings ➔ Wi-Fi. The network names and security settings (Open network or Secured with WEP) of detected Wi-Fi networks display in the Wi-Fi networks section.
2. Tap the network you wish to connect to.

Note: When you select an open network you are automatically connected.
3. Enter a wireless password (if necessary).
4. Tap Connect.

Wi-Fi Status Indicators
The following icons indicate the Wi-Fi connection status:

Displays when Wi-Fi is connected, active, and communicating with a Wireless Access Point (WAP).
Displays when Wi-Fi is active and there is an available open wireless network.
Displays when Wi-Fi is configured for a Wi-Fi Direct connection to another compatible device in the same direct communication mode.

Manually Add a New Network Connection
1. From the Wi-Fi network screen, tap Add network.
2. Enter the Network SSID (the name of your Wireless Access Point).
3. Tap the Security field and select a security option. This must match the current security setting on your target WAP.
4. Enter your WAP’s password if the WAP is secure.
5. Tap Save to store the new information and connect to the target WAP.
Note: No prompt to enter the WAP key displays if this is the second time to connect to a previously accessed or secured wireless network. The WAP key is required when the device is reset using factory default settings.

Deactivating Wi-Fi

1. Press ➔ and then tap Settings.
2. In a single motion touch and slide the Wi-Fi slider to the left to turn it off.
   – or –
   Activate and Deactivate Wi-Fi from the Notification bar.

Note: Use of wireless data connections such as Wi-Fi and Bluetooth can reduce battery life and use times.

Manually Scan for a Wi-Fi Network

1. Press ➔ and then tap Settings ➔ Wi-Fi ➔ Scan.

Wi-Fi Advanced Settings

The Wi-Fi settings - Advanced menu allows you to set up many of the device’s Wi-Fi services, including:
- Setting the Wi-Fi sleep policy
- Viewing the device’s MAC Address
- Configuring use of either a DHCP or Static IP

To access the Wi-Fi Advanced Settings menu:
1. Press ➔ and then tap Settings ➔ Wi-Fi.
2. Tap Advanced.

USB Tethering

This option allows you to share your device’s mobile data connection via a direct USB connection between your device and a single computer. The Mobile HotSpot connectivity is a wireless version of this same functionality and allows you to provide Internet connectivity to multiple devices.

Note: You can not mount your device’s microSD card to your computer while using the USB tethering feature. If additional software or USB drivers are required, navigate to: http://www.samsung.com/us/support/downloads.
To connect using USB Tethering:
1. Press \( \text{Home} \rightarrow \text{Menu} \) and then tap Settings → More... → Tethering and Mobile HotSpot.
2. Plug in the USB cable between your computer and your phone.
3. When prompted for a USB mode, press \( \text{Back} \) to exit the menu.
4. Tap USB tethering from the Tethering menu. This places a green check mark next to the entry and activates the feature. A Tethering or HotSpot active notification briefly appears on the screen. Look for the Tethering active icon \( \text{T} \) in the Status bar area of the screen.
5. Read the on-screen notification regarding data use and tap OK.

To disconnect tethering:
1. Press \( \text{Home} \rightarrow \text{Menu} \) and then tap Settings → More... → Tethering and Mobile HotSpot.
2. Tap USB tethering from the Tethering menu to remove the check mark and deactivate the feature.
3. Remove the USB cable from the phone.

Mobile HotSpot

This feature allows you to turn your device into a Wi-Fi HotSpot. The feature works best when used in conjunction with HSPA+ (4G) data services (although 3G service can also be used).

The Mobile HotSpot connectivity is a wireless version of this same functionality and allows you to provide Internet connectivity to multiple devices.

**Important!** The Mobile HotSpot service can not be active at the same time as Wi-Fi. Please close your Wi-Fi connection prior to launching this service.

**Note:** You must have a tethering plan on your account to use the Mobile HotSpot. You cannot use data on the device while it is being used as a HotSpot.

To activate the Mobile HotSpot service:
1. Press \( \text{Home} \rightarrow \text{Menu} \) and then tap Settings → More... → Tethering and Mobile HotSpot.
2. In a single motion touch and slide the Mobile HotSpot slider \( \text{OFF} \rightarrow \text{ON} \) to the right to turn it on.
3. Read the on-screen notification regarding data use and tap OK.
4. Tap **Mobile HotSpot ➔ Configure**.
5. Create a new Network SSID name and then write it down.
6. Tap **Save** to store the new settings.
7. Confirm the Mobile AP service icon 📡 appears at the top of the screen.

**Note:** By default, the connection is open and not secured. It is recommended that you access the Mobile HotSpot settings and create a secure connection by using a password for communication.

**Note:** Using your 4G service and Mobile HotSpot drains your device’s battery at a much faster rate than when using any other feature combination. The best way to keep using the device as a HotSpot is to have it connected to a power supply.

---

**To connect to the HotSpot:**

1. Enable Wi-Fi (wireless) functionality on your target device (laptop, media device, etc.).
2. Scan for Wi-Fi networks from the external device and select your device’s Mobile HotSpot name from the network list.
   - The SSID name for your device’s HotSpot is determined by what you entered into the **Network SSID** field.
   - You can change the name by tapping **Configure ➔ Network SSID** and changing the entry.
3. Select this HotSpot and follow your on-screen instructions to complete the connection.
4. Launch your Web browser to confirm you have an Internet connection.
To secure the Portable HotSpot service:
The two most common methods for securing your connection to the HotSpot are to a security method (WPA2 PSK) and to Hide your phone’s SSID name.

1. Press ➔ and then tap Settings ➔ Wireless and network ➔ More... ➔ Tethering and Mobile HotSpot.
2. Tap Configure.
3. Tap the Security field and select WPA2 PSK.
4. With security enabled, enter a new password into the Password field.

**Important!** The more complex the password, the harder it will be for intruders to break your security. It is recommended that you not use names, birthdays, or other personal information.

5. Tap Save to store the new settings.
Section 11: Time Management

This section describes how you can manage time using time-related applications such as the Calendar, Alarm Clock, Analog or Digital clock, and the World clock.

Calendar

With this feature, you can consult the calendar by day, week, or month, create events, and set an alarm to act as a reminder. Google Calendar is built into the device and synchronizes both new and existing entries between your phone and your online Google account.

Note: You should previously add an account (Facebook, Microsoft Exchange ActiveSync, or Google) prior to using the Calendar.

1. From the Home screen, tap (Applications) ➔ (Calendar). Tap (Show More) to display these tabs:
   - **Year**: displays the Year view.
   - **Month**: displays the Month view.
   - **Week**: displays the Week view.
   - **3 days**: displays the calendar events in 3 day increments.

2. Tap (Create event) to create a new Calendar event.
   – or –

   Tap Today to display the current date indicated by a blue box. Press and select one of the following options:
   - **Go to**: displays a specific date.
   - **Delete**: allows you to delete All events, All events before today, or an individual event.
   - **Search**: allows you to search within your current events.
   - **Sync**: allows you to synchronize your Calendar events with your current accounts.
   - **Settings**: displays a list of configurable settings.
To manually sync calendar events:

1. Press ➔ and then tap Settings → Accounts and sync.
2. Locate the email account containing the events you wish to synchronize.
3. Tap ❯ within the adjacent account field to reveal the account’s synchronization settings screen.
   • Tap Sync Calendar to activate the synchronization of calendar events between your device and the remote exchange server. A green checkmark indicates the feature is enabled.

Creating a Calendar Event

1. From the Home screen, tap ➔ (Applications) ➔ (Calendar).
2. Within the Year, Month, Week, 3 days, and Day tabs, tap ➔ (Create event).

Calendar Settings

Using the Calendar settings you can select the day with which you want the calendar to begin. You also select how you want to view the calendar, by Month, Week, or Day or determine how to manage events, notifications, sounds, and defaults reminders.

1. From the Home screen, tap ➔ (Applications) ➔ (Settings).
2. Press ➔ Settings.
3. Tap Week view and select a type: Timeline or Analog.
4. Tap First day of week and select either Local default, Saturday, Sunday, or Monday.
5. Tap Hide declined events to activate this option. A check mark indicates selection.
6. Tap Lock time zone (to lock event time based on your current user-selected time zone). Select a time zone from within the Select time zone field.
7. Tap Show week number to display the week numbers along the side of the week entries.
8. Tap **Calendars** and select the type of general synchronization settings you want. A check mark indicates selection.

9. Tap **Set alerts & notifications** to adjust the event notification method. Choose from: **Alert**, **Status bar notification**, and **Off**.

10. Tap **Select ringtone** to assign a ringtone to a calendar event notification.

11. Tap **Default reminder time** to assign a default time frame for event reminders.

12. Tap **Notifications while screen is off** to display notifications on the full screen while it is turned off.

13. Tap **Sync events/tasks** to select those calendar events and task to sync based on current accounts.

14. Tap **Swipe with two fingers** to change the way events are displayed when swiped.

**Clock**

This feature allows you to create an alarm to ring at a specified time, track time in other parts of the world, use a stopwatch, or set a timer.

- From the Home screen, tap **Applications** ➔ **Clock**.

**Setting an Alarm**

1. From the Home screen, tap **Applications** ➔ **Clock**.

2. Tap **(Create alarm)**.

3. Use the plus or minus symbols to enter the hour, and minutes, then tap **AM** or **PM** (toggles depending on which was last selected).

4. Tap the **Alarm repeat** field and touch the number of times you want this alarm to repeat. Selections are: **Sunday - Saturday** or **Repeat weekly**. Selected day blocks turn blue when active.

5. Tap the **Alarm type** field and select one of the following: **Melody**, **Vibration**, **Vibration and melody**, or **Briefing**.

6. Slide the slider bar left or right in the **Alarm volume** field to decrease or increase the alarm volume. A sample of the volume level plays.

7. Tap the **Alarm tone** field and select one of the following: **Sounds**, or **Go to My files**. Locate a sound to use as an alarm ringtone then tap **OK** to activate the ringtone.
8. Tap the radio button to activate a tone for the Snooze. Tap the field to assign a duration time (3 minutes, 5 minutes, 10 minutes, 15 minutes, or 30 minutes) and Snooze repeat (1 time, 2 times, 3 times, 5 times, and 10 times).
   - Duration indicates the length of time the alarm will remain silent between alarm notifications (snooze time).
   - Snooze repeat indicates the numbers of snooze sessions that are assigned to this alarm. How many times will the snooze silence the alarm.
9. Tap the radio button to activate Smart alarm which slowly increases screen brightness and the volume of nature tones to simulate dawn breaking. Tap the field to assign a duration time (3 min, 5 min, 10 min, 15 min, or 30 min) and nature tone (Morning, Breeze, Mist, Forest, Light, or Rain).
   - Duration category describes the length of time the alarm will remain silent between alarm notifications (snooze time).
   - Tone category provides one of several nature sounds that are used as the alarm tone.
10. Tap the Name field and enter a name for this Alarm.

   11. Tap Save to store the new alarm event.

Turning Off an Alarm
- To stop an alarm when it sounds, touch and slide in any direction.

Setting the Snooze Feature
- To activate the Snooze feature after an alarm sounds, touch and slide in any direction. Snooze must first be set in the alarm settings.

World Clock
This feature allows you to find out what time it is another part of world.
1. From the Home screen, tap (Applications) ➔ (Clock).
2. Tap the World clock tab.
3. Tap (Add city) then scroll and select the desired city, or tap in the search field to locate a city.
To assign DST settings:
1. Locate a desired city from the World Clock list.
2. Touch and hold a city and select **DST settings**.
3. Select **DST setting** (Automatic, Off, 1 hour or 2 hours). If Daylight Savings Time is selected, the sun symbol on the World Clock listing will appear orange.

### Stopwatch
This feature allows you to capture elapsed time while letting the stopwatch keep running.
1. From the Home screen, tap **Applications** ➔ **Clock** ➔ **Stopwatch** tab.
2. Tap **Start** to start the stopwatch counter.
3. Tap **Lap** to begin the lap time counter.
4. Tap **Stop** to stop the counter.
5. Tap **Restart** to restart the lap counter. You can have multiple lap times.
6. Tap **Reset** to reset the counter.

### Setting a Timer
1. From the Home screen, tap **Applications** ➔ **Clock** ➔ **Timer** tab.
2. Tap the **hr**, **min**, or **sec** field and use the on-screen keypad to enter the hour, minute, or seconds. The timer plays an alarm at the end of the countdown.
3. Tap **Start** to start the timer.
4. Tap **Stop** to stop the timer or **Reset** to reset the timer and start over.
5. Tap **Restart** to resume the timer counter.

### Configuring a Desk Clock
This feature lets you activate an on-screen clock that can be viewed when the device is docked.
- From the Home screen, tap **Applications** ➔ **Clock** ➔ **Desk clock** tab.
Section 12: Changing Your Settings

This section explains the sound and phone settings for your device. It includes such settings as: display, security, memory, and any extra settings associated with your device.

Accessing Settings

From the Home screen, tap (Applications) ➔ (Settings).

– or –

Press ➔ and then tap Settings. The Settings screen displays.

Wi-Fi Settings

This section describes the Wi-Fi settings. For more information, refer to “Wi-Fi” on page 236.

Activating Wi-Fi

1. Press ➔ and then tap Settings.

2. In a single motion touch and slide the Wi-Fi slider to the right to turn it on. A check mark indicates that Wi-Fi is active. The device scans for available in-range wireless networks and displays them under Wi-Fi networks on the same screen.

Wi-Fi settings

Once set up for Wi-Fi connectivity, your device automatically uses Wi-Fi, when available, for all your mobile services.

1. Press ➔ and then tap Settings ➔ Wi-Fi.

2. Tap Advanced. Configure the settings as desired.

The available Wi-Fi connections are displayed with a security type displayed next to them.

Note: The Advanced menu also displays your Wi-Fi MAC Address and IP Address.
**Network Notification**

By default, when Wi-Fi is on, you receive notifications in the Status bar anytime your phone detects an available Wi-Fi network. You can deactivate this feature if you do not want to receive notifications.

1. Press ↗️ and then tap Settings ➔ Wi-Fi ➔ Advanced.

2. Tap Network notification. A check mark displayed next to the feature indicates Network notification is active.

3. Tap Network notification again to remove the check mark and deactivate this feature.

**Wi-Fi During Sleep**

By default, when your device enters a sleep mode, your Wi-Fi connection stays on all the time. If the feature is Never enabled during sleep, current data usage is taken over by your SIM and its network connection.

1. Press ↗️ and then tap Settings ➔ Wi-Fi ➔ Advanced ➔ Keep Wi-Fi on during sleep.

2. Select an available option:
   - **Always**: maintains your current active Wi-Fi connection even during sleep.
   - **Only when plugged in**: maintains the active Wi-Fi connection only when the device detects it is connected to a power supply. This reduces the drain on your device’s battery.
   - **Never (increase data usage)**: shuts off the current Wi-Fi connection during sleep and diverts any current data usage to the cellular network connection.

**Wi-Fi Frequency Band**

You can now specify which wireless band is preferred for connection to other devices. In some areas, interference can cause bad connections in certain frequency bands, connecting to an alternate option can improve performance.

1. Press ↗️ and then tap Settings ➔ Wi-Fi ➔ Advanced ➔ Wi-Fi frequency band.

2. Select Auto, 5 GHz only, or 2.4 GHz only.
**Manually Adding a Wi-Fi Network**

1. Press
   and then tap Settings ➔ Wi-Fi ➔ Add network.
2. Enter the Network SSID (the name of your Wireless Access Point).
3. Tap the Security field and select a security option. This must match the current security setting on your target WAP.
4. Enter your WAP’s password if the WAP is secure.
5. Tap Save to store the new information and connect to the target WAP.

**Note:** An SSID is a unique key which identifies a wireless LAN. Its purpose is to stop other wireless equipment from accessing your LAN — whether accidentally or intentionally. To communicate, wireless devices must be configured with the same SSID.

---

**Bluetooth settings**

In this menu you can activate Bluetooth, view or assign a device name, activate your phone so other Bluetooth devices can discover it, or scan for other, available Bluetooth devices with which to pair. For more information, refer to “Bluetooth” on page 229.

**Turning Bluetooth On and Off**

**To turn Bluetooth on:**

1. Press
   and then tap Settings.
2. In a single motion touch and slide the Bluetooth slider
to the right to turn it on. The slider color indicates the activation status. When active, displays in the Status area.

**To turn Bluetooth off:**

1. Press
   and then tap Settings.
2. In a single motion touch and slide the Bluetooth slider
to the left to turn it off.

**Note:** Bluetooth must be enabled prior to use.
Activating the Device Name

1. Press ➔ and then tap Settings → Bluetooth.
2. Verify Bluetooth is active (indicated by ON).
3. Press 📲 and tap the Device name. The assigned device name displays.
4. Tap ☑️ to erase the current device name and enter a new name for this device using the keyboard.
5. Tap OK to confirm your setting.

Activating Visibility

1. Press ➔ and then tap Settings → Bluetooth.
2. Verify your Bluetooth is active.
3. From the top of the Bluetooth settings page, toggle the state of the visibility check mark. Activating this feature enabled your device visible allows other devices to pair and communicate.

Showing Bluetooth Received Files

You can quickly view all of the files that you have received via your Bluetooth connection.

1. Press ➔ and then tap Settings → Bluetooth.
2. Press 📲 and tap the Show received files.

Scanning for Devices

This option allows you to scan for active Bluetooth devices so you can pair with them.

1. Press ➔ and then tap Settings → Bluetooth.
2. From the bottom of the Bluetooth settings page, tap Scan for devices to search for visible external Bluetooth-compatible devices such as headsets, devices, printers, and computers.

Important! Some Bluetooth devices are secured and require a PIN number to confirm and pair with them.

3. Enter a PIN to pair with the device, if one is required, and tap OK.
Data Usage

Monitor and manage your device’s data usage capabilities. Features include activation/deactivation or network data usage, set mobile data usage for a set period of time, and view application data usage.

- Press  ➔ and then tap Settings ➔ Data usage.

To activate/deactivate Mobile data usage:
1. Press  ➔ and then tap Settings ➔ Data usage.
2. In a single motion touch and slide the Mobile data slider to the right to turn it on .
3. In a single motion touch and slide the Mobile data slider to the left to turn it off .

To set a mobile data limit:
1. Press  ➔ and then tap Settings ➔ Data usage.
2. Place a check mark in the Set mobile data limit field.
3. Read the on-screen disclaimer info and tap OK.

4. Touch and drag the far right ends of the Red or Orange horizontal lines to manually adjust both the Warning and Maximum data limits.
5. Touch and drag the bottom grey vertical lines to adjust the time frames.
6. Tap the Data usage cycle button and select either the current cycle or define your own by selecting Change cycle.
7. Press  and then select from the available on-screen options:
   - Data roaming allows you to connect to your service provider's partner networks and access data services when you are out of your service providers area of coverage. For more information, refer to “Data Roaming” on page 257.
   - Restrict background data prevents background data usage. This can help prevent over usage of your data minutes.
   - Show Wi-Fi usage activates an additional Wi-Fi tab that shows you your Wi-Fi data usage.
More... Settings

This tab displays additional wireless and network information.

Press 🏠 → ☰ and then tap Settings → More....

Using Airplane mode

This mode allows you to use many of your phone’s features, such as Camera, Games, and more, when you are in an airplane or in any other area where making or receiving calls or data is prohibited.

Important! When your device is in Airplane mode, it cannot send or receive any calls or access online information or applications.

1. Press 🏠 → ☰ and then tap Settings → More....
2. Tap Airplane mode. A check mark displayed next to the feature indicates Airplane mode is active.

The Airplane mode icon 📱 is displayed at the top of your screen.

USB Utilities

1. Press 🏠 → ☰ and then tap Settings → More... → USB utilities → Connect storage to PC.
2. If prompted, tap OK to turn USB debugging mode off.
3. Plug in a compatible USB cable to begin using the device for mass storage mode.

VPN settings

The VPN settings menu allows you to set up and manage Virtual Private Networks (VPNs).

Important! Before you can use a VPN you must establish and configure one.

Adding a VPN

Before you add a VPN you must determine which VPN protocol to use: PPTP, L2TP/IPSec PSK, L2TP/IPSec RSA, IPSec Xauth PSK, IPSec Xauth RSA, and IPSec Hybrid RSA.

Important! Before you can use a VPN you must establish and configure one.

1. Press 🏠 → ☰ and then tap Settings → More... → VPN.
2. If prompted, read the screen lock information and follow the on-screen steps to setup an unlock PIN or password.

3. Tap **Add VPN network**.

4. In the form that appears, fill in the information provided by your network administrator.

5. Tap **Save**.

---

**Note:** Similar setup process can be used for the remaining VPN types: PPTP, L2TP/IPSec PSK, L2TP/IPSec RSA, IPSec Xauth PSK, IPSec Xauth RSA, and IPSec Hybrid RSA.

---

**Connecting to a VPN**

1. Press 🏠 → ☰ and then tap **Settings → More... → VPN**.

2. Tap the VPN entry you want to connect to.

3. Enter any requested credentials into the pop-up that opens.

4. Tap **Connect**.

---

**Edit a VPN**

1. Press 🏠 → ☰ and then tap **Settings → More... → VPN**.

2. Touch and hold the VPN that you want to edit.

3. In the pop-up that opens, select **Edit network**.

4. Make the desired VPN setting changes.

5. Tap **Save**.

---

**Delete a VPN**

1. Press 🏠 → ☰ and then tap **Settings → More... → VPN**.

2. Touch and hold the VPN that you want to delete.

3. Tap **Delete network** within the pop-up that opens up.
Wi-Fi Calling

You can configure your device to make and receive calls over an active Wi-Fi connection. Wi-Fi Calling is an excellent solution for coverage issues in and around the home or wherever cellular coverage is limited. Minutes used while connected to the Wi-Fi network count against available rate plan minutes. For more information, refer to “Wi-Fi Calling” on page 82.

1. Ensure that the Wi-Fi connected icon displays on the status bar.
2. Press ➔ and then tap Settings ➔ More...
3. Tap the Wi-Fi Calling field and place a green check mark in the adjacent field. This check mark indicates the feature is active.

Wi-Fi Calling Settings

Important! A new ISIM card must be installed within the device prior to using this feature. Wi-Fi must first be active and communicating prior to launching Wi-Fi Calling.

1. Press ➔ and then tap Settings ➔ More... ➔ Wi-Fi Calling Settings.
2. Tap Connection Preferences and select a preference for use of the Wi-Fi Calling feature:
   - Wi-Fi Preferred: Wi-Fi network is preferred over cellular network when making calls. Calling requires you to stay in the Wi-Fi range.
   - Wi-Fi Only: Wi-Fi network is required for making calls. Calling requires you to stay in the Wi-Fi range.
   - Cellular Preferred: The cellular network is preferred over a Wi-Fi network when making calls.
3. Tap OK to save the setting.
**USB Tethering and Mobile HotSpot**

This option allows you to share your device’s mobile data connection via a direct USB connection between your phone and computer. A wireless version of this same functionality would be the Mobile AP feature.

*Note:* You can not mount your device's microSD card to your computer while using the USB tethering feature. If additional software or USB drivers are required, navigate to: [http://www.samsung.com/us/support/downloads](http://www.samsung.com/us/support/downloads).

1. Press 🏛️ ➔ 📲 and then tap **Settings ➔ More... ➔ Tethering and Mobile HotSpot**.

For more information, refer to “USB Tethering” on page 238. For more information, refer to “Mobile HotSpot” on page 239.

**Near Field Communication**

This feature is used to read and exchange tags. When used in conjunction with Android Beam, your device can be used to beam application content when NFC-capable devices are touched.

1. Press 🏛️ ➔ 📲 and then tap **Settings ➔ More**.
2. Tap the **NFC** field. A check mark displayed next to the feature indicating it is enabled.

*Note:* Enabling NFC also enables Android Beam.
**Android Beam**

This feature (when activated via NFC) allows you to directly beam application content to another NFC-capable device when they are in direct contact. These files are typically small such as Calendar and Contact entries.

1. Press 🏡 → 📅 and then tap **Settings → More...**
2. Verify the NFC feature is active.
3. Tap **Android Beam** and make sure the feature is turned on.
4. If not already active, in a single motion touch and slide the **Android Beam** slider to the right to turn it on.
5. Complete the transfer process between the two NFC-enabled devices by placing them back to back.

---

**Wi-Fi Direct Setup and Settings**

You can configure your device to connect directly with other Wi-Fi capable devices. This is an easy way to transfer data between devices. These devices must be enabled for Wi-Fi direct communication. This connection is direct and not via a HotSpot or WAP.

**Note:** Activating this feature will disconnect your current Wi-Fi network connection.

To give your Wi-Fi Direct connection a unique name:

It can be difficult to pair to external devices if all you have is a generic name (ex: Android 12345). It is recommended you provide your connection with a unique name.

1. Press 🏡 → 📅 and then tap **Settings → More... → Wi-Fi Direct.**
2. Press 📅 and then tap **Device name.**
3. Edit the current name and tap **OK** to save the new identification.
To activate your connection:

1. Press ➔ and then tap Settings ➔ More... ➔ Wi-Fi Direct.

2. In a single motion touch and slide the Wi-Fi Direct slider to the right to turn it on. A check mark displayed next to the feature indicating it is enabled.

3. Confirm appears at the top of the screen within the Notifications area.

4. Tap Scan. After scan, tap a device name to begin the connection process to another Wi-Fi Direct compatible device.

**Note:** The target device must also have Wi-Fi Direct service active and running before it can be detected by your device.

5. Tap Connect. The direct connection is then established.

6. When prompted to complete the connection, tap OK. The status field now reads “Connected” and your connected device is listed within the Wi-Fi Direct devices listing.

---

**Mobile networks**

Before you use applications such as Google Maps and find your location or search for places of interest, you must enable the Mobile networks options.

- Press ➔ and then tap Settings ➔ More... ➔ Mobile networks. The following options display:

**Use packet data**

Allows you to activate data usage on your phone.

- Press ➔ and then tap Settings ➔ More... ➔ Mobile networks ➔ Use packet data.

**Data Roaming**

Data roaming allows you to connect to your service provider’s partner networks and access data services when you are out of your service providers area of coverage.

1. Press ➔ and then tap Settings ➔ More... ➔ Mobile networks.

2. Tap Data roaming to connect to data services while roaming outside your network.

   – or –

   Tap Data roaming again to remove the green check mark and deactivate the feature.
Access Point Names

To access a wireless access point:

- Press 🏡 → 📱 and then tap Settings → More... → Mobile networks → Access Point Names. A list of the Access point names display. The active access point displays a bright green, filled circle to the right of the name.

Network mode

You can configure your phone to either manually detect and use either a 2G (GSM) or 3G (WCDMA) data network connection.

- Press 🏡 → 📱 and then tap Settings → More... → Mobile networks → Network mode.

Using the 4G Network

To confirm you are always using the fastest possible connection, the phone has an automatic detection method where it finds both the fastest and most stable connection/communication method. This phone is capable of using either 4G/3G services for this connection.

Note: WCDMA is only available on the 4G network.

1. Press 🏡 → 📱 and then tap Settings → More... → Mobile networks → Network mode.
2. Tap GSM/WCDMA (Auto mode). A check mark displays next to this option to indicate that it is active. This is the default mode for this phone.

Using the 2G (EDGE) Network

If you are not using applications that require the 3G network speed (any application that accesses the network or uses a browser), using the 2G network saves battery life.

1. Press 🏡 → 📱 and then tap Settings → More... → Mobile networks → Network mode.
2. Tap GSM only. A check mark displays next to this option to indicate that it is active.
Note: Connecting to 2G networks slows the data transfer speed and time.

Using the 3G Network
If you are using applications that require the 3G network speed, follow these instructions to connect to the 3G network.

1. Press 🔄 ➔ and then tap Settings ➔ More... ➔ Mobile networks ➔ Network mode.
2. Tap WCDMA only. A check mark displays next to this option to indicate that it is active.

Network Operators
Using this feature you can view the current network connection. You can also scan and select a network operator manually, or set the network selection to Automatic.

1. Press 🔄 ➔ and then tap Settings ➔ More... ➔ Mobile networks.
2. Tap Network operators. The current network connection displays at the bottom of the list.

Important! You must deactivate data service prior to searching for an available network.

3. Tap Search now to manually search for a network.
4. Tap Select automatically to automatically select a network connection.

Note: Connecting to 2G networks slows the data transfer speed and time.

Default Setup Options
Your phone default is set to Automatic (to automatically search for an available network. You can set this option to Manual to select a network each time you connect.

1. Press 🔄 ➔ and then tap Settings ➔ More... ➔ Mobile networks ➔ Network operators.
2. Tap Default setup.
3. Tap Manual to locate and connect to a network manually.
   – or –
   Tap Automatic to allow the device to automatically select a network.
Call Settings

To access the Call settings menu:

- Press ➔ and then tap Settings ➔ Call.
- or -
  From the Home screen, tap ➔ Settings ➔ Call.

Configuring General Call Settings

Configure the general call settings using this option.

1. From the Home screen, tap ➔ (Settings) ➔ Call.
2. Tap one of the following options:
   - Call rejection: allows you to manage your rejection mode and rejection list.
     - Auto reject mode: sets the phone to automatically reject incoming calls or messages.
     - Auto reject list: provides access to current rejection entries and numbers.
   - Set reject messages: allows you to manage both existing rejection messages and create new ones.
   - Call alert: allows you to assign call alert tones and activate call alerts and vibration.
     - Answer vibration: vibrates the phone when the called party answers.
     - Call status tones: assigns sounds settings during the call. Choose from: Call connect tone, Minute minder, and Call end tone.
     - Alerts on call: selects whether alarm and message notification is turned off during a call.
   - Call answering/ending: allows you to manage the settings for answering and ending calls.
     - Answering key allows you to press a key to answer the phone.
     - Automatic answering, when connected, automatically answers a call via the headset after a period of time. Selections are: Off, after 1 second, after 2 seconds, after 3 seconds, after 4 seconds, or after 5 seconds.
     - The Power key ends calls allows you to press the power key to end the current call.
   - Turn on proximity sensor: allows you to turn off the LCD when the phone is near your face during a call so you do not accidentally tap a key.
• **Call forwarding**: configures call forwarding options.
• **TTY mode**: allows you to configure the TTY settings. For more information, refer to “TTY Mode” on page 261.
• **Hearing aids**: allows you to enable/disable hearing aid compatibility.
• **Additional settings**: allows you to configure additional call settings. For more information, refer to “Configuring Additional Voice Call Settings” on page 262.

### Configuring Call Forwarding

1. Press 🏠 ➔ and then tap Settings ➔ Call ➔ Call forwarding ➔ Voice call.
2. Tap an available option:
   • **Always forward**: incoming calls are re-routed to a secondary number that you specify.
   • **Forward when busy**: forwards all your calls to voicemail when your phone is busy.
   • **Forward when unanswered**: automatically forwards to your voicemail number when the phone is not answered, and otherwise allows you to enter a voicemail number.

• **Forward when unreachable**: automatically forwards to your voicemail number when the phone is not in service, or is turned off.

### TTY Mode

A TTY (also known as a TDD or Text Telephone) is a telecommunications device that allows people who are deaf, hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your phone is compatible with select TTY devices. Please check with the manufacturer of your TTY device to ensure that it is compatible with digital cell phones.

Your phone and TTY device will connect via a special cable that plugs into your phone’s headset jack. If this cable was not provided with your TTY device, contact your TTY device manufacturer to purchase the connector cable.

1. Press 🏠 ➔ and then tap Settings ➔ Call ➔ TTY mode.
2. Tap Full TTY to activate the feature, or TTY mode off to deactivate the feature. Off is the default setting.
Configuring Additional Voice Call Settings

1. Press ➔ and then tap Settings ➔ Call ➔ Additional settings.

2. Tap one of the following options:
   • Caller ID: chooses whether your number is displayed when someone answers your outgoing call. Choose from: Network default, Hide number, or Show number.
   • Call barring: blocks specific types of calls (All outgoing calls, International calls, etc.).
   • Call waiting: notifies you of an incoming call while you are on another call.
   • Auto redial: automatically redial the dialed number if it is unable to connect or the call is cut off.
   • Fixed dialing numbers: see description below.

Fixed Dialing Numbers

Fixed Dial Number (FDN), allows you to restrict outgoing calls to a limited set of phone numbers.

Enabling FDN

1. Press ➔ and then tap Settings ➔ Call ➔ Additional settings ➔ Fixed dialing numbers.
2. Tap Enable FDN.
3. At the prompt, enter your PIN2 code and tap OK.

Important! Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering an incorrect PIN2 code could cause the phone to lock. Contact customer service for assistance.

Changing the PIN2 Code

1. Press ➔ and then tap Settings ➔ Call ➔ Additional settings ➔ Fixed Dialing Numbers.
2. Tap Change PIN2.
3. At the prompt, enter your old PIN2 code.
4. At the prompt, enter a new PIN2 code.
5. Confirm your PIN2 code.

_Important!_ Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering the PIN2 incorrectly three times will cause the device to lock. Contact customer service for assistance.

**Managing the FDN List**

When this feature is enabled, you can make calls only to phone numbers stored in the FDN list on the SIM card.

1. Press and then tap **Settings** ➔ **Call** ➔ **Additional settings** ➔ **Fixed Dialing Numbers**.
2. Tap **Enable FDN**.
3. At the prompt, enter your PIN2 code and tap **OK**. FDN is enabled.
4. Tap **FDN list** then press and then tap **Add contact** or edit the contacts that were stored.

_Important!_ Not all SIM cards use a PIN2 code. If your SIM card does not, this menu does not display.

The PIN2 code is provided by your carrier. Entering the PIN2 incorrectly three times will cause the device to lock. Contact customer service for assistance.

**Voicemail**

You can view your voicemail number from this menu.

1. Press and then tap **Settings** ➔ **Call** ➔ **Voicemail service**.
2. Tap **My carrier**.
3. Tap **Voicemail** ➔ **Voicemail number** to now view your number within the Voicemail number field.
Sound Settings

From this menu you can control the sounds on the phone as well as configure the display settings.

Press ➔ and then tap Settings ➔ Sound. The following options display:

Silent mode via Device Options Screen

Silent mode is convenient when you wish to stop the phone from making noise, in a theater for example. In Silent Mode the speaker is muted and the phone only vibrates to notify you of incoming calls, or other functions that normally have a defined tone or sound as an alert.

1. From the Home screen, press and hold the Lock key until Device options displays.
2. Tap Silent mode from the Device Options screen to activate or deactivate this mode (the current mode displays).

Setup Device Vibration

1. Press ➔ ➔ and then tap Settings ➔ Sound.
2. Tap Silent mode.
3. From the Silent mode menu, select either Vibrate or Mute.

Note: This setting is independent of other call sounds settings. For example, if you have Silent mode enabled along with Vibrate, your device won’t play a ringtone, but will vibrate for an incoming call.

Note: Use both the Silent mode and enable the Mute option to guarantee no vibrations or sounds from your device. This really helps at night so you don’t wake up hearing your device vibrating on a nearby counter or table.
**Adjusting the Volume Settings**

The Volume menu now provides access to various volume settings within one on-screen popup menu.

1. Press ➔ and then tap Settings ➔ Sound ➔ Volume.
2. Touch and drag the on-screen slider to assign the volume settings for any of the following volume levels.
   - Music, video, games, and other media, Ringtone, Notifications or System.
3. Tap OK to assign the volume levels.

**Setup the Voice Call Ringtone**

1. Press ➔ and then tap Settings ➔ Sound.
2. Tap Phone ringtone.
3. Tap a ringtone from the available list. The ringtone briefly plays when selected.
4. Tap OK to assign a ringer.

**Setting a Notification Ringtone**

1. Press ➔ and then tap Settings ➔ Sound ➔ Default notifications.
2. Tap one of the ringtones and tap OK.

**Setting up Sound and Vibration**

This option allows you to activate the sound and vibration feature.

1. Press ➔ and then tap Settings ➔ Sound.
2. Tap the Sound and vibration field to activate the feature.
**Audible Tone Settings**

These options are used when you use the dialing pad, make a screen selection, use the lock screen, want a feedback when you tap the screen. Each time you press a key or make a selection the selected tone sounds.

1. Press 🗺️ → 🛠️ and then tap Settings ➔ Sound.
2. Tap Keytones to activate a tone when you use on-screen keys. A check mark displayed next to these features indicates active status.
3. Tap Touch sounds to activate a tone when you touch the screen. A check mark displayed next to this feature indicates active status.
4. Tap Screen lock sounds to activate a tone when you use the Lock screen. A check mark displayed next to this feature indicates active status.
5. Tap Vibrate on screen tap to activate the a vibration when you press soft keys on certain screens. A check mark displayed next to the feature indicates this feature is active.

**Display Settings**

In this menu, you can change various settings for the display such as the font, orientation, pop-up notifications, puzzle lock feature, animation, brightness, screen timeout, and power saving mode.

**Adjusting the Screen Display**

1. Press 🗺️ → 🛠️ and then tap Settings ➔ Display.
2. Configure the following screen display settings:
   - **Screen display**
     - **Home screen wallpaper**: assigns an image from either the Gallery, Live wallpapers, or Wallpaper gallery to the Home screen.
     - **Lock screen wallpaper**: assigns an image from either the Wallpaper gallery or Gallery to the Lock screen.
     - **Clock**: activates/deactivates the display of an on-screen clock within the Lock screen.
     - **Weather**: activates/deactivates the display of an on-screen weather notification within the Lock screen. Once enabled, you can also modify the Weather settings feature.
— **Clock and weather position**: allows you to specify the location of the Clock and Weather information on the Lock screen. Choose from: Top, Middle, or Bottom.

— **Help text**: activates/deactivates the display of Help text on the Lock screen.

- **Brightness**: adjusts the on-screen brightness level. For more information, refer to “*Adjusting Screen Brightness*” on page 268.

- **Auto-rotate screen**: when enabled, the phone automatically switches from portrait to landscape orientation and vice versa. When this setting is disabled, the phone displays in portrait mode only.

- **Screen timeout**: adjusts the delay time before the screen automatically turns off. Selections are: 15 seconds, 30 seconds, 1 minute, 2 minutes, 5 minutes, and 10 minutes.

- **Font style**: sets the fonts used on the LCD display. Selections are: Default font, Choco cooky, Helvetica S, Rosemary, or Get fonts online. Tap Get fonts online to download additional fonts.

- **Display battery percentage**: to activate/deactivate the display of battery charge percentage atop the battery icon at the top of the screen.

- **Touch key light duration**: to adjust the light duration of the touch keys.

- **Auto adjust screen power**: adjusts the phone’s LCD brightness level to automatically adjust and conserve battery power.

- **Gyroscope calibration**: uses the built-in gyroscope to calibrate motion when the phone is in motion.
**Adjusting Screen Brightness**

This feature configures the LCD Brightness levels.

1. Press ➔ and then tap Settings ➔ Display ➔ Brightness.
2. Tap Automatic brightness to allow the phone to self-adjust and tap OK.
   – or –
   Touch and slide the on-screen slider to adjust the level and tap OK.

**Gyro Sensor Calibration**

Calibrate your phone by using the built-in gyroscope.

1. Press ➔ and then tap Settings ➔ Display ➔ Gyroscope calibration.
2. Place the phone on a level surface and tap Calibrate. The phone adjusts the level of the accelerometer. During the calibration process a green circle appears on-screen and the center circle adjusts to the center position.

**Power Saving Mode**

This feature allows you both automatically set the phone to use a power saving mode and configure additional power saving options manually, all in an effort to conserve battery power.

1. Press ➔ and then tap Settings ➔ Power saving.
2. Select System power saving to use the device’s default power saving parameters.
   – or –
   Select Custom power saving to create your own custom power saving plan. Once enabled, you can adjust the settings.
3. When the power gets low, confirm 🔋 appears at the top of the screen. This indicates the power saving mode is active.

To automatically enable power saving from Notifications:

1. In a single motion, touch and drag the Status bar down to the bottom of the screen to reveal the Notifications panel.
2. Tap Power Saving. For more information, refer to “Notification Panel” on page 40.
To automatically enable power saving options:

1. Press ➔ and then tap Settings ➔ Power saving.

2. Tap System power saving to enable this feature when the battery level is low.

3. Read the on-screen power saving notice and tap OK to activate the default “battery low” level at which the power saving mode is activated. It is at this level that the automatic power saving function will “kick in”.

4. Tap OK to store the new battery level.

To activate custom power saving features:

1. Press ➔ and then tap Settings ➔ Power saving.

2. Place a check mark on the Custom power saving field to activate the feature.

3. Tap Custom power saving settings and alter any of the available fields to activate additional power saving parameters. Choose from:
   - Power saving starts at to disable assign the battery level that must first be reached before the custom power saving option “kicks in”.
   - Turn Off Wi-Fi to disable Wi-Fi when it is not connected to an AP.
   - Turn Off Bluetooth to disable Bluetooth when not in use or actively transmitting data.
   - Turn Off GPS to disable the GPS location system when not in use.
   - Turn off Sync to disable the feature when the phone is not synchronizing with the server.
   - Brightness to activate/deactivate the Brightness adjustment feature. Once enable, the following Brightness adjustment field is accessible.
     - Brightness to adjust the brightness of the screen. For more information, refer to “Adjusting Screen Brightness” on page 268.
   - Screen timeout to adjust the time delay before the screen turns off.

4. Tap OK to store the new settings.
SD Card & Device Storage

From this menu you can view the memory allocation for the memory card as well as mount or unmount the SD card.

For more information about mounting or unmounting the SD card, see “Using the SD Card” on page 68.

To view the memory allocation for your external SD card:

- Press ➔ and then tap Settings ➔ Storage.
  The available memory displays under the Total space and Available space headings.

Battery Usage

This option allows you to view a list of those components using battery power.

1. Press ➔ and then tap Settings ➔ Battery.
2. From the upper-right tap (Refresh) to update the list.
   – or –
   Tap an entry to view more detailed information.

Applications

This device can be used for Android development. You can write applications in the SDK and install them on this device, then run the applications using the hardware, system, and network. This feature allows you to configure the device for development.

Warning! Because the device can be configured with system software not provided by or supported by Google or any other company, end-users operate these devices at their own risk.

This menu allows you to manage installed applications. You can view and control currently running services, or use the device for application development.

You can also view the amount of memory or resources used as well as the remaining memory and resources for each of the applications on your phone and clear the data, cache, or defaults.

- Press ➔ and then tap Settings ➔ Applications ➔ All.
Clearing Application Cache and Data

Important! You must have downloaded applications installed to use this feature.

1. Press ➔ and then tap Settings ➔ Applications.
2. Tap an application in which to clear the cache or data.
3. Tap Force stop, Clear data, or Clear cache.

Uninstalling Third-party Applications

Important! You must have downloaded applications installed to use this feature.

1. Press ➔ and then tap Settings ➔ Applications.
2. Tap the Downloaded tab and select your desired application.
3. Tap Uninstall (from within the top area of the Application info page).
4. At the prompt, tap OK to uninstall the application.
5. Select a reason for uninstalling the application, then tap OK.

Moving Third-party Applications to your SD Card

Your device’s built-in memory is augmented by using a microSD card to store additional data. When the device’s built-in memory capacity is reached, it can be possible to move some applications over to the internal microSD card. Freeing up memory space on the phone can help avoid any sluggish performance when the phone has to work harder to manage memory resources.

Important! Only certain downloaded applications are capable of being moved from device to card.

1. Press ➔ and then tap Settings ➔ Applications.
2. Tap the Downloaded tab and select your desired application.
3. Tap Move to SD card (from within the Storage section of the Application info page).

Once the application has been moved to the microSD card, this button now reads “Move to device”.
**Running Services**

The Running services option allows you to view and control currently running services such as Backup, Google Talk, SNS (messaging), Swype, and more.

1. Press 🏛️ → 📱 and then tap Settings → Applications.
2. Tap the Running tab to view all currently active and running applications. This tab also shows the total RAM being used by these currently active applications.
3. Tap a process and select Stop to end the process and stop it from running. When you stop the process the service or application will no longer run until you start the process or application again.
4. Tap Show cached processes to view additional cached applications.

---

**Important!** Stopping a process might have undesirable consequences on the application.

---

**Storage Used**

This option allows you to view a list (on the current tab) of current applications as sorted by size.

1. Press 🏛️ → 📱 and then tap Settings → Applications.
2. Tap the All tab to display all available applications.
3. Press 📱 and then tap Sort by size to change the current list to show items based on the amount of storage they occupy.
Accounts and Synchronization

Your phone provides the ability to synchronize data from a variety of different sources or sites. These accounts can range from Google, a Corporate Microsoft Exchange Email Server, and other social sites such as Facebook, Twitter, and MySpace. Corporate and Google accounts provide the ability to synchronize Calendar events and Contacts.

To activate Accounts and sync

1. Press 🏛️ → 🗼 and then tap Settings ➔ Account and sync.
2. In a single motion touch and slide the Accounts and sync slider OFF to the right to turn it on ON.

To deactivate Accounts and sync

1. Press 🏛️ → 🗼 and then tap Settings ➔ Account and sync.
2. In a single motion touch and slide the Accounts and sync slider ON to the left to turn it off OFF.

Synchronizing a All Account

By default, all managed accounts are synchronized. You can also manually sync all current accounts.

1. Press 🏛️ → 🗼 and then tap Settings ➔ Account and sync.
2. Tap Sync all.

Synchronizing a Google Account

To add a new Google account:

1. Press 🏛️ → 🗼 and then tap Settings ➔ Accounts and sync.
2. Tap Add account ➔ Google ➔ Existing.

Note: If you do not already have a Google account, tap Create and follow the on-screen prompts to create your new account.

3. Tap the Email (@gmail.com) and Password fields and enter your information.
4. Tap Sign in. Your phone then communicates with the Google servers to confirm your information. Your existing Gmail account then appears within the Manage accounts area of the screen.
Any changes or updates to your Gmail account are then automatically updated to your device.

To configure the Google management settings:
1. From the Home screen, tap (Applications) ➔ Settings ➔ Accounts and sync.
2. Tap within the Google account field to reveal the account’s synchronization settings screen.
3. Tap the parameters you wish to synchronize. A green check mark indicates the feature is enabled.
4. Tap Sync Now to synchronize those enabled parameters.
5. Press to return to the previous screen.
   For more information, refer to “Synchronizing Contacts” on page 122.

Synchronizing Your Corporate Account

By default, there are no Corporate Calendar events managed by the device. These must be manually added.

Note: Once a corporate email account is created, it is automatically added as a managed account.

Use the following procedure to configure your phone to synchronize with a corporate email account.
1. From the Home screen, tap (Applications) ➔ Settings ➔ Accounts and sync.
   – or –
   Press ➔ and then tap Settings ➔ Accounts and sync.
   
   Press ➔ and then tap Settings ➔ Accounts and sync.

2. Locate and tap the corporate email account.
3. Tap within the adjacent account field to reveal the account’s synchronization settings screen.
4. Place a check mark adjacent to those events you wish to manually sync.
5. Tap Sync Now to synchronize those enabled parameters.
6. Press to return to the previous screen.
Location Services

The Location services allows you to configure the device’s location services.

Important! The more location determining functions are enabled, the more accurate the determination will be of your position.

Using Google Location Services

Before you use applications such as Google Maps and find your location or search for places of interest, you must enable the Use wireless networks option.

1. Press \home\ and then tap Settings → Location services.

2. Tap Google location services allows apps to use data from sources such as Wi-Fi and mobile networks to provide a better approximation of your current location.

Enabling the GPS Satellites

1. Press \home\ and then tap Settings → Location services.

2. Tap GPS satellites to enable the GPS satellite.

Enabling Location and Google Search

1. Press \home\ and then tap Settings → Location services.

2. Tap Location and Google search to enable the GPS satellite. Enabling this feature allows you to locate places of interest at the street-level. However, this also requires a clear view of the sky and uses more battery power.

Security

This menu contains features that allows you to configure the device’s security parameters.

Screen Unlock Pattern Overview

To secure data and limit phone access, set the phone to require a screen unlock pattern each time you turn on the device, or every time the phone wakes up from sleep mode (when the screen automatically turns off).

The Screen lock menu allows to choose from a variety of locking features such as: None, Swipe, Face unlock, Pattern, PIN, and Password.
Using Swipe

This feature is the least secure locking method and only requires that a user swipe the screen to unlock the device.

1. Press \home\ → \app and then tap **Settings → Security**.
2. Tap **Screen lock → Swipe**.

Using Face Unlock

This feature uses facial recognition to unlock your phone. This feature is less secure than PIN, Pattern, and Password locks and can be bypassed by someone else who looks similar to you.

1. Press \home\ → \app and then tap **Settings → Security**.
2. Tap **Screen lock → Face unlock**.
3. Read the on-screen notification and tap **Set it up**.
4. Follow the on-screen instructions.

Setting an Unlock Pattern

Creating a screen unlock pattern increases security on the phone. When you enable the User visible pattern field, you will draw an unlock pattern on the screen whenever you want to unlock the phone’s buttons or touch screen. When you activate the User tactile feedback field, you feel vibration as feedback while drawing the pattern.

The feature is now paired with a backup PIN code that acts as a backup to the pattern lock. If you forget your pattern, you can regain access to the device by entering a PIN code.

**Note:** Make sure the Require Pattern field is activated.

1. Press \home\ → \app and then tap **Settings → Security**.
2. Tap **Screen lock → Pattern**.
3. Read the instructions then tap **Next**.
4. Review the on-screen animation procedure for drawing a pattern and tap **Next** when you are ready to draw a pattern.
5. Draw your pattern by touching your first on-screen point. Then, **without removing your finger from the screen, drag your finger over adjacent points until the gray trace line overlaps each point** and they are highlighted with a green circle.

6. When you have connected at least four dots in a vertical, horizontal or diagonal direction, lift your finger from the screen and tap **Continue**.

7. Confirm the new pattern by redrawing it and then tapping **Confirm**. The Unlock pattern is set.

8. Enter the backup PIN code and tap **Continue**.

9. Reenter the PIN to reconfirm the previous entry and tap **OK**.

**Changing the Screen Lock Pattern**

This feature allows you to change the previously stored unlock pattern and update it if necessary. This process is similar to changing your password from time to time.

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Screen lock**.
3. Retrace your current pattern on the screen.
4. Tap **Pattern** and repeat steps 3 - 7 from the previous section.

**Deleting the Screen Lock Pattern**

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Screen lock**.
3. Retrace your current pattern on the screen.
4. Tap **None**.

**PIN Lock and Unlock**

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Screen lock ➔ PIN**.
3. Enter a PIN number using the numeric keypad and touch **Continue** to confirm the password.
4. Confirm the PIN by re-entering it and tap **OK** to confirm.

Your phone now requires you to enter this PIN number in order to unlock the phone.
**Password Lock and Unlock**

1. Press ➔ and then tap Settings ➔ Security.
2. Tap Screen lock.
3. Tap Password.
4. Enter a password using the keypad and tap Continue to confirm the password.
5. Confirm the password by re-entering it and tap OK to confirm.

**Owner Information**

This option allows you to show user-defined information on the Lock screen.

1. Press ➔ and then tap Settings ➔ Security ➔ Owner information.
2. Tap the Show owner info on lock screen checkbox to create a check mark if you want your owner information displayed.
3. Enter text that you would like displayed on your Lock screen.
4. Press  twice to save the new text and return to the previous screen.

**Encrypt Device**

When enabled, this feature requires a password be used to decrypt the device each time you turn it on.

**Encrypt SD Card**

When enabled, this feature requires a password be used to decrypt the microSD card each time it is connected.

**Setting up SIM Card Lock**

Prevent another user from using your SIM card to make unauthorized calls or from accessing information stored on your SIM card by protecting the information using a PIN code.

1. Press ➔ and then tap Settings ➔ Security.
2. Tap Set up SIM card lock.
3. Tap Lock SIM card, enter your SIM PIN code, then tap OK.

**Note:** You must activate Lock SIM card before you can change your SIM PIN code.
To change an existing SIM Card PIN:
1. Tap **Change SIM PIN**.
2. Enter the old SIM PIN code and tap **OK**.
3. Enter the new SIM PIN code and tap **OK**.
4. Re-type the new SIM PIN code and tap **OK**.

**Password Settings**

When you create a phone password you can also configure the phone to display the password as you type it instead of using an asterisk (*).

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Make passwords visible** to activate this feature.

**Device Administration**

Activating this feature allows Google to administrate your phone in a way similar to IT security settings on a corporate PC. This would be beneficial in the case that your phone was lost or stolen. The phone could be “deactivated” or “restricted” (through administration) from a remote location.

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Device administrators** to begin configuring this setting.
3. Select an administrator device and follow the prompts.

---

**Unknown Sources**

Before you can download a web application you must enable the Unknown sources feature (enables downloading).
Developers can use this option to install non-Play Store applications.

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Unknown sources** to activate this feature.

**Note:** If you are notified that you can not download a Market application because it comes from an “Unknown source”, enabling this option corrects this issue.

**Credential Storage**

This option allows certain applications to access secure certificates and other credentials. Certificates and credentials can be installed to the SD card and password protected.

1. Press ➔ and then tap **Settings ➔ Security**.
2. Tap **Trusted credentials** to display only trusted CA certificates. A check mark displayed next to the feature indicates secure credentials.
3. Tap **Install from device storage** to install encrypted certificates from the USB Storage location.

4. Tap **Clear credentials** to clear the device (SD card or phone memory) of all certificate contents and reset the credentials password.

**Language and Input Settings**

This setting allows you to configure the language in which to display the menus. You can also set on-screen keyboard options.

- Press 🏛 → 🇲 🇺 🇦 🇫 🇦 🇧 🇣 🇪 🇦 🇳 🇦 🇨 🇧 🇧 🇧 🇺 🇪 🇧 🇲 🇧 🇺 🇪 🇧 🇲 🇬 🇦 and then tap **Settings** → **Language and input**.

**Language Settings**

To set the language that the menus display on the phone:

1. Press 🏛 → 🇲 🇺 🇦 🇫 🇦 🇧 🇣 🇪 🇦 🇳 🇦 🇨 🇧 🇧 🇧 🇺 🇪 🇧 🇲 🇧 🇺 🇪 🇧 🇲 🇬 🇦 and then tap **Settings** → **Language and input** → **Language**.

2. Select a language and region from the list.

**Select Input Method**

1. Press 🏛 → 🇲 🇺 🇦 🇫 🇦 🇧 🇣 🇪 🇦 🇳 🇦 🇨 🇧 🇧 🇧 🇺 🇪 🇧 🇲 🇧 🇺 🇪 🇧 🇲 🇬 🇦 and then tap **Settings** → **Language and input** → **Default**.

2. Select an input method. 

   - or –

   Tap **Configure input methods** to alter/modify the available input methods.

**Swype Settings**

For more information, refer to “Enabling and Configuring SWYPE” on page 95.

1. Press 🏛 → 🇲 🇺 🇦 🇫 🇦 🇧 🇣 🇪 🇦 🇳 🇦 🇨 🇧 🇧 🇧 🇺 🇪 🇧 🇲 🇧 🇺 🇪 🇧 🇲 🇬 🇦 and then tap **Settings** → **Language and input** → 🛠️ (adjacent to the Swype field).

2. Tap **Select Input Method** to switch between keyboard types. Choose from either Samsung keyboard or Swype.

3. Tap **How to Swype** to view an on-screen manual for Swype.

4. Tap **Personal Dictionary** to access and manage your personal dictionary.

5. Tap **Preferences** to alter these settings:
• **Audio feedback**: turns on sounds generated by the Swype application.
• **Vibrate on keypress**: activates a vibration sensation as you enter text using the keypad.
• **Show tips**: turns on a flashing indicator for quick help.
• **Auto-spacing**: automatically inserts a space between words. When you finish a word, just lift your finger or stylus and start the next word.
• **Auto-capitalization**: automatically capitalizes the first letter of a sentence.
• **Show complete trace**: once enabled, sets whether or not to display the complete Swype path.
• **Word suggestion**: suggests words as you are typing.
• **Speed vs. accuracy**: sets how quickly Swype responds to on-screen input. Move the slider between **Fast Response** (speed) or **Error Tolerant** (accuracy) and tap **OK**.
• **Reset Swype’s dictionary**: once enabled, deletes any words you have added to Swype’s dictionary.

### 6. Locate the About section to review the Swype application information:
• **Version**: lists the Swype version number.

### 7. Tap Language Options to activate and select the current text input language. Default language is US English.

### Samsung Keyboard Settings

1. **Press** ➔ and then tap **Settings** ➔ **Language and input** ➔ (adjacent to the Samsung keyboard field).

   — or —

   From within an active text entry screen, tap ✉ from the bottom of the screen to reveal the Samsung keyboard settings screen.

2. Set any of the following options:
   • **Portrait keyboard types** allows you to choose a keypad configuration (Qwerty Keyboard [default] or 3x4 Keyboard).
   • **Input language** sets the input language. Tap a language from the available list. The keyboard is updated to the selected language.
   • **Pen detection** enables the handwriting pad whenever the S Pen is detected on the screen.
   • **One-handed operation** sets the on-screen keyboard to reposition and resize for use by either a single left or right hand operation.
• **XT9** enables predictive text entry mode. This must be enabled to gain access to the advanced settings.

• **XT9 advanced settings** configuration of more advanced XT9 features. For more information, refer to “Using XT9 Predictive Text” on page 105.

• **Keyboard sweeping** allows changing between the input modes without having to use the Input Mode key. You can "sweep" the displayed keyboard aside, in a similar manner to scrolling through the Home screens.

• **Auto-capitalization** automatically capitalizes the first letter of the first word in each sentence (standard English style).

• **Voice input** activates the Voice input feature. This is an experimental feature that uses Google's networked speech recognition application.

• **Auto-full stop** automatically inserts a full stop by tapping the space bar twice.

• **Character preview** provides an automatic preview of the current character selection within the text string. This is helpful when multiple characters are available within one key.

• **Handwriting settings** allows you to modify available handwriting settings.

• **Tutorial** launches a brief on-screen tutorial covering the main concepts related to the Samsung keyboard.

• **Reset all settings** allows you to reset all keyboard settings (including those applicable to handwriting).

### XT9 Advanced Settings

XT9 is a predictive text system that has next-letter prediction and regional error correction, which compensates for users pressing the wrong keys on QWERTY keyboards.

1. Press 🏡 ➔ 📱 and then tap Settings ➔ Language and input ➔ 📈 (adjacent to the Samsung keyboard field).

   — or —

   From within an active text entry screen, tap 📈 from the bottom of the screen to reveal the Samsung keyboard settings screen.

2. Tap the XT9 field. A checkmark indicates activation.

3. Tap the XT9 advanced settings and configure any of the following advanced options:

   • **Word completion** tells your device to attempt to predict how to complete the word you have started. (A green check mark indicates the feature is enabled.)
• **Word completion point** sets how many letters should be entered before a word prediction is made. Choose from 2 letters, 3 letters, 4 letters, or 5 letters.

• **Spell correction** enables the automatic correction of typographical errors by selecting from a list of possible words that reflect both the characters of the keys you touched, and those of nearby characters. (A green check mark indicates the feature is enabled.)

• **Next word prediction** predicts the next word you are like to enter. (A green check mark indicates the feature is enabled.)

• **Auto-substitution** allows the device to automatically replace misspelled or miskeyed words. This option reduce “typos.” (A green check mark indicates the feature is enabled.)

• **Regional correction** automatically tries to correct errors caused when you tap keys adjacent to the correct keys. (A green check mark indicates the feature is enabled.)

• **Recapture** sets the device to redisplay the word suggestion list after selecting the wrong word from the list.

• **XT9 my words** allows you to add new words to the built-in XT9 dictionary.
  — Tap Add word.

  — Use the **Edit XT9 my words** field to enter the new word.
  — Tap **Add** to store the new word.

• **XT9 auto-substitution** allows you to create a word rule by adding words for automatic substitution during text entry (for example youve becomes you’ve).
  — Tap the XT9 auto-substitution field. Flick up or down to review the current list of word substitutions.
  — Press  and tap **Add**.
  — Enter the original word that will be replaced in the **Shortcut** field (for example, youve).
  — Enter the substitute word that will be used in the **Substitution** field (for example, you?ive).
  — Tap **Add** to save the substitution rule.

4. Press  to return to the previous screen.
**Configure Google Voice Typing**

1. Press 🏛 → 📱 and then tap **Settings** → **Language and input**.
   
   – or –

   From a screen where you can enter text, in a single motion, touch and drag the Status bar down to the bottom of the screen, then select 📱 (Select input method) → **Google voice typing**.

2. Tap 📱 (adjacent to the **Google voice typing** field).
3. Select a language by tapping **Select input languages** area.
4. Remove the check mark from the **Automatic** field. This allows you to select additional languages.
5. Select the desired languages.
6. Activate **Block offensive words** to block recognition of known offensive words or language. (A green check mark indicates the feature is active).

**Assign the Voice Recognition Service**

1. Press 🏛 → 📱 and then tap **Settings** → **Language and input** → **Voice recognizer**.
2. Select an available option. Google is the default service.

**Configuring Voice Input Recognition**

This feature allows the device to correctly recognize verbal input.

1. Press 🏛 → 📱 and then tap **Settings** → **Language and input** → **Voice Search**.
2. Configure the available options to alter the settings associated with this feature:
   - **Language**: selects an input language and associated dialect recognition (if available).
   - **SafeSearch**: sets the explicit image filter settings. These settings apply to only Google voice search results. Choose from: Off, Moderate, or Strict.
   - **Block offensive words**: allows you to block recognition of known offensive words or language. (A green check mark indicates the feature is active).
• **Personalized recognition**: allows you to improve speech recognition and accuracy by allowing Google to associate your recordings with your Google Account.

• **Google Account dashboard**: allows you to manage your collected data via your Google account.

3. Press to return to the previous screen.

**Configuring Text-to-speech**

This feature allows the device to provide a verbal readout of on-screen data such as messages and incoming caller information. This action is called TTS (Text To Speech).

1. Press ➔ and then tap Settings ➔ Language and input ➔ Text-to-speech output.

2. Select a current Preferred TTS engine from the list of available options. The default is Google Text-to-speech.

3. Tap to configure the engine’s settings.

4. Configure the General options to alter the settings associated with this feature:
   - **Speech rate**: adjusts the rate at which on-screen text is spoken by the device. Choose from: Very slow, Slow, Normal, Fast, and Very fast.
   - **Listen to an example**: plays a short example of what the text-to-speech feature sounds like on your device when activated.
   - **Driving mode**: incoming calls and new notifications are automatically read out loud.
   - **Driving mode settings**: selects those applications that will use TTS while driving mode is activated. Choose from: Incoming call, Message, New emails, New voicemail, Alarm, Schedule, or Unlock screen.

**Configuring the Mouse-TrackPad**

This feature allows you to configure the pointer speed for the mouse/trackpad.

1. Press ➔ and then tap Settings ➔ Language and input ➔ Pointer speed.

2. Adjust the slider and tap OK.
Back up and Reset

Location settings, backup configurations, or reset the phone to erase all personal data.

Press ➔ and then tap Settings ➔ Backup and reset.

Mobile Backup and Restore

The device can be configured to back up your current settings, application data and settings.

1. Press ➔ and then tap Settings ➔ Backup and reset.
2. Tap Back up my data to create a backup of your current phone settings and applications.
3. Tap Back account to assign the account being backed up.
4. Tap Automatic restore to assist in the re-installation of a previously installed application (including preferences and data).
5. Tap Factory data reset to reset your device and sound settings to the factory default settings. For more information, refer to “Factory Data Reset” on page 287.

6. Tap Collect diagnostics to collects diagnostic data for troubleshooting use. For more information, refer to “Collect Diagnostics” on page 287.

Prior to doing a Factory Reset

Before initiating a factory reset, it is recommended that you backup your personal data prior to use.

To export a Contact list to your microSD card:

1. From the Home screen, tap (Contacts).
2. Press ➔ and then tap Import/Export.
3. Tap Export to SD card ➔ OK. For more information, refer to “Export/Import” on page 125.

Verify your images and videos are on your microSD card:

1. From the Home screen, tap (Applications) ➔ (Gallery).
2. Verify the Gallery contains all of your pictures and videos.
3. Remove both the back cover and remove the internal microSD card prior to initiating the process.
**Factory Data Reset**

From this menu you can reset your phone and sound settings to the factory default settings.

1. Press ➔ and then tap Settings ➔ Backup and reset ➔ Factory data reset.
2. Read the on-screen reset information.

**Note:** Select Format USB storage to also erase all data on the USB storage.

3. Tap Reset device.
4. If necessary, enter your password and tap Delete all.
   The device resets to the factory default settings automatically and when finished displays the Home screen.

**Collect Diagnostics**

This feature only collects diagnostic data for troubleshooting use.

1. Press ➔ and then tap Settings ➔ Backup and reset ➔ Collect diagnostics.
2. Read the on-screen System Manager Application information.

**Note:** This software collects only diagnostic data from your device so that T-Mobile technicians can better troubleshoot issues with your device.

3. Choose to enable or disable the feature by placing a check mark in the Allow Diagnostics field.
4. Select either More Info.. (to read additional information) or Close to close the message screen.

**Important!** Selecting Close only closes the current description screen and does not disable data collection.
To disable data collection, go to Settings ➔ Backup and reset ➔ Collect diagnostics and turn off the Allow Diagnostics feature.
Dock Settings

This menu allows you to assign external speakers when the device is docked.

1. Press ➔ and then tap Settings ➔ Dock.
2. Tap Audio output mode. This enables the phone to output audio when docked to a compatible device.

Pen Settings

This menu allows you to modify and change the S Pen settings.

1. Press ➔ and then tap Settings ➔ Pen settings.
2. Tap Dominant hand and choose from either Left handed or Right handed.
3. Tap Hovering pen icon to activate this feature whereby an on-screen hovering pen icon is displayed as your pen hovers over an area on the display.
4. Tap Pen help to display on-screen help information.

One-Handed Operation Settings

This menu allows you to enable one-handed operation for selected applications and features.

1. Press ➔ and then tap Settings ➔ One-handed operation.
2. Tap Dialer to enable adjustment of the dialing keypad position for either left or right handed use.
3. Tap Samsung keypad to enable adjustment of the Samsung keypad for either left or right handed use.
4. Tap Calculator to enable adjustment of the Samsung calculator for either left or right handed use.
5. Tap Pattern to enable scale adjustment of the unlock pattern for either left or right handed use.
6. Tap Learn about one-handed operation to learn more about using this feature.
**Date and Time**

This menu allows you to change the current time and date displayed.

1. Press 🏛️ → ⌨️ and then tap **Settings → Date and time**.
2. Tap **Automatic data and time** to allow the network set the date and time.

**Important!** Deactivate **Automatic data and time** to manually set the rest of the options.

3. Tap **Automatic time zone** to allow the network set the time zone information automatically.
4. Tap **Set date** and use the plus or minus icons to set the **Month**, **Day**, and **Year** then tap **Set**.
5. Tap **Set time** and use the plus or minus icons, set **Hour**, and **Minute**. Tap **PM** or **AM**, then tap **Set**.
6. Tap **Select time zone**, then tap a time zone.
7. Tap **Use 24-hour format**. If this is not selected the device automatically uses a 12-hour format.
8. Tap **Select date format** and select the date format type.

---

**Accessibility Settings**

This service lets you enable and disable downloaded accessibility applications that aid in navigating your Android device, such as TalkBack (uses synthesized speech to describe the results of actions), KickBack (provides haptic feedback for actions), and SoundBack (plays sounds for various actions). Also lets you enable use of the power key to end calls.

1. Press 🏛️ → ⌨️ and then tap **Settings → Accessibility**.

**Note:** Initially, it might be necessary to download accessibility applications from the Android Market.

2. Tap **TalkBack** to access the feature. In a single motion touch and slide the slider to the right to turn it on.

3. Select the **Auto-rotate screen** field to activate this feature which automatically rotates an available screen.

**Note:** Some screens can not be rotated.
4. Select the **Speak passwords** field to activate this feature which reads out password information.

5. Tap the **Tap and hold delay** field to select a time interval for this action. Choose from: Short, Medium, or Long.

6. Tap the **Install Web scripts → Allow** to activate/deactivate the feature which allows some applications to install scripts from Google that makes the Web site’s content more accessible.

7. Tap the **Assistive light** field to enable the torch feature to help you better see on-screen items.

8. Tap the **Mono audio** field to enable stereo audio to be compressed into a single mono audio stream for use with a single earbud/earphone.

9. Tap **Call answering/ending** to manage call answering and ending options.
   - **Answering key** allows you to press a key to answer the phone.
   - **Automatic answering**, when connected, automatically answers a call via the headset after a period of time. Selections are: Off, after 1 second, after 2 seconds, after 3 seconds, after 4 seconds, or after 5 seconds.

10. Tap **Accessibility shortcut** to allow you to press and hold the ➔ (Power key) and use the accessibility shortcut within the phone options.

### Motion Settings

This feature allows you to assign specific functions to certain phone actions that are detected by both the accelerometer and gyroscope.

**To activate motion:**

1. Press ➔ and then tap **Settings → Motion → Motion activation**.

2. Activate the feature by tapping the **Motion activation** field.

**Note:** If Motion activation is not enabled, all motion services are greyed-out and disabled.

**To activate different motion functions:**

1. Activate and configure any of the following motion features.
- **Tilt to zoom**: Once enabled, you must be on a screen where content can be zoomed. In a single motion, touch and hold two points on the display then tilt the device back and forth to zoom in or out.

- **Pan to edit**: Once enabled, allows you to move an on-screen icon from one screen to another by simply holding it down then moving the device left or right. You can also adjust the sensitivity of this detection.

- **Double tap**: Once enabled, double tap the top of the device to activate the Voice command functionality.

- **Turn over to mute**: Once enabled, turn over the device (screen down) to mute incoming calls and currently playing sounds.

For more information, refer to “Using Gestures” on page 58.

---

**Developer Options**

Use the Developer options to set options for application development.

- Press 🏠 ➔ and then tap **Settings ➔ Developer options**.

---

**Important!** These features are used for development purposes only.

---

**USB Debugging**

When enabled, allows debugging when the device is attached to a PC by a USB cable.

1. Press 🏠 ➔ and then tap **Settings ➔ Developer options**.

2. Tap **USB debugging** to enable or disable the setting. When enabled, a check mark appears in the check box.

---

**Development device ID**

The identification number for your device when using it as a development tool displays in this field.
Allowing Mock Locations

Note: This feature is used for development purposes only.

If you are a developer who is testing a GPS applications using this device, you can tell the device that the phone is at different GPS locations. In other words, the phone is allowed to “mock” the coordinates.

1. Press 🏠 → and then tap Settings → Developer options.
2. Tap Allow mock locations to enable or disable the setting. When enabled, a check mark appears in the check box.

Desktop Backup Password

Protect the desktop with a backup password ID.

1. Press 🏠 → and then tap Settings → Developer options.
2. Tap Desktop backup password.
3. In the Settings screen, enter the current full backup password, the new password for full backups, then enter the new password again.

4. Tap Set backup password to save the password change.

User Interface Options

Configure the user interface by setting the behavior for the way the screen behaves when using applications or displaying data.

1. Press 🏠 → 📱 and then tap Settings → Developer options.
2. Tap the check box next to each option to enable:
   - Strict mode: Makes the screen flash when applications perform long operations on the main thread.
   - Show pointer location: Highlights the data that was touched on the screen.
   - Show touches: Displays touch interactions on the screen.
   - Show screen updates: Areas of the screen flash when they update.
   - Show CPU usage: Screen highlights the current CPU usage.
   - Force GPU rendering: Uses a 2D acceleration in applications.
   - Window animation scale: Configure the scale for animation (ranges from off to 10x).
• Transition animation scale: Configure the scale for transitioning when using animation (ranges from off to 10x).

**Application Options**

1. Press 🏡 → ☰ and then tap Settings → Developer options.
2. Tap Do not keep activities to destroy every activity as soon as the application is closed.
3. Tap Limit background processes to set the number of processes that can run in the background. Options are: Standard limit, No background processes, and 1 to 4 processes at most.
4. Tap Show all ANRs to display a prompt when applications running in the background are not responding.

**Google Search Settings**

Use Google Search to search the Web.

1. Press 🏡 → ☰ and then tap 🔍 (Search).
2. Press 🏡 → Settings.
3. Tap any of the following search parameters to then alter the settings:
   - **Google Search** opens a screen where you can set your Google search preferences.
     - Use Web History: includes search matches from Google's online search engine.
     - Clear on-device search history: erases the history for recently selected search results.
     - Use My Location: uses your My Location information for Google search results and services.
     - Terms of service: displays the applications' service terms.
     - Open Source Licenses: displays the applications' open source license information.
**About Phone**

This menu contains legal information, system tutorial information, and other phone information such as the model number, firmware version, baseband version, kernel version, and software build number.

**To access phone information:**

Press 🏡 → 📱 and then tap **Settings → About phone**. The following information displays:

- **Software update**: allows you to connect to the network and upload any new phone software directly to your device. The device automatically updates with the latest available software when you access this option.

- **Status**: displays the battery status, the level of the battery (percentage), the network connection, signal strength, mobile network type, service state, roaming status, mobile network state, the phone number for this device, IMEI number, IMEI SV, IP address, Wi-Fi MAC address, Bluetooth address, Serial number, and Up time.

- **Legal information**: This option displays information about Open source licenses, License settings, as well as Google legal information. This information clearly provides copyright and distribution legal information and facts as well as Google Terms of Service, Terms of Service for Android-powered Phones, and much more pertinent information as a reference. Read the information and terms, then press 👈 to return to the Settings menu.

**Tip:** To find your device’s DivX® registration code and information about registering your device to play DivX protected video, tap **License settings → DivX® VOD**.

- **Model number**: displays the device’s model number.
- **Android version**: displays the firmware version loaded on this device.
- **Baseband version**: displays the baseband version loaded on this device.
- **Kernel version**: displays the kernel version loaded on this device.
- **Build number**: displays the software, build number.
**Note:** Firmware, baseband, kernel and build numbers are usually used for updates to the handset or support. For additional information please contact your T-Mobile service representative.
Section 13: Health and Safety Information

This section outlines the safety precautions associated with using your phone. The terms “mobile device” or “cell phone” are used in this section to refer to your phone. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Signals

The U.S. Food and Drug Administration (FDA) has published information for consumers relating to Radio Frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

Do cell phones pose a health hazard?

Many people are concerned that cell phone radiation will cause cancer or other serious health hazards. The weight of scientific evidence has not linked cell phones with any health problems.

Cell phones emit low levels of Radio Frequency (RF) energy. Over the past 15 years, scientists have conducted hundreds of studies looking at the biological effects of the radio frequency energy emitted by cell phones. While some researchers have reported biological changes associated with RF energy, these studies have failed to be replicated. The majority of studies published have failed to show an association between exposure to radio frequency from a cell phone and health problems.

The low levels of RF cell phones emit while in use are in the microwave frequency range. They also emit RF at substantially reduced time intervals when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects.

The biological effects of radio frequency energy should not be confused with the effects from other types of electromagnetic energy.

Very high levels of electromagnetic energy, such as is found in X-rays and gamma rays, can ionize biological tissues. Ionization is a process where electrons are stripped away from their normal locations in atoms and molecules. It can permanently damage biological tissues including DNA, the genetic material.
The energy levels associated with radio frequency energy, including both radio waves and microwaves, are not great enough to cause ionization of atoms and molecules. Therefore, RF energy is a type of non-ionizing radiation. Other types of non-ionizing radiation include visible light, infrared radiation (heat), and other forms of electromagnetic radiation with relatively low frequencies.

While RF energy does not ionize particles, large amounts can increase body temperatures and cause tissue damage. Two areas of the body, the eyes and the testes, are particularly vulnerable to RF heating because there is relatively little blood flow in them to carry away excess heat.

**Research Results to Date: Is there a connection between RF and certain health problems?**

The results of most studies conducted to date say no. In addition, attempts to replicate and confirm the few studies that have shown a connection have failed.

The scientific community at large therefore believes that the weight of scientific evidence does not show an association between exposure to Radio Frequency (RF) from cell phones and adverse health outcomes. Still, the scientific community has supported additional research to address gaps in knowledge. Some of these studies are described below.

**Interphone Study**

Interphone is a large international study designed to determine whether cell phones increase the risk of head and neck cancer. A report published in the International Journal of Epidemiology (June, 2010) compared cell phone usage for more than 5,000 people with brain tumors (glioma and meningioma) and a similar number of healthy controls. Results of this study did NOT show that cell phones caused brain cancer. In this study, most people had no increased risk of brain cancer from using cell phones. For people with the heaviest use of cell phones (an average of more than ½ hour per day, every day, for over 10 years) the study suggested a slight increase in brain cancer. However, the authors determined that biases and errors prevented any conclusions being drawn from this data. Additional information about Interphone can be found at [http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf](http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf).

Interphone is the largest cell phone study to date, but it did not answer all questions about cell phone safety. Additional research is being conducted around the world, and the FDA continues to monitor developments in this field.
International Cohort Study on Mobile Phone Users (COSMOS)

The COSMOS study aims to conduct long-term health monitoring of a large group of people to determine if there are any health issues linked to long-term exposure to radio frequency energy from cell phone use. The COSMOS study will follow approximately 300,000 adult cell phone users in Europe for 20 to 30 years. Additional information about the COSMOS study can be found at http://www.ukcosmos.org/index.html.

Risk of Brain Cancer from Exposure to Radio Frequency Fields in Childhood and Adolescence (MOBI-KIDS)

MOBI-KIDS is an international study investigating the relationship between exposure to radio frequency energy from communication technologies including cell phones and brain cancer in young people. This is an international multi-center study involving 14 European and non-European countries. Additional information about MOBI-KIDS can be found at http://www.creal.cat/programes-recerca/en_projectes-creal/view.php?ID=39.

Surveillance, Epidemiology, and End Results (SEER) Program of the National Cancer Institute

The National Cancer Institute (NCI) actively follows cancer statistics in the United States to detect any change in rates of new cases for brain cancer. If cell phones play a role in risk for brain cancer, rates should go up, because heavy cell phone use has been common for quite some time in the U.S. Between 1987 and 2005, the overall age-adjusted incidence of brain cancer did not increase. Additional information about SEER can be found at http://seer.cancer.gov/.

Cell Phone Industry Actions

Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the cell phone industry to take a number of steps, including the following:

- Support-needed research on possible biological effects of RF for the type of signal emitted by cell phones;
- Design cell phones in a way that minimizes any RF exposure to the user; and
- Cooperate in providing users of cell phones with the current information on cell phone use and human health concerns.
The FDA also is working with voluntary standard-setting bodies such as the Institute of Electrical and Electronics Engineers (IEEE), the International Commission on Non-Ionizing Radiation Protection (ICNIRP), and others to assure that safety standards continue to adequately protect the public.

**Reducing Exposure: Hands-Free Kits and Other Accessories**

**Steps to Reduce Exposure to Radio Frequency Energy**

If there is a risk from being exposed to radio frequency energy (RF) from cell phones - and at this point we do not know that there is - it is probably very small. But, if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your RF exposure.

- Reduce the amount of time spent using your cell phone;
- Use speaker mode or a headset to place more distance between your head and the cell phone.

**Hands-Free Kits**

Hands-free kits may include audio or Bluetooth® headsets and various types of body-worn accessories such as belt-clips and holsters. Combinations of these can be used to reduce RF energy absorption from cell phones.

Headsets can substantially reduce exposure because the phone is held away from the head in the user’s hand or in approved body-worn accessories. Cell phones marketed in the U.S. are required to meet RF exposure compliance requirements when used against the head and against the body.

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used for convenience and comfort. They are also required by law in many states if you want to use your phone while driving.

**Cell Phone Accessories that Claim to Shield the Head from RF Radiation**

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that accessories which claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone.
Studies have shown that these products generally do not work as advertised. Unlike “hands-free” kits, these so-called “shields” may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption.

**Children and Cell Phones**

The scientific evidence does not show a danger to any users of cell phones from RF exposure, including children and teenagers. The steps adults can take to reduce RF exposure apply to children and teenagers as well.
- Reduce the amount of time spent on the cell phone;
- Use speaker mode or a headset to place more distance between the head and the cell phone.

Some groups sponsored by other national governments have advised that children be discouraged from using cell phones at all. For example, The Stewart Report from the United Kingdom made such a recommendation in December 2000. In this report, a group of independent experts noted that no evidence exists that using a cell phone causes brain tumors or other ill effects. Their recommendation to limit cell phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

Additional information on the safety of RF exposures from various organizations can be obtained from the following organizations (updated 10/1/2010):
- Environmental Protection Agency (EPA): http://www.epa.gov/radtown/wireless-tech.html.
- Occupational Safety and Health Administration (OSHA): http://www.osha.gov/SLTC/radiofrequencyradiation/.
  (Note: This web address is case sensitive.)
Specific Absorption Rate (SAR)
Certification Information

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for Radio Frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These FCC RF exposure limits are derived from the recommendations of two expert organizations: the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The FCC SAR limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements. SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum reported value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the SAR limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body-worn operation, this phone has been tested and meets
FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the mobile device a minimum of 1.0 cm from the body.

Use of other accessories may not ensure compliance with FCC RF exposure guidelines. The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. The maximum SAR values for this model phone as reported to the FCC are:

- Head: 0.19 W/Kg.
- Body-worn Accessory: 1.13 W/Kg.

SAR information on this and other model phones can be accessed online on the FCC’s website through http://transition.fcc.gov/oet/rfsafety/sar.html. To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone. Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional SAR information can also be obtained at http://www.fcc.gov/encyclopedia/specific-absorption-rate-sar-cellular-telephones.

**FCC Part 15 Information to User**

Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by Samsung could void your authority to operate the device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,
which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Commercial Mobile Alerting System (CMAS)

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System ("CMAS"); which may also be known as the Personal Localized Alerting Network ("PLAN"). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider’s coverage area. If you travel outside your provider’s coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.

Smart Practices While Driving
On the Road - Off the Phone

The primary responsibility of every driver is the safe operation of his or her vehicle.

Responsible drivers understand that no secondary task should be performed while driving whether it be eating, drinking, talking to passengers, or talking on a mobile phone - unless the driver has assessed the driving conditions and is confident that the secondary task will not interfere with their primary responsibility. Do not engage in any activity while driving a moving vehicle which may cause you to take your eyes off the road or become so absorbed in the activity that your ability to concentrate on the act of driving becomes impaired. Samsung is committed to promoting responsible driving and giving drivers the tools they need to understand and address distractions.

Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas. For example, only hands-free use may be permitted in certain areas.
Before answering calls, consider your circumstances. Let the
call go to voicemail when driving conditions require.
Remember, driving comes first, not the call!
If you consider a call necessary and appropriate, follow these
tips:
• Use a hands-free device;
• Secure your phone within easy reach;
• Place calls when you are not moving;
• Plan calls when your car will be stationary;
• Do not engage in stressful or emotional conversations;
• Let the person with whom you are speaking know that you are
driving and will suspend the call if necessary;
• Do not take notes or look up phone numbers while driving;

Notice regarding legal restrictions on mounting this device in
an automobile:
Laws in some states may prohibit mounting this device on or
near the windshield of an automobile. In other states, the law
may permit mounting this device only in specific locations in
the automobile. Be sure to consult the state and local laws or
ordinances where you drive before mounting this device in
an automobile. Failure to comply with these restrictions could
result in fines, penalties, or other damages.

Never mount this device in a manner that will obstruct the
driver’s clear view of the street and traffic.

Never use wireless data services such as text messaging, Web
browsing, or e-mail while operating a vehicle.

Never watch videos, such as a movie or clip, or play video
games while operating a vehicle.

For more information, go to http://www.ctia.org.

Battery Use and Safety

Important! Handle and store batteries properly to avoid injury or
damage. Most battery issues arise from improper
handling of batteries and, particularly, from the
continued use of damaged batteries.

• Do not disassemble, crush, puncture, shred, or otherwise
  attempt to change the form of your battery. Do not put a high
degree of pressure on the battery. This can cause leakage or an
internal short-circuit, resulting in overheating.
• Do not let the phone or battery come in contact with liquids. Liquids can get into the phone’s circuits, leading to corrosion. Even when the phone appears to be dry and appears to operate normally, the circuitry could slowly corrode and pose a safety hazard. If the phone and/or battery get wet, have them checked by your service provider or contact Samsung, even if they appear to be working properly.

• Do not place your battery in or near a heat source. Excessive heating can damage the phone or the battery and could cause the phone or the battery to explode. Do not dry a wet or damp battery with an appliance or heat source such as a microwave oven, hair dryer, iron, or radiator. Avoid leaving your phone in your car in high temperatures.

• Do not dispose of the phone or the battery in a fire. The phone or the battery may explode when overheated.

• Do not handle a damaged or leaking battery. Do not let leaking battery fluid come in contact with your eyes, skin or clothing. For safe disposal options, contact your nearest Samsung-authorized service center.

• Avoid dropping the cell phone. Dropping the phone or the battery, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.

• Never use any charger or battery that is damaged in any way.

• Do not allow the battery to touch metal objects. Accidental short-circuiting can occur when a metallic object (coin, key, jewelry, clip, or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.

---

Important! Use only Samsung-approved batteries, and recharge your battery only with Samsung-approved chargers which are specifically designed for your phone.
WARNING!

Use of a non-Samsung-approved battery or charger may present a risk of fire, explosion, leakage, or other hazard. Samsung’s warranty does not cover damage to the phone caused by non-Samsung-approved batteries and/or chargers.

- Do not use incompatible cell phone batteries and chargers.
  Some websites and second-hand dealers not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers. Consumers should purchase manufacturer or carrier-recommended products and accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.

- Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, or leakage, leading to serious injuries, damages to your phone, or other serious hazard.

Samsung Mobile Products and Recycling

Samsung cares for the environment and encourages its customers to recycle Samsung mobile devices and genuine Samsung accessories.

Proper disposal of your mobile device and its battery is not only important for safety, it benefits the environment. Batteries must be recycled or disposed of properly. Recycling programs for your mobile device, batteries, and accessories may not be available in your area. We've made it easy for you to recycle your old Samsung mobile device by working with respected take-back companies in every state in the country.

Drop It Off

You can drop off your Samsung-branded mobile device and batteries for recycling at one of our numerous Samsung Recycling Direct (SM) locations. A list of these locations may be found at:

http://pages.samsung.com/us/recyclingdirect/usactivities_environment_samsungrecyclingdirect_locations.jsp

. 
Samsung-branded devices and batteries will be accepted at these locations for no fee.

Consumers may also recycle their used mobile device or batteries at many retail or carrier-provided locations where mobile devices and batteries are sold. Additional information regarding specific locations may be found at: http://www.epa.gov/epawaste/partnerships/plugin/cellphone/index.htm or at http://www.call2recycle.org/.

Mail It In

The Samsung Mobile Take-Back Program will provide Samsung customers with a free recycling mailing label. Just go to http://www.samsung.com/us/aboutsamsung/citizenship/usactivities_environment_samsungrecyclingdirect.html?INT=ST A_recyle_your_phone_page and follow the instructions to print out a free pre-paid postage label and then send your old mobile device or battery to the address listed, via U.S. Mail, for recycling.

Dispose of unwanted electronics through an approved recycler.

To find the nearest recycling location, go to our website: www.samsung.com/recyclingdirect
Or call, (877) 278-0799.

Follow local regulations regarding disposal of mobile devices and batteries

Dispose of your mobile device and batteries in accordance with local regulations. In some areas, the disposal of these items in household or business trash may be prohibited. Help us protect the environment - recycle!

Warning! Never dispose of batteries in a fire because they may explode.

UL Certified Travel Charger

The Travel Charger for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines:

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE.

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.
FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET.

THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.

Display / Touch-Screen

Please note the following information when using your mobile device:

WARNING REGARDING DISPLAY

The display on your mobile device is made of glass or acrylic and could break if your mobile device is dropped or if it receives significant impact. Do not use if screen is broken or cracked as this could cause injury to you.

WARRANTY DISCLAIMER: PROPER USE OF A TOUCH-SCREEN MOBILE DEVICE

If your mobile device has a touch-screen display, please note that a touch-screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch-screen may damage the tempered glass surface and void the warranty. For more information, please refer to the “Standard Limited Warranty”.

GPS & AGPS

Certain Samsung mobile devices can use a Global Positioning System (GPS) signal for location-based applications. A GPS uses satellites controlled by the U.S. Government that are subject to changes implemented in accordance with the Department of Defense policy and the 2008 Federal Radio navigation Plan (FRP). Changes may affect the performance of location-based technology on your mobile device.

Certain Samsung mobile devices can also use an Assisted Global Positioning System (AGPS), which obtains information from the cellular network to improve GPS performance. AGPS uses your wireless service provider’s network and therefore
airtime, data charges, and/or additional charges may apply in accordance with your service plan. Contact your wireless service provider for details.

**Your Location**

Location-based information includes information that can be used to determine the approximate location of a mobile device. Mobile devices which are connected to a wireless network transmit location-based information. Additionally, if you use applications that require location-based information (e.g. driving directions), such applications transmit location-based information. The location-based information may be shared with third-parties, including your wireless service provider, applications providers, Samsung, and other third-parties providing services.

**Use of AGPS in Emergency Calls**

When you make an emergency call, the cellular network may activate AGPS technology in your mobile device to tell the emergency responders your approximate location.

AGPS has limitations and **might not work in your area**. Therefore:

- Always tell the emergency responder your location to the best of your ability; and

- Remain on the mobile device for as long as the emergency responder instructs you.

**Navigation**

Maps, directions, and other navigation-data, including data relating to your current location, may contain inaccurate or incomplete data, and circumstances can and do change over time. In some areas, complete information may not be available. **Therefore, you should always visually confirm that the navigational instructions are consistent with what you see before following them. All users should pay attention to road conditions, closures, traffic, and all other factors that may impact safe driving or walking. Always obey posted road signs.**

**Emergency Calls**

This mobile device, like any wireless mobile device, operates using radio signals, wireless and landline networks, as well as user-programmed functions, which cannot guarantee connection in all conditions, areas, or circumstances. Therefore, you should never rely solely on any wireless mobile device for essential communications (medical emergencies, for example). Before traveling in remote or underdeveloped areas, plan an alternate method of contacting emergency services personnel. Remember, to
make or receive any calls, the mobile device must be switched on and in a service area with adequate signal strength.

Emergency calls may not be possible on all wireless mobile device networks or when certain network services and/or mobile device features are in use. Check with local service providers.

**To make an emergency call:**

1. If the mobile device is not on, switch it on.
2. From the Home screen, tap 📞.
3. Key in the emergency number for your present location (for example, 911 or other official emergency number), then tap 📞. Emergency numbers vary by location.

If certain features are in use (call blocking, for example), you may first need to deactivate those features before you can make an emergency call. Consult your User Manual and your local cellular service provider. When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your mobile device may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

---

**Care and Maintenance**

Your mobile device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years:

**Keep your Samsung Mobile Device away from:**

**Liquids of any kind**

Keep the mobile device dry. Precipitation, humidity, and liquids contain minerals that will corrode electronic circuits. If the mobile device does get wet, do not accelerate drying with the use of an oven, microwave, or dryer, because this may damage the mobile device and could cause a fire or explosion.

Do not use the mobile device with a wet hand. Doing so may cause an electric shock to you or damage to the mobile device.

**Extreme heat or cold**

Avoid temperatures below 0°C / 32°F or above 45°C / 113°F.
Microwaves
Do not try to dry your mobile device in a microwave oven. Doing so may cause a fire or explosion.

Dust and dirt
Do not expose your mobile device to dust, dirt, or sand.

Cleaning solutions
Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the mobile device. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

Shock or vibration
Do not drop, knock, or shake the mobile device. Rough handling can break internal circuit boards.

Paint
Do not paint the mobile device. Paint can clog the device’s moving parts or ventilation openings and prevent proper operation.

Responsible Listening

Caution! Avoid potential hearing loss.

Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cell phones, at high volume settings for long durations may lead to permanent noise-induced hearing loss.

This includes the use of headphones (including headsets, earbuds, and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound, and distorted hearing. Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings, and equipment.

You should follow some common sense recommendations when using any portable audio device:
- Always turn the volume down before plugging the earphones into an audio source.
- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- Be aware that you can adapt to higher volume settings over time, not realizing that the higher volume may be harmful to your hearing.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.
- Limit the amount of time you listen. As the volume increases, less time is required before you hearing could be affected.
- Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech, or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

You can obtain additional information on this subject from the following sources:

**American Academy of Audiology**

11730 Plaza American Drive, Suite 300
Reston, VA 20190
Voice: (800) 222-2336
Email: info@audiology.org

Internet:

Operating Environment

Operating Environment

Remember to follow any special regulations in force in any area, and always switch your mobile device off whenever it is forbidden to use it, or when it may cause interference or danger. When connecting the mobile device or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

Using Your Mobile Device Near Other Electronic Devices

Most modern electronic equipment is shielded from Radio Frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless mobile device. Consult the manufacturer to discuss alternatives.
Implantable Medical Devices

A minimum separation of six (6) inches should be maintained between a handheld wireless mobile device and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

- Should ALWAYS keep the mobile device more than six (6) inches from their implantable medical device when the mobile device is turned ON;
- Should not carry the mobile device in a breast pocket;
- Should use the ear opposite the implantable medical device to minimize the potential for interference;
- Should turn the mobile device OFF immediately if there is any reason to suspect that interference is taking place;
- Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless mobile device with an implantable medical device, consult your health care provider.

For more information see: http://www.fcc.gov/oet/rfsafety/rf-faqs.html#.

Other Medical Devices

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your mobile device off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle before using your mobile device in a motor vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Switch your mobile device off in any facility where posted notices require you to do so.

Potentially Explosive Environments

Switch your mobile device off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion.
or fire resulting in bodily injury or even death. Users are advised to switch the mobile device off while at a refueling point (service station).

Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

**When your Device is Wet**

Do not turn on your device if it is wet. If your device is already on, turn it off and remove the battery immediately (if the device will not turn off or you cannot remove the battery, leave it as-is). Then, dry the device with a towel and take it to a service center.

**FCC Hearing Aid Compatibility (HAC) Regulations for Wireless Devices**

The U.S. Federal Communications Commission (FCC) has established requirements for digital wireless mobile devices to be compatible with hearing aids and other assistive hearing devices.

When individuals employing some assistive hearing devices (hearing aids and cochlear implants) use wireless mobile devices, they may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and mobile devices also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless mobile devices to assist hearing device users find mobile devices that may be compatible with their hearing devices. Not all mobile devices have been rated. Mobile devices that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not
be able to use a rated mobile device successfully. Trying out the mobile device with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Wireless mobile devices rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. M4 is the better/higher of the two ratings. M-ratings refer to enabling acoustic coupling with hearing aids that do not operate in telecoil mode.

**T-Ratings:** Mobile devices rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. T4 is the better/higher of the two ratings. T-ratings refer to enabling inductive coupling with hearing aids operating in telecoil mode.

Hearing devices may also be rated. Your hearing aid manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise.

Under the current industry standard, American National Standards Institute (ANSI) C63.19, the hearing aid and wireless mobile device rating values are added together to indicate how usable they are together. For example, if a

A hearing aid meets the M2 level rating and the wireless mobile device meets the M3 level rating, the sum of the two values equals M5. Under the standard, this should provide the hearing aid user with normal use while using the hearing aid with the particular wireless mobile device. A sum of 6 or more would indicate excellent performance.

However, these are not guarantees that all users will be satisfied. T ratings work similarly.
The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

**HAC for Newer Technologies**

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids.

It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

**Restricting Children's Access to Your Mobile Device**

Your mobile device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the mobile device, or make calls that increase your mobile device bill.

Keep the mobile device and all its parts and accessories out of the reach of small children.

**FCC Notice and Cautions**

**FCC Notice**

The mobile device may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the mobile device if such interference cannot be eliminated. Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association.

**Cautions**

Any changes or modifications to your mobile device not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas, and chargers. The use of any unauthorized accessories may be dangerous and void the mobile device warranty if said accessories cause damage or a defect to the mobile device.
Although your mobile device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.

**Other Important Safety Information**

- Only qualified personnel should service the mobile device or install the mobile device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
- Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted.
- Check regularly that all wireless mobile device equipment in your vehicle is mounted and operating properly.
- When using a headset in dry environments, static electricity can build up in the headset and cause a small quick static electrical shock. To minimize the risk of electrostatic discharge from the headset avoid using the headset in extremely dry environments or touch a grounded unpainted metal object to discharge static electricity before inserting the headset.
- Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the mobile device, its parts, or accessories.
- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including installed or portable wireless equipment near or in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.
- Switch your mobile device off before boarding an aircraft. The use of wireless mobile devices in aircraft is illegal and may be dangerous to the aircraft's operation. Check with appropriate authorities before using any function of a mobile device while on an aircraft.
- Failure to observe these instructions may lead to the suspension or denial of cell phone services to the offender, or legal action, or both.
- While using your device, leave some lights on in the room and do not hold the screen too close to your eyes.
- Seizures or blackouts can occur when you are exposed to flashing lights while watching videos or playing games for extended periods. If you feel any discomfort, stop using the device immediately.
• Reduce risk of repetitive motion injuries. When you repetitively perform actions, such as pressing keys, drawing characters on a touch screen with your fingers, or playing games, you may experience occasional discomfort in your hands, neck, shoulders, or other parts of your body. When using your device for extended periods, hold the device with a relaxed grip, press the keys lightly, and take frequent breaks. If you continue to have discomfort during or after such use, stop use and see a physician.

• If your device has a camera flash or light, do not use the flash or light close to the eyes of people or pets. [122011]
Section 14: Warranty Information

Standard Limited Warranty

What is covered and for how long?
SAMSUNG TELECOMMUNICATIONS AMERICA, LLC ("SAMSUNG") warrants that SAMSUNG’s handsets and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase by the first consumer purchaser and continuing for the following specified period of time after that date:

- Phone 1 Year
- Batteries 1 Year
- Case/Pouch/Holster 90 Days
- Other Phone Accessories 1 Year

What is not covered?
This Limited Warranty is conditioned upon proper use of the Product. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abnormal use, abnormal conditions, improper storage, exposure to liquid, moisture, dampness, sand or dirt, neglect, or unusual physical, electrical or electromechanical stress; (b) scratches, dents and cosmetic damage, unless caused by SAMSUNG; (c) defects or damage resulting from excessive force or use of a metallic object when pressing on a touch screen; (d) equipment that has the serial number or the enhancement data code removed, defaced, damaged, altered or made illegible; (e) ordinary wear and tear; (f) defects or damage resulting from the use of Product in conjunction or connection with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (g) defects or damage resulting from improper testing, operation, maintenance, installation, service, or adjustment not furnished or approved by SAMSUNG; (h) defects or damage resulting from external causes such as collision with an object, fire, flooding, dirt, windstorm, lightning, earthquake, exposure to weather conditions, theft, blown fuse, or improper use of any electrical source; (i) defects or damage resulting from cellular signal reception.
or transmission, or viruses or other software problems introduced into the Product; or (j) Product used or purchased outside the United States. This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery; (ii) any of the seals on the battery are broken or show evidence of tampering; or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG’s obligations?
During the applicable warranty period, provided the Product is returned in accordance with the terms of this Limited Warranty, SAMSUNG will repair or replace the Product, at SAMSUNG’s sole option, without charge. SAMSUNG may, at SAMSUNG’s sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product, or may replace the Product with a rebuilt, reconditioned or new Product.

Repaired/replaced cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Products will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for ninety (90) days, whichever is longer. All replaced Products, parts, components, boards and equipment shall become the property of SAMSUNG. Except to any extent expressly allowed by applicable law, transfer or assignment of this Limited Warranty is prohibited.

What must you do to obtain warranty service?
To obtain service under this Limited Warranty, you must return the Product to an authorized phone service facility in an adequate container for shipping, accompanied by the sales receipt or comparable proof of sale showing the original date of purchase, the serial number of the Product and the seller’s name and address.

To obtain assistance on where to deliver the Product, please call SAMSUNG Customer Care at 1-888-987-4357. If SAMSUNG determines that any Product is not covered by this Limited Warranty, you must pay all parts, shipping, and labor charges for the repair or return of such Product.

You should keep a separate backup copy of any contents of the Product before delivering the Product to SAMSUNG for warranty service, as some or all of the contents may be deleted or reformatted during the course of warranty service.
What are the limits on SAMSUNG’s liability?

THIS LIMITED WARRANTY SETS OUT THE FULL EXTENT OF SAMSUNG’S RESPONSIBILITIES, AND THE EXCLUSIVE REMEDY REGARDING THE PRODUCTS.

ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SAMSUNG BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT OR FOR, WITHOUT LIMITATION, COMMERCIAL LOSS OF ANY SORT; LOSS OF USE, TIME, DATA, REPUTATION, OPPORTUNITY, GOODWILL, PROFITS OR SAVINGS; INCONVENIENCE; INCIDENTAL, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES; OR DAMAGES ARISING FROM THE USE OR INABILITY TO USE THE PRODUCT. SOME STATES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, OR THE DISCLAIMER OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND DISCLAIMERS MAY NOT APPLY TO YOU.

SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT USED IN CONJUNCTION WITH THE PRODUCT, OR THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE. RESPONSIBILITY FOR THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT RESTS SOLELY WITH THE USER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT.

Nothing in the Product instructions or information shall be construed to create an express warranty of any kind with respect to the Products. No agent, employee, dealer, representative or reseller is authorized to modify or extend this Limited Warranty or to make binding representations or claims, whether in advertising, presentations or otherwise, on behalf of SAMSUNG regarding the Products or this Limited Warranty.

This Limited Warranty gives you specific legal rights, and you may also have other rights that vary from state to state.
What is the procedure for resolving disputes?

ALL DISPUTES WITH SAMSUNG ARISING IN ANY WAY FROM THIS LIMITED WARRANTY OR THE SALE, CONDITION OR PERFORMANCE OF THE PRODUCTS SHALL BE RESOLVED EXCLUSIVELY THROUGH FINAL AND BINDING ARBITRATION, AND NOT BY A COURT OR JURY.

Any such dispute shall not be combined or consolidated with a dispute involving any other person’s or entity’s Product or claim, and specifically, without limitation of the foregoing, shall not under any circumstances proceed as part of a class action. The arbitration shall be conducted before a single arbitrator, whose award may not exceed, in form or amount, the relief allowed by the applicable law. The arbitration shall be conducted according to the American Arbitration Association (AAA) Commercial Arbitration Rules applicable to consumer disputes. This arbitration provision is entered pursuant to the Federal Arbitration Act. The laws of the State of Texas, without reference to its choice of laws principles, shall govern the interpretation of the Limited Warranty and all disputes that are subject to this arbitration provision. The arbitrator shall decide all issues of interpretation and application of this arbitration provision and the Limited Warranty.

For any arbitration in which your total damage claims, exclusive of attorney fees and expert witness fees, are $5,000.00 or less (“Small Claim”), the arbitrator may, if you prevail, award your reasonable attorney fees, expert witness fees and costs as part of any award, but may not grant SAMSUNG its attorney fees, expert witness fees or costs unless it is determined that the claim was brought in bad faith. In a Small Claim case, you shall be required to pay no more than half of the total administrative, facility and arbitrator fees, or $50.00 of such fees, whichever is less, and SAMSUNG shall pay the remainder of such fees. Administrative, facility and arbitrator fees for arbitrations in which your total damage claims, exclusive of attorney fees and expert witness fees, exceed $5,000.00 (“Large Claim”) shall be determined according to AAA rules. In a Large Claim case, the arbitrator may grant to the prevailing party, or apportion among the parties, reasonable attorney fees, expert witness fees and costs. Judgment may be entered on the arbitrator’s award in any court of competent jurisdiction.

This arbitration provision also applies to claims against SAMSUNG’s employees, representatives and affiliates if any such claim arises from the Product’s sale, condition or performance.
You may opt out of this dispute resolution procedure by providing notice to SAMSUNG no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product. To opt out, you must send notice by e-mail to optout@sta.samsung.com, with the subject line: “Arbitration Opt Out.” You must include in the opt out e-mail (a) your name and address; (b) the date on which the Product was purchased; (c) the Product model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable, if you have it (the IMEI or MEID or Serial Number can be found (i) on the Product box; (ii) on the Product information screen, which can be found under “Settings;” (iii) on a label on the back of the Product beneath the battery, if the battery is removable; and (iv) on the outside of the Product if the battery is not removable). Alternatively, you may opt out by calling 1-888-987-4357 no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product and providing the same information. These are the only two forms of notice that will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect the coverage of the Limited Warranty in any way, and you will continue to enjoy the benefits of the Limited Warranty.

Severability

If any portion of this Limited Warranty is held to be illegal or unenforceable, such partial illegality or unenforceability shall not affect the enforceability of the remainder of the Limited Warranty.

Precautions for Transfer and Disposal

If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software. To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung’s Customer Care Center for an Extended File System (EFS) Clear which will eliminate all user memory and return all settings to default settings. Please contact the Samsung Customer Care Center for details.

Important! Please provide warranty information (proof of purchase) to Samsung’s Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.
End User License Agreement for Software

IMPORTANT. READ CAREFULLY: This End User License Agreement (“EULA”) is a legal agreement between you (either an individual or a single entity) and Samsung Electronics Co., Ltd. for software owned by Samsung Electronics Co., Ltd. and its affiliated companies and its third party suppliers and licensors that accompanies this EULA, which includes computer software and may include associated media, printed materials, “online” or electronic documentation (“Software”).

BY CLICKING THE “I ACCEPT” BUTTON (OR IF YOU BYPASS OR OTHERWISE DISABLE THE “I ACCEPT”, AND STILL INSTALL, COPY, DOWNLOAD, ACCESS OR OTHERWISE USE THE SOFTWARE), YOU AGREE TO BE BOUND BY THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THE TERMS IN THIS EULA, YOU MUST CLICK THE “DECLINE” BUTTON, AND DISCONTINUE USE OF THE SOFTWARE.

1. GRANT OF LICENSE. Samsung grants you the following rights provided that you comply with all terms and conditions of this EULA: You may install, use, access, display and run one copy of the Software on the local hard disk(s) or other permanent storage media of one computer and use the Software on a single computer or a mobile device at a time, and you may not make the Software available over a network where it could be used by multiple computers at the same time. You may make one copy of the Software in machine-readable form for backup purposes only; provided that the backup copy must include all copyright or other proprietary notices contained on the original.

2. RESERVATION OF RIGHTS AND OWNERSHIP. Samsung reserves all rights not expressly granted to you in this EULA. The Software is protected by copyright and other intellectual
property laws and treaties. Samsung or its suppliers own the title, copyright and other intellectual property rights in the Software. The Software is licensed, not sold.

3. LIMITATIONS ON END USER RIGHTS. You may not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code or algorithms of, the Software (except and only to the extent that such activity is expressly permitted by applicable law not withstanding this limitation), or modify, or disable any features of, the Software, or create derivative works based on the Software. You may not rent, lease, lend, sublicense or provide commercial hosting services with the Software.

4. CONSENT TO USE OF DATA. You agree that Samsung and its affiliates may collect and use technical information gathered as part of the product support services related to the Software provided to you, if any, related to the Software. Samsung may use this information solely to improve its products or to provide customized services or technologies to you and will not disclose this information in a form that personally identifies you.

5. UPGRADES. This EULA applies to updates, supplements and add-on components (if any) of the Software that Samsung may provide to you or make available to you after the date you obtain your initial copy of the Software, unless we provide other terms along with such upgrade. To use Software identified as an upgrade, you must first be licensed for the Software identified by Samsung as eligible for the upgrade. After upgrading, you may no longer use the Software that formed the basis for your upgrade eligibility.

6. SOFTWARE TRANSFER. You may not transfer this EULA or the rights to the Software granted herein to any third party unless it is in connection with the sale of the mobile device which the Software accompanied. In such event, the transfer must include all of the Software (including all component parts, the media and printed materials, any upgrades, this EULA) and you may not retain any copies of the Software. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the Software must agree to all the EULA terms.

7. EXPORT RESTRICTIONS. You acknowledge that the Software is subject to export restrictions of various countries. You agree to comply with all applicable international and national laws that apply to the Software, including the U.S. Export Administration Regulations, as well as end user, end use, and destination restrictions issued by U.S. and other governments.
8. TERMINATION. This EULA is effective until terminated. Your rights under this License will terminate automatically without notice from Samsung if you fail to comply with any of the terms and conditions of this EULA. Upon termination of this EULA, you must cease all use of the Software and destroy all copies, full or partial, of the Software.

9. THIRD-PARTY APPLICATIONS. Certain third-party applications may be included with, or downloaded to this mobile device. SAMSUNG makes no representations whatsoever about any of these applications. Since SAMSUNG has no control over such applications, Purchaser acknowledges and agrees that SAMSUNG is not responsible for the availability of such applications and is not responsible or liable for any content, advertising, products, services, or other materials on or available from such applications. Purchaser expressly acknowledges and agrees that use of third-party applications is at Purchaser’s sole risk and that the entire risk of unsatisfactory quality, performance, accuracy and effort is with Purchaser. It is up to Purchaser to take precautions to ensure that whatever Purchaser selects to use is free of such items as viruses, worms, Trojan horses, and other items of a destructive nature. References on this mobile device to any names, marks, products, or services of any third-parties are provided solely as a convenience to Purchaser, and do not constitute or imply an endorsement, sponsorship, or recommendation of, or affiliation with the third-party or its products and services. Purchaser agrees that SAMSUNG shall not be responsible or liable, directly or indirectly, for any damage or loss caused or alleged to caused by, or in connection with, use of or reliance on any such third-party content, products, or services available on or through any such application. Purchaser acknowledges and agrees that your use of any third-party application is governed by such third-party application provider’s Terms of Use, License Agreement, Privacy Policy, or other such agreement and that any information or personal data you provide, whether knowingly or unknowingly, to such third-party application provider, will be subject to such third-party application provider’s privacy policy, if such a policy exists. SAMSUNG DISCLAIMS ANY RESPONSIBILITY FOR ANY DISCLOSURE OF INFORMATION OR ANY OTHER PRACTICES OF ANY THIRD-PARTY APPLICATION PROVIDER.

10. Disclaimer of Warranty Regarding Third-Party Applications. SAMSUNG DOES NOT WARRANT OR MAKE ANY REPRESENTATIONS REGARDING THE AVAILABILITY, USE, TIMELINESS, SECURITY, VALIDITY, ACCURACY, OR RELIABILITY OF, OR THE RESULTS OF THE USE OF, OR OTHERWISE RESPECTING, THE CONTENT OF ANY
THIRD-PARTY APPLICATION WHETHER SUCH THIRD-PARTY APPLICATION IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG, IS DOWNLOADED, OR OTHERWISE OBTAINED. USE OF ANY THIRD-PARTY APPLICATION IS DONE AT PURCHASER’S OWN DISCRETION AND RISK AND PURCHASER IS SOLELY RESPONSIBLE FOR ANY DAMAGE TO YOUR MOBILE DEVICE OR LOSS OF DATA THAT RESULTS FROM THE DOWNLOADING OR USE OF SUCH THIRD-PARTY APPLICATIONS. SAMSUNG EXPRESSLY DISCLAIMS ANY WARRANTY REGARDING WHETHER PURCHASER’S PERSONAL INFORMATION IS CAPTURED BY ANY THIRD-PARTY APPLICATION PROVIDER OR THE USE TO WHICH SUCH PERSONAL INFORMATION MAY BE PUT BY SUCH THIRD-PARTY APPLICATION PROVIDER. ANY THIRD-PARTY APPLICATIONS PROVIDED WITH THIS MOBILE DEVICE ARE PROVIDED “AS IS” AND ON AN “AS AVAILABLE” BASIS, WITHOUT WARRANTIES OF ANY KIND FROM SAMSUNG, EITHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT POSSIBLE PURSUANT TO APPLICABLE LAW, SAMSUNG DISCLAIMS ALL WARRANTIES EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTORY QUALITY OR WORKMANLIKE EFFORT, FITNESS FOR A PARTICULAR PURPOSE, RELIABILITY OR AVAILABILITY, ACCURACY, LACK OF VIRUSES, QUIET ENJOYMENT, NON-INFRINGEMENT OF THIRD PARTY RIGHTS OR OTHER VIOLATION OF RIGHTS. SAMSUNG DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE THIRD-PARTY APPLICATION, THAT THE FUNCTIONS CONTAINED IN THE THIRD-PARTY APPLICATION WILL MEET PURCHASER’S REQUIREMENTS, THAT THE OPERATION OF THE THIRD-PARTY APPLICATION WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE THIRD-PARTY APPLICATION WILL BE CORRECTED. PURCHASER ASSUMES THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR, OR CORRECTION. SOME JURISDICTIONS DO NOT ALLOW EXCLUSIONS OR LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. NO ADVICE OR INFORMATION, WHETHER ORAL OR WRITTEN, OBTAINED BY PURCHASER FROM SAMSUNG SHALL BE DEEMED TO ALTER THIS DISCLAIMER OF WARRANTY REGARDING THIRD-PARTY APPLICATIONS, OR TO CREATE ANY WARRANTY.

11. Limitation of Liability. SAMSUNG WILL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND ARISING OUT OF OR RELATING TO THE USE OR THE INABILITY TO USE ANY THIRD-PARTY APPLICATION, ITS CONTENT OR FUNCTIONALITY, INCLUDING BUT NOT LIMITED TO DAMAGES
CAUSED BY OR RELATED TO ERRORS, OMISSIONS, INTERRUPTIONS, DEFECTS, DELAY IN OPERATION OR TRANSMISSION, COMPUTER VIRUS, FAILURE TO CONNECT, NETWORK CHARGES, AND ALL OTHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES EVEN IF SAMSUNG HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. NOTwithstanding the foregoing, SAMSUNG’S TOTAL LIABILITY TO PURCHASER FOR ALL LOSSES, DAMAGES, CAUSES OF ACTION, INCLUDING BUT NOT LIMITED TO THOSE BASED ON CONTRACT, TORT, OR OTHERWISE, ARISING OUT OF PURCHASER’S USE OF THIRD-PARTY APPLICATIONS ON THIS MOBILE DEVICE, OR ANY OTHER PROVISION OF THIS EULA, SHALL NOT EXCEED THE AMOUNT PURCHASER PAID SPECIFICALLY FOR ANY SUCH THIRD-PARTY APPLICATION THAT WAS INCLUDED WITH THIS MOBILE DEVICE. THE FOREGOING LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS (INCLUDING SECTIONS 9, 10, AND 11) SHALL APPLY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EVEN IF ANY REMEDY FAILS ITS ESSENTIAL PURPOSE.

12. U.S. Government End Users Restricted Rights. The Software is licensed only with "restricted rights" and as "commercial items" consisting of "commercial software" and "commercial software documentation" with only those rights as are granted to all other end users pursuant to the terms and conditions herein. All Software and Products provided to the United States Government pursuant to solicitations issued on or after December 1, 1995 is provided with the commercial rights and restrictions described elsewhere herein. All Software and Products provided to the United States Government pursuant to solicitations issued prior to December 1, 1995 are provided with RESTRICTED RIGHTS as provided for in FAR, 48 CFR 52.227-14 (JUNE 1987) or DFAR, 48 CFR 252.227-7013 (OCT 1988), as applicable.

13. APPLICABLE LAW. This EULA is governed by the laws of TEXAS, without regard to conflicts of laws principles. This EULA shall not be governed by the UN Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded. If a dispute, controversy or difference is not amicably settled, it shall be finally resolved by arbitration in Seoul, Korea in accordance with the
Arbitration Rules of the Korean Commercial Arbitration Board. The award of arbitration shall be final and binding upon the parties.

14. ENTIRE AGREEMENT; SEVERABILITY. This EULA is the entire agreement between you and Samsung relating to the Software and supersedes all prior or contemporaneous oral or written communications, proposals and representations with respect to the Software or any other subject matter covered by this EULA. If any provision of this EULA is held to be void, invalid, unenforceable or illegal, the other provisions shall continue in full force and effect.

Social Hub

Legal Terms and Privacy

Samsung's Social Hub and (if applicable) the website where you accessed this Disclaimer (collectively, the "Service"), is being made available to you by Samsung Electronics Co., Ltd., and its affiliates and suppliers (collectively "Samsung") subject to the following enclosed documents:

- Social Hub Terms and Conditions which governs your use of the Service generally;
- Social Hub End User License Agreement which specifically governs your use of the software which forms part of, or enables you to access, the Service; and
- Social Hub Privacy Policy which governs our collection and use of personal information in connection with your access to and use of the Service.

By using the Service, you agree to be bound by the above documents. Please read through those documents to make sure you understand the basis on which Samsung is providing the Service to you.

You will be able to access additional features available at socialhub.samsungmobile.com.

Social Hub Terms and Conditions

Acceptance of the Terms

These Social Hub Terms and Conditions together with the Social Hub Privacy Policy and Social Hub End User Licence Agreement (collectively "Terms") govern your use of Social Hub, which comprises all content and services accessible through Social Hub (including third party content and services), and (if applicable) the website where you accessed these Terms (collectively the "Service"). The Terms constitute an agreement between you and Samsung
Electronics Co., Ltd., and its affiliates (collectively "Samsung") with respect to the Service. By using the Service, you agree to be legally bound to the Terms.

You are not allowed to use the Service if you do not agree to the Terms. To the extent permitted by applicable law, Samsung reserves the right to modify, update, supplement, revise or otherwise change the Terms, and to impose new or additional rules, policies, terms or conditions in relation to the Service, from time to time with or without notice to you ("Amendments").

Samsung may provide you with notice of the Amendments by sending an email message to the email address listed in your account information (if any), or by posting the notice on the Social Hub website. Such Amendments will be effective immediately and incorporated into the Terms upon sending or posting of such notice. You are responsible for regularly reviewing the Terms. Your continued use of the Service will be deemed to constitute your acceptance of any and all such Amendments.

Eligibility

To use the Service, you must be at least sixteen (16) years of age. If you are at least sixteen (16) years of age but are a minor for legal purposes where you live, you must review the Terms and have your parent or legal guardian accept the Terms on your behalf in order for you to use the Service. The person accepting the Terms on your behalf must be legally competent.

Your Information

When required to provide information in connection with your use of the Service, you agree to provide truthful and complete information. Providing misleading information about your identity is forbidden. When you first use the Service, you may be required to create a username and a password.

You (and your parent or legal guardian, if you are a minor) are personally responsible for any use of the Service with your username and password.

You agree to take due care in protecting your username and password against misuse by others and promptly notify Samsung about any misuse.

Termination of Service

Samsung may terminate or restrict your access to certain parts of the Service if there is an indication that you have breached the Terms or at any time in its sole discretion.
Your Material
Except as set forth in the Social Hub Privacy Policy, Samsung shall not be responsible for any removal of the information or content you have submitted in the course of using the Service ("Material") when your access to the Service is terminated. Your submission of Material in the course of using the Service does not transfer ownership rights in the Material to Samsung. After the Material is removed from the Service by either you or Samsung, some traces of the Material may remain and copies of the Material may still reside within the servers used in providing the Service. However, Samsung does not claim ownership in your Material.

You represent and warrant that you have obtained any consents, permission or licenses that may be required for you to have the legal right to submit any Material. Samsung reserves the right to terminate your access to the Service if Samsung determines, at its sole discretion, that you have repeatedly submitted infringing Materials to the Service.

Using the Service
You agree to:
• Use the Service only for your private, non-commercial purposes;
• Comply with applicable laws, the Terms and good manners;
• Not submit unlawful, offensive, abusive, pornographic, harassing, libelous or other inappropriate Material;
• Respect the privacy of others;
• Obtain any consents, permission or licenses that may be required for you to have the legal right to submit any Material; and
• Not distribute or post spam, unreasonably large files, chain letters, pyramid schemes, viruses or any other technologies that may harm the Service, or the interest or property of the Service users.

Unauthorized use of the Service (including any use in contravention of the Terms) is prohibited and may result in criminal prosecution and/or civil liability.

Restrictions
You and any third party directed by You must not display, copy, store, modify, sell, publish or redistribute the Service (whether all or any portion of it), and such displaying, copying, storing, modification, sale, publishing and redistribution shall be prohibited unless you have obtained all necessary rights and permissions from Samsung and the owners and right holders of such the Service or relevant part.
You must not use the Service for any purposes other than those permitted under the Terms. Without limiting this restriction, you must not use the service for any illegal purposes, to make unsolicited offers or advertisements, to impersonate or falsely claim affiliation with any person or entity, to misrepresent, harass, defraud or defame others, to post obscene or unreasonably offensive material, to negatively present the Service, nor for any commercial purposes.

Except as expressly permitted by the Terms, and except to the extent that applicable laws prevent Samsung from restraining you from doing so, you are not allowed to disassemble, reverse engineer, tamper with the Service, transmit malicious code or collect information of other users through the Service.

You may not take any action to interrupt the functionality of or tamper with the Service or any content or service contained in or provided through the Service, or any servers used in providing the Service, or to unreasonably affect others' enjoyment of the Service in any way.

**Actions Required by Law**

Samsung may need to comply with lawful interception and/or data retention requirements imposed by your country of residence or any other country in which you use the Service. Samsung may restrict access to any part of the Service or terminate your access to the Service, at any time in its sole discretion if required by law or by the relevant authorities or regulatory agencies to do so.

**Third Party Sites and Content**

The Service may allow access to sites on the Internet that are owned or operated by third parties. Access to such sites does not imply that Samsung endorses the site or the conduct, products or services on the site. Upon accessing any such site, you must review and agree to the rules of use of the relevant site before using the site.

You acknowledge and agree that Samsung has no control over the content, products or services of third-party sites and does not assume any responsibility for or in respect of such content, products or services. Third party content and services may be terminated or interrupted at any time, and Samsung makes no representation or warranty that any content or service will remain available for any period of
time. Samsung expressly disclaims any responsibility or liability for any interruption or suspension of any third party content or service.

In addition, Samsung is neither responsible nor liable for customer service related to third party sites. Any question or request for service relating to third party sites should be made directly to the relevant site operator.

**Subscription Information**

Use of the Service may involve transmission of data through your service provider’s network. Your network service provider may charge you for such data transmission. Samsung assumes no responsibility for the payment of any such charges.

**Availability**

The Service may be network dependent - contact your network service provider for more information. Samsung reserves the right, in its sole discretion, to change, improve and correct the Service. The Service may not be available during maintenance breaks and other times. Samsung may also decide to discontinue the Service or any part thereof in its sole discretion. In such case you will be provided with prior notification.

Samsung does not represent or warrant that the Service, or any part thereof, is appropriate or available for use in any particular jurisdiction. If you choose to access the Service, you do so on your own initiative and at your own risk, and you are responsible for complying with all US federal, state and local laws, rules and regulations.

**Dealings with Others**

You may interact with other users on or through the Service. You agree that any such interactions do not involve Samsung and are solely between you and the other user(s).

**Intellectual Property**

The Service and related software are protected under international copyright laws and you are hereby notified that copyrights are claimed by Samsung. Subject to the Terms, Samsung retains all right, title and interest in the Service and in all Samsung’s products, software and other properties provided to you or used by you through the Service.

**Personal Data**

The Social Hub Privacy Policy and the following additional provisions govern the use of your personal information. When you access the Service, Samsung may ask for or otherwise
collect certain personal information such as your email address along with your user name and password and, in certain cases, your mobile phone number so that we can communicate with you, for example to send notifications of incoming messages. When you use the Service, certain technical information such as the type and serial number of your mobile device, Internet protocol address, your mobile network and country codes, timezone, technical details of your client as well as your transactions with Samsung, for example your acceptance of the Terms, will be automatically collected by Samsung.

The purposes for which Samsung may use such data are explained in the Social Hub Privacy Policy. Samsung may also participate with your selected service providers in maintaining your contact lists.

The third party services and content you access through the Service and the telecommunications carriers and the network through which you access the Service are provided and hosted by your selected third party content and service providers who typically has a privacy policy of its own. We recommend you familiarize yourself with your service provider’s privacy policy. Samsung is not responsible for the privacy or any other practices of such service providers. Although your messages will be transmitted through Samsung’s servers, Samsung will not process the content or headers of your messages for any purpose other than as necessary to deliver and manage your messages, unless otherwise required by law.

In connection with certain services accessible via the Service, Samsung may cooperate with your operator and other third parties. Samsung may receive from such third parties certain device specific non-personal information, such as device serial number of the devices sold by the operator with preinstalled software for the Service. Such information may be used for analyzing the activation of the Service.

**LIMITATION OF LIABILITY**

THE SERVICE IS PROVIDED ON "AS IS" AND "AS AVAILABLE" BASIS. TO THE FULLEST EXTENT PERMITTED BY THE LAW AND SUBJECT TO THE TERMS, SAMSUNG DOES NOT WARRANT THAT THE SERVICE WILL BE UNINTERRUPTED OR ERROR OR VIRUS-FREE.

TO THE FULLEST EXTENT PERMITTED BY THE LAW AND SUBJECT TO THE TERMS, NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF TITLE OR NON-INFRINGEMENT OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS
FOR A PARTICULAR PURPOSE, IS MADE IN RELATION TO THE AVAILABILITY, ACCURACY, RELIABILITY, OF THE SERVICE, INCLUDING ANY INFORMATION OR CONTENT PROVIDED THROUGH THE SERVICE. YOU EXPRESSLY AGREE AND ACKNOWLEDGE THAT THE USE OF THE SERVICE IS AT YOUR SOLE RISK AND THAT YOU MAY BE EXPOSED TO CONTENT FROM VARIOUS SOURCES.

SAMSUNG SHALL NOT BE HELD RESPONSIBLE FOR ANY THIRD PARTY CONTENT OR SERVICE THAT MAY BE ACCESSED THROUGH THE SERVICE, NOR SHALL SAMSUNG BE HELD RESPONSIBLE FOR MALICIOUS CODE CONTAINED ON OR DISTRIBUTED THROUGH BY THIRD PARTIES.

YOU ASSUME FULL RESPONSIBILITY FOR ANY DAMAGES, LOSSES, COSTS, OR HARM ARISING FROM YOUR USE OF OR INABILITY TO USE THE SERVICE. TO THE EXTENT PERMITTED BY LAW, EXCEPT FOR LIABILITY FOR DEATH OR PERSONAL INJURY CAUSED BY GROSS NEGLIGENCE OR INTENTIONAL MISCONDUCT, SAMSUNG DISCLAIMS ALL LIABILITIES WITH RESPECT TO YOUR USE OF THE SERVICE (INCLUDING DIRECT, INDIRECT, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES).

IF THERE IS A CLAIM THAT WE HAVE BREACHED ANY OF THE PROVISIONS IN THE TERMS, THIS DOES NOT AFFECT OR INVALIDATE THE OTHER PROVISIONS.

CERTAIN STATUTORY PROVISIONS UNDER APPLICABLE LAW MAY IMPLY WARRANTIES OR CONDITIONS OR IMPOSE OBLIGATIONS UPON SAMSUNG WHICH CANNOT BE EXCLUDED, RESTRICTED OR MODIFIED OR CANNOT BE EXCLUDED, RESTRICTED OR MODIFIED EXCEPT TO A LIMITED EXTENT. THE TERMS MUST BE READ SUBJECT TO THESE STATUTORY PROVISIONS. IF THESE STATUTORY PROVISIONS APPLY, TO THE EXTENT TO WHICH SAMSUNG IS ABLE TO DO SO, SAMSUNG LIMITS ITS LIABILITY UNDER THOSE PROVISIONS TO, AT ITS OPTION, IN THE CASE OF SERVICES (A) THE SUPPLYING OF THE SERVICES AGAIN; OR (B) THE PAYMENT OF THE COST OF HAVING THE SERVICES SUPPLIED AGAIN AND, IN THE CASE OF GOODS, (A) THE REPLACEMENT OF THE GOODS OR THE SUPPLY OF EQUIVALENT GOODS; (B) THE REPAIR OF THE GOODS; (C) THE PAYMENT OF THE COST OF REPLACING THE GOODS OR OF ACQUIRING EQUIVALENT GOODS; OR (D) THE PAYMENT OF THE COST OF HAVING THE GOODS REPAIRED.
**Indemnification**

You agree to defend, indemnify and hold harmless Samsung from and against any and all third party claims and all liabilities, assessments, losses, costs or damages resulting from or arising out of i) your breach of the Terms, ii) your infringement or violation of any intellectual property, other rights or privacy of a third party, iii) misuse of the Service by a third party where such misuse was made possible due to your failure to take reasonable measures to protect your username and password against misuse.

**Choice of Law**

Except where prohibited by applicable law or provided otherwise herein, the Terms shall be governed by the laws of the State of New York without regard to its conflict of law provisions.

You and Samsung agree to submit to the non-exclusive jurisdiction of the competent courts in the State of New York to resolve any legal matters arising from the Terms. Notwithstanding this, you agree that Samsung shall still be allowed to apply for injunctive remedies (or equivalent type of urgent legal relief) in any jurisdiction.

**Miscellaneous**

The Terms (including all documents comprising the Terms) constitute the entire agreement between you and Samsung, and supersedes any prior agreement between you and Samsung, with respect to your use of the Service. Your use of any third-party content or service accessed via the Service will be governed by the terms and conditions furnished with, and applicable to that content or service. If any provision of the Terms is held invalid, illegal or unenforceable, that portion of the Terms shall be construed in a manner consistent with applicable law to reflect, as nearly as possible, the original intentions of the parties, and the remaining portion of the Terms shall remain in full force and effect. Samsung’s failure to enforce any right or provision of the Terms will not constitute a waiver of such provision, or any other provision of the Terms.

Samsung will not be liable or responsible for any failure to fulfill any of its obligations under the Terms which failure is due to any cause or condition beyond the reasonable control of Samsung. If there is any conflict between these Social Hub Terms and Conditions and the Social Hub Privacy Policy, the provisions of these Social Hub Terms and Conditions shall
prevail. The provisions of the Terms that are intended to or by their nature should survive termination of your use of the Service shall remain valid after any such termination.

**Social Hub Privacy Policy**

Samsung Electronics Co., Ltd. ("Samsung") is committed to protecting the online privacy of visitors, users and customers to our Social Hub service. This privacy policy ("Privacy Policy") forms part of the Terms which govern your use of Social Hub(excluding any third party content and services), and (if applicable) the website where you accessed this Privacy Policy, (collectively, the "Service"). The purpose of the Privacy Policy is to inform you about the types of information we gather about you when you access or use the Service, how we may use that information, and if and how we disclose it to third parties.

All users of the Service are required to provide true, current, complete and accurate personal information when prompted and we will reject and delete any entry that we believe in good faith to be incorrect, false, falsified, or fraudulent, or inconsistent with or in violation of the Privacy Policy.

We will provide you with an opportunity to give your consent in relation to your use of the Service. Separate from such consent, your access or use of the Service will be construed as your acceptance of the Privacy Policy and of our collection, use, disclosure, management and storage of your personal information as described below. We may, from time to time, transfer or merge any personal information collected off-line to our online databases or store off-line information in an electronic format. We may also combine personal information we collect online with information available from other sources, including information received from our affiliates, marketing companies, or advertisers. This Privacy Policy covers all such personal information and will remain in full force and effect as long as you are a user of the Service, even if your use of or participation in any particular service, feature, function or promotional activity terminates, expires, ceases, is suspended or deactivated for any reason.

**INFORMATION THAT WE COLLECT**

**Personal Information**

We may request that you supply us with "personal" information, such as your name, e-mail address, mailing address, home or work telephone number in the course of you accessing or using the Service, such as via registration forms, surveys, and polls. In each such case, you will know what categories of information we collect because you will actively provide the information to us. You may not be able to
fully utilize all of the features or components of the Service if you choose not to provide certain information. If you do choose to give us personal information through the Service, we will collect and retain that information.

**Non-Personal Information**

When you use the Service, we may also collect "non-personal" information. We consider "non-personal information" to be information that, by itself, cannot be used to identify or contact you personally, such as demographic information (your age, gender, income, education, profession, zip code, etc.). Non-personal information may also include technical information, such as your IP address and other anonymous data involving your use of the Service. Non-personal information may also include information that you provide us through your use of the Service, such as the terms you enter into the search functions of Social Hub, mail inbox and instant messenger. We reserve the right to use or disclose non-personal information in any way we see fit.

**USE OF INFORMATION WE COLLECT**

**Our Services**

We use your personal information to provide you with any services that you may request or require, to communicate with you and to allow you to participate in online surveys. We use aggregated non-personal information about our users to understand the demographics of users of the Service, such as the percentage of male and female users, the geographic distribution of our users, the age ranges of our users, a combination of these and/or other demographics. We may also use the personal or non-personal information we collect to analyze how Service is being used, and to improve the content of the Service, and for marketing and promotional efforts.

**E-mail Communications**

If you send us an e-mail with questions or comments, we may use your personal information to respond to your questions or comments, and we may save your questions or comments for future reference. Aside from our reply to such an e-mail, it is not our standard practice to send you e-mail unless you request a particular service that involves e-mail communications. However, you consent to us contacting you by e-mail, and sending you information about products and services which we believe may be of interest to you. You may have the opportunity to subscribe to an electronic newsletter in which case information about the Service or our advertisers will be sent to your e-mail address. We will provide you with the option to change your preferences and opt-out of receiving those communications. You may request
at any time that we not e-mail you in future by clicking the "unsubscribe" link which is included at the bottom of any e-mail that you receive from us. If you unsubscribe, we will make reasonable efforts to discontinue e-mail communications to you as soon as practicable.

DISCLOSURE OF INFORMATION TO THIRD PARTIES

Aggregate Information
Except as specifically set forth in this Privacy Policy, we do not share your personal information with any third party without your permission. We may disclose aggregate information, such as demographic information, and our statistical analyses to third parties, including advertisers or other business partners. This aggregate information does not include your personal information.

Service Providers
We sometimes engage unaffiliated businesses to assist us in providing you certain services. For example, we may use third parties to provide advertising, marketing and promotional assistance, provide e-mail services, or facilitate our online services. In those instances, we may need to share your personal information with them.

We require these companies to use your personal information only to provide the particular product or service and do not authorize them to use your personal information for any other reason. We sometimes offer promotions in conjunction with a third party sponsor.

If you choose to participate in those promotions, we may share your information with the sponsor if they need it to send you a product or other special promotion they offer.

Third Party Advertisers
We may use third-party advertising companies to deliver specific advertisements to you. These companies may collect non-personal information about your visits to Social Hub in order to provide advertisements about products and services that may be of interest to you.

These companies may also aggregate your non-personal information for use in targeted advertising, marketing research, and other similar purposes. These companies may place their own cookies on your computer. If you want to prevent a third-party advertiser from collecting and using this information, you may visit each third party advertiser's website directly and opt-out.
Other Disclosures

We may disclose personal information when we are required or requested to do so by law, court order or other government or law enforcement authority or regulatory agency; to enforce or apply our rights and agreements; or when we believe in good faith that disclosing this information is necessary or advisable, including, for example, to protect the rights, property, or safety of the Service and Samsung, our users, or others.

CHILDREN

The Service is not designed for use by children without their parent’s supervision. We ask that anyone under the age of sixteen (16) not submit any personal information through the Service. We do not knowingly collect any personal information from children under the age of eighteen, and therefore we do not knowingly distribute such information to third parties.

SECURITY OF THE INFORMATION WE COLLECT

The security of your personal information is important to us. We maintain physical, electronic, and procedural safeguards to secure your personal information. However, there is always some risk in transmitting information electronically. The personal information we collect is stored within databases that we control.

As we deem appropriate, we use security measures consistent with industry standards, such as firewalls and encryption technology, to protect your information. However, we cannot guarantee the security of our databases, nor can we guarantee that information you supply won’t be intercepted while being transmitted to us over the Internet.

CHAT ROOMS AND OTHER PUBLIC AREAS

Our third party service and content providers may offer chat, user reviews, bulletin boards, or other public functions and any posting by you is considered public information available to other users. Any posting is governed in accordance with the third party service and content providers' terms and conditions. You should take care not to use personal information in your screen name or other information that might be publicly available to other users.

Archived Information

We maintain archives of web logs, database, and other systems and information in relation to the Service. Please note that it is possible some of this information may remain
archived after we delete the information from its active database. We maintain archives for disaster recovery, legal and other non-marketing purposes.

**How can I update my profile?**

You can help us maintain the accuracy of your profile by notifying us when you change zip/postal code, country of residence, age range, or e-mail address. If at any time you wish to update your information or stop receiving communication from us, sign in to the Service and then select 'update your profile' to change your preferences.

**CONTESTS AND SWEEPSTAKES**

Registration may be required to enter promotions such as contests and sweepstakes on Social Hub. These registration or entry processes may require your submission of personal information such as your first and last name, street address, city, state and zip code, e-mail address, telephone number and date of birth. The entry page and/or rules for the promotion will provide the specific requirements for the promotion. You may also have the opportunity to opt-in to special offers from our advertisers in connection with these promotions.

**ACCURACY OF THE INFORMATION WE COLLECT**

Any questions you may have regarding this Privacy Policy, the accuracy of your personal information or the use of your personal information, or any requests that we correct, update, or remove your information in our databases, should be directed via e-mail to s.dufresne@Samsung.com, or via regular mail to:

Samsung Telecommunications America, LLC
1301 E. Lookout Drive, Richardson, TX 75082
Attn: Customer Support Department

After receiving a request to change your information, we will make reasonable efforts to ensure that all of your personal information stored in databases we actively use to operate the Service will be updated, corrected, changed or deleted, as appropriate, as soon as reasonably practicable. However, we reserve the right to retain in our archival files any information we remove from or change in our active databases. We may retain such information to resolve disputes, troubleshoot problems and enforce our Terms.
In addition, it is not technologically possible to remove each and every record of the information you have provided to us. A copy of your personal information may exist in a non-erasable form that will be difficult or impossible for us to locate.

**CHANGES TO PRIVACY POLICY**

This Privacy Policy is effective as of May 29, 2010 and complies with Samsung's Corporate Privacy Policy. We reserve the right to change this Privacy Policy at any time, and will post any such changes to this Privacy Policy on the Social Hub website. Please refer back to the Social Hub website on a regular basis to obtain the most up to date Privacy Policy.

**Social Hub End User License Agreement**

**1. SOCIAL HUB**

This end user license ("License") allows you to use Social Hub ("Software") made available on your mobile device. This License is a legally binding agreement between you and Samsung Electronics Co. Ltd. the ("Licensor").

**2. LICENSE**

2.1 Licensor grants you for the term of this License a limited, personal, non-exclusive, non-transferable license to use the Software in object code executable only form on a single device for non-commercial uses.

2.2 All rights not expressly granted to you under this License are reserved to Licensor, and you agree not to take or permit any action with respect to the Software that is not expressly authorised under this License. For the avoidance of doubt, you have no right to use, incorporate into other products, copy, modify, translate or transfer to any third party the Software or any modification, adaptation or copy of the Software or any part thereof, nor to decompile, reverse engineer, or disassemble the binary code of the Software, either in whole or in part, except as expressly provided in this License.

2.3 The Software is licensed to you only. You may not rent, lease, sub-license, sell, assign, pledge, transfer or otherwise dispose of the Software, on a temporary or permanent basis without the prior written consent of Licensor.
3. OWNERSHIP OF INTELLECTUAL PROPERTY RIGHTS

3.1 Your only right to use the Software is by virtue of this License and you acknowledge that all intellectual property rights in or relating to the Software and all parts of the Software are and shall remain the exclusive property of Licensor or its licensors.

3.2 You agree that you will not remove or alter any copyright notices or similar proprietary devices, including without limitation any electronic watermarks or other identifiers, that may be incorporated in the Software or any copy of the Software.

4. CONFIDENTIALITY

4.1 The structure, organisation and source code of the Software are the valuable trade secrets and proprietary confidential information of Licensor and its licensors. You agree not to provide or disclose any such confidential information in the Software or derived from it to any third party.

4.2 The provisions of clause 4.1 will not apply to any information which is:

4.2.1 lawfully obtained free of any duty of confidentiality (otherwise than directly or indirectly from Licensor); or

4.2.2 already in your possession, provided that Licensee can show such possession from written records (other than as a result of a breach of this clause 4); or

4.2.3 which you can demonstrate is in the public domain (other than as a result of a breach of this clause 4).

4.3 To the extent that any information is necessarily disclosed pursuant to a statutory or regulatory obligation or court order, such disclosure shall not be a breach of this clause 4 provided you do what you can to prevent any such disclosure.

5. WARRANTY AND SUPPORT

The Software is provided "as is" with no representation, guarantee or warranty of any kind as to its functionality or that it does not and will not infringe any third party rights (including intellectual property rights). Licensor has no obligation under this License to provide technical or other support to you.

6. LIMITATION AND EXCLUSION OF LIABILITY

6.1 Licensor does not exclude its liability (if any) to you:

6.1.1 for personal injury or death resulting from Licensor's negligence;

6.1.2 for fraud; or
6.1.3 for any matter for which it would be illegal for Licensor
to exclude or to attempt to exclude its liability.

6.2 LICENSOR MAKES NO EXPRESS WARRANTIES WITH
RESPECT TO THE SOFTWARE AND LICENSOR HEREBY
EXCLUDES (TO THE FULLEST EXTENT PERMISSIBLE IN LAW),
ALL CONDITIONS, WARRANTIES (INCLUDING WITHOUT
LIMITATION ANY WARRANTY THAT THE SOFTWARE WILL
MEET YOUR REQUIREMENTS OR THAT ITS OPERATION WILL
BE UNINTERRUPTED OR ERROR FREE) AND STIPULATIONS,
EXPRESS (OTHER THAN THOSE SET OUT IN THIS LICENSE)
OR IMPLIED, STATUTORY, CUSTOMARY OR OTHERWISE
WHICH, BUT FOR SUCH EXCLUSION, WOULD OR MIGHT
SUBSIST IN FAVOUR OF YOU. EXCEPT AS SET OUT IN THIS
LICENSE YOU ASSUME THE ENTIRE RISK AS TO THE QUALITY
AND PERFORMANCE OF THE SOFTWARE.

6.3 SUBJECT TO CLAUSE 6.1 LICENSOR WILL BE UNDER NO
LIABILITY TO YOU WHATSOEVER (WHETHER IN CONTRACT,
TORT (INCLUDING NEGLIGENCE), BREACH OF STATUTORY
DUTY, RESTITUTION OR OTHERWISE) FOR ANY INJURY,
DEATH, DAMAGE OR DIRECT, INDIRECT OR CONSEQUENTIAL
LOSS (ALL THREE OF WHICH TERMS INCLUDE, WITHOUT
LIMITATION, PURE ECONOMIC LOSS, LOSS OF PROFITS,
LOSS OF BUSINESS, LOSS OF DATA, LOSS OF SAVINGS,
DEPLETION OF GOODWILL AND LIKE LOSS) HOWSOEVER
CAUSED ARISING OUT OF OR IN CONNECTION WITH:

6.3.1 THE SOFTWARE, OR THE MANUFACTURE OR SALE OR
SUPPLY, OR FAILURE OR DELAY IN SUPPLY, OF THE
SOFTWARE BY LICENSOR OR ON THE PART OF LICENSOR’S
EMPLOYEES, AGENTS OR SUB-CONTRACTORS;

6.3.2 ANY BREACH BY LICENSOR OF ANY OF THE EXPRESS
OR IMPLIED TERMS OF THIS LICENSE;

6.3.3 ANY USE MADE OF THE SOFTWARE; OR

6.3.4 ANY STATEMENT MADE OR NOT MADE, OR ADVICE
GIVEN OR NOT GIVEN, BY OR ON BEHALF OF LICENSOR.

6.4 Disclaimer of Certain Damages. IN NO EVENT SHALL
SAMSUNG BE LIABLE TO YOU OR ANY PARTY RELATED TO
YOU FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL,
SPECIAL, EXEMPLARY, OR PUNITIVE DAMAGES OR LOST
PROFITS, EVEN IF SAMSUNG HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION WILL
APPLY REGARDLESS OF THE THEORY OF LIABILITY, WHETHER
FRAUD, MISREPRESENTATION, BREACH OF CONTRACT,
NEGLIGENCE, PERSONAL INJURY, PRODUCTS LIABILITY,
INTELLECTUAL PROPERTY INFRINGEMENT, OR ANY OTHER
THEORY REGARDLESS OF WHETHER OR NOT SAMSUNG HAS
6.5 You acknowledge that the above provisions of this clause 6 are reasonable for the Software and you will accept such risk and/or insure accordingly.

6.6 Any rights that you have as a consumer are not affected by this clause 6.

7. **TERM AND TERMINATION**

7.1 This License shall commence upon the earlier of your acceptance of this License or your activation of the Software and shall continue until terminated in accordance with clause 7.2 or otherwise in accordance with this License.

7.2 This License will terminate automatically if you fail to comply with any term or condition of this License or if you cease to use the Software for any reason.

7.3 Upon termination of this License for any reason whatsoever Licensor retains the right to permanently disable your access to the Software.

7.4 The termination of this License howsoever arising is without prejudice to the rights, duties and liabilities of either party accrued prior to termination. Clauses 2.2, 2.3, 3, 4, 5, 6, 7.3, 8, 9 and 10 of this License will continue to be enforceable notwithstanding termination.

8. **GOVERNING LAW AND JURISDICTION**

8.1 The formation, existence, construction, performance, validity and all aspects whatsoever of this License or of any term of this License will be governed by the laws of the State of New York.

8.2 The courts in New York City will have non-exclusive jurisdiction to settle any disputes which may arise out of or in connection with this License. The parties irrevocably agree to submit to that jurisdiction.

9. **COMPLIANCE WITH APPLICABLE LAW**

You acknowledge and agree that notwithstanding the fact that this License is governed by the laws of the Republic of Korea, you may be subject to additional laws in other jurisdictions with respect to your use of the Software. You
will comply with the laws of any jurisdiction that apply to the Software, including without limitation any applicable export laws or regulations.

10. GENERAL

10.1 If any clause or part of this License is found by any court, tribunal, administrative body or authority of competent jurisdiction to be illegal, invalid or unenforceable then that provision will, to the extent required, be severed from this License and will be ineffective without, as far as is possible, modifying any other clause or part of this License and this will not affect any other provisions of this License which will remain in full force and effect.

10.2 No failure or delay by any party to exercise any right, power or remedy will operate as a waiver of it nor will any partial exercise preclude any further exercise of the same, or of some other right, power or remedy.

10.3 The parties to this License do not intend that any of its terms will be enforceable by any person not a party to it.

10.4 This License contains all the terms which the parties have agreed in relation to the subject matter of this License and supersedes any prior written or oral agreements, representations or understandings between the parties in relation to such subject matter.

10.5 Licensor reserves the right to revise the terms of this License by updating the License on its web site, or by notifying you by post or by e-mail. You are advised to check the Licensor's website periodically for notices concerning revisions. Your continued use of the Software shall be deemed to constitute acceptance of any revised terms.

10.6 You will be deemed to have accepted the terms of this License by using the Software on any device.
