### Appendix
- 159 Troubleshooting
Basics

Read me first

Please read this manual before using the device to ensure safe and proper use.

- Descriptions are based on the device's default settings.
- Some content may differ from your device depending on the region, service provider, model specifications, or device's software.
- Content (high quality content) that requires high CPU and RAM usage will affect the overall performance of the device. Apps related to the content may not work properly depending on the device's specifications and the environment that it is used in.
- Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung.
- Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customise the operating system may cause the device or apps to work improperly.
- Software, sound sources, wallpapers, images, and other media provided with this device are licensed for limited use. Extracting and using these materials for commercial or other purposes is an infringement of copyright laws. Users are entirely responsible for illegal use of media.
- You may incur additional charges for data services, such as messaging, uploading and downloading, auto-syncing, or using location services depending on your data plan. For large data transfers, it is recommended to use the Wi-Fi feature.
• Default apps that come with the device are subject to updates and may no longer be supported without prior notice. If you have questions about an app provided with the device, contact a Samsung Service Centre. For user-installed apps, contact service providers.

• Modifying the device’s operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss. These actions are violations of your Samsung licence agreement and will void your warranty.

• Depending on the region, you can view the regulatory information on the device. To view the information, launch the Settings app and tap About phone → Legal information.

⚠️ **Warning**: situations that could cause injury to yourself or others

❗ **Caution**: situations that could cause damage to your device or other equipment

🌿 **Notice**: notes, usage tips, or additional information
Device overheating situations and solutions

When the device heats up while charging the battery

While charging, the device and the charger may become hot. During wireless charging or fast charging, the device may feel hotter to the touch. This does not affect the device’s lifespan or performance and is in the device’s normal range of operation. If the battery becomes too hot, the charger may stop charging.

Do the following when the device heats up:

- Disconnect the charger from the device and close any running apps. Wait for the device to cool down and then begin charging the device again.
- If the lower part of the device overheats, it could be because the connected USB cable is damaged. Replace the damaged USB cable with a new Samsung-approved one.
- When using a wireless charger, do not place foreign materials, such as metal objects, magnets, and magnetic stripe cards, between the device and the wireless charger.

The wireless charging or fast charging feature is only available on supported models.

When the device heats up during use

When you use features or apps that require more power or use them for extended periods, your device may temporarily heat up due to increased battery consumption. Close any running apps and do not use the device for a while.

The following are examples of situations in which the device may overheat. Depending on the functions and apps you use, these examples may not apply to your model.

- During the initial setup after purchase or when restoring data
- When downloading large files
• When using apps that require more power or using apps for extended periods
  - When playing high-quality games for extended periods
  - When recording videos for extended periods
  - When streaming videos while using the maximum brightness setting
  - When connecting to a TV
• While multitasking (or, when running many apps in the background)
  - When using Multi window
  - When updating or installing apps while recording videos
  - When downloading large files during a video call
  - When recording videos while using a navigation app
• When using large amount of data for syncing with the cloud, email, or other accounts
• When using a navigation app in a car while the device is placed in direct sunlight
• When using the mobile hotspot and tethering feature
• When using the device in areas with weak signals or no reception
• When charging the battery with a damaged USB cable
• When the device's multipurpose jack is damaged or exposed to foreign materials, such as liquid, dust, metal powder, and pencil lead
• When you are roaming

Do the following when the device heats up:

• Keep the device updated with the latest software.
• Conflicts between running apps may cause the device to heat up. Restart the device.
• Deactivate the Wi-Fi, GPS, and Bluetooth features when not using them.
• Close apps that increase battery consumption or that run in the background when not in use.
• Delete unnecessary files or unused apps.
• Decrease the screen brightness.
• If the device overheats or feels hot for a prolonged period, do not use it for a while. If the device continues to overheat, contact a Samsung Service Centre.
Device limitations when the device overheats

When the device heats up, the features and performance may be limited or the device may turn off to cool down. The feature is only available on supported models.

- If the device becomes hotter than usual, a device overheating message will appear. To lower the device’s temperature, the screen brightness and the performance speed will be limited and battery charging will stop. Running apps will be closed and you will only be able to make emergency calls until the device cools down.
- If the device overheats or feels hot for a prolonged period, a power off message will appear. Turn off the device, and wait until it cools down.

Precautions for operating environment

Your device may heat up due to the environment in the following conditions. Use caution to avoid shortening the battery’s lifespan, damaging the device, or causing a fire.

- Do not store your device in very cold or very hot temperatures.
- Do not expose your device to direct sunlight for extended periods.
- Do not use or store your device for extended periods in very hot areas, such as inside a car in the summertime.
- Do not place the device in any areas that may overheat, such as on an electric heating mat.
- Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers.
- Never use a damaged charger or battery.
Device layout and functions

Package contents

Refer to the quick start guide for package contents.

- The items supplied with the device and any available accessories may vary depending on the region or service provider.
- The supplied items are designed only for this device and may not be compatible with other devices.
- Appearances and specifications are subject to change without prior notice.
- You can purchase additional accessories from your local Samsung retailer. Make sure they are compatible with the device before purchase.
- Use only Samsung-approved accessories. Using unapproved accessories may cause the performance problems and malfunctions that are not covered by the warranty.
- Availability of all accessories is subject to change depending entirely on manufacturing companies. For more information about available accessories, refer to the Samsung website.
Device layout

- Speaker
- Proximity sensor
- Front camera
- Microphone
- Back key
- Front camera
- Power key
- Volume key
- Recents key
- Home key (Fingerprint recognition sensor)
- Touchscreen
- Earphone jack
- Multipurpose jack
- Main antenna
- Main antenna
- GPS antenna
- Rear camera (Dual)
- Speaker
- Flash
- Back cover
Connectivity problems and battery drain may occur in the following situations:

- If you attach metallic stickers on the antenna area of the device
- If you attach a device cover made with metallic material to the device
- If you cover the device’s antenna area with your hands or other objects while using certain features, such as calls or the mobile data connection

- Using a Samsung-approved screen protector is recommended. Unapproved screen protectors may cause the sensors to malfunction.
- Do not cover the proximity/light sensor area with screen accessories, such as a screen protector or stickers. Doing so may cause the sensor to malfunction.
- Do not allow water to contact the touchscreen. The touchscreen may malfunction in humid conditions or when exposed to water.

Battery

Installing the battery

1. Remove the back cover.

Be careful not to damage your fingernails when you remove the back cover.

Do not bend or twist the back cover excessively. Doing so may damage the cover.

2. Insert the battery with the battery’s gold-coloured contacts properly aligned with the device’s contacts.
3 Replace the back cover.

Removing the battery

1 Remove the back cover.

2 Pull out the battery.
Charging the battery

Charge the battery before using it for the first time or when it has been unused for extended periods.

Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device.

- Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty.
- Do not remove the battery before removing the charger. This may damage the device.

To save energy, unplug the charger when not in use. The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging.

1. Connect the USB cable to the USB power adaptor.

2. Plug the USB cable into the device’s multipurpose jack.
3 Plug the USB power adaptor into an electric socket.

4 After fully charging, disconnect the charger from the device. Then, unplug the charger from the electric socket.

Reducing the battery consumption

Your device provides various options that help you conserve battery power.

- Optimise the device using the device maintenance feature.
- When you are not using the device, turn off the screen by pressing the Power key.
- Activate power saving mode.
- Close unnecessary apps.
- Deactivate the Bluetooth feature when not in use.
- Deactivate the Wi-Fi feature when not in use.
- Deactivate auto-syncing of apps that need to be synced, such as emails.
- Decrease the backlight time.
- Decrease the screen brightness.

Battery charging tips and precautions

- When the battery power is low, the battery icon appears empty.
- If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device.
- If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid losing power during a data transfer, always use these apps after fully charging the battery.
- Using a power source other than the charger, such as a computer, may result in a slower charging speed due to a lower electric current.
- The device can be used while it is charging, but it may take longer to fully charge the battery.
• If the device receives an unstable power supply while charging, the touchscreen may not function. If this happens, unplug the charger from the device.
• While charging, the device and the charger may heat up. This is normal and should not affect the device’s lifespan or performance. If the battery gets hotter than usual, the charger may stop charging.
• If you charge the device while the multipurpose jack is wet, the device may be damaged. Thoroughly dry the multipurpose jack before charging the device.
• If the device is not charging properly, take the device and the charger to a Samsung Service Centre.

SIM or USIM card (microSIM card)

Installing the SIM or USIM card
Insert the SIM or USIM card provided by the mobile telephone service provider.
For dual SIM models, you can insert two SIM or USIM cards so you can have two phone numbers or service providers for a single device. In some areas, data transfer speeds may be slower if two SIM cards are inserted in the device than when one SIM card is inserted.

• Use only a microSIM card.
• Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards.

Some LTE services may not be available depending on the service provider. For more information about service availability, contact your service provider.
1 Remove the back cover and battery.

2 Insert the SIM or USIM card with the gold-coloured contacts facing downwards.
   - **Single SIM models**: Place the SIM or USIM card on the SIM card slot.
   - **Dual SIM models**: Insert the primary SIM or USIM card into SIM card slot 1 (1) and the secondary SIM or USIM card into SIM card slot 2 (2).

   ![Diagram showing SIM card slots](image)

   Do not insert a memory card into the SIM card slot. If a memory card happens to be lodged in the SIM card slot, take the device to a Samsung Service Centre to remove the memory card.

3 Replace the battery and back cover.
Removing the SIM or USIM card

1. Remove the back cover and battery.

2. Pull out the SIM or USIM card.
   - Single SIM models:
   - Dual SIM models:
Using dual SIM or USIM cards (dual SIM models)

If you insert two SIM or USIM cards, you can have two phone numbers or service providers for a single device.

Activating SIM or USIM cards

Launch the Settings app and tap Connections → SIM card manager. Select a SIM or USIM card and tap the switch to activate it.

Customising SIM or USIM cards

Launch the Settings app, tap Connections → SIM card manager, and then select a SIM or USIM card to access the following options:

• Icon: Change the icon of the SIM or USIM card.
• Name: Change the display name of the SIM or USIM card.
• Network mode: Select a network type to use with the SIM or USIM card.

Setting preferred SIM or USIM cards

When two cards are activated, you can assign voice calls, messaging, and data services to specific cards.

Launch the Settings app, tap Connections → SIM card manager, and then set the feature preferences for your cards in PREFERRED SIM CARD.
Memory card (microSD card)

Installing a memory card

Your device’s memory card capacity may vary from other models and some memory cards may not be compatible with your device depending on the memory card manufacturer and type. To view your device’s maximum memory card capacity, refer to the Samsung website.

- Some memory cards may not be fully compatible with the device. Using an incompatible card may damage the device or the memory card, or corrupt the data stored in it.
- Use caution to insert the memory card right-side up.
- The device supports the FAT and the exFAT file systems for memory cards. When inserting a card formatted in a different file system, the device will ask to reformat the card or will not recognise the card. To use the memory card, you must format it. If your device cannot format or recognise the memory card, contact the memory card manufacturer or a Samsung Service Centre.
- Frequent writing and erasing of data shortens the lifespan of memory cards.
- When inserting a memory card into the device, the memory card’s file directory appears in the My Files → SD card folder.
1. Remove the back cover.

2. Insert a memory card with the gold-coloured contacts facing downwards.

3. Replace the back cover.

Ensure that the back cover is closed tightly.

---

Removing the memory card

Before removing the memory card, first unmount it for safe removal.

Launch the Settings app and tap Device maintenance → Storage → → Storage settings → SD card → UNMOUNT.

1. Remove the back cover.

2. Pull out the memory card.

3. Replace the back cover.

Do not remove external storage, such as a memory card, while the device is transferring or accessing information, or right after transferring data. Doing so can cause data to be corrupted or lost or cause damage to the external storage or device. Samsung is not responsible for losses, including loss of data, resulting from the misuse of external storage devices.

Ensure that the back cover is closed tightly.
Formatting the memory card

A memory card formatted on a computer may not be compatible with the device. Format the memory card on the device.

Launch the Settings app and tap Device maintenance → Storage → Storage settings → SD card → Format.

⚠️ Before formatting the memory card, remember to make backup copies of all important data stored in the memory card. The manufacturer’s warranty does not cover loss of data resulting from user actions.

Turning the device on and off

Press and hold the Power key for a few seconds to turn on the device.

When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

To turn off the device, press and hold the Power key, and then tap Power off.

‼️ Follow all posted warnings and directions from authorised personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals.

Emergency mode

You can switch the device to emergency mode to reduce battery consumption. Some apps and functions will be restricted. In emergency mode, you can make an emergency call, send your current location information to others, sound an emergency alarm, and more.

Activating emergency mode

To activate emergency mode, press and hold the Power key, and then tap Emergency mode.

‼️ The usage time left shows the time remaining before the battery power runs out. Usage time left may vary depending on your device settings and operating conditions.
Basics

Deactivating emergency mode
To deactivate emergency mode, tap → Turn off Emergency mode. Alternatively, press and hold the Power key, and then tap Emergency mode.

Initial setup
When you turn on your device for the first time or after performing a data reset, follow the on-screen instructions to set up your device.

The initial setup procedures may vary depending on the device's software and your region.

1  Turn on the device.

2  Select your preferred device language and select 🔄.

Select a language.
3 Select a Wi-Fi network and connect to it.

If you do not connect to a Wi-Fi network, you may not be able to set up some device features during the initial setup.

4 Read and agree to the terms and conditions, and tap **AGREE**.

5 Follow the on-screen instructions to proceed the initial setup.

6 Set a screen lock method to protect your device. You can protect your personal information by preventing others from accessing your device. To set the screen lock method later, tap **No, thank you**.

7 Sign in to your Samsung account. You can enjoy Samsung services and keep your data up to date and secure across all of your devices. Refer to **Samsung account** for more information.

8 Select features you want to use and complete the initial setup.

The Home screen will appear.
Samsung account

Introduction

Your Samsung account is an integrated account service that allows you to use a variety of Samsung services provided by mobile devices, TVs, and the Samsung website. Once your Samsung account has been registered, you can keep your data up to date and secure across your Samsung devices with Samsung Cloud, track and control your lost or stolen device, see tips and tricks from Samsung Members, and more.

Create your Samsung account with your email address.

To check the list of services that can be used with your Samsung account, visit account.samsung.com. For more information on Samsung accounts, launch the Settings app and tap Cloud and accounts → Accounts → Samsung account → Help.

Registering your Samsung account

Registering a new Samsung account

If you do not have a Samsung account, you should create one.

1. Launch the Settings app and tap Cloud and accounts → Accounts → Add account.
2. Tap Samsung account → CREATE ACCOUNT.
3. Follow the on-screen instructions to complete creating your account.

Registering an existing Samsung account

If you already have a Samsung account, register it to the device.

1. Launch the Settings app and tap Cloud and accounts → Accounts → Add account.
2. Tap Samsung account → SIGN IN.
3 Enter your email address and password, and then tap **SIGN IN**.
   If you forget your account information, tap **Find ID** or **Reset password**. You can find your account information when you enter the required information.

4 Read and agree to the terms and conditions and tap **AGREE**.

5 Tap **DONE** to finish registering your Samsung account.

**Removing your Samsung account**

When you remove your registered Samsung account from the device, your data, such as contacts or events, will also be removed.

1 Launch the **Settings** app and tap **Cloud and accounts → Accounts**.

2 Tap **Samsung account → Remove account**.

3 Tap **REMOVE**, enter your Samsung account password, and then tap **REMOVE ACCOUNT**.

**Transferring data from your previous device**

You can restore your data, such as images, contacts, messages, and apps from Samsung Cloud or copy them from your previous device wirelessly (Wi-Fi Direct) via Smart Switch.

- This feature may not be supported on some devices or computers.
- Limitations apply. Visit [www.samsung.com/smartswitch](http://www.samsung.com/smartswitch) for details. Samsung takes copyright seriously. Only transfer content that you own or have the right to transfer.
Smart Switch
Transfer data between mobile devices via Smart Switch. To use Smart Switch, launch the Settings app and tap Cloud and accounts → Smart Switch. If you do not have the app, download it from Galaxy Apps or Play Store.

Transferring data wirelessly via Wi-Fi Direct
Transfer data from your previous device to your device wirelessly via Wi-Fi Direct.

1. On the previous device, launch Smart Switch.
   If you do not have the app, download it from Galaxy Apps or Play Store.

2. On your device, launch the Settings app and tap Cloud and accounts → Smart Switch.

3. Place the devices near each other.

4. On the previous device, tap WIRELESS → SEND → CONNECT.

5. On your device, tap WIRELESS → RECEIVE and select the previous device type.

6. Follow the on-screen instructions to transfer data from your previous device.
Transferring backup data from a computer

Transfer data between your device and a computer. You must download the Smart Switch computer version app from www.samsung.com/smartswitch. Back up data from your previous device to a computer and import the data to your device.

1. On the computer, visit www.samsung.com/smartswitch to download Smart Switch.

2. On the computer, launch Smart Switch.

   If your previous device is not a Samsung device, back up data to a computer using a program provided by the device's manufacturer. Then, skip to the fifth step.

3. Connect your previous device to the computer using the device's USB cable.

4. On the computer, follow the on-screen instructions to back up data from the device. Then, disconnect your previous device from the computer.

5. Connect your device to the computer using the USB cable.

6. On the computer, follow the on-screen instructions to transfer data to your device.

Viewing imported data

You can view the imported data on the same app from your previous device. If your new device does not have the same apps to view or play the imported data, the data will be saved to a similar app. For example, if you import memos and your device does not have the Memo app, you can view the memos in the Samsung Notes app.
**Samsung Cloud**

Back up data from your previous device to Samsung Cloud and restore the data to your new device. You must register and sign in to your Samsung account to use Samsung Cloud. Refer to Samsung account for more information.

![Samsung Cloud Diagram](image)

**Backing up data**

1. On your previous device, sign in to your Samsung account.

2. Launch the **Settings** app, select the backup option, and back up your data.
   
   - If your device supports Samsung Cloud, launch the **Settings** app, tap **Cloud and accounts** → **Samsung Cloud**, select your device under **BACKUP AND RESTORE**, tap **Back up**, and then back up your data.
   
   - The data backup method may vary depending on your model.
   
   - Some data will not be backed up. To check which data will be backed up, launch the **Settings** app, tap **Cloud and accounts** → **Samsung Cloud**, select your device under **BACKUP AND RESTORE**, and then tap **Back up**.
Restoring data

1. On your new device, launch the Settings app and tap Cloud and accounts → Samsung Cloud.

2. Select your previous device under BACKUP AND RESTORE and tap Restore data.

3. Tick the data types you want to restore and tap RESTORE.

Syncing data

You can sync data saved in your devices with Samsung Cloud and access it from other devices.

1. On your new device, launch the Settings app and tap Cloud and accounts → Samsung Cloud.

2. Tap → Settings → Sync settings.

3. Tap the switches next to the items you want to sync with.

Checking data

You can check the saved items and used memory of your Samsung Cloud. Launch the Settings app and tap Cloud and accounts → Samsung Cloud.

- You can immediately check your used memory and saved items, such as GALLERY, SAMSUNG NOTES, and SAMSUNG CLOUD DRIVE. Tap each card and enter the next page. You can change the settings or check the saved data.
- You can check the backup data in your Samsung account by using the BACKUP AND RESTORE option. Select your device and tap Restore data.
Understanding the screen

Controlling the touchscreen

- Do not allow the touchscreen to come into contact with other electrical devices. Electrostatic discharges can cause the touchscreen to malfunction.
- To avoid damaging the touchscreen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.
- Leaving the touchscreen idle for extended periods may result in afterimages (screen burn-in) or ghosting. Turn off the touchscreen when you do not use the device.
- The device may not recognise touch inputs close to the edges of the screen, which are outside of the touch input area.
- It is recommended to use fingers when you use the touchscreen.

**Tapping**
Tap the screen.

**Tapping and holding**
Tap and hold the screen for approximately 2 seconds.
Basics

Dragging
Tap and hold an item and drag it to the target position.

Double-tapping
Double-tap the screen.

Swiping
Swipe upwards, downwards, to the left, or to the right.

Spreading and pinching
Spread two fingers apart or pinch on the screen.
Home screen and Apps screen

The Home screen is the starting point for accessing all of the device's features. It displays widgets, shortcuts to apps, and more.

The Apps screen displays icons for all apps, including newly installed apps.

⚠️ The screen may appear differently depending on the region or service provider.
Switching between Home and Apps screens

On the Home screen, swipe upwards or downwards to open the Apps screen. To return to the Home screen, swipe upwards or downwards on the Apps screen. Alternatively, tap the Home key or the Back key.

If you add the Apps button on the Home screen, you can open the Apps screen by tapping the button. On the Home screen, tap and hold an empty area and tap Home screen settings → Apps button → Show Apps button → APPLY. The Apps button will be added at the bottom of the Home screen.
Moving items
Tap and hold an item, and then drag it to a new location. To move the item to another panel, drag it to the side of the screen.
To add a shortcut to an app on the Home screen, tap and hold an item on the Apps screen, and then drag it to the top or bottom of the screen. A shortcut to the app will be added on the Home screen.
You can also move frequently used apps to the shortcuts area at the bottom of the Home screen.

Creating folders
Create folders and gather similar apps to quickly access and launch apps.

1. On the Home screen or the Apps screen, tap and hold an app, and then drag it over another app.

2. Drop the app when a folder frame appears around the apps.
A new folder containing the selected apps will be created. Tap **Enter folder name** and enter a folder name.

• Adding more apps
Tap **ADD APPS** on the folder. Tick the apps to add and tap **ADD**. You can also add an app by dragging it to the folder.

• Moving apps from a folder
Tap and hold an app to drag it to a new location.
• **Deleting a folder**
  Tap and hold a folder, and then tap **Delete folder**. Only the folder will be deleted. The folder’s apps will be relocated to the Apps screen.

**Editing the Home screen**

On the Home screen, tap and hold an empty area, or pinch your fingers together to access the editing options. You can set the wallpaper, add widgets, and more. You can also add, delete, or rearrange Home screen panels.

• Adding panels: Swipe to the left, and then tap •.
• Moving panels: Tap and hold a panel preview, and then drag it to a new location.
• Deleting panels: Tap on the panel.

• **Wallpapers**: Change the wallpaper settings for the Home screen and the locked screen.

• **Themes**: Change the device’s theme. Visual elements of interface, such as colours, icons, and wallpapers will change depending on the selected theme.

• **Widgets**: Widgets are small apps that launch specific app functions to provide information and convenient access on your Home screen. Tap and hold a widget, and then drag it to the Home screen. The widget will be added on the Home screen.

• **Home screen settings**: Change the size of the grid to display more or fewer items on the Home screen and more.
Displaying all apps on the Home screen

Without using a separate Apps screen, you can set the device to display all apps on the Home screen. On the Home screen, tap and hold an empty area, and then tap Home screen settings → Home screen layout → Home screen only → APPLY.

You can now access all your apps by swiping to the left on the Home screen.

Indicator icons

Indicator icons appear on the status bar at the top of the screen. The icons listed in the table below are most common.

The status bar may not appear at the top of the screen in some apps. To display the status bar, drag down from the top of the screen.

**Lock screen**

Pressing the Power key turns off the screen and locks it. Also, the screen turns off and automatically locks if the device is not used for a specified period.

To unlock the screen, swipe in any direction when the screen turns on.

If the screen is off, press the Power key or Home key to turn on the screen.

Locked screen
Changing the screen lock method

To change the screen lock method, launch the Settings app, tap Lock screen → Screen lock type, and then select a method.

When you set a pattern, PIN, password, face, or fingerprint for the screen lock method, you can protect your personal information by preventing others from accessing your device. After setting the screen lock method, the device will require an unlock code whenever unlocking it.

- **Swipe**: Swipe in any direction on the screen to unlock it.
- **Pattern**: Draw a pattern with four or more dots to unlock the screen.
- **PIN**: Enter a PIN with at least four numbers to unlock the screen.
- **Password**: Enter a password with at least four characters, numbers, or symbols to unlock the screen.
- **None**: Do not set a screen lock method.
- **Face**: Register your face to unlock the screen. Refer to Face recognition for more information.
- **Fingerprints**: Register your fingerprints to unlock the screen. Refer to Fingerprint recognition for more information.

You can set your device to perform a factory data reset if you enter the unlock code incorrectly several times in a row and reach the attempt limit. Launch the Settings app, tap Lock screen → Secure lock settings, and then tap the Auto factory reset switch to activate it.

Screen capture

Capture a screenshot while using the device.

Capturing a screenshot

Press and hold the Home key or Volume Down key and the Power key simultaneously. You can view captured images in Gallery.

It is not possible to capture a screenshot while using some apps and features.
Notification panel

When you receive new notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notification panel and view the details.

To open the notification panel, drag the status bar downwards. To close the notification panel, swipe upwards on the screen.

You can open the notification panel, even on the locked screen.

You can use the following functions on the notification panel.

- **Quick setting buttons**
- **View the notification details and perform various actions.**
- **Access the notification settings.**
- **Launch Settings.**
- **Clear all notifications.**

SIM and USIM card feature preferences. Tap to access the SIM card manager. (dual SIM models)
Using quick setting buttons

Tap quick setting buttons to activate certain features. Swipe downwards on the notification panel to view more buttons.

To change feature settings, tap the text under each button. To view more detailed settings, tap and hold a button.

To rearrange buttons, tap ➔ Button order, tap and hold a button, and then drag it to another location.
Entering text

Keyboard layout

A keyboard appears automatically when you enter text to send messages, create notes, and more.

- When the keyboard is opened for the first time, the keyboard setup screen will appear. Set the language, keyboard type, and keyboard settings and then tap START.
- Text entry is not supported in some languages. To enter text, you must change the input language to one of the supported languages.

Changing the input language

Tap 📑 → Languages and types → MANAGE INPUT LANGUAGES, and then select the languages to use. When you select two or more languages, you can switch between the input languages by swiping to the left or right on the space key.

Changing the keyboard layout

Tap 📑 → Languages and types, select a language, and then select a keyboard layout to use.

On 3x4 keyboard, a key has three or four characters. To enter a character, tap the corresponding key repeatedly until the desired character appears.

Additional keyboard functions.
- View more keyboard functions.
- Delete a preceding character.
- Break to the next line.
- Enter a space.
- Enter symbols.
- Enter uppercase. For all caps, tap it twice.
Additional keyboard functions

- 📖: Predict words based on your input and show word suggestions. To return to the keyboard functions list, tap 📖.
- 😊: Enter emoticons.
- 📱: Attach stickers.
- 🎨: Attach animated GIFs.
- 🎤: Enter text by voice.
- 🌐: Change the keyboard settings.
- 👤 → 📌: Add an item from the clipboard.
- 👤 → 📊: Change the keyboard for one-handed operation.

Copying and pasting

1. Tap and hold over text.
2. Drag 📏 or 📌 to select the desired text, or tap Select all to select all text.
3. Tap Copy or Cut.
   The selected text is copied to the clipboard.
4. Tap and hold where the text is to be inserted and tap Paste.
   To paste text that you have previously copied, tap Clipboard and select the text.
Dictionary

Look up definitions for words while using certain features, such as when browsing webpages.

1. Tap and hold over a word that you want to look up. If the word you want to look up is not selected, drag or to select the desired text.

2. Tap More → Dictionary on the options list. If a dictionary is not preinstalled on the device, tap Move to Manage dictionaries → next to a dictionary to download it.

3. View the definition in the dictionary pop-up window. To switch to the full screen view, tap . Tap the definition on the screen to view more definitions. In the detailed view, tap to add the word to your favourite words list or tap Search Web to use the word as a search term.
Apps and features

Installing or uninstalling apps

**Galaxy Apps**
Purchase and download apps. You can download apps that are specialised for Samsung Galaxy devices.

Open the Samsung folder and launch the Galaxy Apps app.

This app may not be available depending on the region or service provider.

**Installing apps**
Browse apps by category or tap the search field to search for a keyword.
Select an app to view information about it. To download free apps, tap **INSTALL**. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap → Settings → Auto update apps, and then select an option.

**Play Store**
Purchase and download apps.
Launch the Play Store app.

**Installing apps**
Browse apps by category or search for apps by keyword.
Select an app to view information about it. To download free apps, tap **INSTALL**. To purchase and download apps where charges apply, tap the price and follow the on-screen instructions.

To change the auto update settings, tap → Settings → Auto-update apps, and then select an option.
Managing apps

Uninstalling apps and using app sleep mode
Tap and hold an app and select an option.
• **Disable**: Disable selected default apps that cannot be uninstalled from the device.
• **Uninstall**: Uninstall downloaded apps.

Enabling apps
Launch the **Settings** app, tap **Apps → Disabled**, select an app, and then tap **ENABLE**.

Setting app permissions
For some apps to operate properly, they may need permission to access or use information on your device. When you open an app, a pop-up window may appear and request access to certain features or information. Tap **ALLOW** on the pop-up window to grant permissions to the app.

To view your app permission settings, launch the **Settings** app and tap **Apps**. Select an app and tap **Permissions**. You can view the app’s permissions list and change its permissions.

To view or change app permission settings by permission category, launch the **Settings** app and tap **Apps → App permissions**. Select an item and tap the switches next to apps to grant permissions.

If you do not grant permissions to apps, the basic features of the apps may not function properly.
Bixby

Introduction

Bixby is a new interface that can communicate with you and it provides services that help you to use your smartphone more conveniently.

- **Bixby Home**: You can view recommended services and information that Bixby provides by analysing your usage patterns and your routine.
- **Reminder**: You can create reminders to schedule to-do items or to view content later.

To use the Bixby feature, your device must be connected to a Wi-Fi or mobile network.
- To use the Bixby feature, you must register and sign in to your Samsung account.
- Available Bixby services may differ depending on the region or service provider.

Starting Bixby

When you launch Bixby for the first time, the Bixby intro page will appear. You must register and sign in to your Samsung account according to the on-screen instructions and agree to the terms and conditions.

1. Swipe to the right on the Home screen.
2. Check the Bixby intro page and tap NEXT.
3. Tap SIGN IN and follow the on-screen instructions to sign in to your Samsung account.
   - If you are already signed in, this step will not appear.
4. Tap DONE to finish registering your Samsung account.
5. Read and agree to the terms and conditions and tap → NEXT.
Bixby Home

On the Bixby Home screen, you can view recommended services and information that Bixby provides by analysing your usage patterns and your routine.

Opening Bixby Home

1. Swipe to the right on the Home screen. The Bixby Home screen will appear.

2. Swipe upwards or downwards to view recommended content.

3. To close Bixby Home, swipe to the left on the screen.
Using recommended content on Bixby Home

When you open Bixby Home, you can view the content that is frequently updated as Bixby cards. Swipe upwards or downwards to view the Bixby cards.

For example, on the way to the office in the morning, you can view your day’s schedule and play your favourite music on the Bixby Home screen. In the evening, you can set alarms, check your daily activity, and view your friends’ feeds.

The content and order of the cards update automatically at a specified interval. To manually update cards, swipe downwards on the screen.
Viewing Bixby cards

The cards that are most useful to you will be shown on the top based on the time and location. You can view more cards by setting more apps to show as Bixby cards.

On the Bixby Home screen, swipe upwards or downwards to view Bixby cards.

- At night, Bixby Home will display your alarm for the following morning.
- If you have added reminders, the most recent reminder will appear on the Bixby Home screen.
- View the most recent event created in your planner. Tap a card to view its details.
- Check today’s weather for your current area in real time and view your location information.
- Preview the photos and videos you have taken today.
- View updated news.

Editing Bixby cards list

- To pin a card to the top of the Bixby Home screen, tap → Pin to top. To unpin a card, tap → Unpin.
- To hide a card from the list, tap → Hide for now.
- To stop displaying a card on the list, tap → Don’t show again.

Selecting apps to show as Bixby cards

Add or delete apps to show as cards on the Bixby Home screen.

On the Bixby Home screen, tap → Settings → Cards and tap the switches next to items to add or delete them.

If an app is not installed on the device, you must install it to use it. On the Bixby Home screen, tap → Settings → Cards and then download an app.
Reminder

Create reminders to schedule to-do items or to view content later. You will receive notifications at the preset time or location for each reminder.

- To receive more accurate notifications, connect to a Wi-Fi or mobile network.
- To fully use this feature, you must register and sign in to your Samsung account.
- To use location reminders, the GPS feature must be activated.

Starting Reminder

You can start Reminder from Bixby Home.

1. Swipe to the right on the Home screen.
   The Bixby Home screen will appear.

2. Tap GET STARTED on the UPCOMING REMINDERS card.
   The Reminder intro page will appear.
3 Make sure the Add Reminder on Home screen option is ticked and tap START.

If you add the Reminder app icon () to the Home screen, you can launch the Reminder app from the Home screen.

Creating reminders

Create reminders with various methods. Reminder will alert you if you create a reminder with a specified time or location setting. You can also save various content, such as a single memo or webpage address, and view it later.

Creating reminders via the Reminder app

For example, create a reminder to alert you to ‘take your medicine at 9 AM’.

1 Launch the Reminder app.

2 Tap Write a reminder and enter ‘Take medicine’.

3 Tap Set conditions → Date and time and set the time to ‘9 AM’.

   When you tap VIEW MORE, you can add details, such as images or frequency.

4 Tap SAVE to save the reminder.
Creating reminders from Bixby Home

On the Bixby Home screen, tap **UPCOMING REMINDERS** on the Reminder card. Enter information, set the time or the location condition, and then save the reminder.

Creating reminders while browsing the Internet

While browsing the Internet, you can create reminders to view the content later.

1. While browsing the Internet, tap → Share.

2. Tap Reminder.
   The webpage address will be saved as a reminder automatically.
   To set the data, time, or location manually, tap 📍.

Checking reminder notifications

At the preset time or location, a notification pop-up window will appear. Tap **COMPLETE** or **SNOOZE**.

Viewing the reminders list

Launch the Reminder app to view your reminders list. To view reminder details, select a reminder.
Setting reminder details

Add or edit reminder details, such as frequency, date and time, or location.

1. Select a reminder to edit and tap EDIT. Alternatively, swipe right on a reminder and tap Edit.

2. Edit the conditions and tap SAVE.

Completing reminders

Mark reminders that you do not need to be reminded of as complete.

On the reminders list, select a reminder and tap COMPLETE. When a notification pop-up window appears, tap COMPLETE.

Restoring reminders

Restore reminders that have been completed.

1. On the reminders list, tap → Completed → EDIT.

2. Tick items to restore and tap RESTORE.

Reminders will be added to the reminders list and you will be reminded at the preset times.
Deleting reminders
To delete a reminder, swipe right on a reminder and tap Delete. To delete multiple reminders, tap and hold a reminder, tick reminders to delete, and then tap DELETE.

Customising Bixby settings
On the Bixby Home screen, tap → Settings.

- **Samsung account**: View your Samsung account information.
- **HOME CARDS**
  - **Cards**: Select apps to show as cards on the Bixby Home screen.
- **GENERAL**
  - **Auto-update Bixby**: Set the device to update Bixby software automatically when connected to a mobile network.
    
      ![Warning]
      You can incur additional charges when using this feature.

  - **Notifications**: Set to receive notifications about Bixby Home cards, marketing information, and more.
  - **Privacy**: Set to use Bixby’s interactive and customised services to enhance your experience. You can also delete Bixby interaction data.
  - **About Bixby**: View the Bixby version and legal information.
Phone

Introduction
Make or answer voice and video calls.

Making calls

1. Launch the Phone app and enter a phone number. If the keypad does not appear on the screen, tap to open the keypad.

2. Tap 📞 to make a voice call, or tap 📺 to make a video call. For dual SIM models, tap 📞 or 📺 to make a voice call.
Making calls from call logs or contacts list

Tap RECENTS or CONTACTS, and then swipe to the right on a contact or a phone number to make a call.

If this feature is deactivated, launch the Settings app, tap Advanced features, and then tap the Swipe to call or send messages switch to activate it.

Using speed dial

Set speed dial numbers to quickly make calls.

To set a number to speed dial, tap → Speed dial numbers, select a speed dial number, and then add a phone number.

To make a call, tap and hold a speed dial number on the keypad. For speed dial numbers 10 and up, tap the first digit(s) of the number, and then tap and hold the last digit.

For example, if you set the number 123 as a speed dial number, tap 1, tap 2, and then tap and hold 3.

Making calls from the locked screen

On the locked screen, drag outside the circle.

Making an international call

1. Tap to open the keypad if the keypad does not appear on the screen.

2. Tap and hold 0 until the + sign appears.

3. Enter the country code, area code, and phone number, and then tap .

   For dual SIM models, enter the country code, area code, and phone number, and then tap or .
Receiving calls

Answering a call
When a call comes in, drag 📞 outside the large circle.

Rejecting a call
When a call comes in, drag 📞 outside the large circle.
To send a message when rejecting an incoming call, drag the rejection message bar upwards. You can send a text message or a sticker to reject a call. If Add reminder is selected, a reminder will be saved to alert you of the rejected call one hour later.
To create various rejection messages, launch the Phone app, tap ☰ → Settings → Quick decline messages, enter a message, and then tap +.

Missed calls
If a call is missed, the ☎️ icon appears on the status bar. Open the notification panel to view the list of missed calls. Alternatively, launch the Phone app and tap RECENTS to view missed calls.

Blocking phone numbers
Block calls from specific numbers added to your block list.

1. Launch the Phone app and tap ☰ → Settings → Block numbers.

2. Tap ☰, select contacts, and then tap DONE.
   - To manually enter a number, tap Enter phone number, enter a phone number, and then tap +.

When blocked numbers try to contact you, you will not receive notifications. The calls will be logged in the call log.

You can also block incoming calls from people that do not show their caller ID. Tap the Block unknown callers switch to activate the feature.
Options during calls

If the area around the rear camera is covered, unwanted noises may incur during a call. Remove accessories, such as a screen protector or stickers, around the rear camera area.

The available options may vary depending on the region or service provider.

During a voice call

The following actions are available:

- Access additional options.
- Record: Record a call conversation.
- Extra volume: Increase the volume.
- Bluetooth: Switch to a Bluetooth headset if it is connected to the device.
- Speaker: Activate or deactivate the speakerphone. When using the speakerphone, keep the device away from your ears.
- Mute: Turn off the microphone so that the other party cannot hear you.
- Keypad / Hide: Open or close the keypad.
- : End the current call.

During a video call

Tap the screen to use the following options:

- Access additional options.
- Camera: Turn off the camera so that the other party cannot see you.
- Switch: Switch between the front and rear cameras.
- : End the current call.
- Mute: Turn off the microphone so that the other party cannot hear you.
- Speaker: Activate or deactivate the speakerphone. When using the speakerphone, keep the device away from your ears.
Adding a phone number to Contact

Adding a phone number to Contacts from the keypad

1. Launch the Phone app.
2. Enter the number.
   If the keypad does not appear on the screen, tap to open the keypad.
3. Tap CREATE CONTACT to create a new contact, or tap UPDATE EXISTING to add the number to an existing contact.

Adding a phone number to Contacts from the calls list

1. Launch the Phone app and tap RECENTS.
2. Tap a caller’s image, or tap a phone number → Details.
3. Tap Create contact to create a new contact, or tap Update existing to add the number to an existing contact.
Contacts

Introduction
Create new contacts or manage contacts on the device.

Adding contacts

Creating a new contact

1. Launch the Contacts app, tap +, and then select a storage location.

2. Enter contact information.

![Contact creation interface]

Select a storage location.  
Add an image.  
Enter contact information.  
Open more information fields.  
Scan contact information from a business card.

Depending on the selected storage location, the types of information you can save may vary.

3. Tap SAVE.
Importing contacts
Add contacts by importing them from other storages to your device.

1. Launch the Contacts app and tap → Manage contacts → Import/Export contacts → IMPORT.

2. Select a storage location to import contacts from.

3. Tick VCF files or contacts to import and tap DONE.

4. Select a storage location to save contacts to and tap IMPORT.

Synching contacts with your web accounts
Sync your device contacts with online contacts saved in your web accounts, such as your Samsung account.

1. Launch the Settings app, tap Cloud and accounts → Accounts, and select the account to sync with.

2. Tap Sync account and tap the Sync Contacts switch to activate it.
   For the Samsung account, tap → Sync settings and tap the Contacts switch to activate it.

Searching for contacts
Launch the Contacts app.
Use one of the following search methods:

• Scroll up or down the contacts list.

• Drag a finger along the index at the right side of the contacts list to scroll through it quickly.

• Tap the search field at the top of the contacts list and enter search criteria.
Tap the contact’s image, or tap the contact’s name → Details. Then take one of the following actions:

- ★: Add to favourite contacts.
- ☑️/☐: Make a voice or video call.
- ☑️: Compose a message.
- ☑️: Compose an email.

**Sharing contacts**

You can share contacts with others by using various sharing options.

1. Launch the **Contacts** app and tap → Share.
2. Select contacts and tap **SHARE**.
3. Select a sharing method.

**Saving and sharing profile**

Save and share your profile information, such as your photo and status message, with others using the profile sharing feature.

- The profile sharing feature may not be available depending on the region or service provider.
- The profile sharing feature is only available for contacts who have activated the profile sharing feature on their device.

1. Launch the **Contacts** app and select your profile.
2. Tap **EDIT**, edit your profile, and tap **SAVE**.
3. Tap → **Profile sharing**, and then tap the switch to activate it.

To use the profile sharing feature, your phone number must be verified. You can view your contacts’ updated profile information in **Contacts**.

To change the scope of contacts to share your profile with, tap **Share with**, select an item to share, and then select an option.
Creating groups
You can add groups, such as family or friends, and manage contacts by group.

1. Launch the Contacts app and tap Groups → CREATE.

2. Enter a group name.
   To set a group ringtone, tap Group ringtone and select a ringtone.

3. Tap Add member, select contacts to add to the group, and then tap DONE.

4. Tap SAVE.

Sending a group message
You can send a group message to a group’s members at the same time.
Launch the Contacts app, tap Groups, select a group, and then tap → Send message.

Merging duplicate contacts
When you import contacts from other storages, or sync contacts with other accounts, your contacts list may include duplicate contacts. Merge duplicate contacts into one to streamline your contacts list.

1. Launch the Contacts app and tap → Manage contacts → Merge contacts.

2. Tick contacts and tap MERGE.

Deleting contacts

1. Launch the Contacts app and tap → Delete.

2. Select contacts and tap DELETE.

   To delete contacts one by one, open the contacts list and tap a contact’s image or tap a contact’s name → Details. Then tap → Delete.
Introduction
Send and view messages by conversation.

Sending messages

You may incur additional charges for sending messages when you are roaming.

1. Launch the Messages app and tap 🌨.

2. Add recipients and tap START.

3. Enter a message.
   To record and send a voice message, tap and hold 🎤, say your message, and then release your finger. The recording icon appears only while the keyboard is hidden.

4. Tap 🔄 to send the message.
   For dual SIM models, tap 🌨 or 🌨 to send the message.
Viewing messages
Messages are grouped into message threads by contact.

⚠️ You may incur additional charges for receiving messages when you are roaming.

1. Launch the Messages app and tap CONVERSATIONS.
2. On the messages list, select a contact.
3. View your conversation.
   - To reply to the message, tap Enter message, enter a message, and then tap ✉️. For dual SIM models, tap 📞 or 📞.

Blocking unwanted messages
Block messages from specific numbers added to your block list.

1. Launch the Messages app and tap ⬤ → Settings → Block numbers and messages → Block numbers.
2. Tap INBOX and select a contact. Or, tap CONTACTS, select contacts, and then tap DONE.
   - To manually enter a number, tap Enter number, enter a phone number, and then tap ✪.

Setting the message notification
You can change notification sound, display options, and more.

1. Launch the Messages app, tap ⬤ → Settings → Notifications, and then tap the switch to activate it.
2. Change the notification settings.

Setting a message reminder
You can set an alert at an interval to let you know that you have unchecked notifications.

If this feature is not activated, launch the Settings app, tap Accessibility → Notification reminder, and then tap the switch to activate it. Then, tap the Messages switch to activate it.
Internet

Introduction
Browse the Internet to search for information and bookmark your favourite webpages to access them conveniently.

Browsing webpages

1. Open the Samsung folder and launch the Internet app.
2. Tap the address field.
3. Enter the web address or a keyword, and then tap Go.

To view the toolbars, drag your finger downwards slightly on the screen.
To switch between tabs quickly, swipe to the left or right on the address field.
**Using secret mode**

In secret mode, you can separately manage open tabs, bookmarks, and saved pages. You can lock secret mode using a password and your fingerprint.

**Activating secret mode**

In the toolbar at the bottom of the screen, tap **Tabs → TURN ON SECRET MODE**. If you are using this feature for the first time, set whether to use a password or biometric for secret mode.

In secret mode, you cannot use some features, such as screen capture.

In secret mode, the device will change the colour of the toolbars.

**Changing security settings**

You can change your password or the lock method.

Tap **⋮ → Settings → Privacy → Secret mode security → Change password**. To set your registered fingerprint as the lock method along with the password, tap the **Fingerprints** switch to activate it. Refer to **Fingerprint recognition** for more information about using your fingerprints.

**Deactivating secret mode**

In the toolbar at the bottom of the screen, tap **Tabs → TURN OFF SECRET MODE**.
Email

Setting up email accounts
Set up an email account when opening Email for the first time.

1. Open the Samsung folder and launch the Email app.
2. Enter the email address and password, and then tap SIGN IN.
   To manually register an email account, tap MANUAL SETUP.
3. Follow the on-screen instructions to complete the setup.

To set up another email account, tap → → Add account.
If you have more than one email account, you can set one as the default account. Tap → → → Set default account.

Sending emails

1. Tap to compose an email.
2. Add recipients and enter an email text.
3. Tap SEND to send the mail.

Reading emails

When Email is open, the device will automatically retrieve new emails. To manually retrieve emails, swipe downwards on the screen.
Tap an email on the screen to read it.

If email syncing is disabled, new emails cannot be retrieved. To enable email syncing, tap → → your account name, and then tap the Sync account switch to activate it.
Camera

Introduction
Take photos and record videos using various modes and settings. When you use the Live focus feature, you can take an out-of-focus photo with the focus on the subject.

Camera etiquette
- Do not take photos or record videos of other people without their permission.
- Do not take photos or record videos where legally prohibited.
- Do not take photos or record videos in places where you may violate other people’s privacy.
Launching Camera

Use the following methods to launch Camera:

- Launch the **Camera** app.
- Press the Home key twice quickly.
- On the locked screen, drag outside the circle.

- Some methods may not be available depending on the region or service provider.
- Some camera features are not available when you launch the **Camera** app from the locked screen or when the screen is turned off while the screen lock method is set.
- If photos you take appear blurry, clean the camera lens and try again.

Using swipe gestures

Quickly control the preview screen by swiping in different directions. You can change the shooting mode, switch between cameras, or apply various filters or effects.
Basic shooting

Taking photos or recording videos

1. Tap the image on the preview screen where the camera should focus.

2. Tap Ⓓ to take a photo or tap Ⓘ to record a video.

- You can add another camera button on the preview screen. Drag Ⓓ to the location you want on the screen. This feature is available only in Auto and Selfie modes.
- To adjust the brightness of photos or videos, tap the screen. When the adjustment bar appears, drag Ⓓ on the adjustment bar towards ➕ or ➖.
- To capture an image from the video while recording, tap Ⓓ.
- To change the focus while recording a video, tap where you want to focus. To use auto focus mode, tap Ⓓ.
• The preview screen may vary depending on the shooting mode and which camera is being used.
• The camera automatically shuts off when unused.
• Make sure that the lens is not damaged or contaminated. Otherwise, the device may not work properly in some modes that require high resolutions.

Zooming in and out

Use various methods to zoom in or out.
• Spread two fingers apart on the screen to zoom in, and pinch to zoom out.
• Control the zoom with one finger. Drag on the zoom bar towards + or –.

Zooming features are available only when using the rear camera.

Locking the focus (AF) and exposure (AE)

You can lock the focus or exposure on a selected area to prevent the camera from automatically adjusting based on changes to the subjects or light sources.
Tap and hold the area to focus, the AF/AE frame will appear on the area and the focus and exposure setting will be locked. The setting remains locked even after you take a photo.

This feature is available only in Auto and Pro modes.
**LIVE FOCUS**

The dual camera allows you to take shallow focus photos where the background is blurred and the subject stands out clearly.

**Taking portraits that stand out using the Live focus feature**

Adjust the background blur level on the preview screen and take a photo that highlights the subject.

- This feature is available only in **Auto** mode.
- Use this feature in a place that has sufficient light.

1. On the preview screen, tap **LIVE FOCUS**.
2. Drag the background blur adjustment bar to the left or right to adjust the blur level.
3. Tap to take a photo.

The background blur may not be applied properly in the following conditions:

- The device or the subject is moving.
- The subject is thin or transparent.
- The subject has a similar colour or pattern to the background.
- The subject or background is plain.
Editing the Live Focus photos

You can also edit the background blur level and change the focus of a photo taken with the Live focus feature. When the background lighting appears in blurred points, you can change the shape of the background blur. Select a shape, such as a heart, star, or flower, to decorate the photo and make it look different.

Adjusting the background blur level

Changing the shape of the background blur
1. Select a photo taken with the Live focus feature and tap **ADJUST BACKGROUND BLUR**.

2. To adjust the background blur level, drag the background blur adjustment bar to the left or right.

   To change the focus, tap where you want to focus.

   To change the background blur shape, drag the effect list to the left or right and select an effect you want. The effect list will appear only when the photo has blur shape in the background.

3. Tap ✔ to save the photo.
More fun with live stickers

Capture photos and videos with various live stickers. As you move your face, stickers will track with your movements. You can also record a lovely and funny sticker that keeps moving in a video.

1. On the preview screen, tap STICKERS.

2. Tap 🐻 and select a sticker.

3. Tap 📷 to take a photo.

Applying stickers randomly

You can apply stickers randomly, instead of selecting one from the stickers list. Tap Random repeatedly until the sticker you want appears.
Using shooting modes

On the preview screen, swipe to the right to open the shooting modes list. Select a shooting mode you want.

You can add shortcuts to frequently used shooting modes on the Home screen. On the shooting modes list, tap → Add shortcut on home screen.

Auto mode

Auto mode allows the camera to evaluate the surroundings and determine the ideal mode for the photo.

On the shooting modes list, tap Auto.

Pro mode

Capture photos and videos while manually adjusting various shooting options, such as exposure value and ISO value.

On the shooting modes list, tap Pro. Select options and customise the settings, and then tap to take a photo or tap to record a video.

Available options

- : Change the exposure value. This determines how much light the camera’s sensor receives. For low-light situations, use a higher exposure.
- ISO : Select an ISO value. This controls camera light sensitivity. Low values are for stationary or brightly lit objects. Higher values are for fast-moving or poorly lit objects. However, higher ISO settings can result in noise in photos.
- WB : Select an appropriate white balance, so images have a true-to-life colour range. You can set the colour temperature.
Panorama mode

Using panorama mode, take a series of photos and then stitch them together to create a wide scene.

To get the best shots using panorama mode, follow these tips:

- Move the camera slowly in one direction.
- Keep the image within the frame on the camera’s viewfinder. If the preview image is out of the guide frame or you do not move the device, the device will automatically stop taking photos.
- Avoid taking photos of indistinct backgrounds, such as an empty sky or a plain wall.

1. On the shooting modes list, tap Panorama.
2. Tap 📷 and move the device slowly in one direction.
3. Tap 📷 to stop taking photos.

Continuous shot mode

Take a series of photos of moving subjects.

On the shooting modes list, tap Continuous shot.

Tap and hold 📷 to take several photos continuously.
**HDR (Rich tone) mode**

Use HDR mode to capture photos and videos with rich colours and reproduce details even in bright and dark areas.

On the shooting modes list, tap **HDR (Rich tone)** and select an option.

![Without effect](image1) ![With effect](image2)

This feature may not be available depending on the region or service provider.

**Night mode**

Take a photo in low-light conditions, without using the flash.

On the shooting modes list, tap **Night**.

This feature may not be available depending on the region or service provider.

**Sports mode**

Take a photo of fast-moving subjects.

On the shooting modes list, tap **Sports**.
**Sound & shot mode**

Take a photo with sound. The device identifies the photos with 🎶 in Gallery.

On the shooting modes list, tap **Sound & shot**.

**Selfie mode**

Take self-portraits with the front camera. You can preview various beauty effects on the screen.

1. On the preview screen, swipe upwards or downwards, or tap 📷 to switch to the front camera for self-portraits.
2. On the shooting modes list, tap **Selfie**.
3. Face the front camera lens.
4. When the device detects your face, show your palm to the front camera. After recognising your palm, a countdown timer will appear. When the time is up, the device will take a photo.

   To set the camera to take a photo by tapping the screen, tap 📷 → **Shooting methods**, and then tap the **Tap screen** switch to activate it.

**Applying beauty effects**

You can modify facial features, such as your skin tone or face shape, before taking self-portraits.

   This feature is available only in **Selfie** mode.

1. On the preview screen, tap 📷.
2. Select the options below to apply beauty effects to your face on the preview screen and take a photo of yourself.
   - **Skin Tone**: Make your skin appear brighter and clearer.
   - **Slim Face**: Adjust the face shape and make your face appear slimmer.
   - **Large Eyes**: Make your eyes appear bigger.
Using the Selfie focus feature

The Selfie focus feature allows you to get an out-of-focus photo with the focus on the subject.

- This feature is available only in Selfie mode.
- Use this feature in a place that has sufficient light.

1. On the preview screen, tap **SELFIE FOCUS**.

2. Tap 

   - The Selfie focus feature may not be applied properly in the following conditions:
     - The device or the subject is moving.
     - The subject is thin or transparent.
     - The subject has a similar colour or pattern to the background.
     - The subject or background is plain.

Wide selfie mode

Take a wide self-portrait and include as many people in the photo as possible to avoid leaving people out.

1. On the preview screen, swipe upwards or downwards, or tap 

2. On the shooting modes list, tap **Wide selfie**.

3. Face the front camera lens.

4. When the device detects your face, show your palm to the front camera. After recognising your palm, a countdown timer will appear. When the time is up, the device will take a photo.

   - To set the camera to take a photo by tapping the screen, tap → Shooting methods, and then tap the Tap screen switch to activate it.
5  Slowly swivel the device left and then right or vice versa to take a wide self-portrait. The device will take additional photos when the white frame moves to each end of the viewfinder window.

- Make sure to keep the white frame inside the viewfinder window.
- The subjects should remain still while taking wide self-portraits.
- The top and bottom parts of the image displayed on the preview screen may be cut out of the photo depending on the shooting conditions.

Customising camera settings

Options for current shooting mode

On the preview screen, use the following options.

- [ ] : Turn on and off the full preview screen.
- [ ] : Activate or deactivate the flash.
- [ ] : Select a metering method. This determines how light values are calculated. Centre-weighted uses the light in the centre portion of the shot to calculate the exposure of the shot. Spot uses the light in a concentrated centre area of the shot to calculate the exposure of the shot. Matrix averages the entire scene.
- [ ] : Set the device to record sound before or after taking a photo.
Camera settings

On the preview screen, tap 📷. Some options may not be available depending on the shooting mode.

REAR CAMERA

- **Picture size**: Select a resolution for photos. Using a higher resolution will result in higher quality photos, but they will take up more memory.
- **Video size**: Select a resolution for videos. Using a higher resolution will result in higher quality videos, but they will take up more memory.
- **Timer**: Select the length of the delay before the camera automatically takes a photo.

FRONT CAMERA

- **Picture size**: Select a resolution for photos. Using a higher resolution will result in higher quality photos, but they will take up more memory.
- **Video size**: Select a resolution for videos. Using a higher resolution will result in higher quality videos, but they will take up more memory.
- **Save pictures as previewed**: Invert the image to create a mirror-image of the original scene, when taking photos with the front camera.
- **Shooting methods**: Select shooting options to use.
- **Timer**: Select the length of the delay before the camera automatically takes a photo.
COMMON

- **Grid lines**: Display viewfinder guides to help composition when selecting subjects.
- **Location tags**: Attach a GPS location tag to the photo.
  - GPS signal strength may decrease in locations where the signal is obstructed, such as between buildings or in low-lying areas, or in poor weather conditions.
  - Your location may appear on your photos when you upload them to the Internet. To avoid this, deactivate the location tag setting.
- **Review pictures**: Set the device to show photos after capturing them.
- **Quick launch**: Set the device to launch the camera by pressing the Home key twice quickly.
  - This feature may not be available depending on the region or service provider.
- **Storage location**: Select the memory location for storage. This feature will appear when you insert a memory card.
- **Floating Camera button**: Add a camera button that you can place anywhere on the screen. This feature is available only in Auto and Selfie modes.
- **Volume key function**: Set the device to use the Volume key to control the shutter or zoom in or out.
- **Reset settings**: Reset the camera settings.
- **Contact us**: Ask questions or view frequently asked questions. Refer to Samsung Members for more information.
  - This feature may not be available depending on the region or service provider.
Introduction

View images and videos stored in your device. You can also manage images and videos by album or create stories.

The screen may appear differently depending on the region or service provider.

Viewing images and videos

Viewing images

1. Launch the Gallery app and tap PICTURES.

2. Select an image.

   - Access additional options.
   - Add the image to favourites.
   - Recognise products in the image and search for information online.
   - Add a sticker.
   - Draw on the image.
   - Apply a filter or effect.
   - Modify the image.
   - Share the image with others.
   - Delete the image.
Editing the Live focus photos

You can edit the background blur level and change the focus of a photo taken with the Live focus feature. When the background lighting appears in blurred points, you can change the shape of the background blur. Select a shape, such as a heart, star, or flower, to decorate the photo and make it look different.

Launch the Gallery app, select a photo taken with the Live focus feature, tap ADJUST BACKGROUND BLUR to edit the blur level.

Searching for images

Launch the Gallery app and tap ☐ to view images sorted by category, such as location, type, and more.

To search for images by entering keywords, tap the search field.

Viewing videos

1. Launch the Gallery app and tap PICTURES.
2. Select a video to play. Video files show the ▶ icon on the preview thumbnail.

Drag your finger up or down on the left side of the playback screen to adjust the brightness, or drag your finger up or down on the right side of the playback screen to adjust the volume.

To rewind or fast-forward, swipe to the left or right on the playback screen.
Viewing albums

You can view your images and videos sorted by folders or albums. The animations or collages you have created will also be sorted in your folders on the albums list.
Launch the Gallery app, tap ALBUMS, and then select an album.

Viewing stories

When you capture or save images and videos, the device will read their date and location tags, sort the images and videos, and then create stories. To create stories automatically, you must capture or save multiple images and videos.

Creating stories

Create stories with various themes.

1. Launch the Gallery app and tap STORIES.
2. Tap → Create story.
3. Tick images or videos to include in the story and tap DONE.
4. Enter a title for the story and tap CREATE.

To add images or videos to a story, select a story and tap ADD.
To remove images or videos from a story, select a story, tap → Edit, tick images or videos to remove, and then tap → Remove from story.

Deleting stories

1. Launch the Gallery app and tap STORIES.
2. Tap and hold a story to delete, and tap DELETE.
Syncing images and videos with Samsung Cloud

You can sync images and videos saved in Gallery with Samsung Cloud and access them from other devices. You must register and sign in to your Samsung account to use Samsung Cloud. Refer to Samsung account for more information.

Launch the Gallery app, tap → Settings, and then tap the Samsung Cloud switch to activate it. Images and videos captured on the device will be automatically saved to Samsung Cloud.

Deleting images or videos

Deleting an image or a video
Select an image or a video and tap at the bottom of the screen.

Deleting multiple images and videos

1. On the Gallery screen, tap and hold an image or a video to delete.
2. Tick the images or videos to delete.
3. Tap DELETE.
Multi window

Introduction

Multi window lets you run two apps at the same time in the split screen view. You can also run multiple apps at the same time in the pop-up view.

Some apps may not support this feature.
Split screen view

1 Tap the Recents button to open the list of recently used apps.

2 Swipe upwards or downwards and tap 📈 on a recent app window. The selected app will launch in the upper window.

3 In the lower window, swipe upwards or downwards to select another app to launch. To launch apps not in the list of recently used apps, tap APP LIST and select an app.
Using additional options

Tap the bar between the app windows to access additional options.

Adjusting the window size

Drag the bar between the app windows up or down to adjust the size of the windows. When you drag the bar between the app windows to the top or bottom edge of the screen, the window will be maximised.
Minimising the split screen view

Press the Home button to minimise the split screen view. The icon will appear on the status bar. The app in the lower window will close and the app in the upper window will remain active in the minimised split screen view.

To close the minimised split screen view, tap \( \times \).

Sharing text or images between windows

Drag and drop text or copied images from one window to another. Tap and hold an item in the selected window and drag it to a location in another window.

Some apps may not support this feature.
Apps and features

Pop-up view

1 Tap the Recents button to open the list of recently used apps.

2 Swipe upwards or downwards, tap and hold an app window, and then drag it to Drop here for pop-up view.
   The app screen will appear in the pop-up view.

   ![Pop-up view diagram](image)
   
   - Minimise the window.
   - Close the app.
   - Maximise the window.

Moving pop-up windows

To move a pop-up window, tap the window’s toolbar and drag it to a new location.

Samsung Pay mini

Register frequently used mobile wallets and UPI (Unified Payments Interface) bank accounts to Samsung Pay mini, a mobile payment service, to make payments quickly and securely.

Open the Samsung folder and launch the Samsung Pay mini app.

- To make payments with Samsung Pay Mini, the device may be required a connection to a Wi-Fi or mobile network.
- This feature may not be available depending on the region or service provider.
Samsung Members

Samsung Members offers support services to customers, such as device problem diagnosis, and lets users submit questions and error reports. You can also view the latest Galaxy news and tips. Samsung Members can help you solve any problems you might encounter while using your device.

- This app's availability and supported features may vary depending on the region or service provider.
- To submit your feedback or post your comments, you must register and sign in to your Samsung account. Refer to Samsung account for more information.
**Samsung Notes**

**Introduction**
Create notes by entering text from the keyboard or by writing or drawing on the screen. You can also insert images or voice recordings into your notes.

**Creating notes**

1. Launch the **Samsung Notes** app and tap **ALL → +**.
2. Select an input method from the toolbar at the top of the screen and compose a note. Tap **→ Image** to insert an image by selecting from **Gallery** or by taking a photo. Tap **→ Voice** to record a voice recording and insert it into the note. Voice recording will start immediately.

3. When you are finished composing the note, tap **SAVE**.

**Deleting notes**

1. Launch the **Samsung Notes** app, tap **ALL** or **COLLECTIONS**, and then select a category.
2. Tap and hold a note to delete. To delete multiple notes, tick more notes to delete.
3. Tap **🗑️**.
Calendar

Introduction
Manage your schedule by entering upcoming events or tasks in your planner.

Creating events

1 Launch the Calendar app and tap + or double-tap a date.
If the date already has saved events or tasks in it, tap the date and tap +.

2 Enter event details.

3 Tap SAVE to save the event.
Creating tasks

1. Launch the Calendar app and tap VIEW → Tasks.
2. Tap and enter task details.
3. Tap SAVE to save the task.

Syncing events and tasks with your accounts

1. Launch the Settings app, tap Cloud and accounts → Accounts, select the account to sync with.
2. Tap Sync account and tap the Sync Calendar switch to activate it.
   For the Samsung account, tap → Sync settings and tap the Calendar switch to activate it.
To add accounts to sync with, launch the Calendar app and tap → Manage calendars → Add account. Then, select an account to sync with and sign in. When an account is added, it will appear on the list.

Samsung Health

Introduction

Samsung Health helps you manage your wellness and fitness. Set fitness goals, check your progress, and keep track of your overall wellness and fitness.

Starting Samsung Health

When running this app for the first time or restart it after performing a data reset, follow the on-screen instructions to complete the setup.

1. Open the Samsung folder and launch the Samsung Health app.
2. Follow the on-screen instructions to complete the setup.
Using Samsung Health

You can view the key information from Samsung Health menus and trackers to monitor your wellness and fitness. You can also compare your step count records with other Samsung Health users, compete with your friends, and view health tips.

Open the Samsung folder and launch the Samsung Health app.

Some features may not be available depending on the region.

To add items to the Samsung Health screen, tap → Manage items, and then select items.

- **GOALS**: Set your daily fitness goals and view your progress.
- **PROGRAMS**: Use customisable exercise programmes.
- **GENERAL TRACKERS**: Monitor your activities, food intake, and body measurements.
- **EXERCISE TRACKERS**: Add trackers of various exercises and monitor your activities.
**TOGETHER**

Together allows you to set up step count goals and compete with your friends. You can invite friends to walk together, set target step counts, compete in challenges, and view your ranking on the **Steps leaderboard**.

On the Samsung Health screen, tap **TOGETHER**.

**Steps**

The device counts the number of steps you take and measures the distance travelled.

On the Samsung Health screen, tap the steps tracker.

- You may experience a brief delay while the steps tracker monitors your steps and then displays your step count. You may also experience a brief delay before the pop-up window indicates that your goal has been reached.
- If you use the steps tracker while travelling by car or train, vibration may affect your step count.
Additional information

• Samsung Health is intended for fitness and wellness purposes only and is not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease.

• The available functions, features and addable applications for Samsung Health may vary from country to country due to different local laws and regulations. You should check the features and applications available in your specific region before use.

• Samsung Health applications and its service can be changed or discontinued without prior notice.

• The purpose for data collection is limited to providing the service that you have requested, including providing additional information to enhance your wellness, sync data, data analysis and statistics or to develop and provide better services. (But if you sign in to your Samsung account from Samsung Health, your data may be saved on the server for data backup purposes.) Personal information may be stored until the completion of such purposes. You can delete personal data stored by Samsung Health by using the Reset data option in the Settings menu. To delete any data you have shared with social networks or transferred to storage devices, you must delete them separately.

• You may share and/or sync your data with additional Samsung services or compatible third party services that you select, as well as with any of your other connected devices. Access to Samsung Health information by such additional services or third party devices will only be permitted with your express approval.

• You assume full responsibility for the inappropriate use of data shared on social networks or transmitted to others. Use caution when sharing your personal data with others.

• If the device is connected to measuring devices, verify the communication protocol to confirm proper operation. If you use a wireless connection, such as Bluetooth, the device may be affected by electronic interference from other devices. Avoid using the device near other devices that transmit radio waves.

• Please read Terms and Conditions and Privacy Policy of Samsung Health carefully before using it.
Voice Recorder

Use this app to record or play voice memos.

1. Open the Samsung folder and launch the Voice Recorder app.

2. Tap 📺 to start recording. Speak into the microphone.
   - Tap 🎤 to pause recording.
   - While making a voice recording, tap BOOKMARK to insert a bookmark.

3. Tap ■ to finish recording.

4. Enter a file name and tap SAVE.
**My Files**

Access and manage various files stored in the device or in other locations, such as cloud storage services.

Open the Samsung folder and launch the My Files app.

View files that are stored in each storage.

To free up the device’s storage, tap → Get more space.

To search for files or folders, tap Q.

**Clock**

**Introduction**

Set alarms, check the current time in many cities around the world, time an event, or set a specific duration.

**ALARM**

Launch the Clock app and tap ALARM.

**Setting alarms**

Tap + in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap SAVE.

To open the keypad to enter an alarm time, tap the time input field.

To activate or deactivate alarms, tap the switch next to the alarm in the alarms list.

**Stopping alarms**

Tap DISMISS to stop an alarm. If you have previously enabled the snooze option, tap SNOOZE to repeat the alarm after a specified length of time.
Deleting alarms
Tap and hold an alarm, tick alarms to delete, and then tap DELETE.

WORLD CLOCK
Launch the Clock app and tap WORLD CLOCK.

Creating clocks
Tap +, enter a city name or select a city from the globe, and then tap ADD.

Deleting clocks
Tap and hold a clock, tick clocks to delete, and then tap DELETE.

STOPWATCH
1 Launch the Clock app and tap STOPWATCH.
2 Tap START to time an event.
   To record lap times while timing an event, tap LAP.
3 Tap STOP to stop timing.
   To restart the timing, tap RESUME.
   To clear lap times, tap RESET.
**TIMER**

1. Launch the **Clock** app and tap **TIMER**.

2. Set the duration, and then tap **START**.
   - To open the keypad to enter the duration, tap the duration input field.

3. Tap **DISMISS** when the timer goes off.

**Calculator**

Perform simple or complex calculations.

Launch the **Calculator** app.

Rotate the device to landscape orientation to display the scientific calculator. If **Auto-rotate** is disabled, tap $$ $$ to display the scientific calculator.

To see the calculation history, tap **HISTORY**. To close the calculation history panel, tap **KEYPAD**.

To clear the history, tap **HISTORY → CLEAR HISTORY**.

To use the unit conversion tool, tap $$. You can convert various values, such as area, length, or temperature, into other units.
Listening to the FM radio

Launch the Radio app.

Before you use this app, you must connect an earphone, which serves as the radio antenna.

The FM radio scans and saves available stations automatically when running for the first time.

Tap ☀️ to turn on the FM radio. Select the radio station you want from the stations list.

- Record a song from the FM radio.
- Search for an available radio station.
- Turn the FM radio on or off.
- Access additional options.
- Enter radio station frequency manually.
- Add the current radio station to the favourites list.
- Fine-tune the frequency.
- View the list of favourites stations.
- View the list of available stations.
- Scan and save available stations automatically.

Playing through the speaker

You can listen to the radio through the speaker instead of the connected earphone.

Tap 🎧 → Play through speaker.
Scanning radio stations

Launch the Radio app.

Tap SCAN, and then select a scan option. The FM radio scans and saves available stations automatically.

Select the radio station you want from the stations list.

Game Launcher

Introduction

Game Launcher gathers your games downloaded from Play Store and Galaxy Apps into one place for easy access. You can set the device to game mode to play games more easily.

- Downloaded apps.
- Open games with or without sound.
- Turn on or off the Game Tools icon.
- Access additional options.
- Search for games.
- View your gameplay information.
- Change the performance mode.

The screen may appear differently depending on the region or service provider.
Using Game Launcher

1. Launch the Settings app, tap Advanced features → Games, and then tap the Game Launcher switch to activate it.

   Game Launcher will be added to the Home screen and the Apps screen.

   When you deactivate the feature, Game Launcher will be removed from the Home screen and the Apps screen.

2. Launch the Game Launcher app.

3. Tap a game from the games list.

   Games downloaded from Play Store and Galaxy Apps will be automatically shown on the game launcher screen. If you cannot see your games, tap → Add a game.

Removing a game from Game Launcher

Tap and hold a game and tap Remove.

Changing the performance mode

You can change the game performance mode.

Launch the Game Launcher app, tap Normal performance, and then tap the button repeatedly to select the mode you want.

- Normal performance: Power saving mode or high performance mode is not used.
- Save power: This decreases the battery power consumption but it will reduce the system performance.

Battery power efficiency may vary by game.
Using Game Tools

You can set the Game Tools icon to be displayed as a floating icon on game screens. Launch the Settings app, tap Advanced features → Games and then tap the Game Tools switch to activate it.

While playing a game, tap 📈 to display the game tools.

To move the icon, tap 📈 and drag it to a new location.

To hide the icon from the current game screen, tap and hold 📈 and drag it to Hide at the top of the screen.

To show the icon on the game screen again, open the notification panel and tap the Game Tools notification.

Blocking notifications during games

Tap 📈 and tap the No alerts during game switch to mute notification sounds and display only notifications for incoming calls and emergency alerts, so that you can enjoy your games without being disturbed. If you receive an incoming call, a small notification will appear at the top of the screen.
Dual Messenger

Install the second app and use two separate accounts for the same messenger app.

1. Launch the Settings app and tap Advanced features → Dual Messenger. Supported apps will appear.

2. Tap the switch of an app to install the second app.
   The second app will be installed. The second app’s icon will be displayed with 📨. When you receive notifications from the second app, the notifications will be displayed with 📨 to distinguish them from the first app’s notifications.

   • The Dual Messenger feature may not be available depending on the app.
   • Some features of the app may be limited for the second app.

Uninstalling a second app

1. Launch the Settings app and tap Advanced features → Dual Messenger.

2. Tap the switch of the app you want to disable and tap DISABLE or UNINSTALL.
   All data related to the second app will be deleted.

   If you uninstall the first app, the second app will also be deleted.
**SmartThings**

**Introduction**

Connect to nearby devices, such as Bluetooth headsets or other smartphones, easily and quickly. You can also control and manage TVs, home appliances, and Internet of Things (IoT) products with your smartphone.

- Connecting with nearby devices: Quickly search for nearby devices, such as Bluetooth headsets or wearable devices, and connect with them.
- Registering and controlling home appliances, TVs, and IoT products: Register smart refrigerators, washers, robot vacuums, TVs, AVs, and Internet of Things (IoT) products on your smartphone, and view their status or control them from your smartphone’s screen. You can group devices by location and set multiple devices to operate automatically at preset times.

- Your smartphone and other devices must be connected to a Wi-Fi or mobile network.
- The devices you can connect using SmartThings may vary depending on the region or service provider. To see the list of connectable devices, open the **Samsung** folder, launch the **SmartThings** app, and then tap **SUPPORTED DEVICES**.
- Available features may differ depending on the connected device.
- Connected devices' own errors or defects are not covered by the Samsung warranty. When errors or defects occur on the connected devices, contact the device’s manufacturer.
Open the Samsung folder and launch the SmartThings app. The dashboard will appear.

Connecting to nearby devices

Connect to nearby devices, such as Bluetooth headsets, easily and quickly.

Connection methods may vary depending on the type of connected devices or the shared content.

1. Open the Samsung folder and launch the SmartThings app.

2. Follow the pop-up window’s instructions to turn on the Wi-Fi and Bluetooth auto on feature.

   When you launch the SmartThings app, the Wi-Fi and Bluetooth features will be automatically activated.

3. On the dashboard, tap Add device.

   The device will automatically search for nearby devices.

4. Select a device from the list and connect to it by following the on-screen instructions.

   Once the connection is made, you can use the device or share the content.
Using home appliances, TVs, and IoT products

View the status of your smart appliances, TVs, and IoT products from your smartphone’s screen. You can group devices by location and add automations to control the devices easily and conveniently.

Registering devices

1. Open the Samsung folder and launch the SmartThings app.

2. On the dashboard, tap Add device.

3. Select a device from the list.
   - To manually register devices, tap  under ADD DEVICE MANUALLY and select a device type or tap Search to enter the device name or device’s model name.

4. Follow the on-screen instructions to register devices.

Viewing and controlling registered devices

You can view and control your registered devices. For example, you can check whether your TV is on or what is in your fridge.

1. Open the Samsung folder and launch the SmartThings app.

2. Tap Devices.
   - The list of registered devices will appear.

3. View the status of devices on the list.
   - To control the devices, select a device. The device controller supplied with the selected device will be downloaded and then you can control the device.

Adding devices and scenes by locations

Add devices by locations, view the list of devices in a same location, and control them. You can also add a scene to a location to control multiple devices at the same time.

Open the Samsung folder, launch the SmartThings app, and then tap Devices.
Apps and features

Adding locations

1 Tap ALL DEVICES → Add location.

2 Enter the location name.
   To set a location, tap Geolocation to select a location on the map and tap DONE.

3 Tap SAVE.
   Your location will be added.

Adding devices to a location

Select a location, tap ADD DEVICE, select a device from the AVAILABLE DEVICES list, and then follow the on-screen instructions to register devices.

The devices will be added to the location.

Adding scenes

Add a scene and register devices to it to control multiple devices at the same time with a single tap of a button or with a voice command.

Select a location, tap → Add scene, and set scene options. You can set the scene name, icon, and devices.

Adding automations

You can also set an automation to perform actions automatically depending on the preset time or the status of devices.

For example, add an automation to turn on the audio automatically every day at 7:00 AM.

1 Open the Samsung folder and launch the SmartThings app and tap Automations → ADD AUTOMATION.

2 Tap When do you want to use this automation? and set the conditions.

3 Tap What do you want this automation to do? and set devices and actions to perform.
   To receive a notification when an automation runs, tap Notify me, enter the message, and then tap DONE.
Sharing content

Share content by using various sharing options. The following actions are an example of sharing images.

You may incur additional charges when sharing files via the mobile network.

1. Launch the Gallery app and select an image.
2. Tap and select a sharing method, such as message and email.

When you have a communication or sharing history, the people you contacted will appear on the sharing options panel. To directly share content with them via the corresponding app, select a person’s icon. If the feature is not activated, launch the Settings app, tap Advanced features, and then tap the Direct share switch to activate it.

Using additional features

- Link Sharing: Share large files. Upload files to the Samsung storage server and share them with others via a Web link or a code. To use this feature, your phone number must be verified.
- Share to device: Share content with nearby devices via Wi-Fi Direct or Bluetooth, or with SmartThings supported devices. You can also view your device’s displayed content on a large screen by connecting your device to a screen mirroring-enabled TV or monitor.

When the image is sent to the recipients’ devices, a notification will appear on their devices. Tap the notification to view or download the image.
Google apps

Google provides entertainment, social network, and business apps. You may require a Google account to access some apps.

To view more app information, access each app's help menu.

Some apps may not be available or may be labelled differently depending on the region or service provider.

Chrome

Search for information and browse webpages.

Gmail

Send or receive emails via the Google Mail service.

Maps

Find your location on the map, search the world map, and view location information for various places around you.

Play Music

Discover, listen to, and share music on your device. You can upload music collections stored on your device to the cloud and access them later.

Play Movies & TV

Purchase or rent videos, such as movies and TV programmes, from Play Store.

Drive

Store your content on the cloud, access it from anywhere, and share it with others.
Apps and features

**YouTube**
Watch or create videos and share them with others.

**Photos**
Search for, manage, and edit all your photos and videos from various sources in one place.

**Google**
Search quickly for items on the Internet or your device.

**Duo**
Make a simple video call.
Settings

Introduction

Customise settings for functions and apps. You can make your device more personalised by configuring various setting options.

Launch the Settings app.

To search for settings by entering keywords, tap Search or Q.

Connections

Options

Change settings for various connections, such as the Wi-Fi feature and Bluetooth.

On the Settings screen, tap Connections.

- **Wi-Fi**: Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices. Refer to Wi-Fi for more information.
- **Bluetooth**: Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices. Refer to Bluetooth for more information.
- **Phone visibility**: Allow other devices to find your device to share content with you. When this feature is activated, your device will be visible to other devices when they search for available devices using their Transfer files to device option.
- **Data usage**: Keep track of your data usage amount and customise the settings for the limitation. Set the device to automatically disable the mobile data connection when the amount of mobile data you have used reaches your specified limit.
  You can also activate the data saver feature to prevent some apps running in the background from sending or receiving data. Refer to Data saver for more information.
- **Flight mode**: Set the device to disable all wireless functions on your device. You can use only non-network services.
  Make sure the device is turned off during takeoff and landing. After takeoff, you can use the device in flight mode if allowed by aircraft personnel.
• **Mobile Hotspot and Tethering:** Use the device as a mobile hotspot to share the device’s mobile data connection with other devices when the network connection is not available. Connections can be made via Wi-Fi, USB, or Bluetooth. Refer to **Mobile Hotspot and Tethering** for more information.

• **Mobile networks:** Configure your mobile network settings.

• **SIM card manager:** Activate your SIM or USIM cards and customise the SIM card settings. Refer to **SIM card manager (dual SIM models)** for more information.

• **Location:** Change settings for location information permissions.

• **More connection settings:** Customise settings to control other features. Refer to **More connection settings** for more information.

## Wi-Fi

Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices.

⚠️ Turn off Wi-Fi to save the battery when not in use.

### Connecting to a Wi-Fi network

1. On the Settings screen, tap **Connections → Wi-Fi**, and then tap the switch to activate it.

2. Select a network from the Wi-Fi networks list.

   Networks that require a password appear with a lock icon. Enter the password and tap **CONNECT**.

   • Once the device connects to a Wi-Fi network, the device will reconnect to that network each time it is available without requiring a password. To prevent the device connecting to the network automatically, select it from the list of networks and tap **FORGET**.

   • If you cannot connect to a Wi-Fi network properly, restart your device’s Wi-Fi feature or the wireless router.
**Wi-Fi Direct**

Wi-Fi Direct connects devices directly via a Wi-Fi network without requiring an access point.

1. On the Settings screen, tap **Connections** → **Wi-Fi**, and then tap the switch to activate it.

2. Tap **Wi-Fi Direct**.
   
   The detected devices are listed.
   
   If the device you want to connect to is not in the list, request that the device turns on its Wi-Fi Direct feature.

3. Select a device to connect to.
   
   The devices will be connected when the other device accepts the Wi-Fi Direct connection request.

**Sending and receiving data**

You can share data, such as contacts or media files, with other devices. The following actions are an example of sending an image to another device.

1. Launch the **Gallery** app and select an image.

2. Tap ⚽️ → **Wi-Fi Direct** and select a device to transfer the image to.

3. Accept the Wi-Fi Direct connection request on the other device.
   
   If the devices are already connected, the image will be sent to the other device without the connection request procedure.

**Ending the device connection**

1. On the Settings screen, tap **Connections** → **Wi-Fi**.

2. Tap **Wi-Fi Direct**.

   The device displays the connected devices in the list.

3. Tap the device name to disconnect the devices.
**Bluetooth**

Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices.

- Samsung is not responsible for the loss, interception, or misuse of data sent or received via Bluetooth.

- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.

- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.

- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes).

  Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

**Pairing with other Bluetooth devices**

1. On the Settings screen, tap **Connections → Bluetooth**, and then tap the switch to activate it.

   The detected devices will be listed.

2. Select a device to pair with.

   If the device you want to pair with is not in the list, request that the device turns on its visibility option. Refer to the other device’s user manuals.

   Your device is visible to other devices while the Bluetooth settings screen is open.

3. Accept the Bluetooth connection request on your device to confirm.

   The devices will be connected when the other device accepts the Bluetooth connection request.
**Sending and receiving data**

Many apps support data transfer via Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

1. Launch the **Gallery** app and select an image.

2. Tap → **Bluetooth**, and then select a device to transfer the image to.
   - If your device has paired with the device before, tap the device name without confirming the auto-generated passkey.
   - If the device you want to pair with is not in the list, request that the device turns on its visibility option.

3. Accept the Bluetooth connection request on the other device.

**Unpairing Bluetooth devices**

1. On the Settings screen, tap **Connections → Bluetooth**.
   - The device displays the paired devices in the list.

2. Tap next to the device name to unpair.

3. Tap **Unpair**.
**Data saver**

Reduce your data usage by preventing some apps running in the background from sending or receiving data.

On the Settings screen, tap **Connections → Data usage → Data saver** and tap the switch to activate it.

When the data saver feature is activated, the 🔄 icon will appear on the status bar.

![Data saver feature activated](image)

To select apps to use data without restriction, tap **Allow app while Data saver on** and select apps.

**Mobile Hotspot and Tethering**

Use the device as a mobile hotspot to share the device's mobile data connection with other devices when the network connection is not available. Connections can be made via Wi-Fi, USB, or Bluetooth.

On the Settings screen, tap **Connections → Mobile Hotspot and Tethering**.

You may incur additional charges when using this feature.

- **Mobile Hotspot**: Use the mobile hotspot to share the device's mobile data connection with computers or other devices.
- **Bluetooth tethering**: Use Bluetooth tethering to share the device's mobile data connection with computers or other devices via Bluetooth.
- **USB tethering**: Use USB tethering to share the device's mobile data connection with a computer via USB. When connected to a computer, the device is used as a wireless modem for the computer.
Using the mobile hotspot

Use your device as a mobile hotspot to share your device’s mobile data connection with other devices.

1 On the Settings screen, tap **Connections → Mobile Hotspot and Tethering → Mobile Hotspot**.

2 Tap the switch to activate it.
   
   The ☑️ icon appears on the status bar. Other devices can find your device in the Wi-Fi networks list.
   
   To set a password for the mobile hotspot, tap ☑️ → **Configure Mobile Hotspot** and select the level of security. Then, enter a password and tap **SAVE**.

3 On the other device’s screen, search for and select your device from the Wi-Fi networks list.

4 On the connected device, use the device’s mobile data connection to access the Internet.

**SIM card manager** *(dual SIM models)*

Activate your SIM or USIM cards and customise the SIM card settings. Refer to **Using dual SIM or USIM cards (dual SIM models)** for more information.

On the Settings screen, tap **Connections → SIM card manager**.

- **Calls**: Select a SIM or USIM card for voice calls.
- **Text messages**: Select a SIM or USIM for messaging.
- **Mobile data**: Select a SIM or USIM card for data services.
- **Confirm SIM card for calls**: Set the device to display the SIM or USIM card selection pop-up window when returning a call or calling from a message. The pop-up window will appear only if the SIM or USIM card used for the previous call or message is different from your preferred SIM or USIM card.
- **Smart dual SIM**: Set the device to allow incoming calls from the other SIM or USIM card during a call.

   When this feature is enabled, you may incur additional charges for call forwarding depending on the region or service provider.
**More connection settings**

Customise settings to control other features.

On the Settings screen, tap **Connections → More connection settings**.

- **Nearby device scanning**: Set the device to scan for nearby devices to connect to.
- **Printing**: Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files. Refer to **Printing** for more information.
- **VPN**: Set up virtual networks (VPNs) on your device to connect to a school or company's private network.

**Printing**

Configure settings for printer plug-ins installed on the device. You can connect the device to a printer via Wi-Fi or Wi-Fi Direct, and print images or documents.

Some printers may not be compatible with the device.

**Adding printer plug-ins**

Add printer plug-ins for printers you want to connect the device to.

1. On the Settings screen, tap **Connections → More connection settings → Printing → Add service**.

2. Search for a printer plug-in in **Play Store**.

3. Select a printer plug-in and install it.
4 Select the printer plug-in and tap the switch to activate it. The device searches for printers that are connected to the same Wi-Fi network as your device.

5 Select a printer to add.

To add printers manually, tap Settings → Add printer.

Printing content
While viewing content, such as images or documents, access the options list, tap Print → All printers..., and then select a printer.

Printing methods may vary depending on the content type.

## Sounds and vibration

Change settings for various sounds on the device.

On the Settings screen, tap Sounds and vibration.

- **Sound mode**: Set the device to use sound mode, vibration mode, or silent mode.
- **Vibrate while ringing**: Set the device to vibrate and play a ringtone for incoming calls.
- **Use Volume keys for media**: Set the device to adjust the media volume level when you press the Volume key.
- **Volume**: Adjust the volume level for call ringtones, music and videos, system sounds, and notifications.
- **Ringtone**: Change the ringtones for calls or notifications.
- **Vibration pattern**: Select a vibration pattern.
- **Notification sounds**: Change the notification sound settings.
- **Do not disturb**: Set the device to mute incoming calls, notification sounds, and media, except for allowed exceptions.
- **Touch sounds**: Set the device to sound when you select an app or option on the touchscreen.
• **Screen lock sounds**: Set the device to sound when you lock or unlock the touchscreen.
• **Charging sound**: Set the device to sound when it is connected to a charger.
• **Dialling keypad tones**: Set the device to sound when you tap the buttons on the keypad.
• **Keyboard sound**: Set the device to sound when a key is touched.
• **Sound quality and effects**: Configure additional sound settings.
• **Separate app sound**: Set the device to play media sound from a specific app on the connected Bluetooth speaker or headset separate from the sound of other apps. For example, you can listen to the Navigation app through your device’s speaker while listening to playback from the Music app through the vehicle’s Bluetooth speaker.

**Notifications**

Change the notification settings for each app.

On the Settings screen, tap **Notifications**.

To display icon badges, tap the **App icon badges** switch to activate it. To customise the settings, tap **App icon badges**.

To customise notification settings, tap **ADVANCED** and select an app.

**Display**

**Options**

Change the display and the Home screen settings.

On the Settings screen, tap **Display**.

• **Brightness**: Adjust the brightness of the display.
• **Outdoor mode**: Activate outdoor mode to make the display easier to see in bright conditions.
• **Font and screen zoom**: Change the screen zoom setting or font size and style.
• **Screen mode**: Change the screen mode to adjust the display’s colour and contrast. Refer to **Changing the screen mode or adjusting the display colour** for more information.
• **Home screen**: Change the size of the grid to display more or fewer items on the Home screen and more.

• **Easy mode**: Switch to easy mode to display larger icons and apply a simpler layout to the Home screen.

• **Icon frames**: Set whether to display shaded backgrounds to make icons stand out.

• **Status bar**: Customise the settings for displaying notifications or indicators on the status bar.

• **Screen timeout**: Set the length of time the device waits before turning off the display’s backlight.

• **Screensaver**: Set the device to launch a screensaver when the device is charging. Refer to Screensaver for more information.

### Changing the screen mode or adjusting the display colour

Select a screen mode suitable for viewing movies or images, or adjust the display colour to your preference. If you select the **Adaptive display** mode, you can adjust the display colour balance by colour value.

#### Changing the screen mode

On the Settings screen, tap **Display → Screen mode** and select a mode you want.

• **Adaptive display**: This optimises the colour range, saturation, and sharpness of your display. You can also adjust the display colour balance by colour value.

• **AMOLED cinema**: This is suitable for watching videos.

• **AMOLED photo**: This is suitable for viewing images.

• **Basic**: This is set as default and is suitable for general use.

- You can adjust the display colour only in **Adaptive display** mode.

- **Adaptive display** mode may not be compatible with third-party apps.

- You cannot change the screen mode while applying the blue light filter.
Optimising the full screen colour balance

Optimise the display colour by adjusting the colour tones to your preference. When you drag the colour adjustment bar towards Cool, the blue colour tone will increase. When you drag the bar towards Warm, the red colour tone will increase.

1. On the Settings screen, tap Display → Screen mode → Adaptive display.
2. Adjust the colour adjustment bar under Full screen colour balance. The colour balance of the screen will be optimised.

Adjusting the screen tone by colour value

Increase or lower certain colour tones by adjusting the Red, Green, or Blue value individually.

1. On the Settings screen, tap Display → Screen mode → Adaptive display.
2. Tick Advanced options.
3. Adjust the Red, Green, or Blue colour bar to your preference. The screen tone screen will be adjusted.
**Screensaver**

You can set to display images as a screensaver when the screen turns off automatically. The screensaver will be displayed when the device is charging.

1. On the Settings screen, tap **Display → Screensaver** and tap the switch to activate it.

2. Select an option.
   - If you select **Photo Frame**, a slideshow with selected images will start. If you select **Photo Table**, selected images will appear as small cards and overlap.

3. Tap 📀 to select albums for displaying images.

4. When you are finished, tap the Back button.
   - To preview the selected option, tap **PREVIEW**.

   When you tap the screen while your screensaver is displayed, the screen will turn on.

**Wallpapers and themes**

Change the wallpaper settings for the Home screen and the locked screen or apply various themes to the device.

On the Settings screen, tap **Wallpapers and themes**.

- **Wallpapers**: Change the wallpaper settings for the Home screen and the locked screen.
- **Themes**: Change the device’s theme.
- **Icons**: Change the icon style.
Advanced features

Activate advanced features and change the settings that control them. On the Settings screen, tap Advanced features.

![Warning]
Excessive shaking or an impact to the device may cause an unintended input for some features using sensors.

- **Games**: Activate the Game Launcher. Refer to Game Launcher for more information.
- **One-handed mode**: Activate one-handed operation mode for your convenience when using the device with one hand.
  
  ![Warning]
  This feature may not be available depending on the region or service provider.

- **Quick launch Camera**: Set the device to launch the camera by pressing the Power key twice quickly.
  
  ![Warning]
  This feature may not be available depending on the region or service provider.

- **Multi window**: Select a Multi window launch method.
- **Smart alert**: Set the device to alert you if you have missed calls or new messages when you pick up the device.
  
  ![Warning]
  This feature may not work if the screen is turned on or the device is not on a flat surface.

- **Swipe to call or send messages**: Set the device to make a call or send a message when you swipe to the right or left on a contact or a phone number.
- **Dual Messenger**: Install the second app and use two separate accounts for the same messenger app. Refer to Dual Messenger for more information.
- **Panic mode** or **Send SOS messages**: Set the device to send help messages by pressing the Power key three times.
- **Direct share**: Set the device to display the people you contacted on the sharing options panel to allow you to share content directly.
Device maintenance

The device maintenance feature provides an overview of the status of your device’s battery, storage, memory, and system security. You can also automatically optimise the device with a tap of your finger.

Using the quick optimisation feature

On the Settings screen, tap Device maintenance → FIX NOW or OPTIMISE NOW.

The quick optimisation feature improves device performance through the following actions.

- Clearing some memory.
- Deleting unnecessary files and closing apps running in the background.
- Managing abnormal battery usage.
- Scanning for crashed apps and malware.
**Battery**

Check the remaining battery power and time to use the device. For devices with low battery levels, conserve battery power by activating power saving features.

On the Settings screen, tap **Device maintenance → Battery**.

- The usage time left shows the time remaining before the battery power runs out. Usage time left may vary depending on your device settings and operating conditions.
- You may not receive notifications from some apps that use power saving mode.

**Power saving mode**

- **MID**: Activate power saving mode to extend the battery’s usage time.
- **MAX**: In maximum power saving mode, the device decreases battery consumption by applying the dark theme and limiting the apps and features available. Network connections, except for the mobile network, will be deactivated.

**Managing the battery**

You can save battery power by preventing apps that are running in the background from using battery power when they are not being used. Tick apps from the apps list and tap **SAVE POWER**. Also, tap **→ Advanced settings** and set the **App power monitor** options.

**Storage**

Check the status of the used and available memory.

On the Settings screen, tap **Device maintenance → Storage**.

- The actual available capacity of the internal memory is less than the specified capacity because the operating system and default apps occupy part of the memory. The available capacity may change when you update the device.
- You can view the available capacity of the internal memory in the Specification section for your device on the Samsung website.
Managing the memory

To delete residual files, such as cache, tap **CLEAN NOW**. To delete files or uninstall apps that you do not use any more, select a category under **USER DATA**. Then, tick items to select and tap **DELETE** or **UNINSTALL**.

**Memory**

On the Settings screen, tap **Device maintenance → Memory**.

To speed up your device by reducing the amount of memory you are using, tick apps from the apps list, and tap **CLEAN NOW**.

**Device security**

Check the device’s security status. This feature scans your device for malware.

On the Settings screen, tap **Device maintenance → Device security → SCAN PHONE**.

**Ultra data saving**

Monitor and reduce your mobile data usage by preventing background apps from using the mobile data connection. You can also use the data compression feature to compress Internet data, such as images, videos, and webpages, accessed via the mobile network.

- This feature may not be available depending on the region or service provider.
- Some webpages or content may not be available when this feature is activated, depending on the service provider or the mobile network conditions.
On the Settings screen, tap **Device maintenance → Ultra data saving**, and then tap the switch to activate it.

Activate the Opera Max data compression feature to compress Internet data when using the mobile network.

Select apps that are allowed to use the mobile data connection in the background.

You can change the data usage monitoring period. On the Settings screen, tap **Connections → Data usage → Billing cycle and data warning → Start billing cycle on**, and then change the start date of the cycle.

**Apps**

Manage the device’s apps and change their settings. You can view the apps’ usage information, change their notification or permission settings, or uninstall or disable unnecessary apps.

On the Settings screen, tap **Apps**.
Lock screen

Options

Change the settings for the locked screen.

On the Settings screen, tap Lock screen.

The available options may vary depending on the screen lock method selected.

- **Screen lock type**: Change the screen lock method.
- **Smart Lock**: Set the device to unlock itself when trusted locations or devices are detected. Refer to Smart Lock for more information.
- **Secure lock settings**: Change screen lock settings for the selected lock method.
- **Clock style**: Change the type and colour of the clock on the locked screen.
- **Roaming clock**: Change the clock to show both the local and home time zones on the locked screen when roaming.
- **FaceWidgets**: Set whether or not to allow access to useful widgets on the locked screen.
- **Contact information**: Set the device to show contact information, such as your email address, on the locked screen.
- **Notifications**: Set whether or not to show notifications on the locked screen and select which notifications to display.
- **App shortcuts**: Select apps to display shortcuts to them on the locked screen.
**Smart Lock**

You can set the device to unlock itself and remain unlocked when trusted locations or devices are detected.

For example, if you have set your home as a trusted location, when you get home your device will detect the location and automatically unlock itself.

- This feature will be available to use after you set a screen lock method.
- If you do not use your device for four hours or when you turn on the device, you must unlock the screen using the pattern, PIN, or password you set.

1. On the Settings screen, tap **Lock screen** → **Smart Lock**.
2. Unlock the screen using the preset screen lock method.
3. Select an option and follow the on-screen instructions to complete the setting.

**Biometrics and security**

**Options**

Change the settings for securing the device.

On the Settings screen, tap **Biometrics and security**.

- **Face Recognition**: Set the device to unlock the screen by recognising your face. Refer to **Face recognition** for more information.
- **Fingerprint Scanner**: Register your fingerprint to the device to secure the device or sign in to your Samsung account. Refer to **Fingerprint recognition** for more information.
- **Google Play Protect**: Set the device to check for harmful apps and behaviour and warn about potential harm and remove them.
• **Find My Mobile**: Activate or deactivate the Find My Mobile feature. Access the Find My Mobile website (findmymobile.samsung.com) to track and control your lost or stolen device.

You can also locate your device or control the device remotely by using the Find My Device service provided by Google.

• **Security update**: View the version of your device’s security system and check for updates.

• **Install unknown apps**: Set the device to allow the installation of apps from unknown sources.

• **Samsung Pass**: Verify your identity easily and securely via your biometric data. Refer to Samsung Pass for more information.

• **Secure Folder**: Create a secure folder to protect your private content and apps from others. Refer to Secure Folder for more information.

• **App permission monitor**: Set to receive notifications when the permissions you select are used by apps that you are not using. You can manage the settings of each app and view their permission usage history.

• **Secure startup**: Protect your device by setting it to require a screen unlock code when turning on the device. You must enter the unlock code to start the device and receive messages and notifications.

• **Encrypt SD card**: Set the device to encrypt files on a memory card.

⚠️ If you reset your device to the factory defaults with this setting enabled, the device will not be able to read your encrypted files. Disable this setting before resetting the device.

• **Other security settings**: Configure additional security settings.
Face recognition

You can set the device to unlock the screen by recognising your face.

- Your device could be unlocked by someone or something that looks like your image.
- Face recognition is less secure than Pattern, PIN, or Password.
- Consider the following when using face recognition:
  - Consider the conditions when registering, such as wearing glasses, hats, masks, beards, or heavy makeup
  - Ensure that you are in a well-lit area and that the camera lens is clean when registering
  - Ensure your image is not blurry for better match results
- If you use your face as a screen lock method, your face cannot be used to unlock the screen when turning on the device. To use the device, you must unlock the screen using a pattern, PIN, or password you set when registering the face. Be careful not to forget your pattern, PIN, or password.

Registering your face

For better face registration, register your face indoors and out of direct sunlight.

2. Unlock the screen using the preset screen lock method.
   If you have not set a screen lock method, create one.
3. Read the on-screen instructions and tap CONTINUE.
4 Hold the device with the screen facing towards you and look at the screen.

5 Position your face inside the circle on the screen.
   The camera will scan your face.
   When a face lock screen appears, tap **TURN ON** to use your face to unlock the screen.

   If unlocking the screen with your face is not working properly, tap **Remove face data**
   to remove your registered face and register your face again.

**Unlocking the screen with face recognition**

You can unlock the screen with your face instead of using a pattern, PIN, or password.

1 On the Settings screen, tap **Biometrics and security → Face Recognition**.

2 Unlock the screen using the preset screen lock method.

3 Tap the **Face unlock** switch to activate it.

   If you want to reduce the possibility of recognising faces in photos or videos, tap the
   **Faster recognition** switch to deactivate it. This may decrease the face recognition
   speed.

4 On the locked screen, look at the screen.
   When your face is recognised, you can unlock the screen without using any additional
   screen lock method. If your face is not recognised, use the preset screen lock method.
Fingerprint recognition

In order for fingerprint recognition to function, your fingerprint information needs to be registered and stored in your device. After registering, you can set the device to use your fingerprint for the features below:

- Samsung Pass (Samsung account verification and web sign-in)
- Samsung Pay mini
- Screen lock
- Secure Folder

- This feature may not be available depending on the region or service provider.
- Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing two different fingerprints is very low. However, in rare cases where separate fingerprints are very similar the sensor may recognise them as identical.
- If you use your fingerprint as a screen lock method, your fingerprint cannot be used to unlock the screen when turning on the device. To use the device, you must unlock the screen using a pattern, PIN, or password you set when registering the fingerprint. Be careful not to forget your pattern, PIN, or password.
- If your fingerprint is not recognised, unlock the device using the pattern, PIN, or password you set when registering the fingerprint, and then re-register your fingerprints. If your pattern, PIN, or password is forgotten, you will not be able to use the device if you do not reset it. Samsung is not responsible for any data loss or inconvenience caused by forgotten unlock codes.
For better fingerprint recognition

When you scan your fingerprints on the device, be aware of the following conditions that may affect the feature’s performance:

- The Home key recognises fingerprints. Ensure that the Home key is not scratched or damaged by metal objects, such as coins, keys, and necklaces.
- Covering the fingerprint recognition area with protective films, stickers, or other accessories may decrease the fingerprint recognition rate. If the fingerprint recognition area is initially covered with a protective film, remove it before using the Home key.
- Ensure that the fingerprint recognition area and your fingers are clean and dry.
- The device may not recognise fingerprints that are affected by wrinkles or scars.
- The device may not recognise fingerprints from small or thin fingers.
- If you bend your finger or use a fingertip, the device may not recognise your fingerprints. Make sure to cover the entire Home key with your finger.
- To improve recognition performance, register fingerprints of the hand used most often to perform tasks on the device.
- In dry environments, static electricity can build up in the device. Avoid using this feature in dry environments or before using the feature, discharge static electricity by touching a metal object.

Registering fingerprints

1. On the Settings screen, tap **Biometrics and security → Fingerprint Scanner**.

2. Unlock the screen using the preset screen lock method.
   
   If you have not set a screen lock method, create one.
3 Place your finger on the Home key.

4 After the device detects your finger, lift it up and place it on the Home key again. Repeat this action until the fingerprint is registered. When you are finished registering your fingerprints, tap **DONE**.

When a fingerprint lock screen appears, tap **TURN ON** to use your fingerprint to unlock the screen.

**Deleting fingerprints**

You can delete registered fingerprints.

1 On the Settings screen, tap **Biometrics and security → Fingerprint Scanner**.

2 Unlock the screen using the preset screen lock method.

3 Tap **EDIT**.

4 Tick fingerprints to delete and tap **REMOVE**.
Using Samsung Pass

When you register your fingerprints to Samsung Pass, you can use them to easily verify your identity or sign in to websites. Refer to Samsung Pass for more information.

Using fingerprints with Samsung Pay mini

You can use fingerprints with Samsung Pay mini to make payments quickly and securely. Refer to Samsung Pay mini for more information.

![Warning] Samsung Pay mini may not be available depending on the region or service provider.

Unlocking the screen with fingerprints

You can unlock the screen with your fingerprint instead of using a pattern, PIN, or password.

2. Unlock the screen using the preset screen lock method.

3. Tap the Fingerprint unlock switch to activate it.

4. On the locked screen, place your finger on the Home key and scan your fingerprint.

**Samsung Pass**

Samsung Pass allows you to sign in to your Samsung account, websites, or apps more easily and securely via your biometric data rather than entering your login information.

Register your biometric data to Samsung Pass and set to sign in to supported websites or apps using the data via Samsung Pass.

- To use this feature, your device must be connected to a Wi-Fi or mobile network.
- To use this feature, you must register and sign in to your Samsung account. For more information, refer to Samsung account.
- The website sign-in feature is only available for websites that you access via the Internet app. Some websites may not support this feature.

**Registering Samsung Pass**

Before using Samsung Pass, register your biometric data to Samsung Pass.

1. On the Settings screen, tap **Biometrics and security → Samsung Pass**.
2. Read the on-screen instructions and tap **SIGN IN**.
3. Enter your Samsung account ID and password and tap **SIGN IN**.
4. Tap **DONE** to finish registering your Samsung account.
5. Tap **REGISTER FINGERPRINTS** and register your fingerprints.
   Refer to Fingerprint recognition for more information.
6. Scan your fingerprint and tap **NEXT** to complete the Samsung Pass registration.
   If the Add to Home screen option is ticked, the Samsung Pass icon will be added on the Home screen.
Verifying the Samsung account password

You can use Samsung Pass to verify your Samsung account password. You can use your biometric data instead of entering your password, for example, when you purchase content from Galaxy Apps.

1. On the Settings screen, tap **Biometrics and security** → **Samsung Pass**.

2. Unlock the screen using the preset screen lock method.

3. Tap **Settings** → **Samsung account** and tap the **Use with Samsung Pass** switch to activate it.

Using Samsung Pass to sign in to websites

You can use Samsung Pass to easily sign in to websites that support ID and password autofill.

1. Open a website that you want to sign in to.

2. Enter your user name and password, and then tap the website’s sign in button.

3. When a pop-up window asking whether you want to save the sign-in information appears, tick **Sign in using fingerprints via Samsung Pass** and tap **REMEMBER**.

You can now use the biometric data you registered to Samsung Pass when signing in to the website.

Using Samsung Pass to sign in to apps

You can use Samsung Pass to easily sign in to apps that support ID and password autofill.

1. Open an app that you want to sign in to.

2. Enter your user name and password, and then tap the app’s sign in button.

3. When a pop-up window asking whether you want to save the sign-in information appears, tap **SAVE**.

You can now use the biometric data you registered to Samsung Pass when signing in to the app.
Managing sign-in information

View the list of websites you have set to use Samsung Pass and manage your sign-in information.

2. Unlock the screen using the preset screen lock method.
3. Select a website from the list.
4. Tap → Edit and modify your ID, password, and the website’s name.
   To delete the website, tap → Delete.

Using Samsung Pass with websites and apps

When using websites or apps that support Samsung Pass, you can easily sign in with Samsung Pass.

To see the list of websites and apps that support Samsung Pass, open the Settings screen, tap Biometrics and security → Samsung Pass, and then select the site or app tab. If there are no websites or apps that support Samsung Pass, the site or app tab will not appear.

- Available websites and apps may vary depending on the region or service provider.
- Samsung is not responsible for any loss or inconvenience caused by signing in to websites or apps via Samsung Pass.

Deleting your Samsung Pass data

You can delete your biometric data, web sign-in information, and app data registered to Samsung Pass with Delete data. Your agreement to the terms and conditions and your Samsung account will remain active.

2. Unlock the screen using the preset screen lock method.
3 Tap Settings → Delete data.

4 Enter your Samsung account password. Your Samsung Pass data will be deleted.

**Secure Folder**

Secure Folder protects your private content and apps, such as photos and contacts, from being accessed by others. You can keep your private content and apps secure even when the device is unlocked.

⚠️ Secure Folder is a separate, secured storage area. The data in Secure Folder cannot be transferred to other devices via unapproved sharing methods, such as USB or Wi-Fi Direct. Attempting to customise the operating system or modifying software will cause Secure Folder to be automatically locked and inaccessible. Before saving data in Secure Folder, make sure to back up a copy of the data in another secure location.
Setting up Secure Folder

1. Launch the Secure Folder app. Alternatively, launch the Settings app and tap Biometrics and security → Secure Folder.

2. Tap START.

3. Tap SIGN IN and sign in to your Samsung account.

4. Read and agree to the terms and conditions and tap AGREE.

5. Tap DONE to finish registering your Samsung account.

6. Select a lock method to use for Secure Folder and follow the on-screen instructions to complete the setup.

   To change the name or icon of Secure Folder, tap Secure Folder → Customise icon.

- When you launch the Secure Folder app, you must unlock the app using your preset lock method.
- If you forget your Secure Folder unlock code, you can reset it using your Samsung account. Tap the reset button at the bottom of the locked screen, and enter your Samsung account password.

Setting auto lock for Secure Folder

Set the device to automatically lock Secure Folder when it is not being used.

1. Launch the Secure Folder app and tap Settings → Auto lock Secure Folder.

2. Select a lock option.

   To manually lock your Secure Folder, tap Lock.
Moving content to Secure Folder
Move content, such as photos and contacts, to Secure Folder. The following actions are an example of moving an image from the default storage to Secure Folder.

1. Launch the **Secure Folder** app and tap **Add files**.
2. Tap **Images**, tick images to move, and then tap **DONE**.
3. Tap **MOVE**.
   The selected items will be deleted from the original folder and moved to Secure Folder.
   To copy items, tap **COPY**.

The method for moving content may vary depending on the content type.

Moving content from Secure Folder
Move content from Secure Folder to the corresponding app in the default storage. The following actions are an example of moving an image from Secure Folder to the default storage.

1. Launch the **Secure Folder** app and tap **Gallery**.
2. Select an image and tap → **Move out of Secure Folder**.
   The selected items will be moved to **Gallery** in the default storage.

Adding apps
Add an app to use in Secure Folder.

1. Launch the **Secure Folder** app and tap **Add apps**.
2. Tick one or more apps installed on the device and tap **ADD**.
   To install apps from **Play Store** or **Galaxy Apps**, tap **DOWNLOAD FROM PLAY STORE** or **DOWNLOAD FROM GALAXY APPS**.
Removing apps from Secure Folder

Tap Edit apps, tick apps, and then tap Uninstall.

Adding accounts

Add your Samsung and Google accounts, or other accounts, to sync with the apps in Secure Folder.

1. Launch the Secure Folder app and tap → Settings → Accounts → Add account.
2. Select an account service.
3. Follow the on-screen instructions to complete the account setup.

Hiding Secure Folder

You can hide the Secure Folder shortcut from the Apps screen.

Launch the Secure Folder app, tap → Settings, and then tap the Show Secure Folder switch to deactivate it.

Alternatively, drag the status bar downwards to open the notification panel. Then, swipe downwards on the notification panel and tap Secure Folder to deactivate the feature.

Backing up and restoring Secure Folder

Back up content and apps in Secure Folder to Samsung Cloud using your Samsung account and restore them later.

Backing up data

1. Launch the Secure Folder app and tap → Settings → Backup and restore.
2. Tap Add account and register and sign in to your Samsung account.
3 Tap **Back up Secure Folder data.**

4 Tick items you want to back up and tap **BACK UP NOW.**
   Data will be backed up to Samsung Cloud.

**Restoring data**

1 Launch the **Secure Folder** app and tap → **Settings** → **Backup and restore.**

2 Tap **Restore.**

3 Select a device and the data types you want to restore and tap **RESTORE NOW.**
   Backed up data will be restored to your device.

**Uninstalling Secure Folder**

You can uninstall Secure Folder, including the content and apps in it.
Launch the **Secure Folder** app and tap → **Settings** → **More settings** → **Uninstall.**

To back up content before uninstalling Secure Folder, tick **Move media files out of Secure Folder** and tap **UNINSTALL.** To access data backed from Secure Folder, open the **Samsung** folder, launch the **My Files** app, and then tap **Internal storage** → **Secure Folder.**

![Notes saved in **Samsung Notes** will not be backed up.](image)
Cloud and accounts

Options

Sync, back up, or restore your device’s data using Samsung Cloud. You can also register and manage accounts, such as your Samsung account or Google account, or transfer data to or from other devices via Smart Switch.

On the Settings screen, tap **Cloud and accounts**.

Regularly back up your data to a safe location, such as Samsung Cloud or a computer, so that you can restore it if the data is corrupted or lost due to an unintended factory data reset.

- **Samsung Cloud**: Manage the content that you want to store securely in Samsung Cloud. Check the usage status of your Samsung Cloud storage, and sync, back up, and restore your data. Refer to Samsung Cloud for more information.
- **Accounts**: Add your Samsung and Google accounts, or other accounts, to sync with.
- **Backup and restore**: Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information and access it later. You must sign in to your Google or Samsung account to back up or restore data. Refer to Backup and restore for more information.
- **Smart Switch**: Launch Smart Switch and transfer data from your previous device. Refer to Smart Switch for more information.
**Backup and restore**

Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information and access it later. You must sign in to your Google or Samsung account to back up or restore data.

**Using a Samsung account**

On the Settings screen, tap **Cloud and accounts → Backup and restore → Back up data** for the Samsung account, tap the switches next to the items you want to back up to activate them, and then tap **BACK UP**.

Data will be backed up to Samsung Cloud. Refer to Samsung Cloud for more information. To restore backup data from Samsung Cloud using a Samsung account, tap **Restore data**. Select a device and the data types you want to restore and tap **RESTORE**. The selected data will be restored to your device.

**Using a Google account**

On the Settings screen, tap **Cloud and accounts → Backup and restore** and tap the **Backup my data** switch for the Google account to activate it. Tap **Backup account** and select an account as the backup account.

To restore data using a Google account, tap the **Automatic restore** switch to activate it. When you reinstall apps, backed up settings and data will be restored.

**Google**

Configure settings for some features provided by Google.

On the Settings screen, tap **Google**.
Configure various settings to improve accessibility to the device.

On the Settings screen, tap **Accessibility**.

- **Vision**: Customise the settings to improve accessibility for visually impaired users.
- **Hearing**: Customise the settings to improve accessibility for users with hearing impairment.
- **Dexterity and interaction**: Customise the settings to improve accessibility for users who have reduced dexterity.
- **Text-to-speech**: Set the text-to-speech options such as language or speech rate while using Voice Assistant.
- **Direction lock**: Change the directional combination settings for unlocking the screen.
- **Direct access**: Set the device to launch selected accessibility menus when you press and hold the Power key and the Volume Up key simultaneously or press the Home key three times.
- **Accessibility shortcut**: Set the device to start a shortcut service when you simultaneously press and hold the Volume Up key and the Volume Down key for three seconds.
- **Notification reminder**: Set the device to alert you to notifications that you have not checked at the interval.
- **Answering and ending calls**: Change the method of answering or ending calls.
- **Single tap mode**: Use a single tap instead of a swipe to respond to alarms, alerts, and incoming calls.
- **SERVICES**: View accessibility services installed on the device.
**General management**

Customise your device's system settings or reset the device.

On the Settings screen, tap **General management**.

- **Language and input**: Select device languages and change settings, such as keyboards and voice input types. Some options may not be available depending on the selected language. Refer to **Adding device languages** for more information.
- **Date and time**: Access and alter the settings to control how the device displays the time and date.

  ![Warning](image)

  If the battery remains fully discharged, the time and date is reset.

- **Contact us**: Ask questions or view frequently asked questions. Refer to **Samsung Members** for more information.
- **Report diagnostic information**: Set the device to automatically send the device's diagnostic and usage information to Samsung.
- **Marketing information**: Set whether to receive Samsung marketing information, such as special offers, membership benefits, and newsletters.
- **Reset**: Reset your device's settings or perform a factory data reset. You can reset all your settings and network settings. You can also set the device to restart at a preset time for device optimisation.

**Adding device languages**

You can add languages to use on your device.

1. On the Settings screen, tap **General management → Language and input → Language → Add language**.

   To view all the languages that can be added, tap ![All languages](image)

2. Select a language to add.
To set the selected language as the default language, tap **SET AS DEFAULT**. To keep the current language setting, tap **KEEP CURRENT**.

The selected language will be added to your languages list. If you changed the default language, the selected language will be added to the top of the list.

To change the default language from your languages list, drag next to a language and move it to the top of the list. Then, tap **DONE**. If an app does not support the default language, the next supported language in the list will be used.

## Software update

Update your device’s software via the firmware over-the-air (FOTA) service. You can also schedule software updates.

On the Settings screen, tap **Software update**.

- **Download updates manually**: Check for and install updates manually.
- **Download updates automatically**: Set the device to download updates automatically when connected to a Wi-Fi network.
- **Scheduled software updates**: Set the device to install downloaded updates at a specified time.
- **Last update information**: View information about the last software update.

## Security updates information

Security updates are provided to strengthen the security of your device and protect your personal information. For security updates for your model, visit [security.samsungmobile.com](http://security.samsungmobile.com).

- The website supports only some languages.
User manual

View help information to learn how to use the device and apps or configure important settings.

About phone

Access your device's information.

On the Settings screen, tap About phone.

To change your device's name, tap EDIT.

- **Status**: View various device information, such as the SIM card status, Wi-Fi MAC address, and serial number.
- **Legal information**: View legal information related to the device, such as safety information and the open source licence.
- **Software information**: View the device's software information, such as its operating system version and firmware version.
- **Battery information**: View the device's battery status and information.
Appendix

Troubleshooting

Before contacting a Samsung Service Centre, please attempt the following solutions. Some situations may not apply to your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- **Password**: When the device lock feature is enabled, you must enter the password you set for the device.
- **PIN**: When using the device for the first time or when the PIN requirement is enabled, you must enter the PIN supplied with the SIM or USIM card. You can disable this feature by using the Lock SIM card menu.
- **PUK**: Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your service provider.
- **PIN2**: When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For more information, contact your service provider.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. For more information, contact your service provider.

Your device does not turn on

- When the battery is completely discharged, your device will not turn on. Fully charge the battery before turning on the device.
- The battery may not be inserted properly. Insert the battery again.
- Wipe both gold-coloured contacts and insert the battery again.
The touchscreen responds slowly or improperly

- If you attach a screen protector or optional accessories to the touchscreen, the touchscreen may not function properly.
- If you are wearing gloves, if your hands are not clean while touching the touchscreen, or if you tap the screen with sharp objects or your fingertips, the touchscreen may malfunction.
- The touchscreen may malfunction in humid conditions or when exposed to water.
- Restart your device to clear any temporary software bugs.
- Ensure that your device software is updated to the latest version.
- If the touchscreen is scratched or damaged, visit a Samsung Service Centre.

Your device freezes or encounters a fatal error

Try the following solutions. If the problem is still not resolved, contact a Samsung Service Centre.

Restarting the device

If your device freezes or hangs, you may need to close apps or turn off the device and turn it on again.

Forcing restart

If your device is frozen and unresponsive, press and hold the Power key and the Volume Down key simultaneously for more than 7 seconds to restart it.

Resetting the device

If the methods above do not solve your problem, perform a factory data reset. Launch the Settings app and tap General management → Reset → Factory data reset → RESET → DELETE ALL. Before performing the factory data reset, remember to make backup copies of all important data stored in the device.

If you registered a Google account to the device, you must sign in to the same Google account after resetting the device.
Appendix

Calls are not connected

• Ensure that you have accessed the right cellular network.
• Ensure that you have not set call barring for the phone number you are dialling.
• Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

• Ensure that you are not covering the built-in microphone.
• Ensure that the microphone is close to your mouth.
• If using an earphone, ensure that it is properly connected.

Sound echoes during a call

Adjust the volume by pressing the Volume key or move to another area.

A cellular network or the Internet is often disconnected or audio quality is poor

• Ensure that you are not blocking the device’s internal antenna.
• When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems due to issues with the service provider’s base station. Move to another area and try again.
• When using the device while moving, wireless network services may be disabled due to issues with the service provider’s network.

The battery icon is empty

Your battery is low. Charge the battery.
The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- If the battery terminals are dirty, the battery may not charge properly or the device may turn off. Wipe both gold-coloured contacts and try charging the battery again.

The battery depletes faster than when first purchased

- When you expose the device or the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption will increase when you use certain features or apps, such as GPS, games, or the Internet.
- The battery is consumable and the useful charge will get shorter over time.

Error messages appear when launching the camera

Your device must have sufficient available memory and battery power to operate the camera app. If you receive error messages when launching the camera, try the following:

- Charge the battery.
- Free some memory by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Centre.

Photo quality is poorer than the preview

- The quality of your photos may vary, depending on the surroundings and the photography techniques you use.
- If you take photos in dark areas, at night, or indoors, image noise may occur or images may be out of focus.
Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some memory by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate licence or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To confirm the file formats that your device supports, visit www.samsung.com.
- Your device supports photos and videos captured with the device. Photos and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorised by your network service provider or providers of additional services. Some content circulated on the Internet, such as ringtones, videos, or wallpapers, may not work properly.

Another Bluetooth device is not located

- Ensure that the Bluetooth wireless feature is activated on your device.
- Ensure that the Bluetooth wireless feature is activated on the device you wish to connect to.
- Ensure that your device and the other Bluetooth device are within the maximum Bluetooth range (10 m).

If the tips above do not solve the problem, contact a Samsung Service Centre.

A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.
- If you are a Windows XP user, ensure that you have Windows XP Service Pack 3 or higher installed on your computer.
Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored in the device has been lost

Always make backup copies of all important data stored in the device. Otherwise, you cannot restore data if it is corrupted or lost. Samsung is not responsible for the loss of data stored in the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.

There is not enough space in the device’s storage

Delete unnecessary data, such as cache, using the Smart manager or manually delete unused apps or files to free up storage space.

The Apps button does not appear on the Home screen

Without using the Apps button, you can open the Apps screen by swiping upwards or downwards on the Home screen. To display the Apps button at the bottom of the Home screen, launch the Settings app and tap Display → Home screen → Apps button → Show Apps button → APPLY.
The screen brightness adjustment bar does not appear on the notification panel

Open the notification panel by dragging the status bar downwards, and then drag the notification panel downwards. Tap ✓ next to the brightness adjustment bar and tap the Show control on top switch to activate it.

Samsung Cloud does not work

- Ensure that you are connected to a network properly.
- During a Samsung Cloud’s service check, you cannot use Samsung Cloud. Try again later.
