Wireless Audio - Multiroom
HUB

Quick Setup Guide

Front Panel

1. This indicator turns on when power is supplied to the HUB.
2. This indicator blinks when the HUB is in pairing mode.
   After pairing is complete, this indicator stops flashing and operates in normal mode.
3. This indicator turns on when the HUB is connected to a wireless router with an Ethernet cable.
4. This indicator turns on when the HUB is set to Repeater mode and used to expand wireless Wi-Fi coverage in a network that includes another HUB and a wireless router.
   If you have trouble connecting the HUB and M7 because the signal is blocked or the distance between them is too great, add a new HUB in Repeater mode to expand wireless coverage.

What's included

- LAN cable (AK39-00176A)
- Power Adaptor (BN44-00673A)
- Quick Guide (AH68-02665J)

Connecting the HUB to Your Wi-Fi Network

M7's can be used anywhere your Wi-Fi signal reaches.

1. Connect the HUB to your router or modem using a LAN cable.
2. Plug the included power cable into the back of the HUB, and then plug the power cord into a wall socket.
3. After the Pairing Indicator on the HUB lights, plug in the M7.
   (For more information, see the M7 Quick Setup Guide.)

Rear Panel

1. SPK ADD
   Press this button to set the HUB to Pairing mode when adding an additional M7 or to switch the HUB to Repeater mode.
   (Press and hold for 1 second to switch to Pairing mode. Press and hold for 10 seconds to switch to Repeater mode.)
2. SERVICE
   Used to update the firmware.
   The SERVICE port is only for updating.
3. ETHERNET SWITCH
   Used to connect a LAN cable.
   If you want to connect another wired device to the router that the HUB is connected to, and all the router’s wired ports are occupied, you can connect it to an unoccupied LAN port on the HUB.
   Connecting to the HUB provides the same functionality as being connected to the router; however, the link to the router will be lost if you power off (unplug) the HUB.
   Note: The HUB and the router must have a hard-wired connection.
4. RESET
   Press the RESET button with a pen tip for 5 seconds to reset the HUB.
5. DC IN
   Connector for the power cable.
Safety precautions

Power Supply Precautions
• Do not overload outlets or extension cords. (This is very important if you are)

Do not use the AC adapter while on a boat. (This is very important if you are)

Do not use the AC adapter while on an aircraft. (This is very important if you are)

Do not use the AC adapter while on a train. (This is very important if you are)

Installation Precautions
• Do not install the AC adapter or this product near heat sources such as radiators.

Do not install the AC adapter or this product near a window. (This is very important if you are)

Do not install the AC adapter or this product near a door. (This is very important if you are)

Do not install the AC adapter or this product near a window. (This is very important if you are)

Cleaning Precautions
• Never use a solvent or alcohol to clean the product. (This is very important if you are)

Never use a hard cloth or brush to clean the product. (This is very important if you are)

Never use a vacuum cleaner to clean the product. (This is very important if you are)

Never use a hard cloth or brush to clean the product. (This is very important if you are)

Usage Precautions
• Using an AC adapter at high elevation may cause serious damage to your
