Samsung GALAXY Note 4

SMARTPHONE

User Manual

Please read this manual before operating your device and keep it for future reference.
WARNING! This product contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, please call 1-800-SAMSUNG (726-7864).

Intellectual Property

All Intellectual Property, as defined below, owned by or which is otherwise the property of Samsung or its respective suppliers relating to the SAMSUNG Phone, including but not limited to, accessories, parts, or software relating there to (the “Phone System”), is proprietary to Samsung and protected under federal laws, state laws, and international treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship. You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) modify, prepare derivative works of, reverse engineer, decompile, disassemble, or otherwise attempt to create source code from the software. No title to or ownership in the Intellectual Property is transferred to you. All applicable rights of the Intellectual Property shall remain with SAMSUNG and its suppliers.

Open Source Software

Some software components of this product incorporate source code covered under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), OpenSSL License, BSD License and other open source licenses. To obtain the source code covered under the open source licenses, please visit: opensource.samsung.com

Disclaimer of Warranties; Exclusion of Liability

EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED ON THE WARRANTY PAGE ENCLOSED WITH THE PRODUCT, THE PURCHASER TAKES THE PRODUCT “AS IS”, AND SAMSUNG MAKES NO EXPRESS OR IMPLIED WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE; THE DESIGN, CONDITION OR QUALITY OF THE PRODUCT; THE PERFORMANCE OF THE PRODUCT; THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO. NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS OR IMPLIED WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE OR USE OF THE PRODUCT OR ARISING FROM THE BREACH OF THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES, OR LOSS OF ANTICIPATED PROFITS OR BENEFITS.

Modification of Software

SAMSUNG IS NOT LIABLE FOR PERFORMANCE ISSUES OR INCOMPATIBILITIES CAUSED BY YOUR EDITING OF REGISTRY SETTINGS, OR YOUR MODIFICATION OF OPERATING SYSTEM SOFTWARE.

USING CUSTOM OPERATING SYSTEM SOFTWARE MAY CAUSE YOUR DEVICE AND APPLICATIONS TO WORK IMPROPERLY. YOUR CARRIER MAY NOT PERMIT USERS TO DOWNLOAD CERTAIN SOFTWARE, SUCH AS CUSTOM OS.
IF YOUR CARRIER PROHIBITS THIS, IF YOU ATTEMPT TO DOWNLOAD SOFTWARE ONTO THE DEVICE WITHOUT AUTHORIZATION, YOU WILL BE NOTIFIED ON THE SCREEN THAT UNAUTHORIZED SOFTWARE HAS BEEN DETECTED. YOU SHOULD THEN POWER DOWN THE DEVICE AND CONTACT YOUR CARRIER TO RESTORE THE DEVICE TO THE CARRIER AUTHORIZED SETTINGS.

Notice from AT&T

This device is intended for use exclusively on AT&T’s system. You agree that you won’t make any modifications to the Equipment or programming to enable the Equipment to operate on any other system. A voice plan is required on all voice-capable devices, unless specifically noted otherwise in the terms governing your agreement. Some devices or plans may require you to subscribe to a data plan.

Your device is designed to make it easy for you to access a wide variety of content. For your protection, AT&T wants you to be aware that some applications that you enable may involve the location of your device being shared. For applications available through AT&T, AT&T offers privacy controls that let you decide how an application may use the location of your device and other devices on your account. However, AT&T’s privacy tools do not apply to applications available outside of AT&T. Please review the terms and conditions and the associated privacy policy for each location-based service to learn how location information will be used and protected.

Your device may be used to access the Internet and to download, and/or purchase goods, applications, and services from AT&T or elsewhere from third parties. AT&T provides tools for you to control access to the Internet and certain Internet content. These controls may not be available for certain devices which bypass AT&T controls.

AT&T may collect certain types of information from your device when you use AT&T services to provide customer support and to improve its services. For more information on AT&T’s Privacy Policy, visit att.com/privacy [013016]

Getting Started

Learn about your mobile device hardware, assembly procedures, and how to get started using your new device.
• **Proximity sensors**: Detect the presence of objects near the device.

• **Front camera**: Take self-portraits and record videos of yourself.

• **Power key**: Press and hold to turn the device on or off, restart it, or for quick access to Airplane and Emergency modes. Press to lock or wake up the screen.

• **Back**: Return to the previous screen, or to close a dialog box, menu, or keyboard. Touch and hold for Multi window™.

• **Home key/Finger scanner**: Return to the Home screen. Activate the Fingerprint security feature.

• **Recent**: Tap to display recent apps, or touch and hold for Home screen options.

• **Volume key**: Adjust the volume of your device’s sounds and audio playback.

• **Status light**: Display a light when the battery is charging or fully charged, when a notification arrives, or when recording voice.

• **Earpiece**: Listen to a call.
Microphone: Record audio and detect voice commands.

Headset jack: Connect an optional headset (not included).

Rear camera: Take pictures and record videos.

Heart rate sensor: Measure your heart rate using your fingertip when using the S Health™ app. For more information, see S Health.

USB charger/Accessory port: Connect the USB charger (included) and other optional accessories (not included).

S Pen: Access a variety of powerful functions on your device with this versatile S Pen™.

Speaker: Play music and other sounds.

Flash: Illuminate subjects in low-light environments when taking a photo or recording video.

Infrared transmitter: Controls external devices using infrared light.
This section helps you to assemble your device.

Remove the Back Cover
To remove the back cover:

1. Use the slot at the top left of the back cover.

2. Lift the cover up and to the right of the phone.

Warning: Do not bend or twist the back cover excessively. Doing so may damage the cover.

Replace the SIM Card
When you subscribe to a cellular network, you are provided with a plug-in SIM card. During activation, your SIM card is loaded with your subscription details, such as your Personal Identification Number (PIN), available optional services, and other features.

**Warning:** Please be careful when handling the SIM card to avoid damaging it. Keep all SIM cards out of reach of small children.

- Carefully slide the SIM card into the SIM card slot.
  - Make sure that the card’s gold contacts face down into the device and that the card is positioned as shown.

**Caution:** If the SIM card is not inserted correctly, the device cannot detect it. Reorient the SIM card and place it back into the slot if it is not detected.
Install a Memory Card

You can install an optional microSD™ or microSDHC™ memory card (not included) to add more memory space to your device.

**Note:** A memory card can be installed at any time; it is not necessary to install it prior to using the device.

For more information on installing a memory card, see *Memory Card (SD Card)*.

1. With the gold contacts facing down, carefully slide the memory card into the slot.

**Caution:** If the memory card is not inserted correctly, the device cannot detect it. Reorient the memory card and place it back into the slot if it is not detected.

Install the Battery

You can install a replacement battery.

1. Insert the battery into the opening on the back of the device, making sure the connectors align.

2. Gently press down to secure the battery.

Replace the Back Cover

Close the back cover before using the device.

1. Place the back cover onto the back of the device and press down.

2. Press along the edge of the back cover until you have a secure seal.
Charge the Battery

Your device is powered by a rechargeable, standard Li-Ion battery. A USB charger (charging head and USB cable) is included with the device for charging the battery from any standard outlet.

The battery comes partially charged. A fully discharged battery requires up to four hours of charge time. You can use the device while charging.

**Note:** It is recommended you fully charge the battery before using your device for the first time.

**Note:** For fastest charging times, use the Samsung Adaptive Fast Charger that came with your device. This charger provides faster charging only when connected to devices that support Adaptive Fast Charging.

**Caution:** Use only charging devices and batteries approved by Samsung. Samsung accessories are designed for your device to maximize battery life. Using other accessories may invalidate your warranty and may cause damage.

1. Insert the USB cable into the USB charger/Accessory port.

2. Connect the USB cable to the charging head, and then plug the charging head into a standard outlet.

3. Unplug the charging head from the outlet and remove the USB cable from the device when charging is complete.

**Caution:** Failure to unplug the wall charger before you remove the battery can cause damage to the device.

When to Charge the Battery

When the battery is low and only a few minutes of operation remain, the device sounds a warning tone at regular intervals.

In this condition, your device conserves its remaining battery power by dimming the screen.

When the battery level becomes too low, the device automatically turns off.

For a quick check of your battery level:

- View the battery charge indicator located in the top right corner of your device’s display. A solid color (□) indicates a full charge.

  You can also choose to display a percentage value. Viewing a percentage value can provide a better idea of the remaining charge on the battery. For more information, see [Battery](#).
Set Up Your Device

Turn Your Device On or Off
The instructions below explain how to turn your device on or off.

Turn the Device On
To turn the device on:
► Press and hold the Power key until the device vibrates and turns on.

Turn the Device Off
To turn the device off:
1. Press and hold the Power key until the Device options menu is displayed.
2. Tap Power off, and confirm if prompted.

Restart the Device
If your device stops responding to taps or finger gestures and you are unable to turn it off, you can restart your device.
► Press and hold the Power key and the Volume down key at the same time for more than seven seconds.

Initial Set Up
The first time you turn your device on, a Welcome screen is displayed. It guides you through the basics of setting up your device.

Follow the prompts to choose a default language, connect to a Wi-Fi® network, set up accounts, choose location services, learn about your device’s features, and more.

Setup and Transfer
During initial setup, the Setup & Transfer screen displays. It guides you through the basics of setting up your device.

Follow the prompts to choose a default language, connect to a Wi-Fi network, set up accounts, choose location services, learn about your device’s features, and more.

Note: If you tap not now > exit, you can set up your device later.

To access AT&T Setup & Transfer at any time:
► From a Home screen, tap Apps > Setup & Transfer.

Secure Your Device
Use your device’s screen lock features to secure your device.

Lock the Device
By default, the device locks automatically when the screen times out.

To lock the device:
► Press the Power key.

Unlock the Device
The default Screen lock on your device is Swipe.

Note: To choose a more secure screen lock, see Set a Screen Lock.

To unlock the device:
► Press the Power key or Home key, and then drag your finger across the screen.
Set Up Accounts on Your Device

Samsung Account
Create a Samsung account for access to Samsung content and apps on your device.

When you turn on your device for the first time, set up your existing Samsung account or create a new Samsung account.

– or –
To create a new Samsung account or set up your Samsung account on your device at any time, use Accounts settings.

For more information, see Accounts.

1. From a Home screen, tap Apps > Settings > General > Accounts.
2. Tap Add account > Samsung account.

Google Account
Your new device uses your Google™ Account to fully utilize its Android™ features, including Gmail™, Google Hangouts™, and the Google Play™ store.

When you turn on your device for the first time, set up your existing Google Account or create a new Google Account.

– or –
To create a new Google Account or set up your Google Account on your device at any time, use Accounts settings.

For more information, see Accounts.

1. From a Home screen, tap Apps > Settings > General > Accounts.
2. Tap Add account > Google.
Learn some of the key features of your mobile device, including the screens and icons, as well as how to navigate the device and enter text using the keyboard.

Warning: Please note that a touch screen responds best to a light touch from the pad of your finger or a capacitive stylus. Using excessive force or a metallic object when pressing on the touch screen may damage the tempered glass surface and void the warranty.
The Home screen is the starting point for using your device.

- **Status bar**: Displays device status icons (right) and notification icons (left). For more information, see Status Bar.
- **App folder**: Groups multiple apps into a folder.
- **Apps list**: Allows quick access to all of your applications.
- **Primary app shortcuts**: Displays these shortcuts on all Home screens.
- **Home screen indicator**: Indicates which Home screen is currently visible.
- **App shortcuts**: Launches your favorite applications.
- **Widget**: Runs as a simple application extension (not a shortcut) on a Home screen.
Customize your Home screens by adding application shortcuts, widgets, and folders, and using wallpapers.

To access Home screen manager:
► From a Home screen, pinch the screen.
– or –
Touch and hold an empty space on the screen.

Manage Home Screens
Your device comes with multiple Home screens to hold app shortcuts and widgets. You can add, remove, and change the order of screens, as well as choose a different main Home screen.

1. From a Home screen, pinch the screen.
2. Use these options to manage screens:
   • **Add a screen**: Swipe to the end of the screens, and then tap **Add**.
   • **Remove a screen**: Touch and hold a screen, and then drag it to **Remove**.
   • **Set a screen as the main Home screen**: Tap **Main Home screen** at the top of a screen. This screen is displayed when you press the Home key.
   • **Change the order of screens**: Touch and hold a screen, and then drag it to a new position.
   • Tap **Home screen settings**, and then tap an option to customize:
     – **Transition effect**: Select a transition to use when swiping between screens.
     – **Flipboard Briefing**: To enable or disable this feature, tap **Flipboard Briefing**. Swipe to the left of the Home screens to find the Flipboard Briefing screen.

Wallpapers
Change the look of the Home and Lock screens with wallpaper. You can display a favorite picture or choose from preloaded wallpapers.

1. From a Home screen, pinch the screen.
2. Tap **Wallpapers** to customize.

For more information, see **Wallpaper Settings**.

To access Wallpaper settings:
► From a Home screen, tap **Apps** > **Settings** > **Device** > **Wallpaper**.

Widgets
Widgets are simple application extensions that run on a Home screen. There are many kinds of widgets, including links to a specific contact, Internet bookmarks, Gmail and email accounts, and many others.

Add a Widget to a Home Screen
You can add a widget to a Home screen.

1. From a Home screen, pinch the screen.
2. Tap **Widgets**.
3. Touch and hold a widget, drag it to a Home screen, and then release it.

Remove a Widget
You can remove a widget that you added to a Home screen.

1. From a Home screen, touch and hold a widget to release it.
2. Drag the widget to **Remove** and release it.

**Note**: Removing a widget does not delete the widget, it just removes the widget from the Home screen.
App Shortcuts
You can use app shortcuts to launch an app from any Home screen.

Add a Shortcut to a Home Screen
You can add a shortcut to a Home screen.
1. From a Home screen, tap Apps.
2. Touch and hold an app shortcut, drag it to a Home screen, and then release it.

Remove a Shortcut
You can remove a shortcut that you added to a Home screen.
1. Touch and hold an app shortcut to release it.
2. Drag the app shortcut to Remove and release it.

Note: Removing a shortcut does not delete the app, it just removes the shortcut from the Home screen.

Folders
Place folders on a Home screen to organize items.

Create a Folder
You can create an app folder on a Home screen.
1. From a Home screen, touch and hold an app shortcut.
2. Drag the shortcut onto Create folder and release.
   - Enter folder name: Enter a name for the folder.
   - Palette: Change the color.
   - Add application: Place more apps in the folder. Tap apps to select them, and then tap Done.
3. Tap anywhere outside of the folder to close it.
   - To add more apps, touch and hold an app shortcut and drag it to the folder.

Remove a Folder from a Home Screen
You can remove a folder that you added to a Home screen.
1. Touch and hold the folder until it detaches.
2. Drag the folder to Remove and release it.
Status Bar

The Status bar at the top of the Home screen provides device information (such as network status, battery charge, and time) on the right side and notification alerts on the left.

**Status Icons**

- **Battery full**: Battery is fully charged.
- **Battery low**: Battery is low.
- **Battery charging**: Battery is charging.
- **Vibrate mode**: Vibrate mode is enabled.
- **Mute mode**: Mute mode is enabled.
- **4G LTE active**: The device is connected to a 4G LTE® wireless network.
- **Signal strength**: Cellular network signal strength.
- **Network not available**: No wireless network is available.
- **Wi-Fi active**: Wi-Fi is active.
- **Wi-Fi available**: A Wi-Fi network is available.
- **NFC enabled**: NFC (Near Field Communication) is enabled.

**Notification Icons**

- **Missed call**: A call has been missed.
- **Call in progress**: A call is in progress.
- **Call on hold**: A call is on hold.
- **New email**: New email has arrived.
- **New Gmail**: New Gmail has arrived.
- **New voicemail**: New voicemail message has been received.
- **New message**: New text or multimedia message has arrived.
- **File download in progress**: Download of a file or app is in progress.
- **File upload in progress**: File is being uploaded or sent.
- **GPS active**: Location service (GPS) is active and acquiring a signal.
- **App updates available**: App updates are available from the Google Play store.
- **App updates complete**: App installation or updates are complete.
Learn the basics for how to navigate through your device.

Touchscreen Navigation
Use the following motions and gestures on your touchscreen to navigate the device.

Tap
Lightly tap items to select or launch them.
- Tap the keyboard to enter characters or text.
- Tap an item to select it.
- Tap an app shortcut to launch the application.

Touch and Hold
Touch and hold items on the screen to activate them.
- Touch and hold a widget on a Home screen to move it.
- Touch and hold a field to display a pop-up menu of options.

Swipe
Lightly drag your finger vertically or horizontally across the screen.
- Swipe the screen to unlock the device.
- Swipe the screen to scroll through the Home screens or menu options.

Drag
Touch and hold on an item, and then move it to a new location.
- Drag an app shortcut to add it to a Home screen.
- Drag a widget to place it in a new location on a Home screen.

Pinch and Spread
Pinch the screen using your thumb and forefinger or spread by moving your fingers apart.
- Pinch the screen to zoom out while viewing a picture or a web page.
- Spread your fingers on the screen to zoom in while viewing a picture or a web page.

Motions and Gestures
Control your device by making specific gestures with your hand above the device's screen.

To access the Motions and gestures settings:
► From a Home screen, tap Apps > Settings > Controls > Motions and gestures.

For more information, see Motions and Gestures.
Common Options

The device uses basic command options to perform common actions.

- **More options**: Tap to view more menu options for a screen. This often allows you to select items to delete or share.

- **Delete**: Tap to select items to delete.

- **Share**: Tap to select items to share, and then choose a sharing method.

- **Edit**: Tap to customize the screen.

- **On/Off**: Tap to turn the option on (on) or off (off).

- **Checkbox**: Tap to enable or select. When enabled, a checkmark is displayed. You can often tap a checkbox at the top of the screen to select all.

- **Menu**: Tap to view available options for the field.
Notification Panel

Notification icons on the Status bar display calendar events, device status, and more. For details, open the Notification panel.

- **Settings**: Display the Settings screen.
- **View all**: See all available Quick settings.
- **Clear notifications**: Clear all notifications.
- **Notification card**: View details about a notification.
- **Screen brightness**: Adjust screen brightness.
- **Quick settings**: Quickly enable or disable a feature.
View the Notification Panel

You can access the Notification panel from any Home screen.

1. Drag the Status bar down to display the Notification panel.

2. Swipe down the list to see notification details.
   - To open an item, tap it.
   - To clear a single notification, drag the notification left or right.
   - To clear all notifications, tap Clear.

3. Drag upward from the bottom of the screen or tap Back to close the Notification panel.

Quick Settings

In addition to notifications, the Notification panel also provides quick access to device functions such as Wi-Fi, allowing you to quickly turn them on or off.

To view additional Quick settings:

1. Drag the Status bar down to display the Notification panel.

2. Swipe left or right across the visible icons.
   – or –
   Tap View all.

Notification Panel Settings

To customize the Notification panel:

▸ From a Home screen, tap Apps > Settings > Device > Notification panel.

For more information, see Notification Panel Settings.
Multi Window

Multitask by using multiple applications at the same time.

Activate Multi Window

Apps that support Multi window display together on a split screen. You can switch between the apps, adjust the size of their display on the screen, and copy information from one app to the other.

Note: Multi window is not available for all apps.

1. From a Home screen, tap Apps > Settings > Device > Multi window.
2. Tap On/Off to activate.
3. Tap an option to activate it:
   - Open in split screen view: Automatically view content in Multi window when you open files from My Files or Video player, or attachments from email.
   - Pop-up view shortcut: Swipe down diagonally from the corner of a window to put it in pop-up view.

Note: You can also activate Multi window from the Notification panel.
**Use Multi Window**

After enabling Multi window, you can use it to run multiple apps at the same time.

**Note:** Only apps located on the Multi window tray can be used together.

► Touch and hold ➡️ Back to display the Multi window tray, and then drag apps to the windows.

You can also launch recently used apps directly into Multi window view:

1. Tap ➡️ Recent.
   - Recently used apps that support Multi window have a Multi window icon in their title bar.
2. Tap Multi window in the title bar to launch an application in split screen view.
   - Other recently used apps that support Multi window are displayed below the launched app.
3. Tap an app icon to add it to the split screen view.

**Note:** Only applications that support Multi window have the Multi window icon.

**Window Controls**

Select an app window, and then tap Window controls in the middle of the window border.

### Control Buttons

- **Switch windows:** Switch locations between Multi window apps.
- **Drag and drop content:** Move items between the app windows. Drag an item to share from one window to another. Not all applications support this feature.
- **Minimize window:** Collapse the selected window.
- **Maximize window:** Open the selected app window in full screen view.
- **Close app:** Close the selected app.

**Customize Multi Window**

You can customize Multi window to suit your preferences.

**Create a Window Group**

If you use certain apps together in Multi window often, you can create a window group to quickly display the two apps.

The window group is stored in the Multi window tray, so you can choose it any time to display the two apps.

1. Touch and hold ➡️ Back to display the tray, and then drag apps to the windows.
2. Scroll to the bottom of the Multi window tray, and then tap Tray controls > Create.

**Choose Apps to Display in the Multi Window Tray**

You can choose the apps you want to display in the Multi window tray.

1. Touch and hold ➡️ Back to display the Multi window tray.
2. Tap Tray controls > Edit for options:
   - To remove an app from the tray, touch and drag it off of the tray and place it in the storage area.
   - To add an app to the tray, touch and drag it from the storage area to the tray.
   - To relocate an app, touch and drag it to a new location.

**Multi Window Settings**

To customize Multi window:

► From a Home screen, tap ➡️ Apps > ➡️ Settings > Device > Multi window.

For more information, see Multi Window Settings.
The S Pen is a stylus that assists you in performing different functions.

Caution: When you insert the S Pen into the slot, insert the S Pen’s tip first. Failure to do so can cause the S Pen to become stuck. Forcefully detaching the S Pen from the slot may cause damage to the S Pen and your device.

Air View
Hover the S Pen over the screen to preview content, or view information about an item on the screen. For example:

- Hover over an email in a list to preview the message before opening it.
- Hover over a photo album to preview the contents or see a picture enlarged.
- Hover over the timeline during video playback to preview and navigate to specific scenes.
- Hover over an icon or screen button to view the item’s name or description.

Note: The preview function is only available when the S Pen’s onscreen pointer is a solid color.
Direct Pen Input

When filling out a form field in an app (like Name or Number in Contacts), you can open a Handwriting window that allows you to handwrite an entry with the S Pen.

To use the Handwriting window:

1. Hover the S Pen over a text field until Handwriting appears.
2. Tap Handwriting. The Handwriting window appears.
3. Use the space provided in the window to write an entry by hand using the S Pen. While writing, your entries are converted into text.
   • To edit the converted text, use the Space, Delete, and Enter icons. To change the position of the cursor, drag the pointer below the cursor to the desired position for editing.
   • To draw images, tap Drawing mode.
4. Tap Done when finished.

Configure S Pen Settings

To configure S Pen settings:

► From a Home screen, tap Apps > Settings > Controls > S Pen.

For more information, see S Pen Settings.

Replace the S Pen Tip

You can replace the tip of the S Pen.

To replace the tip:

1. Use tweezers to pull out the S Pen tip.
2. Insert the new pen tip in the end of the S Pen and press until it clicks in place.
Air Command

*Air command allows you to quickly activate frequently-used applications or perform actions.*

To launch the Air command menu:

► Remove the S Pen from the S Pen slot.

– or –

Hold the S Pen near the screen so that the pointer appears, and then press the **S Pen button** once.

– or –

Tap ✌ **Air command**.

To use Air Command:

► Tap an option:

  - **Action memo**: Launch an Action memo and link it to actions. Action memos are saved in the S Note app.
  - **Smart select**: Draw around an area of the screen to collect it in the Scrapbook app.
  - **Screen write**: Capture screenshots and write or draw on them.
  - **S Note**: Create or edit an S Note. For more information, see [S Note](#).
  - **Add shortcuts**: Add up to six apps and functions to the Air command menu.
  - **Settings**: Customize your Air command by adding apps and functions, and changing how it appears.

**Action Memo**

An Action memo is a special type of note that can turn your written text into actions on your device.

For example, if someone tells you the name of a restaurant, you can launch a new memo, write the name of the restaurant, and then have the memo locate it on a map.

**Note**: While active, an Action memo stays on the screen for as long as you are using it, even if you press the **Home** key. You must tap **Save** or **Delete** to close the memo.
Create an Action Memo

To create an Action memo:

1. Tap ✍️ Air command > 📝 Action memo.
   – or –
   Press and hold the S Pen button and tap the screen two times with the pen.

2. Write your Action memo. The following editing tools are available:
   - **List**: View all Action memos saved in the S Note app.
   - **Pen**: Change the pen color.
   - **Eraser**: Use the pen to erase part of the memo, or tap **Clear all** to erase all content.

3. Tap ✉️ Share, and then choose a sharing method to share the action memo.

4. Tap More for additional options:
   - **Link to action**: Turn written text into actions.
   - **Minimize**: Minimize the action memo by making a small thumbnail on the main Home screen.
   - **Pin to Home screen**: Pin the Action memo to the Home screen.
   - **Set reminder**: Set a time to remind you about the action memo.
   - **Edit as S Note file**: Open the Action memo in the S Note app.
   - **Change background color**: Change the color of the Action memo.
   - **Discard**: Close the current Action memo without saving it.

5. When you are finished, tap Save.

**Note**: Action memos are saved in the S Note app.

Link an Action Memo

Turn text into actions. For example, you can write a phone number, and then save it to Contacts.

To link a memo to an action:

1. Tap ✍️ Air command > 📝 Action memo.

2. Write on the memo.

3. Tap More > Link to action and select an action to perform.

4. Draw around the content you want to use for the action. The selected content is boxed and highlighted.

5. On the menu bar that appears, tap the action you want to take. Options include Phone, Contacts, Messages, Email, Internet, and More.

Screen Off Memo

You can write quick memos without turning your device on.

**Note**: The Screen off memo setting must be enabled. For more information, see S Pen Settings.

To create a screen off memo:

1. Detach the S Pen while the screen is off.

2. Write on the screen.
   - Tap Save to save your memo to the S Note app.
   - Tap Delete to discard the memo.
Smart Select

The Smart select feature provides a capture tool to select content on a screen. You can then add it to your Scrapbook app or share it with your contacts.

To launch the Smart select tool:
1. Tap \( \text{Air command} > \text{Smart select} \).
2. Tap a shape at the top of the screen, and then drag a box with the S Pen to select content. The following options appear:
   - **Write**: Add notes to the screen using the S Pen.
   - **Share**: Choose a sharing method to share your content.
   - **Save in Scrapbook**: Save the content in the Scrapbook app.
   - **Save in Gallery**: Save the content to the Gallery app.

Screen Write

Screen write allows you to capture a screen shot and then write notes on the screen shot.

To use Screen Write:
1. Tap \( \text{Air command} > \text{Screen write} \).
2. The current screen is captured, and a pen tool appears. The following editing tools are provided:
   - **Pen**: Draw on the screen shot. Press the Pen icon a second time to change the pen tip, size, color, and to save presets.
   - **Eraser**: Erase the writing or drawings on the screen shot. Tap the Eraser icon a second time to change the size of the eraser area and to see the Erase all option.
   - **Undo**: Tap to undo the last action.
   - **Redo**: Tap to redo the last action that was undone.

3. When you are finished writing, tap an option:
   - **Share**: Choose a sharing method to share your content.
   - **Save in Scrapbook**: Save the content in the Scrapbook app.
   - **Save in Gallery**: Save the content to the Gallery app.

S Note App

Create notes and edit Action memos.

To access S Note:
1. Tap \( \text{Air command} > \text{S Note} \).
   – or –
2. From a Home screen, tap \( \text{Apps} > \text{S Note} \).

For more information, see S Note.

Add Shortcuts

You can add shortcuts to apps and functions to the Air Command menu.

To use Add shortcuts:
1. Tap \( \text{Air command} > \text{Add shortcuts} \).
2. Swipe across the screens, and tap the apps or functions you would like to add to the Air command menu.
   - To delete an app shortcut tap \( \text{Remove} \).
3. Tap \( \text{Back} \) to save your selection.
Air Command Settings

Configure settings for Air command.

To access Settings:

► Tap 📌 Air command > ⌚ Settings.

The following options are available:

- **Shortcuts**: Choose and arrange the shortcuts that appear on the Air command menu.

- **Floating icon**: Choose to enable the Air command menu to appear as a floating icon that can be moved around the screen.
Enter Text

Text can be entered using a keyboard or by speaking.

Use the Samsung Keyboard

Enter text using a QWERTY keyboard.

Special Keys

Symbol: Tap to insert symbols.

Voice input: Enter text using Google Voice™ typing.

Handwriting: Use your handwriting to enter text.

Clipboard: Access the clipboard.

Predictive text suggests words that match your text entries, and can automatically complete common words. Predictive text can learn your personal writing style from your contacts, messages, email, and social networking sites—improving the accuracy of predicting your text entries.

Configure the Samsung Keyboard

To customize the Samsung keyboard:

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Tap Samsung keyboard for options.

For more information, see Samsung Keyboard.
**Use Google Voice Typing**

Instead of typing, enter text by speaking.

Use Google Voice Typing

To enable Google voice typing:
1. Tap **Voice input** on the Samsung keyboard.
   - You may need to touch and hold **Options** (left of the Space bar) to find it.
2. Speak your text.

*Note:* Tap **Settings > Languages** to download additional languages for use with Google voice typing.

**Configure Google Voice Typing**

To customize Google voice typing:
1. From a Home screen, tap **Apps > Settings > General**.
2. Tap **Language and input**.
3. Tap **Google voice typing** for options.

For more information, see [Google Voice Typing](#).

**Use Swype**

Swype™ is a text input method that makes it possible to enter a word by sliding your finger or stylus (not included) from letter to letter, lifting your finger or stylus between words.

For example, to enter the word “this”, slide your fingers between the letters “t-h-i-s”.

To enable the Swype keyboard while entering text:
1. Drag down on the Status bar to display the Notification panel.
2. Tap **Select keyboard**.
3. Tap **Swype**.

**Configure Swype**

To customize Swype:
1. From a Home screen, tap **Apps > Settings > General**.
2. Tap **Language and input**.
3. Tap **Swype** for options.

For more information, see [Swype Keyboard](#).
Emergency Mode

Emergency mode conserves your device's remaining power when you are in an emergency situation.

Emergency mode saves battery power by:

- Changing the color of the screen to grayscale.
- Restricting application usage to only essential applications and those you select.
- Turning off Mobile data when the screen is off.
- Turning off connectivity features such as Wi-Fi and Bluetooth®.

Note: When Emergency mode is turned off, the Location settings may stay the same as they were in Emergency mode.

Activate Emergency Mode

To activate Emergency mode:

1. Press and hold the Power key to display the Device options window.
2. Tap Emergency mode.
   - When accessing for the first time, read the Terms and conditions. If you accept them, tap the ✔ Checkbox, and then tap Agree. Confirm when prompted.
3. Tap Turn on.

Turn Off Emergency Mode

From the Emergency mode Home screen, tap More options > Turn off Emergency mode.

Use Emergency Mode

While in Emergency mode, your device conserves power. The following apps and features are available on the Home screen:

- Flashlight: Use the device’s flash as a steady source of light.
- Emergency alarm: Sound an audible siren.
- Share my location: Send your location information to your emergency contacts.
- Phone: Launch the call screen.
- Internet: Launch the Web browser.
- ✪ Add: Add other available apps.
  - Facebook: Launch Facebook™.
  - Maps: Launch Google Maps™.
- Battery charge: Display estimated battery charge remaining.
- Estimated usage time remaining: Display estimated standby time that can be reached based on current battery charge and usage.
- Emergency call: Dial the emergency telephone number (for example, 911). This kind of call can be made even without activated cellular service.
More options:

- **Turn off Emergency mode**: Disable Emergency mode and return to standard mode.

- **Remove**: Choose apps to remove from the screen.

- **Manage emergency contacts**: Add emergency contacts if none have been set in Safety Assistance.

- **Settings**: Configure the available settings. Only a limited number of settings are enabled in Emergency mode.
Calling

Make telephone calls using a variety of calling features and services.
Phone Screen

Use the Phone screen to access the dialer keypad, recent calls, favorites, and contacts.

- **More options**: Access Speed dial and Call settings.
- **Delete**: Delete the numbers entered.
- **Video call**: Make video calls.
- **Call**: Make a call.
- **Voicemail**: Set up and check your voicemail. For more information, see Set Up and Access Voicemail.

- **Keypad**: Dial the number that you want to call.
- **Tabs**: Display a log of all dialed, received, and missed calls. Display contacts marked as favorites. Display your contacts and select a contact to call.
**Access Phone**

There are a couple of ways to access Phone.

► From a Home screen, tap 📞 Phone.

– or –

From a Home screen, tap 📱 Apps > 📞 Phone.

**Display Your Phone Number**

Your phone number can be found in Settings.

► From a Home screen, tap 📱 Apps > 📉 Settings > General > About device > Status.

• Your phone number is displayed in the My phone number field.

**Call Settings**

There are a couple of ways to access the Call settings menu.

► From a Home screen, tap 📞 Phone > 🔍 More options > Settings > Call.

– or –

From a Home screen, tap 📱 Apps > 📉 Settings > Apps > Call.
Make and Answer Calls

Learn how to make or answer a call. Explore features and functionality associated with making or answering a call.

Make a Call

You can make a call from a Home screen.

1. From a Home screen, tap Phone.
2. Enter a number on the keypad and tap either Dial or Video call.
   - Tap Keypad if the keypad is not displayed.

Note: Not all devices support video calling.

Dial a Recent Number

All incoming, outgoing, and missed calls are recorded in the Call log. If the number or caller is listed in your contacts list, the associated name is also displayed.

1. From a Home screen, tap Phone.
2. Tap Log. A list of recent calls is displayed.
3. Tap a contact, and then tap Call.

Video Calls

To make Video calls:

1. From a Home screen, tap Phone.
2. Enter a number and tap Video call.

Note: Not all devices support video calling. The caller has the option to accept the video call or answer the call as a regular voice call.

To switch from a Phone call to a Video call after dialing:

▶ Tap Video call to request two-way video calling.

Wi-Fi Calling

You can make voice and video calls over a Wi-Fi Internet connection. For Wi-Fi calling to work, you must activate Wi-Fi Calling first. For more information, see Wi-Fi Calling.

Dial a Number from Your Contacts List

You can quickly dial a phone number from your Contacts list.

1. From a Home screen, tap Apps > Contacts.
   - or -
2. From a Home screen, tap Phone > Contacts.
   2. Swipe your finger across a contact to the right to call the contact.
Answer a Call

When a call is received, the phone rings and the caller’s phone number or name is displayed, if it is stored in the Contacts list.

► At the incoming call screen:
  • Drag ✅ Answer to the right to answer the call.
  • Drag ✗ Reject to the left to reject the call and send it to your voicemail.
  • Drag Reject call with message upward and select a message.

If you are using an app, a pop-up screen is displayed for the incoming call.

► On the incoming call pop-up screen:
  • Tap ✅ Answer to answer the call.
  • Tap ✗ Reject to reject the call and send it to your voicemail.
  • Tap Reject call with message and select a message.
  • Tap ✚ Expand to exit the app and view the main incoming call screen.

End a Call

To finish your call:
► Tap ✗ End when you are ready to end your call.

Multitask While on a Call

If you exit the call screen and return to a Home screen, your active call is indicated by Call on the Status bar.

This lets you continue with your current call and do something else, such as access the contacts list, view a recent email, or locate a picture.

To return to the call screen:
► Tap Reactivate to return to the call screen.

To end a call from any application:
► Drag the Status bar down to display the Notification panel, and then tap ✗ End call.

Options During a Call

Your phone provides several options that you can use during a call.

Adjust the Call Volume

► Press the Volume key to increase or decrease the volume.
  – or –
  Tap More options > Extra volume to quickly add more volume to the incoming audio.

Listen with the Speaker or Bluetooth Headset

Listen to the call using the speaker or through a Bluetooth headset (not included).

► Tap Speaker to hear the caller using the speaker.
  – or –
  Tap Bluetooth to hear the caller using a Bluetooth headset.
Place a New Call While on a Call

If your service plan supports this feature, you can make another call while a call is in progress.

1. From the active call, tap Add call to dial the second call.
2. Dial the new number and tap Dial. When the call is answered:
   - Tap Swap to switch between the two calls.
   - Tap Merge to hear both callers at once (multi-conferencing).

Video Call Options

To change the call type during a video call:

► Tap Call type. The following options are available:
   - Show me or Hide me: Turn your camera on or off.
     - The option depends on whether your camera is currently on or off.
   - Voice call: Change the video call to a voice-only call.
   - Cancel: Do not change the call type.

Call Waiting

If your service plan supports this feature, you can answer an incoming call while you have a call in progress. You are notified of an incoming call by a call waiting tone.

To answer a new call while you have a call in progress:

1. Drag Answer in any direction to answer the new call.
2. Tap an option:
   - Put [caller] on hold to place the previous caller on hold while you answer the new incoming call.
   - Merge with [caller] to add the new caller to the current call.
   - End call with [caller] to end the previous call and answer the new call.
3. Tap Swap to switch between the two calls. This places the new caller on hold and activates the previous call.

Call Log

The numbers of the calls you have dialed, received, or missed are stored in the Call log.

1. From a Home screen, tap Phone.
2. Tap Log. A list of recent calls is displayed. If the caller is in your Contacts list, the caller’s name is displayed.

Save a Recent Call to Your Contacts List

Use recent call information to create a contact or update your Contacts list.

1. From a Home screen, tap Phone.
2. Tap Log.
3. Tap the call that contains the information that you want to save to your Contacts list.
4. Tap Create contact.
   - or –
   If you want to replace the number for an existing contact, tap Update existing.
Delete a Call from the Call Log

To delete Call log entries:

1. From a Home screen, tap ✆ Phone.
2. Tap Log.
3. Touch and hold the call you want to delete from the Call log.
4. Tap Delete. Confirm when prompted.

Add a Caller to the Reject List

By adding a caller to your Reject list, future calls from this number are sent directly to your voicemail.

1. From a Home screen, tap ✆ Phone.
2. Tap Log.
3. Tap the caller you want to add to the Reject list.
4. Tap More options > Add to auto reject list.
Speed Dial

You can assign a shortcut number to a contact for speed dialing their default number.

Create a Speed Dial
You can assign 100 speed dial numbers.

1. From a Home screen, tap Phone.
   • Tap Keypad if the keypad is not displayed.

2. Tap More options > Speed dial. The Speed dial screen displays the numbers 1 through 100. Number 1 is reserved for Voicemail.

3. Tap an unassigned number (Add contact).

4. Tap a contact to assign to the number.
   • The selected contact is displayed in the Speed dial number box.

Use Speed Dial to Make a Call
You can make a call using Speed dial.

1. From a Home screen, tap Phone.
   • Tap Keypad if the keypad is not displayed.

2. Touch and hold the Speed dial number.
   • If the Speed dial number is more than one digit long, enter the first digits, and then hold the last digit.

Remove a Speed Dial Number Assignment
You can remove an assigned Speed dial number.

1. From a Home screen, tap Phone.
   • Tap Keypad if the keypad is not displayed.

2. Tap More options > Speed dial.

3. Find the contact to remove from Speed dial.

4. Tap Remove.
Emergency Calls

You can dial the emergency telephone number in your region regardless of the phone’s cellular service status.

Make an Emergency Call

You can dial the emergency telephone number from your phone whether or not cellular service has been activated. If your phone is not activated, you can only make an emergency call.

1. From a Home screen, tap Phone.
2. Enter the emergency telephone number (911 in North America) and tap Dial.
3. Complete your call. During this type of call, you have access to most in-call features.

Call Emergency Services from a Locked Screen

The emergency telephone number can be dialed even if the phone is locked, allowing anyone to use your phone to call for help in an emergency. When accessed from a locked screen, only the emergency calling feature is accessible to the caller. The rest of the phone remains secured.

Swipe Lock Screen

If the Lock screen is set to Swipe, you can access the call screen in a couple of ways.

1. Drag Phone upward to open the call screen.
   - or -
   Swipe across the screen to unlock it, and then tap Phone.
2. Enter the emergency telephone number (911 in North America) and tap Dial.
3. Complete your call. During this type of call, you have access to most in-call features.

Secure Lock Screens

You can make calls even if your phone has a secure lock screen.

1. Drag Phone upward to open the call screen.
2. Tap Emergency call to display the Emergency dialer.
3. Enter the emergency telephone number (911 in North America) and tap Dial.
4. Complete your call. During this type of call, you have access to most in-call features.
Set Up and Access Voicemail

Set up and configure your voicemail.

Set Up Your Voicemail
You can access your voicemail from a Home screen.

1. From a Home screen, tap Phone > Voicemail.
2. Follow the tutorial to create a password, record a greeting, and record your name.

Note: These steps may be different depending on your network.

Access Your Voicemail
You can access your voicemail from a Home screen.

1. From a Home screen, tap Phone > Voicemail.
   • You may be prompted to enter a password.
2. Follow the voice prompts from the voicemail center.

Access Your Voicemail from Another Phone
You can access your voicemail from another phone.

1. From another phone, dial your wireless phone number. Wait until you hear your voicemail greeting.
2. Press the asterisk or star (*) key on the phone you are using.
3. Enter your password and you are connected to your voicemail.

Visual Voicemail
Use AT&T Visual Voicemail to:

• Review and manage your voicemail messages directly from your phone without dialing into voicemail.
• See a list of your messages on your phone and select, in any order you choose, which ones you want to play, call back, share, delete, or save.

To get started:

1. From a Home screen, tap Apps > Visual Voicemail.
2. Follow the prompts.
Applications

Learn how to change the way apps are displayed, organize apps into folders, and uninstall or disable apps.
The Apps list displays all preloaded apps and apps that you downloaded. You can uninstall, disable, or hide apps from view.

Shortcuts to apps can be placed on any of the Home screens. For more information, see Add a Shortcut to a Home Screen.

Access Apps

You can access and launch all applications from the Apps list.

1. From a Home screen, tap Apps.
2. Tap an app’s shortcut to launch it.
   • To return to the main Home screen, press the Home key.

Download and Install New Apps

Find new apps to download and install on your device.

• Play Store: Download new apps from the Google Play store. Visit play.google.com/store/apps to learn more.

• Galaxy Apps: View and download Samsung apps that are optimized for use with Galaxy devices. Visit samsung.com/levant/apps/mobile/galaxyapps to learn more.

View Your Downloaded Apps

You can view all of the apps you have downloaded and installed on your device.

1. From a Home screen, tap Apps.
2. Tap More options > Downloaded apps.

Uninstall or Disable Apps

You can uninstall or disable apps you download and install.

• Preloaded apps cannot be uninstalled.

• Apps that are disabled are turned off and hidden from view.

To uninstall or disable an app:

1. From a Home screen, tap Apps.
2. Tap More options > Uninstall/disable apps. Apps that can be uninstalled or disabled display Uninstall/disable on their shortcut.
3. Tap Uninstall/disable and follow the prompts to either uninstall or disable the app.

To enable apps after disabling them:

1. From a Home screen, tap Apps > Settings > Apps > Application manager.
2. Tap Menu and choose Disabled, and then tap the app you want to enable.
3. Tap Enable. The app is displayed again in the Apps list.
Organize Your Apps

The Apps shortcuts can be listed alphabetically or in your own custom order.

To change the order Apps are listed:
1. From a Home screen, tap Apps.
3. Tap an option:
   - Custom: Touch and hold, and then drag app shortcuts to arrange them in any order.
   - Alphabetical order: App shortcuts are arranged in alphabetical order.

Use Folders to Organize Apps

You can organize Apps in a folder on an Apps list screen.

1. From a Home screen, tap Apps.
2. Tap More options > Create folder.
   - Enter a folder name: Name the folder.
   - Palette: Change the folder color.
   - Add application: Place more apps in the folder. Tap apps to select them, and then tap Done.
3. Tap anywhere outside of the folder to close it.

To launch apps in a folder:
▶ Tap a folder, and then tap an app shortcut to launch it.

To delete a folder:
1. From a Home screen, tap Apps.
2. Tap More options > Remove folder.
3. Tap the folder to delete, and then tap Done. Confirm when prompted.

Add a Folder to a Home Screen

To add a folder to a Home screen:
1. From a Home screen, tap Apps.
2. Touch and hold a folder, drag it to a Home screen, and then release it.

Hide or Show Apps

Hide Apps from View

You can hide (rather than uninstall or disable) any apps you do not want to see on the Apps list.

1. From a Home screen, tap Apps.
2. Tap More options > Hide apps.
3. Tap apps to hide, and then tap Done.

Show Hidden Apps

You can unhide apps you have hidden and put them back on the Apps list.

1. From a Home screen, tap Apps.
2. Tap More options > Show hidden apps.
3. Tap apps to unhide, and then tap Done.
Apps List Options

1. From a Home screen, tap Apps.

2. Tap More options for these options:
   - **Edit**: Touch and hold an app shortcut, and then drag it to:
     - **Create folder**: Create a new folder.
     - **App info**: View information about this app.
     - **Turn off**: Disable the app.
     - **Uninstall**: Uninstall the downloaded app. Preloaded apps cannot be uninstalled.
   - **Create folder**: Create a new folder to hold apps.
   - **Remove folder**: Remove folders that you have created. This option is displayed only if folders have been created.
   - **Sort by**: Choose how apps are listed.
   - **Downloaded apps**: View downloaded apps. Tap a shortcut on the Downloaded apps screen to launch the app.
   - **Uninstall/disable apps**: Uninstall an app that you downloaded to your device or disable a preloaded app (preloaded apps cannot be uninstalled). Tap Uninstall/disable to remove or disable the selected app.
   - **Hide apps**: Hide apps from the Apps list.
   - **Show disabled apps**: Display disabled apps. This option is displayed only if apps have been disabled.
   - **Show hidden apps**: Display hidden apps. This option is displayed only if apps have been hidden.
   - **Galaxy Essentials**: View and download Samsung apps that are optimized for use with Galaxy devices.
   - **Help**: View information about your device.
Google Apps

AT&T Apps

Enjoy these apps from AT&T.

**Note:** Certain apps require a data plan or paid subscription. Visit att.com to learn more or contact your service provider for additional information.

### AT&T FamilyMap
Conveniently locate a family member from your wireless device or PC, and know that your family’s location information is secure and private using AT&T FamilyMap®.

AT&T FamilyMap requires a paid subscription.

Visit att.com/familymap for more information or contact your AT&T Customer Service Representative.

### AT&T Locker
Store, share, and sync all of your photos, videos, and documents in one safe, convenient place: the AT&T cloud.

### AT&T Mail
Instantly get your mail anytime, anywhere. Read, respond to, and organize your messages quickly, whether you are at home or on the go.

### AT&T Navigator
Access real-time GPS-driven applications. These programs not only allow you to achieve turn-by-turn navigation, but also access local searches.

**Note:** You must have a data plan to use this feature. These services require the purchase of a subscription.

### AT&T Protect Plus
Access the Mobile Protection Pack and with a paid subscription, replace your device if it is lost or damaged, locate your device if it is lost, and receive backup and device support. You must purchase the Mobile Protection Pack within 30 days of purchase/activation of a new device.

### AT&T Smart Wi-Fi
Maximize your battery performance, simplify access to AT&T Hot Spots and Wi-Fi networks, automate your Wi-Fi connections, and track your data use.

### Device Help
Access online information to help with your device questions.

### DriveMode
Auto reply when you are driving and do not want to answer the phone. You can auto reply to messages, emails, and phone calls. You can also allow up to five of your contacts to contact you while using DriveMode®.
Mobile Hotspot
Share your device’s mobile data connection using a USB cable or as a portable Wi-Fi hotspot.

Mobile TV
Watch your favorite TV shows using your device with this subscription service.

myAT&T
Manage your AT&T account. You can review and pay your bill, check minutes and data usage, upgrade to a new device, or change your plan.

Setup & Transfer
Transfer your contacts, call logs, messages and media when switching phones.

Smart Limits
Set limits on purchases and texts, block data and phone numbers, and view phone activity with this family smartphone manager.

Visual Voicemail
Review and manage your voicemail messages directly from your device without dialing into voicemail. You can also see a list of your messages on your device and select which ones you want to play, call back, share, delete, or save.
There are additional apps, including several Samsung apps, preloaded on your device.

**Amazon**
Shop at amazon.com™ from your device.
Visit [amazon.com](http://amazon.com) to learn more.

**Caller Name ID**
Subscribe to Caller Name ID to identify unknown callers by name, picture, city, and state.

*Note:* Caller Name ID requires a subscription.

**Evernote**
Create, synchronize, and share multimedia notes. You can add tags to the notes, or sort the notes into a notebook so that you can manage your ideas efficiently.

**Facebook**
Keep up with friends and family with the Facebook app. Share updates, photos, and videos, as well as text, chat, and play games.

**Flipboard**
Access your personalized magazines.
Visit [flipboard.com](http://flipboard.com) to learn more.

**Games**
Play full version games for free. Use WildCoins to rent or buy games and in-game items. Enjoy new games every week.

**Hancom Office 2014**
View, edit, and create Hancom™ Office Hanword (*.hwp) and Hanshow (*.show) documents.

**Instagram**
Capture and share photos and videos with your friends with Instagram™. Customize what you capture, then share it on your feed or post it directly to your friends.

**Lookout**
Configure and manage key security options, such as anti-virus and anti-malware technology, a lost and stolen device locator service, an application privacy adviser, and a backup service.

**Peel Smart Remote**
Control select Wi-Fi-enabled Samsung TV models using your Samsung Galaxy device. Now you can control all of your TV’s settings, such as on and off functions, channel navigation, and volume control from the same Samsung device you already know.
PEN.UP
Share photos, comment on other creations, or just browse through the pages for something to add to your personal collection.

Samsung Milk Music
Stream music with Samsung Milk Music™, a radio service that offers a simple way to find the music that is right for you. With a library of over 13 million songs and 200+ stations, the interactive dial makes it easy to skim through stations to find the perfect soundtrack for the moment.

Uber
Hire a private driver in more than 130 cities and 30 countries. Uber is an entirely new and modern way to travel.

Usage Manager
Manage your data using this shortcut to your battery, apps, and data usage settings.

For more information, see Data Usage.

YP
Use Yellow Pages to tap into local businesses, locations, and events, and connect to your search in real-time. Provides quick and ready access to businesses, map locations, and storage of your favorite searches.
The Calculator provides basic and advanced arithmetic functions.

Basic Operation
You can use your calculator to perform basic operations.

1. From a Home screen, tap Apps > Calculator.
2. Enter the first number using the numeric keys.
3. Tap the appropriate arithmetic function key.
4. Enter the next number.
5. Tap Equals to view the result.
6. Tap Clear to clear the results.

Additional Functions
You can perform additional functions on your calculator.

To clear the calculator history:
► Tap History > Clear history.

To copy all or part of the calculation to the clipboard:
► Touch and hold an entry in the display field, and then tap Copy.

Scientific Calculator
The Calculator app also provides advanced arithmetic functions, such as $\sin$, $\cos$, and $\tan$.

To use the Scientific calculator:
► When Screen rotation is enabled, turn the device to landscape.

Note: Screen rotation is found in the Quick settings on the Notification panel. For more information, see Quick Settings.
Calendar

Manage your events and tasks.

Calendar View

To choose a calendar view:

1. From a Home screen, tap Apps > Calendar.
2. Tap Menu, and then tap one of the following:
   - **Year**: Display all twelve months of this year. Swipe across the screen to display another year.
   - **Month**: Display the current month. Swipe across the screen to display another month.
   - **Month and agenda**: Display the current month. Swipe across the screen to display another month. Events and tasks are also displayed.
   - **Week**: Display the current week. Swipe across the screen to display another week.
   - **Day**: Display today’s schedule by hour. Swipe across the screen to display another day.
   - **Agenda**: Display all tasks.
3. Tap Today to return to the current date.

Create an Event or Task

You can use your Calendar to create events or tasks.

1. From a Home screen, tap Apps > Calendar.
2. Tap Add and use one of the following methods:
   - **Add event**: Enter an event with an optional repeat setting.
   - **Add task**: Enter a task with an optional priority setting.
3. Enter details for the event or task, and then tap Save. Confirm if prompted.

Share an Event

You can share events you create from your Calendar.

1. From a Home screen, tap Apps > Calendar.
2. Tap an event to view it.
3. Tap Share via, choose a sharing method, and follow the prompts.
Delete an Event or Task

You can delete events or tasks you create from your Calendar.

1. From a Home screen, tap Apps > Calendar.
2. Tap an event or task to view it.
3. Tap Delete. Confirm if prompted.

To delete multiple events or tasks:
1. From a Home screen, tap Apps > Calendar.
2. Tap More options > Delete.
3. Tap events or tasks to select them.
4. Tap Done. Confirm if prompted.

Calendar Settings

These settings allow you to modify settings associated with using the Calendar.

1. From a Home screen, tap Apps > Calendar.
2. Tap More options > Settings.
3. Tap an option and follow the prompts.
Take pictures and record videos with the Camera app.

- **Record video**: Record a video.
- **Take a picture**: Take a picture.
- **Shooting mode**: Change the shooting mode.
- **Gallery**: Open the Gallery to view photos and videos.
- **Camera Settings**: Configure other camera settings.
- **Quick settings**: Select camera settings or options.
- **Switch cameras**: Switch between the rear and front cameras.
- **Current shooting mode**: Indicated which shooting mode is active.
Take Pictures

Take pictures with your device’s front or rear camera or combine shots with Dual camera.

**Note:** Prior to using the camera, remove the plastic protective covering from the camera lens.

1. From a Home screen, tap `Apps > Camera`.
2. Using the display screen as a viewfinder, compose your shot by aiming the camera at the subject. While composing your picture, use the available options or these gestures:
   - Touch the screen with two fingers and pinch or spread them on the screen to zoom in or out.
   - Tap the screen to focus on the area you touched.
   - Before taking the photo, you can tap the icons to access various camera options and settings.
3. Tap `Take a picture` to take the picture.

**Note:** You can also press the Volume key up or down to take a picture. This is the default action of the Volume key while the camera is active. You can also set the Volume key to act as the video record key or as a zoom key.

Quick Settings

Reorganize shortcuts for easy access to the camera’s various options.

1. From a Home screen, tap `Apps > Camera`.
2. Tap `Settings` to quickly change Camera settings. The available options vary by mode.
3. Touch and hold a settings icon and drag it to the left side of the screen.
4. Touch and drag a Quick setting icon to change the position of the icon or to change which Quick settings to use.

Shooting Mode

Several visual effects are available. Some modes are not available when taking self-portraits.

1. From a Home screen, tap `Apps > Camera`.
2. Tap `Mode` to view the following options. Each section indicates which camera (front or rear) the modes are available for.

**Rear Camera**

- **Auto:** Allow the camera to evaluate the surroundings and determine the ideal mode for the picture.
- **Rear-cam selfie:** Set the rear camera to automatically detect and focus on your face when you take self-portrait pictures using the rear camera.
- **Selective focus:** Make objects stand out from the background. They must be within 1.5 feet from you, and at least 3 times this distance from the background.
- **Panorama:** Create a linear image by taking pictures in either a horizontal or vertical direction.
- **Slow motion:** Record videos at a high frame rate for viewing in slow motion. You can play a specific section of each video in slow motion after recording it.
- **Fast motion:** Record videos for viewing in fast motion. You can play a specific section of each video in fast motion after recording.
- **Manage modes:** Select which shooting modes to display when you tap `Mode`.
- **Download:** Download additional shooting modes from the Galaxy Apps store.

**Front Camera**

- **Selfie:** Tap the screen, or place your finger over the heart rate sensor to take selfies.
- **Wide selfie:** Take wide-angle selfie shots to fit more people into your pictures.
- **Download:** Download additional shooting modes from the Galaxy Apps store.
Camera and Video Settings

Use Camera settings to configure the camera.

1. From a Home screen, tap Apps > Camera.

2. Tap Settings. Available options vary depending on the camera/recording mode used.

   - **Picture size**: Select a resolution. Use higher resolution for higher quality. Higher resolution pictures take up more memory.
   
   - **Effects**: Add special graphical effects.
   
   - **Timer**: Take time-delayed pictures or videos.
   
   - **Flash**: Activate or deactivate the flash (rear camera only).
   
   - **Interval shot**: Select the best picture from a series of continuous shots (front camera only).

3. Tap Menu to display the following additional options.

**Rear Camera Only**

   - **ISO**: Select an ISO value. This controls camera light sensitivity. It is measured in film-camera equivalents. Low values are for stationary or brightly-lit objects. Higher values are for fast-moving or poorly-lit objects.

   - **White balance**: Select an appropriate white balance, so images have a true-to-life color range. The settings are designed for specific lighting situations. These settings are similar to the heat range for white-balance exposure in professional cameras.

   - **Metering modes**: Select a metering method. This determines how light values are calculated. Center-weighted measures background light in the center of the scene. Spot measures the light value at a specific location. Matrix averages the entire scene.

   - **HDR (rich tone)**: Enables the light sensitivity and color depth features of the device to produce a brighter and richer picture.

   - **Video stabilization**: Activate anti-shake. Anti-shake helps to keep the focus steady when the camera is moving.

**Front Camera Only**

   - **Beauty face**: Take a picture with lightened faces for gentler images.

   - **Save as flipped**: Automatically save images as flipped in the Gallery.

**Both Cameras**

   - **Exposure value**: Change the exposure value. This determines how much light the camera’s sensor receives. For low light situations, use a higher exposure.

   - **Tap to take pics**: Tap the image on the preview screen to take pictures.

   - **Video size**: Select a resolution. Use higher resolution for higher quality. Higher resolution videos take up more memory.

   - **Location tags**: Attach a GPS location tag to the picture.

   - **Storage location**: Select the memory location for storage.

   - **Grid lines**: Display viewfinder grid lines to help composition when selecting subjects.

   - **Voice control**: Set the camera to take pictures with voice commands.

   - **Shutter sound**: Turn the shutter sound on or off.

   - **The Volume key**: Use the Volume key as the camera key, the record key, or as a zoom key.

   - **Review pictures**: Set to show pictures or videos after taking them.

   - **Reset settings**: Reset the camera settings.
The Clock app offers features for keeping track of time and setting alarms.

1. From a Home screen, tap \(\text{Apps} > \text{Clock}\).
2. Tap a tab to use a feature:
   - **Alarm**: Set an alarm to ring at a specific time.
   - **World clock**: View the time of day or night in other parts of the world. World clock displays time in hundreds of different cities, within all 24 time zones around the world.
   - **Stopwatch**: Measure intervals of time.
   - **Timer**: Use a timer to count down to an event based on a preset time length (hours, minutes, and seconds).

**Alarm**

Set an alarm to ring at a specific time.

**Create an Alarm**

Create an alarm event. You can set one-time or recurring alarms, and choose options for how to be notified.

1. From a Home screen, tap \(\text{Apps} > \text{Clock}\).
2. Tap **Alarm**.
3. Tap **Create alarm**:
   - **Time**: Set a time for the alarm.
   - **Repeat**: Choose when to repeat the alarm.
   - **Alarm type**: Choose whether the alarm uses sound, vibration, or vibration and sound to alert you.
   - **Alarm tone**: Choose a sound to play for the alarm.

4. Tap **Done**.

**Delete an Alarm**

To delete an alarm:

1. From a Home screen, tap \(\text{Apps} > \text{Clock}\).
2. Touch and hold an alarm, and then tap **Delete**.

- **Volume**: Drag the slider to set the volume of the alarm.
- **Snooze**: Allow snoozing. Set a time interval and number of repeats for snoozing.
- **Smart alarm**: When on, the alarm starts playing a tone at a low volume at an interval before the alarm time, and slowly increases in volume. Choose a time interval and a tone to use with smart alarm. This option is available when you have chosen an alarm type that includes sound.
- **Name**: Enter a name for the alarm.
World Clock

The World clock lets you keep track of the current time in multiple cities around the globe.

To list a city on the main World clock screen:
1. From a Home screen, tap Apps > Clock.
2. Tap World clock.
3. Tap the Search cities field, and enter the name of a city. Tap the city to view it on the globe.
4. Tap Add city to add the city to your world clock.
5. Repeat to add more cities.

To remove a city from the World clock list:
1. From a Home screen, tap Apps > Clock.
2. Tap World clock.
3. Tap List view.
4. Touch and hold a city you want to remove from the list until it is selected.
5. Tap Delete.

Stopwatch

The Stopwatch lets you time events down to a hundredth of a second.

1. From a Home screen, tap Apps > Clock.
2. Tap Stopwatch and use the following options:
   • Start: Begin timing.
   • Stop: Stop timing.
   • Lap: Keep track of lap times.
   • Resume: Continue timing after stopping the clock.
   • Reset: Reset the Stopwatch to zero.

Timer

The Timer provides a countdown timer for up to 99 hours, 59 minutes, and 59 seconds.

1. From a Home screen, tap Apps > Clock.
2. Tap Timer.
3. Use the keypad and tap Hours, Minutes, and Seconds to set the length of the Timer. The following options are available:
   • Start: Begin the Timer.
   • Stop: Pause the Timer.
   • Resume: Resume the Timer.
   • Reset: Reset the Timer.
Contacts

Store and manage your contacts with the Contacts app, which can be synchronized with a variety of your existing personal accounts.

For more information on connecting with and managing your accounts through your device, see Accounts.

Manage Contacts

Access your list of contacts by using the Contacts app. To access your Contacts list:

1. From a Home screen, tap Apps > Contacts.

Find a Contact

You can search for a contact or swipe the list to find one by name.

1. From a Home screen, tap Apps > Contacts.
2. Tap the Search field, and then enter characters to find contacts that match.
   - or -
   Tap a letter on the side of the list to go directly to that letter in the alphabetical list.

Add a Contact

Use the following procedure to add a new contact.

1. From a Home screen, tap Apps > Contacts.
2. Tap Create contact, and then tap contact fields to enter information.
   - Choose a storage account for the contact.
   - Tap Contact photo to assign a picture to the new contact.
   - Enter a name, phone number, email address, and assign the contact to a group, and choose a default ringtone.
     - Tap Add to enter additional entries.
     - Tap Remove to remove an entry.
     - Tap More for additional fields.
     - Tap Label to choose a label for the field.
   - Tap Add another field to add more contact information.
3. Tap Save.

Edit a Contact

When editing a contact, you can tap a field and change or delete the information, or you can add more fields to the contact’s list of information.

1. From a Home screen, tap Apps > Contacts.
2. Tap the contact to display it, and then tap Edit.
3. Tap any of the fields to add, change, or delete information.
4. Tap Save.
Share a Name Card
When you share a name card, the contact's information is sent as a vCard file (.vcf) or text file. You can share a vCard using Bluetooth or Wi-Fi Direct, attach it to a message, or save it to a storage location.

1. From a Home screen, tap Apps > Contacts.
2. Tap a contact to display it, and then tap More options > Share name card.
3. Choose whether to send the contact as a vCard file (.vcf) or text file.
4. Choose a sharing method and follow the prompts.

Delete Contacts
You can delete a single contact or choose multiple contacts to delete.

1. From a Home screen, tap Apps > Contacts.
2. Touch and hold a contact to select it. You can also tap other contacts or tap the selected checkbox at the top of the screen to select all contacts.
3. Tap Delete, and then confirm when prompted.

Favorites
When you mark contacts as favorites, they are easily accessible from other apps. Favorites display together on the Favorites tab in Contacts.

Mark Contacts as Favorites
To mark a contact as a favorite.

1. From a Home screen, tap Apps > Contacts.
2. Tap a contact to display it, and then tap Add to Favorites (the star brightens ★).

Remove Contacts from Favorites
You can remove contacts from Favorites.

1. From a Home screen, tap Apps > Contacts.
2. Tap a contact to display it, and then tap Remove from Favorites (the star dims ★★).

Link Contacts
When you have contacts from various accounts, you may have multiple similar entries for a single contact. Contacts lets you link multiple entries into a single contact.

1. From a Home screen, tap Apps > Contacts.
2. Tap the contact to display it.
3. Tap More options > Link contacts.
4. Tap contacts to link to the original contact.
5. Tap Done.

Unlink Contacts
To unlink contacts.

1. From a Home screen, tap Apps > Contacts.
2. Tap the contact to display it.
3. Tap More options > Unlink contacts.
4. Tap Separate beside contacts to unlink them from the main contact.
Create a Shortcut to a Favorite

You can create a shortcut to a favorite on the Home screen, to access their information directly from the Home screen.

1. From a Home screen, tap Apps > Contacts.
2. Tap Favorites, and then touch and hold a contact to select it.
3. Tap More options > Add shortcut to Home screen.

Groups

You can use groups to organize your contacts. Your device comes with preloaded groups, and you can create your own. You might create a group for your family, for coworkers, or a team. Groups make it easy to find contacts, and you can send messages to the members of a group.

Create a Group

To create a group:

1. From a Home screen, tap Apps > Contacts.
2. Tap Groups, and then tap Create group.
3. Tap fields to enter information about the group:
   - Create group in: Choose where to save the group. You can save it to a specific account, to the device memory, or to all accounts.
   - Group name: Enter a name for the new group.
   - Group ringtone, Group message tone, and Group vibration pattern: Customize the sounds for the group.
   - Add member: Select contacts to add to the new group, and then tap Done.
4. Tap Save.

Rename a Group

To rename a group:

1. From a Home screen, tap Apps > Contacts.
2. Tap Groups, and then tap a group.
3. Tap More options > Edit group and enter a new name.
4. Tap Save.

Add Contacts to a Group

To add contacts to a group:

1. From a Home screen, tap Apps > Contacts.
2. Tap Groups, and then tap a group.
3. Tap Add member, and then tap the contacts you want to add.
4. Tap Done.

Send a Message to a Group

To send a text message to members of a group:

1. From a Home screen, tap Apps > Contacts.
2. Tap Groups, and then tap a group.
3. Tap More options > Send message or email.
4. Tap Message.
5. Type your message and tap Send.
Send an Email to a Group

To send an email to members of a group:

1. From a Home screen, tap **Apps > Contacts**.
2. Tap **Groups**, and then tap a group.
3. Tap **More options > Send message or email**.
4. Tap **Email**.
5. Tap contacts to select them, or tap the **selected** checkbox at the top of the screen to select all, and then tap **Done**.
   - Only group members that have an email address in their records are displayed.
6. Choose an email account and follow the prompts.
7. Type your message and tap **Send**.

Delete a Group

Preset groups cannot be deleted.

1. From a Home screen, tap **Apps > Contacts**.
2. Tap **Groups**.
3. Tap **More options > Delete group**.
4. Tap groups to select them or tap the **selected** checkbox to select all, and then tap **Delete**.
5. Tap **Group only** to only delete the group or tap **Group and members** to delete the group and the contacts in the group.

Contacts Settings

These settings allow you to modify settings associated with using the Contacts app.

1. From a Home screen, tap **Apps > Contacts**.
2. Tap **More options > Settings > Contacts**.
3. Tap an option and follow the prompts.
Use the Email app to view and manage all your email accounts in one app.

To access Email:
► From a Home screen, tap Apps > Email.

Configure Email Accounts
You can configure Email for most accounts in just a few steps.

1. From a Home screen, tap Apps > Email.
2. Follow the prompts to set up your email account.

To add another Email account:
1. From a Home screen, tap Apps > Email.
2. Tap More options > Settings > Manage accounts.
3. Tap Add account.
4. Enter your email address and password.

The device communicates with the appropriate server to set up your account and synchronize your email. When complete, your email is displayed in the Inbox for the account.

Note: To configure email account settings at any time, tap More options > Settings. Tap Manage accounts. Tap the email account to display its settings.

View Multiple Email Accounts
You can view email you receive for multiple accounts on the Combined view screen or you can view email accounts individually.

1. From a Home screen, tap Apps > Email.
2. Tap Menu at the top left of the screen to view the current account mailbox.
3. Tap the account name to view:
   - Combined inbox: View all email in a combined inbox.
   - [Account name]: View email for only one email account.

Manage Your Inbox
There are several tools available from the inbox screen:

► From a Home screen, tap Apps > Email.

- Tap Refresh to update your email accounts.
- Tap Search to search for key words in your email inbox.
- Tap More options for additional message options.
Create and Send an Email

This section describes how to create and send an email using the Email app.

1. From a Home screen, tap Apps > Email > Compose.

2. Tap the To field to manually add an email address or tap Add recipient to select a recipient from Favorites, Contacts, or Groups.
   - If manually entering recipients, enter additional recipients by separating each entry with a semicolon (;). More recipients can be added at any time before the message is sent.
   - If adding a recipient from your Contacts, tap the contact to place a checkmark, and then tap Done. The contact is displayed in the recipients field.
   - Tap More to add Cc and Bcc fields.

3. Tap the Subject and Message fields to enter text.
   - Tap Attach to add files, images, audio, and more to your email.
   - Tap More options for additional email options.

4. Review your message and tap Send.

Remove Email Accounts

To remove an email account:

1. From a Home screen, tap Apps > Email.

2. Tap More options > Settings > Manage accounts.

3. Tap More options > Select.

4. Tap one or more accounts to delete, and then tap Remove. Confirm when prompted.

Email Settings

These settings allow you to modify settings associated with using the Email app.

1. From a Home screen, tap Apps > Email.

2. Tap More options > Settings.

3. Under General settings, tap an option, and then follow the prompts.

4. Tap Manage accounts, and then tap an email account to adjust the settings for only that account.
Samsung Galaxy Apps provides a quick and easy way to find and download free premium apps that are compatible with your Galaxy device.

To access the Samsung Galaxy Apps website:

► From a Home screen, tap Apps > Galaxy Apps.

Galaxy Essentials

Galaxy Essentials is a collection of specially chosen apps available through Samsung Apps.

From Galaxy Essentials, you can access and download a collection of premium content, free of charge.

To access Galaxy Essentials:

1. Swipe across the Home screens and locate and tap the Galaxy Essentials widget.

2. Follow the prompts to download Galaxy Essentials apps.

Note: A Samsung account is required to purchase and download apps.
View, edit, and manage pictures and videos.

Note: Some functions described in this section are only available if there are images or videos in the Gallery.

View Images and Videos
Launching Gallery displays available folders. When another app, such as Email, saves an image, a Download folder is automatically created to contain the image. Likewise, capturing a screenshot automatically creates a Screenshots folder.

1. From a Home screen, tap Apps > Gallery.
2. Tap Menu, and then tap Time or Album to choose the way items are displayed.
   - In Album view, you can create albums to organize your images. Tap Menu > Album, and then tap More options > Create album.
   - Tap Camera to launch the Camera app.
   - When in Album view, tap an album to open it.
3. Tap an album or folder, and then tap an image or video.
   - When viewing an image or video, you can swipe left or right to view the next or previous image or video.

Zoom In or Out
Use one of the following methods to zoom in or out on an image:

- Double-tap anywhere on the screen to zoom in or zoom out.
- Spread two fingers apart on any place to zoom in. Pinch the screen to zoom out.

Play Videos
To play a video in the Gallery app:

1. From a Home screen, tap Apps > Gallery.
2. Tap a folder or category to open it.
3. Tap a video to view it.
4. Tap Play to play the video.

Trim Segments of a Video
You can trim segments of a video.

1. Select a video, and then tap the screen once to see the video options.
2. Tap Trim.
3. Use the sliders at the bottom of the screen to trim the video. Move the left bracket to the desired starting point, and then move the right bracket to the desired ending point.
4. Tap Done to save the video. Modify the File name, and then tap OK to confirm the changes.
Edit Images
You can edit images stored on your device.

1. From a Home screen, tap Apps > Gallery.
2. While viewing an image, tap More options for the following functions:
   - **Edit**: Use basic tools to edit your picture.
   - **More info**: View image details.
   - **Write on image**: Write directly on the image.
   - **Rotate left**: Rotate the picture counter-clockwise.
   - **Rotate right**: Rotate the picture clockwise.
   - **Crop**: Resize the frame to crop the image.
   - **Rename**: Rename the file.
   - **Slideshow**: Start a slideshow with the images and videos in the current folder.
   - **Add tag**: Add a tag to your image.
   - **Studio**: Edit your picture with advanced tools.
   - **Set as**: Set the image as wallpaper or as a contact's photo.
   - **Print**: Print the image using a USB or Wi-Fi connection. Some printers may not be compatible with the device.
   - **Settings**: Change the Gallery settings.

Delete Images and Videos
You can delete images and videos stored on your device.

1. From a Home screen, tap Apps > Gallery.
2. Tap a folder to open it.
3. In a folder, tap More options > Delete, select images and videos, and then tap Done.

   - or -

   When viewing a single image or video, tap Delete.

Share Images and Videos
You can share images and videos from your Gallery.

1. From a Home screen, tap Apps > Gallery.
2. Tap a folder to open it.
3. In a folder, tap More options > Select, select images and videos, and then tap Share via to send them to others or share them with social network services.

   - or -

   While viewing a single image or video, tap Share via to send it to others or share it with social network services.

Gallery Settings
These settings allow you to modify settings associated with using your Gallery.

1. From a Home screen, tap Apps > Gallery.
2. Tap More options > Settings.
3. Tap an option and follow the prompts.
4. Tap More options > Add account to add a Samsung, Facebook, or Google Account.
Internet

Access the Internet with a fully-featured web browser.

Access the Internet
► From a Home screen, tap Apps > Internet.

Command Keys
The following command keys are available:

- **Back** or **Back**: Return to the previous page.
- **Forward**: Go forward to a recent page.
- **Home**: Display your Internet Home screen.
- **Bookmarks**: Manage bookmarked pages, saved pages, and history.
- **Tabs**: Manage open tabs. The number on the icon indicates the number of tabs that are currently open.
- **Refresh**: Refresh or reload the current web page.

View a Web Site
To view a web site:
► Tap the address field, enter the web address, and then tap Go on the keyboard.

To share, save, or print the current web page:
► Tap More.

To zoom in or out:
► Tap the screen twice or pinch the screen to zoom out. Stretch the screen to zoom in.

Browser Tabs
Use tabs to view multiple web pages at the same time.

To open a new tab:
► Tap Tabs > New tab.

To close a tab:
1. Tap Tabs.
2. Tap Close tab by the tabs you want to close.

Bookmarks
The Bookmarks page stores Bookmarks, Saved pages, and History.

Save and Open Bookmarks
Bookmarking a web page saves the web address so that you can access it quickly.

To bookmark the current web page:
1. Tap Bookmarks > Bookmarks > Add.
2. Type a title for the bookmark and tap Save.

To open a bookmarked web page:
1. Tap Bookmarks > Bookmarks.
2. Tap a bookmark entry.
Saved Pages

Saving a web page stores the web page content on your device so that you can access it offline.

To save the current web page:
► Tap **More > Save web page**.

To view saved web pages:
1. Tap **Bookmarks > Saved pages**.
2. Tap a saved page to open it in the browser.

Secret Mode

Pages viewed in Secret mode are not listed in your browser history or search history, and leave no traces (such as cookies) on your device. Secret tabs are a darker shade than the normal tab windows.

**Note:** Any downloaded files remain on your device after you close the secret tab.

To enable Secret mode:
1. From a Home screen, tap **Apps > Internet**.
2. Tap **Tabs**.
3. Tap **Turn on secret**.
4. Tap **Create password** to protect your Secret mode data with a password.
   - or –
   Tap **Do not use password**.

To turn off Secret mode:
1. From a Home screen, tap **Apps > Internet**.
2. Tap **Tabs**.
3. Tap **Turn off secret**.

Internet Settings

These settings allow you to modify settings associated with using the Internet app.

1. From a Home screen, tap **Apps > Internet**.
2. Tap **More > Settings**.
3. Tap an option and follow the prompts.

View History

To view a list of recently visited web pages:
► Tap **Bookmarks > History**.

Share Pages

To share a web page address with others:
► Tap **More options > Share**, and follow the prompts.
Learn how to send and receive different messages using the Samsung Messages app on your device.

Types of Messages

The Samsung Messages app provides the following message types:

- Text Messages (SMS)
- Multimedia Messages (MMS)

The Short Message Service (SMS) lets you send and receive text messages to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s message service.

The Multimedia Messaging Service (MMS) lets you send and receive multimedia messages (such as picture, video, and audio messages) to and from other mobile phones or email addresses. To use this feature, you may need to subscribe to your service provider’s multimedia message service.

Messaging icons are displayed at the top of the screen and indicate when messages are received and their type.

Create and Send Messages

This section describes how to create and send a message using the Messages app.

1. From a Home screen, tap Apps > Messages.
2. Tap Compose.
3. Tap the Enter recipients field to manually enter a recipient or tap Add recipient to select a recipient from your Contacts. You can also select the recipient based on Groups, Favorites, or Log.
   - If adding a recipient from your Contacts, tap the contact to place a checkmark, and then tap Done. The contact is placed in the recipients field.
   - Enter additional recipients by separating each entry with a semicolon (;) and then using the previous procedure. More recipients can be added at any time before the message is sent.
4. Tap the Enter message field to enter a message.
   - Attach: Add images, audio, and more to your message.
   - Emoticon: Choose an available emoticon from the list and then add it into your message at the cursor location.
5. Review the message and tap Send.

Note: If you exit a message before you send it, the message is automatically saved as a draft.
View New Messages

When you receive a new message, a New message is displayed on the Status bar.

To view the message:

► Open the Notification panel and tap the message. For more information, see Notification Panel.

– or –

From a Home screen, tap Apps > Messages, and then tap the new message to view it.

• To play a multimedia message attachment (audio or video), tap Play.

• To scroll through the list of messages, swipe up or down the page.

Delete Messages

To delete messages, follow these steps:

1. From a Home screen, tap Apps > Messages.

2. Tap More options > Select.

3. Tap each message you want to delete or tap the selected checkbox at the top of the screen to select all messages.

4. Tap Delete. Confirm when prompted.

Message Search

You can search through your messages by using the Message Search feature.

1. From a Home screen, tap Apps > Messages.

2. Tap Search.

3. Enter a word or phrase to search for, and then tap Search on the keyboard.

Messages Settings

Configure the settings for text messages, multimedia messages, push messages, and more.

1. From a Home screen, tap Apps > Messages.

2. Tap More options > Settings.

Emergency Alerts

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System (CMAS), which may also be known as the Personal Localized Alerting Network (PLAN). For more information, please contact your wireless provider.

Emergency alerts allows customers to receive geographically-targeted messages. Alert messages notify customers of imminent threats to their safety within their area. There is no charge for receiving an Emergency alert message.

There are three types of Emergency alerts:

• Alerts issued by the President

• Alerts involving imminent threats to safety of life (extreme and severe)

• AMBER alerts (missing child alert)

Users may choose not to receive Imminent alerts (extreme and severe) and AMBER alerts.

Note: Alerts issued by the President cannot be disabled.
To disable Imminent and AMBER alerts, follow the instructions below:

1. From a Home screen, tap Apps > Messages.

2. Tap More options > Settings > Emergency alerts.

3. Tap Emergency alerts.
   - All alerts are enabled (checkmark showing) by default.

4. Tap an alert option to disable it.
Listen to your favorite songs with the Music player. Navigate through your music library, play songs, and create customized playlists.

- **Volume**: Adjust the volume.
- **More options**: View more options.
- **Adjust volume**: Control the volume level.
- **Sound quality and effects**: Configure sound quality and effects options.
- **Repeat**: Repeat the current song or playlist.
- **Song length**: View the total length of the current song.
- **Playback controls**: Fast-forward or rewind, play or pause the current song, add the song to a playlist, and view current playlist.
- **Time elapsed**: View the time elapsed for the current song.
- **Shuffle**: Shuffle songs in the current playlist.
- **Playback position**: Skip to another part of the current song.
- **Favorite**: Tag this song as a favorite.
- **Change player**: Play the song on a connected device.
Listen to Music

1. From a Home screen, tap Apps > Music.

2. Tap a category at the top left of the screen to view your music files.

3. Swipe through the list of songs and tap an entry to begin playback.

4. While playing music, use these controls:

   - Tap Pause to pause playback. To start playback again, tap Play.

   - Tap Rewind to move to the previous song. Touch and hold Rewind to rewind through the song. Tap Fast-forward to move to the next song. Touch and hold Fast-forward to forward through the song.

   - Tap the repeat button to control playback. Choose Play once to play all songs once, Repeat all to repeat all songs, or Repeat 1 to repeat the current song.

   - Tap the shuffle button to control the order songs are played. Choose Shuffle off to play songs in the order they appear in the list or Shuffle on to play songs in random order.

   - Tap Queue to view the songs in your current playlist.

   - Tap Playlist to add the current song to a playlist.

Note: When you close the Music screen, playback continues in the background, allowing you to listen to music while using other features of your device. When music is playing in the background, you can access playback controls from the Notification panel.
My Files

Access files stored on your device, including images, videos, music, and sound clips.

To access My Files:
1. From a Home screen, tap Apps > My Files.
2. Tap a category to view the relevant files or folders.
3. Tap a file or folder to open it.

File Groups
Files stored in the device are organized into the following groups:

- **Recent files**: View recently saved files.
- **Images**: View image files.
- **Videos**: View video files.
- **Audio**: View audio files.
- **Documents**: View document files.
- **Downloaded apps**: View downloaded apps.
- **Download history**: View all apps and files that have been downloaded to the device.
- **Shortcuts**: Contains shortcuts to files or folders that you have added. This option only appears if you have added shortcuts to the My Files main screen.

- **Local storage**: View folders and files in their storage locations.
  - **Device storage**: View folders and files located on the device.
  - **SD card**: View folders and files located on the memory card (if installed).
- **Cloud storage**: Contains shortcuts to FTP servers or other cloud storage locations that you have added. This option only appears if you have added shortcuts to the My Files main screen.

My Files Options
On the main My Files screen:

► From a Home screen, tap Apps > My Files. The following options are available:

- **Search**: Search for a file or folder.
- **Storage usage**: View memory information for your device and memory card (if installed).

Tap **More options** for these options:

- **Add shortcut**: Add a shortcut on the My Files main screen to any folder.

- **Settings**: Change the settings for viewing files.
Category Options

After tapping on a category, the following options are available:

- Tap 🏡 Home to return to the main screen of the My Files app.
- Tap 🔍 Search, and then enter search criteria.
- Tap · More options to find the following options:
  - **Select**: Select files or folders.
  - **Create folder**: Add a folder to the current list.
    - This option is displayed in Local Storage categories.
  - **View as**: Change the appearance of the files or folders.
  - **Sort by**: Change the sort order of the files.
  - **Add shortcut**: Add a shortcut to the current location on either a Home screen or the main My Files screen.
    - This option is displayed in Local Storage categories.
  - **Settings**: Change the settings for viewing files.

Options for Selected Files and Folders

- Tap · More options > Select, select a file or folder, and then use one of these functions:
  - Tap 📦 Share via: Send files to others or share them.
  - Tap 🗑️ Delete: Delete files or folders.
  - Tap · More options to find the following options:
    - **Move**: Move files or folders to another folder.
    - **Copy**: Copy files or folders to another folder
    - **Rename**: Rename a file or folder. This option is displayed only when just one file or folder is selected.
    - **Add shortcut on Home screen**: Add a shortcut to the file or folder on a Home screen or to the main My Files screen.
    - **Zip**: Create a zip folder containing the selected files. This option is displayed only in Local Storage categories. A selected zip folder has the additional options of **Extract** and **Extract to current folder**.
    - **Details**: View details of the selected files or folders.
Use S Health to plan, track, and manage your health goals and activities, including exercise, sleep, and meals.

**Caution:** The information gathered from this device, S Health, or related software is not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment or prevention of disease.

The accuracy of the information and data provided by this device and its related software, including heart rate readings, may be affected by factors such as environmental conditions, skin condition, specific activity performed while using/wearing the device, settings of the device, user configuration/user-provided information, placement of the sensor on the body, and other end-user interactions. For more information on proper wear and use, see samsung.com/us/heartratesensor.

To access S Health:
1. From a Home screen, tap Apps > S Health.
2. Read and accept the terms and conditions.
3. Set up your health profile and goals.

**Before You Start Exercising**

This app can be used to monitor your exercise. While moderate physical activity, such as brisk walking, is safe for most people, health experts suggest that you talk with your doctor before you start an exercise program, particularly if you have any of the following conditions:

- Heart disease;
- Asthma or lung disease;
- Diabetes, or liver or kidney disease;
- Arthritis.

You should also check with your doctor if you have symptoms suggestive of heart, lung, or other serious disease, such as:

- Pain or discomfort in your chest, neck, jaw, or arms during physical activity;
- Dizziness or loss of consciousness;
- Shortness of breath with mild exertion or at rest, or when lying down or going to bed;
- Ankle swelling, especially at night;
- A heart murmur or a rapid or pronounced heartbeat;
- Muscle pain when walking upstairs or up a hill that goes away when you rest.

Finally, the American College of Sports Medicine recommends that you see your doctor before engaging in vigorous exercise if two or more of the following apply:

- You are a man older than age 45 or a woman older than age 55;
- You have a family history of heart disease before age 55;
- You smoke or quit smoking in the past six months;
- You have not exercised for three months or more;
- You are overweight or obese;
- You have high blood pressure or high cholesterol;
- You have impaired glucose tolerance, also called prediabetes.
When in Doubt — Check It Out

If you are unsure of your health status, have several health problems, or are pregnant, you should speak with your doctor before starting a new exercise program. Working with your doctor ahead of time is a good way to plan an exercise program that is right and safe for you. Consider it the first step on your path to physical fitness.
The S Note app helps you create, edit, and manage all the notes on your device.

Sign in to your Samsung account to access your notes in S Note from any device.

With S Note, create content by typing, writing, drawing, and even recording voice, video, or taking pictures. Templates are provided to make content creation easy and help keep things organized.

Create a Note

To create a note with S Note:

1. From a Home screen, tap Apps > S Note.
2. Tap the Create new note.
3. Use the S Pen to create content.
   - Tap More > Background settings to add templates, change the background color, and add images.
4. Tap Save.

Note Tools

When creating or editing a note in S Note, some helpful modes and tools are provided.

Note: To use your finger to write and draw on S Notes, tap More > Settings > S Pen only mode to disable this restriction.

- **Pen**: Write or draw freehand with the S Pen. Tap the Pen icon once to change the Pen settings.
  - Tap Favorite pens to save pen settings at the bottom of the screen.
- **Eraser**: Erase content from the note. Tap once to select the eraser. Tap again to change the Eraser settings.
- **Text**: Type text using the keyboard. Tap once to select Text mode.
- **Undo**: Undo the last action.
- **Redo**: Redo the last action.
- **Save**: Name and save the note.
- **More**: View more options for the note.
Edit a Note

To edit an S Note:

1. From a Home screen, tap Apps > S Note.
2. Tap a note to view it.
3. Tap Edit to edit the note.

Note: Action memos behave differently from other notes. When you tap an Action memo to view it, you can edit the memo immediately.

View Action Memos

You can view S Notes and Action memos together, or you can narrow your view to Action memos.

To view Action memos in S Note:

1. From a Home screen, tap Apps > S Note.
2. Tap the Menu > Action memos.
3. If there are one or more Action memos, tap Search to search for a memo.
4. Tap More for additional options:
   - Share: Select action memos to share.
   - Edit: Select memos to delete, export, or save as an S Note.
   - Sort by: Sort memos according to date or name.
   - Filter by background color: Sort action memos by background color.
   - Settings: Customize S Note settings.
   - Help: View help topics on how to use S Note.
S Voice

Speak commands to perform operations on your device, and to speak criteria for searches and other operations.

Access S Voice

You can access S Voice™ from the Apps list.

1. From a Home screen, tap Apps > S Voice.
2. Speak a command.
3. Tap Microphone, if the device does not hear you, or to give it another command.

Note: Tap More options for example commands and to view a tutorial.

S Voice Settings

These settings allow you to modify settings associated with using the S Voice app.

1. From a Home screen, tap Apps > S Voice.
2. Tap More options > Settings.
3. Tap an option and follow the prompts.
The Scrapbook app provides a place for you to manage the multimedia content you capture with the S Pen tools.

Scrapbook provides storage and organization tools for content you capture while using your mobile device.

With the S Pen tools, you can capture articles, images, and even videos and music. You can then add a title, text, a handwritten memo, or content tags. When you capture content online, the web link is saved with the content.

Edit the Scrapbook

Categories and content files in the Scrapbook can be edited. To open the Scrapbook:

1. From a Home screen, tap Apps > Scrapbook.

You can edit both Categories and the content files within them.

To edit a file:

1. Tap Menu in the top left corner.
2. Select either the category or tag that contains the file to edit.
3. Tap the file to edit.
4. Tap Edit to change the Title, Text, or Tags as desired.
5. When finished, tap Save.

To edit categories:

1. From a Home screen, tap Apps > Scrapbook.
2. Tap More options > Manage categories.
   - Tap Create category to create a new category.
   - To delete a category, tap Edit, select the category, and tap Delete.
3. When you are finished tap Back.
Video Player

Play and manage videos stored on your device.

- **Volume**: Adjust the volume.
- **More options**: View more options.
- **Video length**: View the total length of the video.
- **Pop-up**: Open the video in a pop-up player window.
- **Fast-forward**: Skip to the next video or fast-forward through the current video.
- **Pause or Play**: Pause or play the current video.
- **Rewind**: Restart the video, skip to a previous video, or rewind the video.
- **Screen ratio**: Change the screen ratio.
- **Time elapsed**: View the time elapsed for the current video.
- **Playback position**: Skip to another part of the video.
- **File name**: View the name of the video file.
- **Change player**: Play the video on a nearby device.
Access the Video Player

Use Video Player to access and play videos stored on your device.

1. From a Home screen, tap Apps > Video.
2. Swipe through the videos stored on your device.
3. Tap a video to view it.

Use Pop-Up Player

Multitask with Pop-up player by transforming your video player into a pop-up window. The video continues to play, and the pop-up window can be resized or moved anywhere on the screen.

1. From a Home screen, tap Apps > Video.
2. Tap a video to view it.
3. Tap Pop-up player to continue playing the video in a floating window.
   • Drag the window to any location on the screen.
   • Use two fingers to pinch or spread to resize the floating window.

Change the Video Screen Size

You can change the size of the video during video playback.

1. From a Home screen, tap Apps > Video.
2. Tap a video to view it.
3. Tap the screen ratio icon to cycle through the screen size options:
   • Fit to height: The video is enlarged as much as possible without becoming distorted.
   • Overlook aspect ratio: The entire screen is used, which may cause some minor distortion.
   • Original size: The video is played in its original size.
   • Keep aspect ratio: The video is enlarged to fit the screen without becoming distorted.
Record voice memos and notes.

Create a Voice Recording

To create a voice recording:

► From a Home screen, tap Apps > Voice Recorder.

• Tap More options > Settings > Recording quality to adjust the recording quality.

• Tap Select mode to choose the appropriate recording mode:
  - Normal: This recording mode picks up any sounds detected by the microphones.
  - Interview: The top and bottom microphones are used for two-directional recording. The top and bottom of the device pick up equal amounts of sound. Microphones can be muted during recording and playback.
  - Meeting: The microphones are sensitive to sound from all directions and can distinguish up to eight sources of sound. Sound sources can be muted during recording and playback.
  - Voice memo: Voice input is converted to text on screen. The maximum recording time is five minutes.

The following additional controls are available:

• Block calls: Block incoming calls while recording.

• Record: Record an audio file.

• Stop: Stop recording. The file is automatically saved.

• Pause: Pause the recording of an audio file.

• Cancel: Cancel the recording of an audio file.

• Bookmark: Bookmark the current position of the recording.

Manage Recordings

Once you have recorded and saved at least one recording, the following options are available:

1. From a Home screen, tap Apps > Voice Recorder.

2. Tap Recordings.

3. Tap a recording to play it back.

4. Tap Search to search for a recording.

5. Tap More options:

• Select: Select recordings. Once selected, the following options are available:
  - Share: Share recording files.
  - Delete: Delete voice recordings.
  - More options: Choose Change category, Rename, Set as, Write to Voice Label, or view Details.

• Sort by: Sort the list of recordings.

• Filter by category: Filter entries by category.

• Edit categories: Add or edit categories.

• Settings: Configure Voice Recorder.
Settings

Configure your device's connections and settings, add accounts, and customize the Home screens, apps, and features.
How to Use Settings

Access Settings

There are a couple of ways to access your device settings.

► From a Home screen, tap Apps > Settings.
– or –
Drag down from the Status bar to display the Notification panel, and then tap Settings.

Categories of Settings

In the Tab view, settings are grouped into five categories.

• Connections: Configure your connections to other devices and networks.
• Device: Customize the device’s display, sounds and more.
• Controls: Configure motions and gestures, and the S Pen.
• General: Configure your personal accounts and preferences, and other system settings.
• Apps: Use Application manager to manage your apps, configure app settings, and assign default applications.

Change How Settings Are Listed

Settings can be listed in a list view or a tab view.

1. From a Home screen, tap Apps > Settings.
2. Tap More options > View as.
3. Select a different view.

Search for Settings

If you are not sure exactly where to find a certain setting, you can use the Search feature.

1. From a Home screen, tap Apps > Settings.
2. Tap Search.
   • Enter a word or words in the Search field. As you type, settings that match are displayed on the screen.
   • Tap an entry to go to that setting.

Customize Quick Settings

Quick settings are the settings that you are most likely to frequently use. When you first access the Settings menu, the Quick setting menu is not defined.

To create or edit the Quick settings list:

1. From a Home screen, tap Apps > Settings.
2. Tap More options > Edit quick settings.
   • Choose settings to display in your Quick settings menu. Settings that are already in the Quick settings menu are checked.
   • Uncheck a setting to remove it from the Quick settings list.
3. Tap Done to save your new Quick settings menu.
   • When you create the Quick settings list, a new tab called Quick Settings is displayed with the items you selected.
   • To remove the Quick Settings tab, uncheck all settings.
Wi-Fi Settings

Wi-Fi is a term used for certain types of Wireless Local Area Networks (WLAN). Wi-Fi communication requires access to a wireless Access Point (AP).

Turn Wi-Fi On or Off

Turning Wi-Fi on makes your device able to discover and connect to compatible in-range wireless APs.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Wi-Fi, and then tap On/Off to turn Wi-Fi on or off.

Wi-Fi Status Indicators

Status bar icons indicate your current Wi-Fi connection status:

- When Wi-Fi is connected, active, and communicating with a wireless Access Point, Wi-Fi active is displayed in the Status bar.
- If a Wi-Fi access point is available, but your device is not connected to it, Wi-Fi available is displayed. It may also display if there is a communication issue with the target wireless Access Point.

Wi-Fi Networks

To scan for a Wi-Fi network and connect to it:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Wi-Fi, and then tap On/Off to turn Wi-Fi on.
   - When Wi-Fi is first turned on, your device automatically scans for available networks and displays them.
3. Tap the network you want to connect to.
   - When you select an open network, you are automatically connected to the network. Otherwise, enter a password to connect.
4. To manually scan for networks, tap More options > Scan.

Manually Connect to a Wi-Fi Network

To manually connect to a Wi-Fi network:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Wi-Fi, and then tap On/Off to turn Wi-Fi on.
3. Tap Add Wi-Fi network.
4. Enter information about the Wi-Fi network:
   - Network SSID: Enter the name of the Wi-Fi network.
   - Security: Select a security option and enter your password.
   - Show advanced options: Add advanced options such as IP settings and Proxy settings.
5. Tap Connect to store the new information and connect to your target wireless Access Point.
Wi-Fi Options

The Wi-Fi settings menu allows you to set up many of your device’s advanced Wi-Fi services.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Wi-Fi, and then tap On/Off to turn Wi-Fi on.
   - **Smart network switch**: Automatically switch between Wi-Fi and mobile networks to maintain a stable Internet connection.

3. Tap More options for options:
   - **Scan**: Start another scan for nearby Wi-Fi networks.
   - **Wi-Fi Direct**: Configure a Wi-Fi Direct connection with a nearby device.
   - **Advanced**:
     - **Network notification**: Receive notifications when new wireless Access Points are available.
     - **Hotspot 2.0**: Automatically connect to Wi-Fi access points that support Hotspot 2.0.
     - **Sort by**: Choose how detected Wi-Fi networks are listed.
     - **Keep Wi-Fi on during sleep**: Specify when to disconnect from Wi-Fi.
     - **Auto connect**: Automatically connect to AT&T Wi-Fi Hotspot when detected.
     - **Install certificates**: Install authentication certificates.
     - **MAC address**: View your device’s MAC address, which is required when connecting to some secured networks (not configurable).
     - **IP address**: View your device’s IP address (not configurable).
   - **WPS push button**: Set up a connection to a WPS (Wi-Fi Protected Setup) router or other equipment.
   - **WPS PIN entry**: View the PIN used by your device to set up a PIN-secured connection to a Wi-Fi router or other equipment (not configurable).
   - **Share Wi-Fi profile**: Share Wi-Fi profiles you have created with others.
   - **Help**: Learn about setting up and using Wi-Fi networks, and other settings.

Wi-Fi Direct

Wi-Fi Direct allows direct device-to-device connections using Wi-Fi, without having to connect to a Wi-Fi network.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Wi-Fi, and then tap On/Off to turn Wi-Fi on.
   - Wi-Fi must be on to configure settings.

3. Tap More options > Wi-Fi Direct. Your device automatically scans for nearby Wi-Fi Direct devices.
   - or –
   - Tap Scan to start scanning.

4. Select a device, and then follow the prompts to complete the connection.

Wi-Fi Direct Status Indicator

Status bar icons indicate your current Wi-Fi Direct connection status:

- When your device is connected to another device using Wi-Fi Direct, 💻 Wi-Fi Direct is displayed in the Status bar.
Wi-Fi Calling

Make and receive calls over Wi-Fi with your AT&T account.

With Wi-Fi Calling, you can talk and text over Wi-Fi when cellular coverage is limited or unavailable. With a Wi-Fi connection, you can talk and text in those hard-to-reach places.

To enable and use Wi-Fi Calling:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Wi-Fi calling.
3. Tap Get started to enable Wi-Fi Calling.

Once Wi-Fi Calling has been enabled:

► Tap On/Off to enable or disable Wi-Fi Calling.

• Tap About Wi-Fi Calling to learn more.

• Tap Emergency address to update your address. This address is used by emergency services to help find you after a 911 call.
Bluetooth

Bluetooth is a short-range communications technology that connects your device wirelessly to a number of Bluetooth devices, such as headsets and hands-free car Bluetooth systems, and Bluetooth-enabled computers, printers, and wireless devices.

Note: The Bluetooth communication range is approximately 30 feet.

Turn Bluetooth On or Off

To turn your device’s Bluetooth service on or off:

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Bluetooth, and then tap On/Off to turn Bluetooth on or off.

Bluetooth Status Indicator

Status bar icons indicate your current Bluetooth connection status:

- When Bluetooth is turned on, Bluetooth is displayed in the Status bar.

Scan for Bluetooth Devices

When you want to pair with another Bluetooth device, you can scan for nearby devices that are visible.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Bluetooth, and then tap On/Off to turn on Bluetooth.
   - When Bluetooth is first turned on, it scans for nearby Bluetooth devices and displays them.
   - To manually perform a new scan, tap Scan.

Make Your Device Visible to Other Bluetooth Devices

When you make your device visible, other Bluetooth devices can find it in a scan and initiate pairing. You can choose the length of time your device remains visible.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Bluetooth, and then tap On/Off to turn on Bluetooth.

3. Tap the Checkbox under My device to make your device visible to nearby devices.

5. Select a time period for your device to remain visible after you turn on visibility.
Review Files Received Using Bluetooth

When you receive files from another device using Bluetooth, you can access them from Bluetooth settings.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Bluetooth > More options > Received files.

Change Your Device's Name

Change the name others use when pairing with your device using Bluetooth.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Bluetooth > More options > Rename device.
3. Tap the current device name to edit it.
4. When finished, tap OK.

Pair Bluetooth Devices

The Bluetooth pairing process allows you to establish trusted connections between your device and another Bluetooth device.

Pairing between two Bluetooth devices is a one-time process. Once a pairing is created, the devices continue to recognize their partnership and exchange information without having to re-enter a passcode.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Bluetooth, and then tap On/Off to turn on Bluetooth.
3. Tap Scan. Your device starts scanning for Bluetooth devices within range.
4. Tap the name of the target device when you see it displayed in the Bluetooth devices section.
   • Your device automatically tries to pair with the target device. If automatic pairing fails, enter the passcode supplied with the target device.

Note: Due to different specifications and features of other Bluetooth-compatible devices, display and operations may be different, and functions such as transfer or exchange may not be possible with all Bluetooth-compatible devices.

Rename a Paired Device

Once you have paired your device to another device, you can rename the paired device to make it easier to recognize.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Bluetooth, and then tap On/Off to turn on Bluetooth.
3. Tap Settings next to the previously paired device, and then tap Rename.
4. Enter a new name, and tap OK.

Delete a Paired Device (Unpair)

When you unpair from a Bluetooth device, the two devices no longer recognize each other. To connect again, you have to pair the devices.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Bluetooth, and then tap On/Off to turn on Bluetooth.
3. Tap Settings next to the paired device, and then tap Unpair to delete the paired device.
Tethering and Mobile Hotspot

Use tethering and Mobile hotspot to share your device’s Internet connection with other devices.

Enable Mobile Hotspot

Activate Mobile hotspot to allow other devices to use your device’s Internet connection.

**Note:** You must have a tethering plan on your service account in order to use the Mobile hotspot.

**Warning:** Mobile hotspot consumes battery power and uses data service.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Tethering and mobile hotspot > Mobile hotspot.
3. Tap On/Off to turn Mobile hotspot on or off.

Connect a Device to Your Mobile Hotspot

Use the other device’s Wi-Fi control to connect to your device’s Mobile hotspot.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Tethering and mobile hotspot > Mobile hotspot.
3. Tap On/Off to turn on Mobile hotspot.
4. Activate Wi-Fi on the target device.
5. Scan for Wi-Fi hotspots and select the target device from the list.
6. Enter your device’s Mobile hotspot password on the target device.

Change the Mobile Hotspot Password

You can change your Mobile hotspot password.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Tethering and mobile hotspot > Mobile hotspot.
3. Tap On/Off to turn on Mobile hotspot.
4. Tap More options > Configure hotspot.
5. Tap the Security field and select WPA2 PSK and enter a new password.
6. Tap Save.

Allowed Devices List

Control whether devices connect to your Mobile hotspot with the Allowed devices list. After you add devices to the list, they can scan for your device and connect using your device’s Mobile hotspot name and password.

**Note:** Using your device as a Mobile hotspot consumes battery power and uses data service. While Mobile hotspot is active, your device’s applications use the Mobile hotspot data service. Roaming while using your device as a Mobile hotspot incurs extra data charges.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Tethering and mobile hotspot > Mobile hotspot.
3. Tap On/Off to turn on Mobile hotspot.
4. Tap More options > Allowed devices, and then tap Add to enter the other device’s Device name and MAC address.
5. Tap OK to add the device.
Configure Mobile Hotspot Settings

Manage your Mobile hotspot security and connection settings.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Tethering and mobile hotspot > Mobile hotspot.

3. Tap More options > Configure hotspot for the following settings:
   - **Network SSID**: View and change the name of your Mobile hotspot.
   - **Hide my device**: Enable to make your Mobile hotspot invisible to other Wi-Fi devices during a scan. When enabled, other devices can still connect to your Mobile hotspot, but have to set up the connection manually with your Network SSID and Password.
   - **Security**: Choose the security level for your Mobile hotspot.
   - **Password**: If you choose a security level that uses a password, enter the password. A default password is displayed on the Mobile hotspot screen.
   - **Show password**: Display your password instead of masking it.
   - **Show advanced options**: Access advanced options, including Broadcast channel, and to specify the channel your device uses for Mobile hotspot and maximum connections.

Timeout Settings

Automatically turn off Mobile hotspot if there are no connected devices.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Tethering and mobile hotspot > Mobile hotspot.

3. Tap More options > Timeout settings, and then select an interval.

Tethering Your Device

You can use USB tethering to share your device’s Internet connection with a computer.

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Tethering and mobile hotspot.

3. Connect the computer to the device using the USB cable, and then tap USB tethering to turn tethering on.
Airplane Mode

Airplane mode disconnects your device from all networks and turns off connectivity features, such as phone calls and Wi-Fi.

While in Airplane mode, you can use other features such as playing music, watching videos, and other offline applications.

Enable Airplane Mode

To enable or disable Airplane mode:

1. From a Home screen, tap Apps > Settings > Connections.

2. Tap Airplane mode, and then tap On/Off to enable or disable the option.

Note: You can also control Airplane mode from the Device options menu. Press and hold the Power key, and then tap Airplane mode.
Data Usage

Monitor how your data is being used, and set limits and restrictions to conserve it.

Note: Your service provider may account for data usage differently.

1. From a Home screen, tap 📱Apps > 🔄Settings > Connections.

2. Tap Data usage for options:
   - Mobile data: Enable mobile data.
   - International Data Roaming: Customize options for when roaming outside the United States. International roaming data charges may apply. Contact your service provider for details.
   - Set mobile data limit: Your mobile data connection is turned off when the specified limit is reached.
   - Data usage cycle: Tap the drop-down menu, and then choose a time period for data usage. Data usage for the period is displayed on the graph, along with usage by application at the bottom of the screen.
   - By application: View data usage by application.

3. Tap ⬇️ More options for the following options:
   - Restrict background data: Restrict some apps and services from working unless you are connected to a Wi-Fi network.
   - Show/Hide Wi-Fi usage: Display or hide a Wi-Fi tab that shows Wi-Fi usage.
   - Mobile hotspots: Select Wi-Fi networks that are mobile hotspots. You can restrict apps from using these networks, and you can configure apps to warn you before using these networks for large downloads.
Location Settings

Some apps, such as Google Maps, may require one or more location services be turned on for full functionality.

Locating Method

Before using any features that require location assistance, you must enable your device’s location services.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Location.
3. Tap On/Off to turn on Location services.
4. Tap Mode to select how your location is determined:
   - High accuracy: Uses GPS, Wi-Fi, and mobile networks.
   - Power saving: Uses Wi-Fi and mobile networks (no GPS).
   - GPS only: Uses GPS only.
5. Tap Improve accuracy to use other connections for determining your location:
   - Wi-Fi scanning: Allow apps and services to scan for Wi-Fi networks automatically, even when Wi-Fi is turned off.
   - Bluetooth scanning: Allow apps to scan for and connect to nearby devices automatically through Bluetooth, even when Bluetooth is turned off.

Recent Location Requests

Apps that have requested your location are listed under Recent location requests.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Location.
3. Tap On/Off to turn on Location services.
4. Tap an entry under Recent location requests to view the app’s settings.

Location Services

Google Location History™ stores and uses your device’s most recent location data. Google apps, such as Google Maps, can use this data to improve your search results based on places that you have visited.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Location.
3. Tap On/Off to turn on Location services.
4. Tap Google Location History and sign in to your Google Account for more options.
Location Sources

You can save your favorite locations for use with services that require location information. This information can improve your search results and other location-related activities.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Location.
3. Tap On/Off to turn on Location services.
4. Tap My places.
   - Tap a category (Home, Work, Car, School, or Gym) to add a location.
   - Tap Add to add more categories.
   - To delete a custom category, tap More options > Select, tap a category to delete, and then tap Delete. Confirm if prompted.

Note: Home, Work, Car, School, and Gym cannot be deleted.
More Networks

The More networks settings allow you to configure a variety of connectivity settings for your device.

Nearby Device Scanning

Scan for nearby devices to connect to and set them up easily. You receive a notification when there are available devices to connect to.

Note: This function uses Bluetooth low energy scanning even if Bluetooth is turned off on your device.

To enable nearby device scanning:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > Nearby device scanning.
3. Tap On/Off to enable the feature.

Mobile Networks

Control your device’s access to networks and mobile data services.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > Mobile networks and select an option:
   - Mobile data: Allow your device to connect to a mobile data network.
   - International Data Roaming: Allow your device to connect to data services while roaming outside of the United States. International roaming data charges may apply. Contact your service provider for details.
   - Access Point Names: Choose or add APNs.
   - Network operators: Choose a preferred network mode.

AT&T MicroCell

To search for an AT&T MicroCell:

1. From a Home screen, tap Apps > Settings > Connections.
3. Tap Network operators > Search for AT&T MicroCell.

Your AT&T MicroCell must be installed and activated before you can connect to it. For more information, visit att.com/esupport.
Virtual Private Networks (VPNs)

Set up and manage your Virtual Private Networks (VPNs).

**Note:** You must set a secured screen lock before setting up a VPN. For more information, see *Set a Screen Lock*.

Add a VPN

Use the VPN settings menu to add a VPN connection to your device.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > VPN.
3. Tap Basic VPN or Advanced IPsec VPN, and follow the prompts to set up your VPN.

Connect to a VPN

To connect to a VPN:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > VPN.
3. Tap Basic VPN or Advanced IPsec VPN.
4. Tap the VPN, enter your log in information, and tap Connect.

Disconnect from a VPN

To disconnect from a VPN:

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > VPN.
3. Tap Basic VPN or Advanced IPsec VPN.
4. Tap the VPN, and tap Disconnect.

Edit or Delete a VPN

Once you have set up a VPN connection, you can edit or delete the connection.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap More networks > VPN.
3. Tap Basic VPN, and then tap Settings next to the VPN that you want to edit or delete.
   – or –
   Tap Advanced IPsec VPN, and then tap the VPN that you want to edit or delete.
NFC Settings

NFC (Near Field Communication) allows data exchange when you touch your device with another compatible device. This is used for features like Android Beam.

Enable NFC
Activate NFC to allow your device to exchange data with other NFC devices.

To activate NFC:
1. From a Home screen, tap Apps > Settings > Connections.
2. Tap NFC, and then tap On/Off to turn on NFC.

Android Beam
When Android Beam is activated, you can beam app content to another NFC-capable device by holding the devices close together. You can beam browser pages, YouTube videos, contacts, and more.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap NFC, and then tap On/Off to turn on NFC.
3. Tap Android Beam, and then tap On/Off to turn on Android Beam.
4. Touch the back of your device with another NFC-capable device to transfer content.

S Beam
When S Beam is activated, you can beam files to another NFC-capable device by holding the devices close together.

You can beam images and videos from your Gallery, music files from your Music app, and more.

1. From a Home screen, tap Apps > Setting > Connections.
2. Tap NFC, and then tap On/Off to turn on NFC.
3. Tap S Beam, and then tap On/Off to turn on S Beam.
4. Touch the back of your device with another NFC-capable device to transfer content.

Tap and Pay
Tap and pay allows you to select the default payment application you want to use for making purchases on your device.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap NFC, and then tap On/Off to turn on NFC.
3. Tap Tap and pay.
4. Select the app that you want as your default.
Nearby Devices

Share your media files with nearby devices using Wi-Fi, Wi-Fi Direct, or Mobile hotspot.

Warning: If file sharing is enabled, other devices can access your data. Use this option with care.

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Nearby devices.
3. Tap On/Off to enable Nearby devices.
4. Set the following options:
   - **Content to share**: Select the content to share. Choices are: Videos, Photos, and Music.
   - **Allowed devices**: Indicate the devices accessible to your device.
   - **Denied devices**: Indicate devices not allowed access to your device.
   - **Download to**: Allow downloading of data to your device or optional memory card (not included).
   - **Receive files from other devices**: Set a default for receiving files.
Print images and documents to Samsung printers and other compatible printers (not included).

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap Printing.
3. Tap a print service and follow the prompts.

Note: Tap Download plug-in to install additional print service drivers.
Screen Mirroring

*Share your device’s screen with another device.*

1. From a Home screen, tap Apps > Settings > Connections.
2. Tap **Screen Mirroring**.
   - Available devices are listed.
3. Tap **Scan** to find more devices.
4. Tap a device and follow the prompts to connect.
Mirror your device’s display on your car’s entertainment and information screen using a USB connection.

**Note:** To use this feature, your car system must support MirrorLink.

To turn on MirrorLink:

1. Connect your device to your car’s system using the USB cable.
2. On your device’s Home screen, tap Apps > Settings > Connections.
3. Tap MirrorLink.
4. Tap Connect to vehicle via USB and follow the prompts.
5. Tap More options > MirrorLink device ID to view the MirrorLink ID for your device.
Sounds and Notifications

Configure the sounds and vibrations used to indicate notifications, screen touches, and other interactions.

Adjust the Volume
Set the system volume level and default volume for call ringtones, notifications, and other audio.

Note: You can also set Ringtone volume from a Home screen by pressing the Volume key.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications.
3. Drag the sliders to set the default volume for:
   - Ringtone
   - Media
   - Notifications
   - System

Sound Mode
You can switch between sound modes, while preserving the individual sound settings you have made.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Sound mode, and then choose a mode:
   - Sound: Use the sounds, vibrations, and volume levels you have chosen in sound settings for notifications and alerts.
   - Vibrate: Vibrate for notifications and alerts. This uses the vibration intensity you choose in sound settings.
   - Mute: Mute all sounds and notifications.

Vibration Intensity
Set the vibration intensity of incoming calls, notifications, and Haptic feedback.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Vibration intensity.
3. Drag the sliders to set the various vibration intensities.
Vibrate When Ringing
Your device can vibrate in addition to ringing when you receive a call.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Vibrate when ringing to turn the feature on.

Note: This feature is only available when the Sound mode is set to Sound.

Notification Ringtone
Choose a sound for notifications, such as for new messages and event reminders.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Notification ringtone.
3. Tap a sound to preview it, and then tap OK to set it as your default notification sound.

Ringtones
Choose from preset ringtones or add your own.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Ringtones.
3. Tap a ringtone to hear a preview, and then tap OK to set it as your default ringtone.
   – or –
   Tap Add to use an audio file as a ringtone.

Vibrations
Choose from preset vibration patterns or create your own pattern.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Vibrations.
3. Tap a pattern to preview it, and then tap OK to set it as your default vibration pattern.
   – or –
   Tap Create and follow the prompts to create a new vibration pattern.

Other Sounds
Set various other sound options.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Other sounds.
3. Tap the checkbox next to the options under Feedback and Samsung keyboard to indicate whether to enable the sound or vibration.

Sound Quality and Effects
Enable sound effects when connected to a headset.

Note: Sound effects are only available when headphones or a compatible Bluetooth headset (not included) is connected.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Sound quality and effects.
3. Tap Adapt sound and follow the prompts to customize your sound settings.
4. Tap On/Off to enable each option:
   - UHQ Upscaler: Enhance the sound resolution of music and videos for a clearer listening experience.
   - SoundAlive+: Recreate the effects of rich surround sound.
   - Tube Amp Pro: Simulate the soft timbre of a tube amplifier.
Do Not Disturb
You can set your phone to silence all calls and alerts except for times you schedule.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Do not disturb.
3. Tap the checkbox next to Turn on now to turn the feature on.
4. Tap Turn on as scheduled, and then tap Days, Start time, and End time to set up a do not disturb schedule.
5. Tap Allow exceptions to allow alarms, calls, messages, or events and reminders.

Notifications on Lock Screen
Choose which notifications can display while the device is locked:

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Notifications on lock screen and choose an option.

Application Notifications
Set whether application notifications are displayed.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Application notifications.
3. Swipe through the alphabetical list of apps and tap an app to enable or disable notifications.

Notification Access
Set whether applications have access to notifications.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Sounds and notifications > Notification access.
3. Swipe through the list of apps and tap On/Off to block apps from reading notifications.
Display Settings

Configure your display's brightness, screen timeout delay, and other display settings.

Adjust the Screen Brightness
Adjust the screen brightness to suit your surroundings or personal preference. You may also want to adjust screen brightness to conserve battery power.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Brightness to customize options:
   - Tap Automatic brightness to allow the device to adjust brightness automatically.
   - Drag the Brightness level slider to set a custom brightness level.

Note: You can also control Brightness from the Notification panel.

Screen Rotation
Use the front camera to rotate the screen based on the orientation of your device.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Screen rotation to turn the feature on.

Smart Stay
Using the front camera to detect your face, the screen does not time out as long as you are facing the screen.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Smart stay to turn the feature on.

Screen Timeout
Turn the screen off after a set amount of time.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Screen timeout and choose a time period.

Change the Font Style and Size
You can set the font style and size for all text that is displayed on the screen.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Font to choose a font style and font size.
   - Font style: Choose another font style, or tap Download to find new fonts from the Google Play store.
   - Font size: Choose a different font size.
Screen Mode

Choose a screen mode to match your type of viewing.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Display > Screen mode and choose a screen mode:
   - Tap Adaptive display if you want your device to automatically optimize the display to match the type of image being displayed and other criteria, such as battery level.
   - or –
     
     Choose a specific type of screen mode based on what you are viewing.

Auto Adjust Screen Tone

Your device analyzes the images displayed on the screen and automatically adjusts the brightness to conserve battery power.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Display > Auto adjust screen tone to turn the feature on.

Daydream

The Daydream™ setting controls what is displayed on the screen when the device is docked (dock not included) or while charging. You can choose to display colors or display photos.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Display > Daydream.

3. Tap On/Off to turn on Daydream.

4. Configure options:
   - Colors: Display a changing screen of colors.
   - Flipboard: Display pictures from Flipboard. Tap Settings for options.
   - Photo table: Display pictures in a photo table. Tap Settings for options.
   - Photo frame: Display pictures in a photo frame. Tap Settings for options.
   - Photos: Display pictures from your Google Photos account. Tap Settings for options.

5. Tap More options for additional options:
   - Preview: See a demonstration of Daydream.
   - Select when to daydream: Select when your device can go into Daydream mode.

LED Indicator

Light up the LED indicator when charging, voice recording, or receiving notifications.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Display > LED indicator to turn the feature on.
Touch Key Light Duration

Set the length of time Recent and Back remain lit after you touch them.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Touch key light duration to choose a timeout period.

Increase Touch Sensitivity

Increase the sensitivity of the touch screen to improve results when wearing gloves.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Display > Increase touch sensitivity to turn the feature on.
Wallpaper Settings

Change the look of the Home and Lock screens with wallpaper.

You can display a favorite picture or choose from preloaded wallpapers.

To change wallpaper:
1. From a Home screen, tap Apps > Settings > Device.
2. Tap Wallpaper.
3. Tap Home screen, Lock screen, or Home and lock screen.
4. Tap an image to preview it.
   • Tap From Gallery for additional wallpapers.
   • Tap Bubbles or Phase beam for animated wallpaper. (Animated wallpaper consumes additional battery power.)
   • Tap PEN.UP to select an image from the PEN.UP app.
5. Tap Set as wallpaper to select an image.
Home Screen Settings

Use Home screen settings to set up a Home screen transition effect and to indicate how Flipboard briefings are to be handled on your Home screen.

To customize Home screen:

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Home screen for options:
   - **Transition effect**: Choose an effect to be used when you swipe across the Home screen.
   - **Flipboard Briefing**: View all Flipboard Briefing updates on the Home screen.
Secure your device and protect your data with Lock Screen settings.

**Set a Screen Lock**

It is recommended that you secure your device using a Screen lock.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Lock screen > Screen lock to select a screen lock and level of security:
   - **Swipe**: Swipe the screen to unlock it. This option provides no security.
   - **Pattern**: Create a pattern that you draw on the screen to unlock your device. This option provides medium security.
   - **PIN**: Select a PIN to use for unlocking the screen. This option provides medium to high security.
   - **Password**: Create a password for unlocking the screen. This option provides high security.
   - **Fingerprint**: Use fingerprint recognition to unlock the screen. This option provides medium to high security.
   - **None**: Do not lock the screen.

**Note**: Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing even small areas of two different fingerprints is very low. But in rare cases, the sensor may recognize a fingerprint that is similar to a registered fingerprint.

3. If you choose a secured screen lock option, select your notification settings:
   - Show content
   - Hide content
   - Do not show notifications.
4. Choose a screen lock option:

   **Swipe Only**
   - **Phone shortcut**: Display a phone shortcut on your Lock screen.
   - **Unlock effect**: Set the visual effect used when unlocking the screen.

   **Pattern Only**
   - **Pattern type**: Select a pattern type.
   - **Make pattern visible**: Display the pattern as you draw it.
   - **Vibration feedback**: Vibrate when the unlock pattern is entered incorrectly.

   **All screen lock types**
   - **Show information**: View options for showing information on the lock screen.
   - **Camera shortcut**: Display a camera shortcut on your Lock screen.
   - **Action memo on lock screen**: Enable the use of action memos on the lock screen.
   - **Secured lock time**: Lock the screen after 10 minutes of inactivity. (Not on Swipe.)
Multi Window Settings

Turn on the Multi window feature.

To activate Multi window:

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Multi window.
3. Tap On/Off to enable Multi window. The following options are available:
   - Open in split screen view: Automatically view content in a split screen when you open files from My Files or Video, or attachments from email.
   - Pop-up view shortcut: Change to pop-up view by swiping down diagonally from either corner at the top of the screen.

For more information, see Multi Window.
Notification Panel Settings

Customize which Quick setting buttons appear on the Notification panel.

To access Notification panel settings:
► From a Home screen, tap Apps > Settings > Device > Notification panel.
   – or –
   From the Notification panel, tap View all > Edit.

To customize which quick setting buttons appear at the top of the Notification panel:
► Touch and drag buttons to reorder them.

To use the default layout:
► Tap Reset.

For more information on the Notification panel:
► Tap More options > Help.
One-Handed Operation

Change the screen layout to accommodate operating your device with one hand.

To enable One-handed operation features:

1. From a Home screen, tap Apps > Settings > Device.
2. Tap One-handed operation.
3. Tap any of the following features and then tap On/Off for each to turn it on or off:
   - **Reduce screen size**: Reduce the screen size so that you can reach all parts of the screen with one hand.
   - **One-handed input**: Adjust the size and position of the dialing keypad, in-call buttons, Samsung keyboard, Calculator, and unlock pattern (if configured).
   - **Side key panel**: Activate a panel of buttons that includes Recent, Home, and Back. The panel is displayed at the side of the screen. When enabled, you can customize the transparency, minimize behavior, and keys that display on the panel.
Easy Mode

Switch between the default screen layout and a simpler layout. The Easy mode layout has larger text and icons, making for a more straightforward visual experience.

To enable Easy mode:
1. From a Home screen, tap Apps > Settings > Device.
2. Tap Easy mode.
3. Tap Easy mode to enable this feature.
   - When Easy mode is enabled, you can swipe down the page and select which apps you want to display on the Home screens.
4. Tap the checkbox next to the apps you want to add or remove.
5. Tap Done to save your settings.

To disable Easy mode:
1. From a Home screen, tap Easy settings.
2. Tap Easy mode > Standard mode to exit Easy mode.
3. Tap Done to confirm.
Accessibility services are special features that make using the device easier for those with certain physical disabilities.

**Note:** You can download additional accessibility applications from the Google Play store.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Accessibility for options:

**Vision**
- **Switch access:** Use this option to control your device using configurable key combinations. Tap On/Off to turn the feature on. Tap Settings for more options.

- **TalkBack:** Speak feedback aloud to help blind and low-vision users. Tap On/Off to turn the feature on. Tap Settings for more options.
  - TalkBack can collect all of the text you enter, except passwords, including personal data and credit card numbers. It may also log your user interface interactions with the device.

- **Dark screen:** Keep the screen turned off at all times for privacy. TalkBack must be enabled in order to configure this option.

- **Rapid key input:** Release your finger to enter selection instead of double tapping. TalkBack must be enabled in order to configure this option.

- **Speak passwords:** Read the characters aloud as you enter your passwords. TalkBack must be enabled in order to configure this option.

- **Font size:** Set the font size.

- **High contrast fonts:** Adjust the color and outline of fonts to increase the contrast with the background.

- **Magnification gestures:** Use exaggerated gestures such as triple-tapping, double pinching, and dragging two fingers across the screen.

- **Hover zoom:** Magnify content by hovering the S Pen over it.

- **Notification reminder:** Play a beep when a notification for a call or message has been missed.

- **Negative colors:** Reverse the display of screen colors from white text on a black background to black text on a white background.

- **Color adjustment:** Adjust the color of the screen if you are color blind or have difficulty reading the display because of the screen color. Tap Color adjustment for options.

- **Accessibility shortcut:** Quickly enable accessibility features in two quick steps. Tap On/Off to turn the feature on.

- **Text-to-speech options:** Set your preferred TTS engine and options. For more information, see Text-to-Speech Options.

**Hearing**
- **Flash notification:** Set your camera light to blink whenever you receive a notification.

- **Turn off all sounds:** Turn off all notifications and audio for privacy.

- **Hearing aids:** Improve the sound quality for use with hearing aids.

- **Samsung subtitles (CC):** Use Samsung subtitles with multimedia files when available.

- **Google subtitles (CC):** Use Google subtitles with multimedia files when available.

- **Sound balance:** Use the slider to set the left and right balance when using a stereo device.
• **Mono audio**: Switch audio from stereo to mono for use with one earphone.

• **Sound detectors**: Receive alerts when the phone detects the doorbell or a baby crying.

**Dexterity and interaction**

• **Assistant menu**: Improve the device accessibility for users with reduced dexterity.

• **Air wake up**: Wake up your device by waving your hand over the sensor.

• **Press and hold delay**: Select a time interval for this action.

• **Interaction control**: Block areas of the screen from touch interaction. Disable auto screen rotation and hard key functions. Only show application notifications in the Notification panel and the Status bar.

**More settings**

• **Direct access**: Open your accessibility settings by pressing the Home key quickly three times in succession.

• **Answering and ending calls**: Select shortcuts for answering and ending calls.

• **Single tap mode**: Dismiss or snooze alarms, calendar events, and timer alerts, and answer or reject incoming calls with a single tap.

• **Manage accessibility**: Import and export your accessibility settings, or share them with other devices.

**Services**

Additional accessibility apps may be downloaded from the Google Play store. Certain accessibility services you install may be configured here.
Private Mode

Hide personal content from being accessed by anyone else using your device.

Private mode is only available for certain applications.

Note: A secure screen lock (Pattern, PIN, Password, or Fingerprint) is required to use Private mode.

Set Up Private Mode

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Private mode.
3. Follow the prompts to learn about and set up Private mode.
Finger Scanner

Use fingerprint recognition as an alternative to entering passwords in certain apps.

You can also use your fingerprint to verify your identity when logging in to your Samsung account.

**Note:** Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing even small areas of two different fingerprints is very low. But in rare cases, the sensor may recognize a fingerprint that is similar to a registered fingerprint.

**Register a Fingerprint**

You can register up to three fingerprints. A password is also set up as an alternative to your fingerprint.

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Finger Scanner > Fingerprint manager.
3. Swipe your finger over the Home key to register your first fingerprint or to continue to the next screen.

**Add a Fingerprint**

If no fingerprints are registered, the manager automatically opens the Register fingerprint screen. Otherwise:

► Tap Add fingerprint and follow the prompts to register a fingerprint and password.

**Rename a Fingerprint**

To rename a fingerprint:

► Touch and hold the fingerprint, and then tap Edit.

**Delete a Fingerprint**

To delete a fingerprint:

► Touch and hold the fingerprint, and then tap Delete.

**Change Backup Password**

To change the backup password:

1. From a Home screen, tap Apps > Settings > Device.
2. Tap Finger Scanner > Change backup password.
3. Scan your fingerprint.
4. Enter a new backup password.
Fingerprint Verification

Fingerprint verification can be used for other accounts accessed from your device.

1. From a Home screen, tap Apps > Settings > Device.

2. Tap Finger Scanner for options.

   - **Screen lock**: Change your Screen lock and access Screen lock settings. For more information, see Set a Screen Lock.

   - **Web sign-in**: Access your online accounts using your fingerprint.

   - **Verify Samsung account**: Verify your identity using your fingerprint when logging in to your Samsung account.
Motions and Gestures

Control certain device actions by picking up the device and by touching the screen with the palm of your hand or turning over the device.

1. From a Home screen, tap Apps > Settings > Controls.
2. Tap Motions and gestures.
3. Tap an option, and then tap On/Off to enable each of the following:
   - **Direct call**: Call the contact whose call log, message, or contact details are currently on the screen by bringing the device close to your ear.
   - **Smart alert**: Set the device to vibrate when you pick it up to notify you about missed calls and messages.
   - **Mute**: Mute incoming calls and alarms by turning the device over or by covering the screen with your hand.
   - **Palm swipe to capture**: Create a copy of the current screen by swiping the side of your hand across the screen. The screenshot is saved to the clipboard and to the Screenshots folder in the Gallery app.
S Pen Settings

Configure options and settings for the S Pen.

Air Command

The Air command menu provides quick access to S Pen applications from any screen. Use the settings page to add shortcuts to your favorite apps or functions on the Air command menu. Also, choose to minimize the Air command menu to a floating icon.

To enable or disable the Air command menu:
1. From a Home screen, tap Apps > Settings > Controls.
2. Tap S Pen > Air command.
3. Tap Shortcuts to configure the Air command menu screen.
4. Tap On/Off to enable or disable the Floating icon feature.

Air View

Preview information, extend text, or enlarge pictures by hovering your pen over the screen.

To configure settings for the S Pen:
1. From a Home screen, tap Apps > Settings > Controls.
2. Tap S Pen.
3. Configure any of the following settings:
   - Direct pen input: Turn the Direct pen input feature on or off. This feature allows you to switch from the keyboard to the S Pen when filling in form fields.
   - Pointer: Turn the pointer on or off. The pointer appears on the screen when the tip of the S Pen is hovering close enough. Holding the pointer over some features can reveal what an item is or what it does.
   - Detachment options: Select an action for the device to take when the S Pen is detached from the device.
   - Screen off memo: Create action memos by detaching the S Pen while the screen is off and writing on the screen.
   - S Pen alerts: Set your phone to sound an alert and show a popup when walk away without attaching the S Pen.
   - S Pen power saver: Turn off pen detection when the S Pen is attached. This can help extend battery life.
   - S Pen sound: Play a sound when writing with the S Pen, and select a sound for the device to make when the S Pen is detached from the device.
   - S Pen vibration: Activate vibration feedback when the S Pen is attached and detached.
Accounts

Set up and manage accounts, including your Google Account, Samsung account, email, and social networking accounts.

Depending on the account, you can choose to synchronize your calendar, contacts, and other types of content.

Add an Account
You can add and manage all your email, social networking, and picture and video sharing accounts.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Accounts > Add account.
3. Tap one of the account types.
4. Follow the prompts to enter your credentials and set up the account.

Synchronize Accounts
You can synchronize your calendar, contacts, and other types of accounts.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Accounts > [Account type].
3. Tap an account to view the sync settings for that account.
4. Tap individual data items to sync.
5. Tap More options > Sync now to synchronize the account.

Note: Sync options and the location of the sync command differ depending on the account type.

Account Settings
Each account has its own set of settings. In addition, you can configure common settings for all accounts of the same type.

Note: Account settings and available features vary between account types and service providers. Contact your service provider for more information on your account’s settings.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Accounts > [Account type].
3. Tap an account to configure that account’s sync settings.
4. Tap other available options for the account.

Remove an Account
You can remove accounts from your device.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Accounts > [Account type].
3. Tap the account, and then tap More options > Remove account. Confirm when prompted.
Configure your device's Google settings.

Customize Google

To customize your Google settings:

1. From a Home screen, tap Apps > Settings > General.

2. Tap Google, and select an option to customize:
   - **Nearby**: Use your device’s sensors to connect with nearby devices.
   - **Nearby discoveries**: View links when things around you are providing apps or websites.
   - **Location**: Configure your Google location settings.
   - **Ads**: Configure your Google advertising profile.
   - **Search & Now**: Configure your Google search settings and Google Now settings.
   - **Security**: Configure the Android Device Manager and apps security settings.
   - **Set up nearby device**: Set up another device using Wi-Fi and Bluetooth.

   **Note**: These options may change if you are signed in to your Google Account.
Backup and Reset

**Back up your data to Google servers. You can also reset your device to its factory defaults.**

**Backup and Restore**
Enable backup of your information to Google servers.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Backup and reset for options:
   - **Back up my data**: Enable back up of application data, Wi-Fi passwords, and other settings to Google servers.
   - **Backup account**: Select a Google Account to be used as your backup account.
   - **Automatic restore**: Enable automatic restoration of settings from Google servers. When enabled, backed-up settings are restored when you reinstall an application.

**Factory Data Reset**
You can reset your device to factory defaults, erasing all data from your device.

This action permanently erases ALL data from the device, including Google or other account settings, system and application data and settings, downloaded applications, as well as your music, photos, videos, and other files. Any data stored on an external SD card is not affected.

To reset your device:

1. From a Home screen, tap Apps > Settings > General.
2. Tap Backup and reset > Factory data reset.
3. Tap Format SD card to erase all data from an installed optional memory card (not included).
4. Tap Reset device and follow the prompts to perform the reset.
5. When the device restarts, follow the prompts to set up your device.

**Reset Network Settings**
You can reset Wi-Fi, Mobile data, and Bluetooth settings with Reset network settings.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Backup and reset > Reset network settings.
3. Tap Reset settings, and confirm when prompted.
Language and Input

Configure your device's language and input settings.

Language
You can select a default language for your device’s menus and keyboards.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input > Language.
3. Select a language from the list.

Default Keyboard
Select your default keyboard or input method.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input > Default.
3. Select a keyboard.

Note: Additional keyboards can be downloaded from the Google Play store.

Samsung Keyboard
Configure options for using the Samsung keyboard.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Tap Samsung keyboard for options:
   - English(US): Set the keyboard type to Qwerty keyboard or 3x4 keyboard.
   - Select input languages: Choose which languages are available on the keyboard. To switch between languages, slide the Space bar sideways.
   - Predictive text: Predictive text suggests words that match your text entries, and can automatically complete common words. Predictive text can learn your personal writing style from your contacts, messages, Gmail, and social networking sites—improving its accuracy of predicting your text entries.
   - Additional keyboard settings provide assistance with capitalization, punctuation, and much more.
Swype Keyboard

Configure options for using the Swype keyboard.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Tap Swype for options:
   - **Settings**: Configure basic options.
   - **Themes**: Change the keyboard layout.
   - **My words**: Manage your personal dictionary, new word updates, as well as how Swype can learn from your writing style in various apps.
   - **Languages**: Set the current language. Additional languages can be downloaded.
   - **Gestures**: Learn about using Swype gestures.
   - **Help**: View information on using Swype.

Google Voice Typing

Speak rather than type your text entries using Google voice typing.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Tap Google voice typing for options:
   - **Languages**: Select languages for Google voice typing.
   - “Ok Google” detection: Launch a Google search whenever you say “OK Google”.
   - Hands-free: Allow requests with the device locked.
   - Speech output: Select options for spoken feedback.
   - Offline speech recognition: Download and install speech recognition engines, allowing you to use voice input while not connected to the network.
   - Block offensive words: Hide recognized offensive voice results.
   - Bluetooth headset: Use audio input from a Bluetooth headset (not included), if one is connected.

Handwriting Recognition Language

Handwriting can be recognized in S Note and Action memo. Use this option to select a language that will be used by the device to recognize your handwriting.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Under Handwriting recognition, tap Language to select a language.
4. Tap More languages to select a new language.

Text-to-Speech Options

Configure your Text-to-speech (TTS) options. TTS is used for various accessibility features, such as TalkBack. For more information, see Accessibility.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input > Text-to-speech options for options:
   - Preferred TTS engine: Choose either the Samsung or Google Text-to-speech engine. Tap Settings next to each TTS engine for options.
   - Speech rate: Set the speed at which the text is spoken.
   - Listen to an example: Play a sample of speech synthesis (available if voice data is installed).
   - Default language status: Display the default language in use.
Read Notifications Aloud

Set the device to read new notifications aloud for incoming calls, messages, and emails, as well as caller or sender information.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input > Read notifications aloud.
3. Tap the checkbox to enable each option.

Pointer Speed

Configure pointer speed for an optional mouse or trackpad (not included).

1. From a Home screen, tap Apps > Settings > General.
2. Tap Language and input.
3. Tap Pointer speed, and then drag the slider to the right to go faster or to the left to go slower.
4. Tap OK to save your setting.
Date and Time

By default, your device receives date and time information from the wireless network.

When you are outside network coverage, you may want to set date and time information manually using the date and time settings.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Date and time.

The following options are available:

- **Automatic date and time**: Receive date and time updates from the wireless network.
  
  When Automatic date and time is disabled, the following options are available:
  
  - **Set date**: Enter the current date.
  
  - **Set time**: Enter the current time.

- **Automatic time zone**: Receive the time zone from the wireless network.
  
  When Automatic time zone is disabled, the following option is available:
  
  - **Select time zone**: Choose your local time zone.

- **Use 24-hour format**: Set the format for displaying time.
Safety Assistance

Receive real-time information about emergencies and severe weather conditions.

You can also enable Emergency mode: a power-conserving mode that restricts certain apps and functions while allowing access to Messages, Contacts, and emergency calls.

Emergency Mode
Use Emergency mode to conserve battery power during emergencies. Power-hungry apps and functions are disabled, but you are still able to send messages, use Contacts, and make emergency calls.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Safety assistance > Emergency mode.
3. Tap On/Off to turn the feature on.

Geo News
Receive information about weather, environmental situations, and geological information for your location during emergencies.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Safety assistance > Geo News.
3. Tap On/Off to turn the feature on.
   • Geo News notification pop-ups: Receive pop-up alerts.

Send Help Messages
Send a quick alert to your primary contacts when you are in an emergency situation.

To enable this feature:
1. From a Home screen, tap Apps > Settings > General.
2. Tap Safety assistance > Send help messages.
3. Tap On/Off to turn the feature on and configure the following options:
   • Send pictures: Send photos taken with the front and back cameras to your emergency contacts.
   • Send sound recording: Send a short audio message to your emergency contacts.

To send a help message:
► Press the Power key quickly three times.
Manage Primary Contacts

Select contacts or create new ones to be your emergency contacts. These contacts automatically receive your help message.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Safety assistance > Manage primary contacts.

3. Tap Create primary contact and choose one of the following options:

   • Create contact: Enter a name and phone number for a new emergency contact.

   • Select from contacts: Designate a contact to be an emergency contact.
Configure options when using HDMI audio devices (not included).

1. From a Home screen, tap Apps > Settings > General.

2. Tap Accessories for the following option:
   - **Audio output**: Select a sound output format to use when connecting your device to HDMI devices (not included).

**Note**: Some devices may not support the surround sound setting.
Battery

View how battery power is used for device activities.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Battery for options:
   - **Fast charging**: Enable fast charging mode.
   - **Show battery percentage**: Display the battery charge percentage next to the battery icon on the Status bar.
   - **Battery chart**: The battery level is displayed as a percentage. The amount of time the battery has been used is also displayed. Tap the **Battery chart** to view History details.

3. Tap **More options** for additional features:
   - **Optimize battery usage**: Choose apps to optimize their individual battery usage.
   - **Refresh**: Update the listing.

Apps and System Usage

Battery usage is displayed in percentages per application and system process.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Battery, and then tap Screen, Android System, Android OS, or an app to view how they are affecting battery use.

3. Tap **More options** > Refresh to update the listing.

**Note**: Other applications may be running that affect battery use.
Conserve battery power by automatically adjusting the screen brightness, limiting the performance of the CPU, and other power reduction activities.

Ultra power saving mode saves even more battery power by using a gray scale theme on the Home screen and limiting the number of usable apps.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Power saving for options:

- **Power saving mode**: Save battery power by limiting your device's performance, limiting vibration feedback, and restricting location services and most background data.

- **Ultra power saving mode**: Save battery power by applying a simplified grayscale theme to your Home screen and limiting the number of usable apps.

**Note**: Tap More options > Help to display more information about conserving power.
Storage

View the device memory and usage. Mount, unmount, or format an optional memory card (not included).

Device Memory
View and manage the memory used by the device.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Storage.
3. Tap Internal storage, if an optional SD card is installed. Device storage used out of the total space available is displayed.

   The amounts of memory used are further divided into:
   - **Total space**: The total space in your device’s memory.
   - **Available space**: The amount of storage space currently available.
   - **System memory**: The minimum amount of storage space required to run the system.
   - **Used space**: The amount of storage space currently being used.
   - **Other**: The space used by app data, downloaded files, and Android system files.
   - **Cached data**: The amount of data currently cached.
4. Tap Explore to launch My Files to view content stored on your device.

To increase available memory:
1. From a Home screen, tap Apps > Settings > General.
2. Tap Storage.
3. Tap Internal storage, if an optional SD card is installed.
4. Tap Cached data to clear cached data for all apps.
5. Tap Delete to confirm.

Memory Card (SD Card)
Once an optional memory card (not included) has been installed in your device, the card memory is displayed as part of Total space and Available space.

**Note**: The SD card menu only appears when an optional memory card is installed.

For more information on memory card installation, see Install a Memory Card.

Mount a Memory Card
When you install an optional memory card, it is automatically mounted (connected to the device) and prepared for use. However, should you unmount the card without removing it from the device, you need to mount it before it can be accessed.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Storage > SD card.
3. Tap Mount.
Remove a Memory Card

**Warning:** To prevent damage to information stored on the memory card, unmount the card before removing it from the device.

1. From a Home screen, tap `Apps > Settings > General`.
2. Tap **Storage > SD card**.
3. Tap **Unmount**.
4. Remove the back cover. For more information, see [Remove the Back Cover](#).
5. Slide the card out carefully.
6. Replace the back cover. For more information, see [Replace the Back Cover](#).

Format a Memory Card

**Warning:** When formatting an SD card, you should back up your music and photo files that are stored on the card because formatting the SD card deletes all the stored data.

1. From a Home screen, tap `Apps > Settings > General`.
2. Tap **Storage > SD card**.
3. Tap **Format** and follow the prompts.
Security

Secure your device and protect your data with Security settings.

Device Administration
Manage your device administrators and application installation privileges.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security for options:
   - Device administrators: Add or remove device administrators.
   - Unknown sources: Enable installation of non-Google Play apps.

Warning: Enabling installation of third-party applications can cause your device and personal data to be more vulnerable to attacks by unknown sources.

Encryption
Require a numeric PIN or password to decrypt your device each time you power it on or encrypt the data on a memory card (not included) each time it is connected.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security for options:
   - Encrypt device: Encrypt all data on your device.
   - Encrypt SD card: Encrypt data on a memory card (not included).

Note: Make sure your battery is charged more than 80 percent. Encryption takes an hour or more.

Find My Mobile
Protect your device from loss or theft allowing your device to be locked, tracked, and for your data to be deleted remotely.

► To access your device remotely, visit findmymobile.samsung.com.

Note: You must sign up for a Samsung account and enable Google location service to use Find My Mobile.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security.
3. Under Find My Mobile, the following options are available:
   - Remote controls: Lock and erase your data remotely if your device is lost or stolen.
   - SIM change alert: Prevent unauthorized changes to your SIM card by being alerted whenever an app or service attempts to change data on your SIM card.
   - Go to website: Launch the Find My Mobile website.
   - Reactivation lock: Use your Samsung account to stop anyone from reactivating your device without your permission.
Factory Data Reset Password

Protect your device from being reset accidentally by requiring a special password before it can be reset to its factory defaults.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security.
3. Tap Set up/change password and follow the prompts.

SIM Card Lock

Require both your SIM card PIN and your ordinary screen lock type when unlocking the device.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security.
3. Tap Set up SIM card lock and follow the prompts.
4. Tap Lock SIM card to enable the feature.
5. Tap Change SIM PIN to create a new PIN.

Passwords

Display password characters briefly as you type them.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security.
3. Tap Make passwords visible to turn the feature on.

Security Update Service

Automatically receive security updates.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security for options:
   - Security policy updates: Automatically or manually check for security policy updates.
   - Send security reports: Send security reports to Samsung using Wi-Fi for threat analysis.

Credential Storage

Manage your security certificates. If a certificate authority (CA) certificate gets compromised or for some other reason you do not trust it, you can disable or remove it.

1. From a Home screen, tap Apps > Settings > General.
2. Tap Security for options:
   - Storage type: Select a storage location for credential contents.
   - Trusted credentials: Display certificates in your device's ROM and other certificates you have installed.
   - Install from device storage: Install a new certificate from storage.
   - Clear credentials: Erase the credential contents from the device and reset the password.
Advanced Security

Protect your device with these advanced security options.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Security for options:

   • **Trust agents**: Perform selected actions when trusted devices are connected.
     - To view Trust agents, set up a secured screen lock (Password, PIN, Pattern, or Fingerprints). For more information, see Set a Screen Lock.

   • **Pin windows**: Pin a specific app on your device screen. Follow the prompts.

   • **Usage data access**: View the applications that can access your device’s usage history.

   • **Smart Lock**: Set your device to stay unlocked when you have trusted devices connected or when it is in a trusted place.
     - To view Smart Lock, set up a secured screen lock (Password, PIN, Pattern, or Fingerprints). For more information, see Set a Screen Lock.

   • **Do not disturb permission**: View which apps have permission to change the Do not disturb settings.
Help

View tips and guidelines for using your device.

1. From a Home screen, tap Apps > Settings > General.

2. Tap Help for information about:
   - New features
   - Getting started
   - Applications
   - Settings

3. Tap Sort by category to sort the topics by category or alphabetically.

4. Tap Search to search for a topic.
About Device

View information about your device, including current status, legal information, hardware and software versions, and more.

1. From a Home screen, tap Apps > Settings > General.

2. Tap About device, and then tap items for more details:
   
   • **Software updates**: Check for software updates.
   
   • **Status**: View the status of the battery, network, and other information about your device.
   
   • **Legal information**: View legal notices and other legal information, including your embedded Samsung legal information.
   
   • **Report diagnostic info**: Consent to send diagnostic and usage data about your phone to Samsung.
   
   • **Device name**: View and change your device’s name.
   
   • Additional device information includes the Model number, Android version, Build number, and more.

Software Update

Use Software update to update your device’s software.

1. From a Home screen, tap Apps > Settings > General.

2. Tap About device > Software updates.

3. Tap Check for updates and follow the prompts to check for available software updates to download and install.
Application Manager

You can download and install new applications on your device. Use Application manager settings to manage your downloaded and preloaded applications.

Warning: Because this device can be configured with system software not provided by or supported by Google or any other company, you operate this software at your own risk.

Application Manager Options
If you have disabled apps, you can choose whether to display them.

1. From a Home screen, tap Apps > Settings > Apps.
2. Tap Application manager.
3. If you have disabled applications:
   - Tap Menu at the top left of the screen.
   - Tap All apps, Enabled, or Disabled.
4. Tap More options for the following options:
   - Memory: View memory usage information.
   - Show/Hide system apps: Show or hide system (background) apps.
   - App permissions: Control which apps have permissions to use certain features of your device.
   - Apps that can appear on top: Choose apps that can run on top of other running apps.
   - Change system settings: Select which apps can change system settings.

   - Reset app preferences: Reset options that have been changed. Existing app data is not deleted.

Manage Apps
You can view and update information about an application, including memory usage, default settings, and permissions.

1. From a Home screen, tap Apps > Settings > Apps.
2. Tap Application manager.
3. Tap an application to view and update information about the application. The following options are displayed:
   - Uninstall/Disable: Uninstall or disable the application. Preloaded apps can only be disabled.
   - Force stop: Stop an app that is misbehaving. Restart your device if stopping an app, process, or service causes your device to stop working correctly.
   - Storage: Manage the app’s storage usage.
   - Data usage: View mobile data usage.
   - Permissions: View permissions granted to the app for access to your device’s information.
   - Notifications: Configure notifications from the app.
   - Set as default: Set the app as a default for a certain category of apps.
   - Battery: View battery usage since the last full charge.
   - Memory: View memory usage.

Note: Options vary by application.
Default Applications

If you have multiple applications of the same type, such as email apps, you can select one app to be the default.

You can also use a simpler Home screen that provides an easier user experience for first-time smartphone users.

1. From a Home screen, tap Apps > Settings > Apps.
2. Tap Default applications.
3. Tap the following to choose default apps:
   - **Browser app**: Choose a default browser app.
   - **Calling app**: Choose a default calling app.
   - **Messaging app**: Choose a default messaging (text and multimedia) app.
   - **Set as default**: Choose default apps for other functions.
   - **Home**: Choose a Home screen type.
   - **Device assistance app**: Choose an app that provides assistance for using your device.
Shortcuts to the settings for various apps are available in one convenient location.

1. From a Home screen, tap Apps > Settings > Apps.

2. Tap one of the following to display the settings for the selected app:
   - Calendar
   - Call
   - Contacts
   - Email
   - Gallery
   - Internet
   - Messages
   - S Voice
