The colour and the appearance may differ depending on the product, and the content in the manual is subject to change without prior notice to improve the performance.

An administration fee may be charged in the following situations:

(a) An engineer is called out at your request, but it is found that the product has no defect (i.e., where the user manual has not been read).

(b) You bring the unit to a repair centre, but it is found that the product has no defect (i.e., where the user manual has not been read).

You will be informed of the administration fee amount before a technician visits.

### CAUTION

**RISK OF ELECTRIC SHOCK. DO NOT OPEN.**

**CAUTION:** TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER ALL SERVICING TO QUALIFIED PERSONNEL.

- ![Symbol] AC voltage: Rated voltage marked with this symbol is AC voltage.
- ![Symbol] DC voltage: Rated voltage marked with this symbol is DC voltage.
- ![Symbol] Caution. Consult instructions for use: This symbol instructs the user to consult the user manual for further safety related information.
Electricity and Safety

The following images are for reference only. Real-life situations may differ from what is shown in the images.

⚠️ Warning

Do not touch the power plug with wet hands.
Otherwise, an electric shock may result.

Do not bend or pull the power cable with force. Be careful not to leave the power cable under a heavy object.
Product failure, an electric shock or fire may result from a damaged cable.

Do not connect multiple products to a single power socket.
Overheated power sockets may cause a fire.

⚠️ Insert the power plug all the way in so it is not loose.
An unsecure connection may cause a fire.

⚠️ Clean any dust around the pins of the power plug or the power socket with a dry cloth.
A fire may result.

⚠️ Connect the power plug to a grounded power socket. (Except for devices that do not provide grounding)
An electric shock or injury may result.

⚠️ Do not use a damaged power plug or a loose power socket.
An electric shock or fire may result.
Caution

Hold the plug when disconnecting the power cable from the power socket.
An electric shock or fire may result.

When connecting the power plug to the port, be sure to connect it completely.
If the power plug is not completely connected to the port, the plug may be unexpectedly disconnected, or there is a risk of overheating due to overcurrent, leading to safety accidents.

Only use the power cable provided with your product by Samsung. Do not use the power cable with other products.
An electric shock or fire may result.

Keep the power socket where the power cord is connected unobstructed.
When a problem occurs with the product, the power cord must be unplugged to completely cut off power to the product. The power is not completely cut off by using only the Power button on the body of the product.

Do not disconnect the power cable while the product is being used.
The product may become damaged by an electric shock.

Installation

Warning

Before moving the product, turn off the power switch and disconnect the power cable and all other connected cables.
Damage to the cable may cause a fire or electric shock.

When installing the product, keep it at a distance from the wall so that it is well ventilated.
An increased internal temperature may cause a fire.

Do not install the product in a poorly ventilated space such as bookcase or closet.
An increased internal temperature may cause a fire.

Keep the plastic packaging out of the reach of children.
Children’s misuse of the plastic packaging may cause suffocation.

Do not install the power cable (DC power supply) and the product near head sources.
(Candles, mosquito repellents, cigarettes, sprays, heating devices, places exposed to direct sunlight, and more)
When installing the product, fix it firmly so that it does not fall. If the product is not fixed firmly and a child touches the product while playing, the product may fall, causing damage to the product or injury to the child.

Do not install the product in a kitchen or near a kitchen counter. Edible oil or oil vapor can damage or deform the product.

Have a technician install the wall-mount hanger. Installation by an unqualified person can result in an injury. Only use approved cabinets.

If the product is installed in an unusual location, the surrounding environment may cause a serious quality problem. Therefore, be sure to contact Samsung Customer Service Centre before installation. (Places where many fine dusts are generated, places where chemicals are used, places with too high or low temperatures, places with a lot of moisture or water, transportation equipment such as vehicles, airports and stations used continuously for a long time, and more)

Caution

When lifting and moving the product, do not touch the screen display, and make sure that at least two people work together. The product may fall, causing personal injury or product damage.

Do not lay down the product on its front. The screen may become damaged.

Prolonged exposure to direct sunlight may discolor the surface of the screen display.
**Operation**

**Warning**

If the product generates a strange noise, a burning smell, or smoke, unplug the power plug immediately and contact your Samsung Customer Service Centre.

An electric shock or fire may result.

Keep the remote control batteries and the small accessories out of the reach of children. Ensure children do not swallow any of them.

If children have had the battery in their mouths, consult your doctor immediately.

If the product is dropped or its appearance is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Centre.

Continued use can result in an electric shock or a fire.

Do not move the product by pulling the power cord or any cable.

Product failure, an electric shock or fire may result from a damaged cable.

Ensure the vents are not blocked by tablecloths or curtains.

An increased internal temperature may cause a fire.

Do not apply an impact to the product.

- The screen display may be damaged.
- An electric shock or fire may result.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).

- If foreign substances enter the product, be sure to power off the product and disconnect the power cord. Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.

- If foreign substances such as water enter the product, be sure to disconnect the power cord. Then contact Samsung Customer Service Centre.
- Product failure, an electric shock or fire may result.

During a lightning or thunderstorm, power off the product and disconnect the power cord.

An electric shock or fire may result.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.

The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.
**Caution**

Insert each battery so that its polarity (+, −) is correct.

If the polarity is not correct, the battery may rupture or the internal fluid may leak, causing contamination and damage to the surroundings, fire, or personal injury.

Do not place heavy objects on the product.

Product failure or personal injury may result.

When you do not use the product for a long time due to vacation or other reason, disconnect the power cord from the power socket.

Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency.

Your eyesight may deteriorate.

The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling.

The customer can return used or rechargeable batteries to a nearby public recycling centre or to a store selling the same type of the battery or rechargeable battery.

Rest your eyes for more than 5 minutes for every 1 hour of product use.

Eye fatigue will be relieved.

---

**Do not hang on or climb on the product.**

- The product may fall, causing personal injury or even death.
- Be especially careful that children do not hang on or climb on the product.

While the power plug is plugged into a power socket, do not insert a chopstick or other conductor into a remaining power socket. Also, after disconnecting the power plug from the power socket, do not touch the pins of the plug immediately.

Otherwise, an electric shock may result.

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.

- Contact Samsung Customer Service Centre for repairs.
- An electric shock or fire may result.

If a gas leakage is found, do not touch the product or the power plug, and ventilate the room immediately.

Sparks can cause an explosion or fire.

Do not use humidifiers or stoves around the product.

An electric shock or fire may result.

---

**Caution**

Insert each battery so that its polarity (+, −) is correct.

If the polarity is not correct, the battery may rupture or the internal fluid may leak, causing contamination and damage to the surroundings, fire, or personal injury.

Do not place heavy objects on the product.

The customer can return used or rechargeable batteries to a nearby public recycling centre or to a store selling the same type of the battery or rechargeable battery.

Rest your eyes for more than 5 minutes for every 1 hour of product use.

Eye fatigue will be relieved.
Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels. When you do not use the product for a long time, activate power-saving mode or set the screen saver to moving-picture mode.

Do not use or keep combustible spray or an inflammable substance near the product. An explosion or fire may result.

Use only the specified standardised batteries, and do not use a new battery and a used battery at the same time. Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

Do not watch the product screen too closely and continuously for a long time. Your eyesight may deteriorate.

Do not lift or move the product when it is in operation.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

When using headphones or earphones, do not turn the volume too high or use them for a long time. Damage to your hearing may result.

**Precautions when handling the panel**

Do not stand the product as shown in the image. The panel is fragile and can get damaged.

Lay the product down to handle it as shown in the image. (the packaging can be used).

Ensure you use the handles on the back when moving the product.

Do not hold or grasp any area of the product within 15 mm from the front.
Cleaning

⚠️ Warning

Do not spray water or cleaner directly on the product.
- The product's surface may be damaged, or the markings may be erased.
- An electric shock or fire may result.

⚠️ Caution

When cleaning, be sure to disconnect the power plug and wipe gently with a soft and dry cloth such as superfine fibers or cotton flannels to prevent scratches. The product's surface may be damaged, or the markings may be erased.

Be sure to use a soft and dry cloth such as superfine fibers or cotton flannels because the surface of the product and the screen display are vulnerable to scratches. The product's surface or the screen display can be easily scratched with foreign substances.

Do not apply chemicals containing alcohol, solvent, or surfactant such as wax, benzene, thinner, pesticide, air freshener, lubricant, or cleaner to the product. The product's exterior may be discoloured or cracked, the surface of the panel may be peeled off, or the markings may be erased.

Storage and Maintenance

Cleaning the exterior and display

Wipe the surface with a slightly wet, soft cloth, and then wipe with a dry cloth.

1 2 3

Precautions

Do not scratch the screen with nails or sharp objects. Scratches may leave marks or damage the product.

Do not spray water directly on any part of the product. Product failure, an electric shock or fire may result from water that enters the product.

Due to the characteristics of high-glossy products, using a UV humidifier nearby may create white-coloured stains on the product.

- Removing a sticker attached on the screen may leave residues. Clean the residues before watching the screen.
- Do not strongly press and rub the product. Damage to the product may result.
- Do not wipe the screen with chemicals. Product failure may result.
- Contact Customer Service Centre if the inside of the product needs cleaning (service fee will be charged).
Chapter 02
Preparations

Checking the Components

Components

- Contact the vendor where you purchased the product if any components are missing.
- The pictures may look different from the actual components.

Holder-Ring x 4 / Screw x 4
**Parts**

External sensor KIT

The External sensor KIT has a remote-control sensor, a brightness sensor and function keys. If mounting the display onto a wall, you can move the External sensor KIT to the side of the display.

The colour and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

<table>
<thead>
<tr>
<th>Buttons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Remote Control Sensor</td>
<td>Aim the remote control towards this spot on the LCD Display. Keep the area between the remote sensor and remote control obstacle-free.</td>
</tr>
<tr>
<td>2 Light sensor</td>
<td>Automatically detects the intensity of ambient light around a selected display and adjusts the screen brightness.</td>
</tr>
<tr>
<td>3 Power indicator</td>
<td>The power indicator will turn off when the product is turned on. It will blink in power-saving mode.</td>
</tr>
<tr>
<td>4 POWER button</td>
<td>Use this button for turning the LCD Display on and off.</td>
</tr>
<tr>
<td>5 SOURCE button</td>
<td>Switches from PC mode to Video mode. Selects the input source that an external device is connected to.</td>
</tr>
</tbody>
</table>

Use the remote control within 7m to 10m from the sensor on the product at an angle of 30° from the left and right.

Store used batteries out of reach of children and recycle.

Do not use a new and used battery together. Replace both batteries at the same time.

Remove batteries when the remote control is not to be used for an extended period of time.
### Reverse Side

The colour and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

#### Port Description

<table>

</tr>
</tbody>
</table>
Remote Control

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- A button without a description in the image below is not supported on the product.
**TOOLS**

- Display information about the current input source.
- Move to the upper, lower, left or right menu, or adjust an option’s setting.
- Confirm a menu selection.
- Exit the current menu.
- Manually select a connected input source from PC, DVI, HDMI, or DisplayPort.
- It sets safe lock function.

**INFO**

- Quick select frequently used functions.

**SET**

- Return to the previous menu.
- If multiple products are connected through the Video Wall feature, press the SET button and enter a product ID using the number buttons.
- Control the product using the remote control.

**UNSET**

- Cancel a value that has been set using the SET button and control all connected products using the remote control.

**LOCK**

- – Remote control button functions may differ for different products.

---

**To place batteries in the remote control**

1. Align the battery with the + and - sides correctly.
2. Insert both batteries into the remote control.
3. Ensure the batteries are fully seated.
4. Close the battery compartment.

---
Connection Using an IR Stereo Cable (sold separately)

Make sure to connect the External ambient sensor while the product is powered off. Then, power on the product.

**Controlling more than one display product using your remote control**

- Connect the IR OUT port on the product to the CONTROL IN port on the other display product using the dedicated stereo cable.
- A command sent from the remote control pointed at product 1 will be received by both display products 1 and 2.

*The appearance may differ depending on the product.*

**Controlling more than one display product using an External ambient sensor (sold separately)**

- A command sent from the remote control pointed at product 1 (to which the External ambient sensor is connected) will be received by both display products 1 and 2.

*The appearance may differ depending on the product.*
Before Installing the Product (Installation Guide)

To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.

- Ensure that an authorised installation company installs the wall mount.
- Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.

Switching between portrait and landscape

- Contact Samsung Customer Service Centre for further details.
- To use the product in portrait orientation, rotate it clockwise.

Ventilation

Installation on a Perpendicular Wall

A Minimum 40 mm
B Ambient temperature: Under 35°C
- When installing the product on a perpendicular wall, allow at least 40 mm of space between the product and wall surface for ventilation and ensure that the ambient A temperature is kept below 35°C.

Installation on an Indented Wall

- Contact Samsung Customer Service Centre for further details.

Plane view

A Minimum 40 mm
B Minimum 70 mm
C Minimum 50 mm
D Minimum 50 mm
E Ambient temperature: Under 35°C
- When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35°C.

- Do not use this model installed on a ceiling, floor, or table.
Installing the Wall Mount

Preparing before installing Wall-Mount
To install a wall-mount from another manufacturer, use the Holder-Ring(1).

Installing the Wall Mount
The wall mount kit (sold separately) allows you to mount the product on the wall.
For detailed information on installing the wall mount, see the instructions provided with the wall mount.
We recommend you contact a technician for assistance when installing the wall mount bracket.
Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you select to install the wall mount on your own.
Wall Mount Kit Specifications (VESAs)

- Install your wall mount on a solid wall perpendicular to the floor. Before attaching the wall mount to surfaces other than plaster board, please contact your nearest dealer for additional information.
- If you install the product on a slanted wall, it may fall and result in severe personal injury.

- Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.
- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.
- Always have two people mount the product on a wall.
- Standard dimensions for wall mount kits are shown in the table below.

<table>
<thead>
<tr>
<th>Model name</th>
<th>VESA screw hole specs (A * B) in millimetres</th>
<th>Standard Screw</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>UH46N-E / UM46N-E / UH55F-E / UM55H-E</td>
<td>600 x 400</td>
<td>M8</td>
<td>4</td>
</tr>
</tbody>
</table>

Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.
Remote Control (RS232C)

Cable Connection

**RS232C Cable**

- Interface: RS232C (9 pins)
- Pin: TxD (No.2), RxD (No.3), GND (No.5)
- Bit rate: 9600 bps
- Data bits: 8 bit
- Parity: None
- Stop bit: 1 bit
- Flow control: None
- Maximum length: 15 m (only shielded type)

### Pin assignment

**Pin** | **Signal**
---|---
1 | Detect data carrier
2 | Received data
3 | Transmitted data
4 | Prepare data terminal
5 | Signal ground
6 | Prepare data set
7 | Send request
8 | Clear to send
9 | Ring indicator
• RS232C cable
  Connector: 9-Pin D-Sub to Stereo Cable

"ERR": A code showing what error has occurred
Before Connecting

Pre-connection Checkpoints

― Before connecting a source device, read the user manual provided with it. The number and locations of ports on source devices may differ from device to device.
― Do not connect the power cable until all connections are completed. Connecting the power cable during connection may damage the product.
― Connect the sound ports correctly: left = white and right = red.
― Check the types of ports at the back of the product you want to connect.

Connecting to a PC

• Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
• A PC can be connected to the product in a variety of ways. Select a connection method suitable for your PC.
― Connecting parts may differ in different products.

Connection using the D-SUB cable (Analogue type)
Connection using a DVI cable (Digital type)

Connection Using an HDMI-DVI Cable
Connection Using an HDMI Cable

HDMI IN 1, HDMI IN 2

Connection Using an DP Cable

DP IN

- **Precautions for using DP**
  - To increase the standby power capacity, the product stops DP communication when it is turned off or in power-saving mode.
  - If the product in dual monitor mode is turned off or goes into power-saving mode, monitor setting changes may not be updated. As a result, screen output may not be displayed properly.
  - In the occurrence of this issue, set Max. Power Saving to Off before using the product.
  - Some graphics cards that are not compliant with the DP standard may prevent the Windows Booting/Bios screen from being displayed when the product is in power-saving mode. If this is the case, make sure to turn on the product first before turning on your PC.
  - The DisplayPort interface (DP IN) on the product and the provided DP cable are designed based on the VESA standards. Using a DP cable that is not VESA compliant may cause the product to function improperly. Samsung Electronics shall not be held responsible for any issues from using a cable that is not VESA compliant. Make sure to use a DP cable that is VESA compliant.
Connecting to a Video Device

• Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.

• You can connect a video device to the product using a cable.
  — Connecting parts may differ in different products.
  — Press the SOURCE button on the remote control to change the source.

Connection Using an HDMI-DVI Cable

— Audio will not be enabled if the product is connected to a video device using an HDMI-DVI cable. To resolve this, additionally connect an audio cable to the audio ports on the product and video device.
— Supported resolutions include 1080p (50/60Hz), 720p (50/60Hz), 480p, and 576p.
— Make sure to connect the same color connectors together. (white to white, red to red, etc.)
Connection Using an HDMI Cable

Using an HDMI cable or HDMI to DVI Cable (up to 1080p)

- For better picture and audio quality, connect to a digital device using an HDMI cable.
- An HDMI cable supports digital video and audio signals, and does not require an audio cable.
  - To connect the product to a digital device that does not support HDMI output, use an HDMI-DVI and audio cables.
- The picture may not display normally (if at all) or the audio may not work if an external device that uses an older version of HDMI mode is connected to the product. If such a problem occurs, ask the manufacturer of the external device about the HDMI version and, if out of date, request an upgrade.
- Be sure to use an HDMI cable with a thickness of 14 mm or less.
- Be sure to purchase a certified HDMI cable. Otherwise, the picture may not display or a connection error may occur.
- A basic high-speed HDMI cable or one with ethernet is recommended. This product does not support the ethernet function via HDMI.

Connecting to an Audio System

- Connecting parts may differ in different products.
- Make sure to connect the same color connectors together. (white to white, red to red, etc.)
Connecting the LAN Cable

Connecting parts may differ in different products.

- Use Cat7(*STP Type) cable for the connection.
  *Shielded Twist Pair
Connecting the Network box (Sold separately)

For details on how to connect to a network box, refer to the user's manual provided with the network box upon purchase.

MagicInfo

To use MagicInfo, a network box (sold separately) must be connected to the product.

To change the MagicInfo settings, run "MagicInfoSetupWizard" on the desktop.

For details on how to use MagicInfo, refer to the DVD provided with the network box.

The information in this section is subject to change without notice for quality improvement.

If a problem occurs after installing an operating system other than the one provided with the network box, restoring the previous version of the operating system, or installing software that is not compatible with the operating system provided, you will not be able to benefit from technical support and will be charged a fee for a visit from a service technician. A product exchange or refund will also not be available.

Entering MagicInfo mode

1. After installing and connecting the network box (sold separately) to the product, power on the product.
2. Press SOURCE on the remote control, and select MagicInfo.
   
   Connecting the network box to the DVI IN (MAGICINFO) port on the product will change Source from DVI to MagicInfo.
3. Select the default application you want to run when MagicInfo starts.
4. Enter the IP information.

5. Select a language. (The default language is English.)

6. Select a display mode.

7. Double-check the settings you have just configured.

If the execution icon does not appear, double-click the MagicInfo icon on the desktop. The icon will appear at the bottom right of the screen.
Changing the Input source

Source

SOURCE → Source

Source allows you to select a variety of sources and change source device names.
You can display the screen of a source device connected to the product. Select a source from source list to display the screen of the selected source.

- The input source can also be changed by using the SOURCE button on the remote control.
- The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.

Edit Name

SOURCE → Source → TOOLS → Edit Name → ENTER

Sometimes the screen will not display properly unless the name of a source device is specified in Edit Name. In addition, it is best to rename the source device in Edit Name to obtain optimal picture quality.

- The list can include the following source devices. Source devices on the list differ depending on the selected source.
  VCR / DVD / Cable STB / HD STB / Satellite STB / AV Receiver / DVD Receiver / Game / Camcorder / DVD Combo / DHR / PC / DVI PC / DVI Devices

- Available settings in the Picture menu depend on the current source and settings made in Edit Name.
  - When connecting a PC to the HDMI IN 1, HDMI IN 2 port, set Edit Name to PC. In other cases, set Edit Name to AV devices.
  - When connecting a PC to the HDMI IN 1, HDMI IN 2 port with HDMI cable, you should set the product to PC mode under Edit Name.
  - When connecting a PC to the HDMI IN 1, HDMI IN 2 port with HDMI to DVI cable, you should set the product to DVI PC mode under Edit Name.
  - When connecting an AV devices to the HDMI IN 1, HDMI IN 2 port with HDMI to DVI cable, you should set the product to DVI Devices mode under Edit Name.
Chapter 04
Using MDC

Multiple display control “MDC” is an application that allows you to easily control multiple display devices simultaneously using a PC. For details on how to use the MDC programme, refer to Help after installing the programme. The MDC programme is available on the website.

After you press the On button following the Off button, the product checks its status for about a minute. To run a command, try it after a minute.

MDC Programme Installation/Uninstallation

Installation

MDC installation can be affected by the graphics card, mother board and network conditions.

1. Click the MDC Unified installation programme.
2. Select a language for installation. Next, click "OK".
3. When the "Welcome to the InstallShield Wizard for MDC_Unified" screen appears, click "Next".
4. In the "License Agreement" window displayed, select "I accept the terms in the license agreement" and click "Next".
5. In the displayed "Customer Information" window, fill out all the information fields and click "Next".
6. In the displayed "Destination Folder" window, select the directory path you want to install the programme in and click "Next".
7. If the directory path is not specified, the programme will be installed in the default directory path.
8. In the displayed “Ready to Install the Program” window, check the directory path to install the programme in and click "Install".
9. Installation progress will be displayed.
10. Click “Finish” in the displayed "InstallShield Wizard Complete" window.

Uninstallation

1. Select Settings > Control Panel on the Start menu and double-click Add/Delete Program.
2. Select MDC Unified from the list and click Change/Remove.
Connecting to MDC

Using MDC via RS-232C (serial data communications standards)

An RS-232C serial cable must be connected to the serial ports on the PC and monitor.
Using MDC via Ethernet

Enter the IP for the primary display device and connect the device to the PC. Display devices can be connected to each other using a LAN cable.

**Connection using a direct LAN cable**

Multiple products can be connected using the RJ45 port on the product and the LAN ports on the HUB.
Connection using a cross LAN cable

- Multiple products can be connected using the RS232C IN / OUT port on the product.
Video Wall

HOME 🌐 → Video Wall → ENTER ⏯

Customise the layout of multiple displays that are connected to form a video wall. In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays. To display multiple images, refer to MDC Help or the MagicInfo user guide. Some models may not support the MagicInfo function.

**Video Wall**

You can activate or deactivate Video Wall. To organise a video wall, select On.

- Off / On

**Horizontal x Vertical**

This feature automatically splits a videowall display based on a videowall matrix configuration. Enter the videowall matrix. The videowall display is split based on the configured matrix. The number of vertical or horizontal display devices can be set within the range 1 and 15.

- A videowall display can be split into a maximum of 225 screens.
- The Horizontal x Vertical option is only enabled when Video Wall is set to On.

— The displayed image may differ depending on the model.
Screen Position

To rearrange split screens, adjust the number for each product in the matrix using the Screen Position feature. Selecting Screen Position will display the videowall matrix with the numbers assigned to the products that form the videowall.

To change the order of a display device, change the device number and press the button.

- A maximum of 225 displays can be arranged in Screen Position.
- The Screen Position option is only enabled when Video Wall is set to On.
- To use the function, make sure Horizontal x Vertical is configured.

Format

Select how to display images on the videowall display.

- **Full**: Display images in full screen.
- **Natural**: Display images in the original aspect ratio.

- The Format option is only enabled when Video Wall is set to On.
- When using Video Wall mode, a resolution of 1280x720P, 1920x1080P or 3840x2160P is recommended.
Picture Mode

Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

- **Shop & Mall**
  Suitable for shopping malls.
  - Select either Video/Image or Text depending on the picture mode.

- **Office & School**
  Suitable for offices and schools.
  - Select either Video/Image or Text depending on the picture mode.

- **Terminal & Station**
  Suitable for bus terminals and train stations.
  - Select either Video/Image or Text depending on the picture mode.

- **Video Wall**
  Suitable for environments where videowall display are used.
  - Select either Video/Image or Text depending on the picture mode.

- **Calibration**
  In this mode, the brightness, colour, gamma and uniformity settings customised using the colour calibration programme Color Expert are applied.
  - To use factory picture settings such as gamma, uniformity and white balance, set Picture Mode to Calibration.
  - To additionally calibrate the picture, use Color Expert. You can adjust the picture quality settings (brightness, colour, gamma, uniformity) according to your preferences.
  - To download the Color Expert programme, visit www.samsung.com/displaysolutions.

- The displayed image may differ depending on the model.
You must set the clock before you can use Clock Set.

On Timer

Set On Timer so that your product turns on automatically at a time and on a day of your choosing. The power is turned on with the specified volume or input source.

On Timer: Set the on timer by making a selection from one of the seven options. Ensure you set the current time first.

(On Timer 1 ~ On Timer 7)

- **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual.
  - If you select Manual, you can choose the days you want On Timer to turn on your product.
  - The check mark indicates days you’ve selected.
- **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.
- **Volume**: Set the desired volume level. Use the left and right arrow buttons to change the volume level.
- **Source**: Select the input source of your choice.

Off Timer

Set the off timer (Off Timer) by making a selection from one of the seven options. (Off Timer 1 ~ Off Timer 7)

- **Setup**: Select Off, Once, Everyday, Mon~Fri, Mon~Sat, Sat~Sun or Manual.
  - If you select Manual, you can choose the days you want Off Timer to turn off your product.
  - The check mark indicates days you’ve selected.
- **Time**: Set the hour and minute. Use the number buttons or the up and down arrow keys to enter numbers. Use the left and right arrow buttons to change entry fields.
Holiday Management

Timer will be disabled during a period specified as a holiday.

- **Add Holiday**: Specify the period you want to add as a holiday.
  Select the start and end dates of the holiday you want to add using the ↑/↓ buttons, and click the Save button.
  The period will be added to the list of holidays.
  - **Start**: Set the start date of the holiday.
  - **End**: Set the end date of the holiday.
- **Edit**: Select a holiday item and then change the date.
- **Delete**: Delete selected items from the list of holidays.
- **Set Applied Timer**: Set the On Timer and Off Timer to not activate on public holidays.
  - Press ⦿ to select the On Timer and Off Timer settings you do not want to activate.
  - The selected On Timer and Off Timer will not activate.
Network Settings

HOME ⏯ → Network Settings → ENTER ⏯

– The displayed image may differ depending on the model.

View the network settings.

- IP Setting: Obtain automatically, Enter manually
- IP Address: Manually enter the IP Address if IP Setting is set to Enter manually.
- Subnet Mask: Manually enter the Subnet Mask if IP Setting is set to Enter manually.
- Gateway: Manually enter the Gateway if IP Setting is set to Enter manually.
Change source to MagicInfo Player I.

MagicInfo Player I publishes and plays a variety of content, including created content and multimedia content (images, videos and audio content), from the server or a connected device.

- The displayed image may differ depending on the model.
ID Settings

Assign an ID to a set.
Press ▲/▼ to select a number, and press ENTER.

ID Settings
Enter the ID number of the product connected to the input cable for input signal reception. (Range: 0~224)
— Enter the number you want using the number buttons on the remote control.

Device ID Auto Set
— Assign ID number automatically for all connected products.

PC Connection Cable
Select a method to connect to MDC to receive the MDC signal.
• RS232C cable
  Communicate with MDC via the RS232C-stereo cable.
• RJ45(LAN) cable
  Communicate with MDC via the RJ45 cable.

— The displayed image may differ depending on the model.
More settings

The picture settings menu appears.

- The displayed image may differ depending on the model.
Chapter 06
Screen Adjustment

Configure the Picture settings (Backlight, Color Tone, etc.). The layout of the Picture menu options may vary depending on the product.

Picture Mode

MENU  
\rightarrow Picture \rightarrow Picture Mode \rightarrow ENTER 

Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

- **Shop & Mall**  
  Suitable for shopping malls.  
  - Select either Video/Image or Text depending on the picture mode.

- **Office & School**  
  Suitable for offices and schools.  
  - Select either Video/Image or Text depending on the picture mode.

- **Terminal & Station**  
  Suitable for bus terminals and train stations.  
  - Select either Video/Image or Text depending on the picture mode.

- **Video Wall**  
  Suitable for environments where videowall display are used.  
  - Select either Video/Image or Text depending on the picture mode.

- **Calibration**  
  In this mode, the brightness, colour, gamma and uniformity settings customised using the colour calibration programme Color Expert are applied.  
  - To use factory picture settings such as gamma, uniformity and white balance, set Picture Mode to Calibration.
  
  - To additionally calibrate the picture, use Color Expert. You can adjust the picture quality settings (brightness, colour, gamma, uniformity) according to your preferences.
  
  - To download the Color Expert programme, visit www.samsung.com/displaysolutions.
Backlight / Brightness / Contrast / Sharpness / Color / Tint (G/R)

Your product has several options for adjusting picture quality.

<table>
<thead>
<tr>
<th>Picture Mode</th>
<th>Picture Mode settings</th>
<th>Adjustable options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Shop &amp; Mall, Office &amp; School, Terminal &amp; Station, Video Wall</td>
<td>Video/Image</td>
<td>Backlight / Brightness / Contrast / Sharpness / Color / Tint (G/R)</td>
</tr>
<tr>
<td>Text</td>
<td></td>
<td>Backlight / Brightness / Contrast / Sharpness</td>
</tr>
<tr>
<td>Calibration</td>
<td></td>
<td>Backlight</td>
</tr>
</tbody>
</table>

When you make changes to Backlight, Brightness, Contrast, Sharpness, Color or Tint (G/R), the OSD will be adjusted accordingly.

You can adjust and store settings for each external device you have connected to an input on the product.

Lowering picture brightness reduces power consumption.

White Balance

Adjust the colour temperature for a more natural picture.

- R-Gain / G-Gain / B-Gain: Adjust each colour's (red, green, blue) brightness.
- Reset: Suitable for environments where videowall display are used.

Gamma

Adjust the primary colour intensity.

- If Picture Mode is set to Calibration, Gamma is disabled.

Calibrated Value

Select whether to apply the brightness, colour, gamma and uniformity settings customised using the colour calibration programme Color Expert to the Information and Advertisement modes.

- Don’t Apply / Apply

To download the Color Expert programme, visit www.samsung.com/displaysolutions.

- If Picture Mode is set to Calibration, Calibrated Value is disabled.

Color Temperature

Adjust the colour temperature. (Range: 2800K–16000K)

- If Picture Mode is set to Calibration, Color Temperature is disabled.
**Picture Options**

MENU → Picture → Picture Options → ENTER

<table>
<thead>
<tr>
<th>Picture Mode settings</th>

<td>Text</td>
<td>Color Tone / HDMI Black Level / Dynamic Backlight / UHD COLOR</td>
</tr>
<tr>
<td>Calibration</td>
<td></td>
<td>Dynamic Backlight / UHD COLOR</td>
</tr>
</tbody>
</table>

**Color Tone**

If Picture Mode is set to Text.
- Off / Cool / Standard / Warm

If Picture Mode is set to Video/Image.
- Off / Cool / Standard / Warm1 / Warm2
  - If Picture Mode is set to Calibration, Color Tone is disabled.
  - Settings can be adjusted and stored for each external device connected to an input on the product.

**Dynamic Backlight**

Automatically adjust the backlight to provide the best possible screen contrast under the current conditions.
- Off / On

  - The Dynamic Backlight is not available when the input source is set to PC while Video Wall is On.

**UHD COLOR**

- HDMI1 : Off / On
- HDMI2 : Off / On
- DisplayPort : Off / On

  - To enable a UHD input source, set UHD COLOR to On.
  - If monitors are connected through Loopout when a UHD resolution is in use, set UHD COLOR to On on all monitors.
  - A maximum of 25 monitors can be connected through Loopout when using UHD resolution.
  - To use UHD COLOR mode over an HDMI cable, using an HDMI cable that is compatible with HDMI 2.0 is recommended. Make sure that the cable is shorter than 2m.
  - Switching UHD COLOR between On and Off takes some time.
  - If the HDMI/DP connector with UHD COLOR enabled is connected to a device that does not support UHD content, the device may not operate properly. Connect a device that supports UHD content.

**HDMI Black Level**

Selects the black level on the screen to adjust the screen depth.
- Low / Normal
  - This option is not available if the input source is set to PC.
**Picture Size**

**MENU** → **Picture** → **Picture Size** → **ENTER**

choose size and aspect ratio picture displayed on screen.

**Picture Size**

Different screen adjustment options are displayed depending on the current input source. Available Picture Size options can vary depending on whether the Picture Mode is Video/Image or Text.

- **16:9**: Sets the picture to 16:9 wide mode.
- **Zoom1**: Use for moderate magnification. Cuts off the top and sides.
- **Zoom2**: Use for a stronger magnification.
- **Smart View 1**: Reduces the 16:9 picture by 50%.
  - Smart View 1 is enabled only in HDMI1, HDMI2 mode.
- **Smart View 2**: Reduce the top and bottom margins of the 16:9 screen by 25%.
  - Smart View 2 is enabled only in HDMI1, HDMI2 mode.
- **Wide**: Enlarges the aspect ratio of the picture to fit the entire screen.
- **4:3**: Sets the picture to basic (4:3) mode.
  - Do not set your product to 4:3 format for a long time. The borders displayed on the left and right, or top and bottom of the screen may cause image retention (screen burn) which is not covered by the warranty.
- **Screen Fit**: Displays the full image without any cut-off when HDMI1, HDMI2 (720p / 1080i / 1080p) signals are inputted.
- **Custom**: Changes the resolution to suit the user’s preferences.
- **Original**: Display images in the original picture quality.
  - Available ports may differ depending on the model.

**Zoom/Position**

Adjust the screen size and position.

This option can be configured if the input source supports 1080i or 1080p and the Picture Size is Custom.

- This option is not supported when a PC is connected.
- From the Zoom/Position screen, follow the steps below.

1. Press the ▼ button to select Zoom/Position. Press the ► button.
2. Select the Zoom or Position. Press the ◄ button.
3. Press the ▲/▼/◄/► button to move the picture.
4. Press the ◄ button.

- If you want to reset the picture to its original position, select Reset in the Zoom/Position screen. The picture will be set to its default position.

**Resolution**

If the picture is not normal even when the resolution of the graphics card is one of the following, you can optimise the picture quality by selecting the same resolution for the product as the PC using this menu.

Available resolutions: Off / 1024 x 768 / 1280 x 768 / 1360 x 768 / 1366 x 768
Auto Adjustment

MENU → Picture → Auto Adjustment → ENTER

Available in PC mode only.
Adjust frequency values/positions and fine tune the settings automatically.

PC Screen Adjustment

MENU → Picture → PC Screen Adjustment → ENTER

Available in PC mode only.

- **Coarse / Fine**
  Removes or reduces picture noise.
  If the noise is not removed by Fine-tuning alone, use the *Coarse* function to adjust the frequency as best as possible (*Coarse*) and Fine-tune again. After the noise has been reduced, re-adjust the picture so that it is aligned with the Centre of screen.

- **Position**
  To adjust the PC's screen position if it is not centred or does not fit the product screen.
  Press the ▲ or ▼ button to adjust the Vertical Position. Press the ◀ or ▶ button to adjust the Horizontal Position.

- **Image Reset**
  Resets the image to the default settings.

Picture Off

MENU → Picture → Picture Off → ENTER

Selecting Picture Off switches off the screen. The volume is not disabled.
To switch the screen on, press any button other than the volume button.

Reset Picture

MENU → Picture → Reset Picture → ENTER

Resets your current picture mode to its default settings.
Chapter 07  OnScreen Display

Display Orientation

MENU  →  OnScreen Display  →  Display Orientation  →  ENTER

Onscreen Menu Orientation

Set the menu screen orientation.
- **Landscape**: Display the menu in landscape mode (default).
- **Portrait**: Display the menu in portrait mode on the right side of the product screen.

Source Content Orientation

Set the orientation of content from external devices connected to the product.
- **Landscape**: Display the screen in landscape mode (default).
- **Portrait**: Display the screen in portrait mode.
  - **Portrait** orientation mode is not supported when a UHD resolution is in use.

Aspect Ratio

Set the rotated screen to be either full screen or original.
- **Full Screen**: Display the rotated screen in full screen.
- **Original**: Display the rotated screen in the original aspect ratio.
  - Available only when **Source Content Orientation** is set to **Portrait**.

---

*The displayed image may differ depending on the model.*
Screen Protection

MENU → OnScreen Display → Screen Protection → ENTER

To reduce the possibility of screen burn, this unit is equipped with Pixel Shift screen burn prevention technology.

Pixel Shift moves the picture slightly on the screen.

The Pixel Shift time setting allows you to programme the time between movements of the picture in minutes.

Pixel Shift

Minimize image retention by finely moving pixels horizontally or vertically.

- **Pixel Shift (Off / On)**
  - **Horizontal, Vertical** and **Time** are enabled only when Pixel Shift is set to **On**.
- **Horizontal**: Sets how many pixels the screen moves horizontally.
- **Vertical**: Sets how many pixels the screen moves vertically.
- **Time**: Set the time interval for performing the horizontal or vertical movement, respectively.

### Available Pixel Shift Settings and Optimum Settings.

<table>
<thead>
<tr>
<th></th>
<th>Available Settings</th>
<th>Optimum Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Horizontal</strong> (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td><strong>Vertical</strong> (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td><strong>Time</strong> (minute)</td>
<td>1 min. ~ 4 min.</td>
<td>4 min.</td>
</tr>
</tbody>
</table>

- The **Pixel Shift** value may differ depending on the model.
- Displaying a still image or a **4:3** output for an extended period of time may cause image retention. This is not a defect in the product.

Timer

You can set the timer for Screen Protection.

The Screen Protection feature stops automatically after a specified period of time.

- **Timer (Off / Repeat / Interval)**
  - **Off**
  - **Repeat**: Display the anti-burn in pattern at a specified interval.
  - **Interval**: Display the anti-burn in pattern for a specified period of time (from the starting to finishing time).
  - When **Clock Set** is configured, **Interval** will be enabled.
  - **Period, Start Time** and **End Time** are enabled only when **Timer** is set to **Repeat** or **Interval**.
  - **Period**: Specify the time interval to activate the **Screen Protection** function.
    - The option is enabled when **Repeat** is selected for **Timer**.
  - **Start Time**: Set the start time to activate the screen protection function.
    - The option is enabled when **Interval** is selected for **Timer**.
  - **End Time**: Set the end time to deactivate the screen protection function.
    - The option is enabled when **Interval** is selected for **Timer**.

Immediate Display

Select the screen saver you want to display immediately.

- **Off / Fading Screen**

Side Gray

When the screen is set to 4:3 aspect ratio, adjust the brightness of white margins on sides to protect the screen.

- **Off / Light / Dark**
Message Display

Source Info
Select whether to display the source OSD when the input source changes.
- Off / On

No Signal Message
Select whether to display the no-signal OSD when no signal is detected.
- Off / On

MDC Message
Select whether to display the MDC OSD when the product is controlled by the MDC.
- Off / On

Menu Language

Set the menu language.
- A change to the language setting will only be applied to the onscreen menu display. It will not be applied to other functions on your PC.

Reset OnScreen Display

This option returns the current settings under OnScreen Display to the default factory settings.
Chapter 08
System

Setup

MENU  → System  → Setup  → ENTER

Change the initial settings that were configured when you first used the product. Press the button.

1. **Language**
   - Select your language to start the on screen setup.

2. **Picture Mode**
   - If you set Picture Mode to Calibration, the video wall automatically has screen uniformity. Set the mode to Calibration.
     - Yes / No

3. **Display Orientation**
   - Configure the menu page orientation.
     - Landscape / Portrait

4. **Network Settings**
   - Set the IP settings, and then select Next.

5. **Clock Set**
   - Set the current date and time, and then select Next.

6. **Complete**
   - Congratulations! Setup is complete and you’re ready to get started.
Time

MENU → System → Time → ENTER

You can configure Clock Set or Sleep Timer. Configure various time-related settings.

Press the INFO button if you want to view the current time.

Clock Set

Select Clock Set. Select Date or Time, and then press E.

Use the number buttons to enter numbers or press the up and down arrow buttons. Use the left and right arrow buttons to move from one entry field to the next. Press E when done.

You can set the Date and Time directly by pressing the number buttons on the remote control.

DST

Switches the DST (Daylight Saving Time) function on or off.

Off / On

• Start Date: Set the start date of Daylight Saving Time.
• End Date: Set the end date of Daylight Saving Time.
• Time Offset: Select the correct time offset your timezone.

Sleep Timer

Automatically shuts off the product after a preset period of time.

(Off / 30 min. / 60 min. / 90 min. / 120 min. / 150 min. / 180 min.)

Use the up and down arrows to select a period of time, and then press E. To cancel Sleep Timer, select Off.

Power On Delay

When connecting multiple products, adjust the power-on time for each product to prevent power overload (within the range 0–50 seconds).

MagicInfo I Source

MENU → System → MagicInfo I Source → ENTER

The MagicInfo I Source feature is available if a network box (sold separately) is connected.

Pressing MagicInfo Player I on the remote control displays content connected to the network box (sold separately).

• DVI / DisplayPort
Auto Source Switching

MENU → System → Auto Source Switching → ENTER

Turning on the display with Auto Source Switching On, and the previous video source selection is not active, the display will automatically search the different video input sources for active video.

Auto Source Switching

When the Auto Source Switching is On, the display video source will automatically be searched for active video.

The Primary Source selection will be activated, if the current video source is not recognised. Secondary Source selection will become active, if no primary video source is available.

If both the primary and secondary input sources are not recognised, the display will perform two searches for an active source, each search checking the primary and then secondary source. If both searches fail, the display will return to the first video source and display a message indicating that there is no signal.

When the Primary Source selection is set to All, the display will search all the video source inputs twice in sequence looking for an active video source, returning back to the first video source in the sequence if no video is found.

Primary Source Recovery

Select whether to restore the selected primary input source when a primary input source is connected.

The Primary Source Recovery function is disabled if Primary Source is set to All.

Primary Source

Specify Primary Source for the automatic input source.

Secondary Source

Specify Secondary Source for the automatic input source.

Power Control

MENU → System → Power Control → ENTER

Auto Power On

This feature automatically turns on the product as soon as it is plugged in. Pressing the power button is not needed.

• Off / On

PC Module Power

The PC module can be turned on/off separately from the LFD.

Synced Power-On

To turn off the LFD without turning off the PC module, select Off.

• Off / On

Synced Power-Off

To turn on the PC module without turning on the LFD, select Off.

• Off / On
Standby Control

You can set the screen standby mode to be applied when an input signal is received.

- **Auto**
  Power-saving mode will activate if no input signals are detected even though a source device is connected to the display.
  The message **No Signal** will appear if no source device is connected.

- **Off**
  The message **No Signal** will appear if no input signals are detected.
  - If **No Signal** is displayed although a source device is connected, check the cable connection.
  - If **No Signal Message** is set to **Off**, the **No Signal** message does not appear.
    - If this is the case, set **No Signal Message** to **On**.

- **On**
  Power-saving mode will activate if no input signals are detected.

Network Standby

This feature keeps the network power on when the product turns off.

- **Off** / **On**

Power Button

The power button can be set to either turn on the power or turn on/off the power.

- **Power On Only**: Set the power button to turn on the power.
- **Power On/Off**: Set the power button to turn on/off the power.

Eco Solution

**MENU** → **System** → **Eco Solution** → **ENTER**

Energy Saving

Reduce the power consumption by adjusting the screen brightness.

- **Off** / **Low** / **Medium** / **High**

Eco Sensor

To enhance your power savings, the picture settings will automatically adapt to the light in the room.

- **Off** / **On**
  - Adjusting the **Backlight** setting under **Picture** while **Eco Sensor** is on will disable the **Off**.
  - If the screen contrast is not sufficient, set the **Eco Sensor** to **Off**. If the **Eco Sensor** is **Off**, it may not comply with energy standards.

Min. Backlight

When **Eco Sensor** is **On**, you can manually adjust the minimum screen brightness. **Min. Backlight** is the darkest backlight mode. Make sure the **Min. Backlight** setting is lower than the **Backlight** setting.

- If **Eco Sensor** is **On**, the display brightness may change (become slightly darker or brighter) depending on the surrounding light intensity.
Screen Lamp Schedule
The panel brightness is adjusted according to the Screen Lamp Schedule. A value closer to 100 makes the panel brighter.

- This option is enabled when Clock Set is configured.
- Off / On

No Signal Power Off
Save power by turning the device off when no signal is received from any source.

- Off / 15 min. / 30 min. / 60 min.
- Disabled when an attached PC is in power saving mode.
- The product will automatically power off at a specified time. The time can be changed as required.

Auto Power Off
The product will automatically turn off if you don't press a button on the remote or touch a button on product front panel within select hours to prevent overheating.

- Off / 4 hours / 6 hours / 8 hours

Temperature Control

MENU → System → Temperature Control → ENTER
This function detects the internal temperature of the product. You can specify the temperature range that is acceptable.

The default temperature is set to 77 ℃.

Recommended temperature for Temperature Control is 75 ℃ ~ 80 ℃ (provided that the surrounding temperature is 40 ℃).

- The screen will become darker if the current temperature exceeds the specified temperature limit. If the temperature continues to rise, the product will power off to prevent overheating.

Change PIN

MENU → System → Change PIN → ENTER
The Change PIN screen will appear.

Choose any 4 digits for your PIN and enter it in Enter a new PIN. Reenter the same 4 digits in Enter the PIN again.

When the Confirm screen disappears, press the Close button. The product has memorised your new PIN.

- Default password: 0 - 0 - 0 - 0
- Change the PIN to keep your device secure.
**General**

**Security**

Enter your 4 digit PIN number. The default PIN number is “0-0-0-0”. If you want to change the PIN number, use the Enter PIN function. Change the PIN to keep your device secure.

**Safety Lock**

It sets safe lock function.
- Off / On

All the menus and buttons of the product and remote control, except for the LOCK button on the remote control, will be locked by the Safety Lock function.

To unlock the menus and buttons, press the LOCK button and then enter the password (default password: 0 - 0 - 0 - 0).

**Button Lock**

This menu can be used to lock the buttons on the product.

Only the remote control can control the product if Button Lock is set to On.
- Off / On

**HDMI Hot Plug**

This feature is used to activate the time delay to turn on a DVI/HDMI source device.
- Off / On

---

**Reset System**

**MENU  → System → Reset System → ENTER**

This option returns the current settings under system to the default factory settings.
Sound Adjustment

Configure the sound (Sound) settings for the product.

**HDMI Sound**

MENU  

Sound  

HDMI Sound  

Select whether to hear from AV(HDMI) or PC(DVI).

- AV(HDMI) / PC(DVI)

**Sound on Video Call**

MENU  

Sound  

Sound on Video Call  

Select sound output to listen to during a video call.

- Current Source / Video Call

**Reset Sound**

MENU  

Sound  

Reset Sound  

The displayed image may differ depending on the model. Reset all sound settings to the factory defaults.
Chapter 10
Support

Software Update

MENU  ➤ Support ➤ Software Update ➤ ENTER  ➤

The Software Update menu lets you upgrade your product software to the latest version.

- Be careful not to turn off the power until the upgrade is complete. The product will turn off and on automatically after completing the software upgrade.
- When you upgrade software, all video and audio settings you have made will return to their default settings. We advise you to write down your settings so that you can easily reset them after the upgrade.

Contact Samsung

MENU  ➤ Support ➤ Contact Samsung ➤ ENTER  ➤

View this information when your product does not work properly or when you want to upgrade the software.

You can find information regarding our call centres and how to download products and software.

- Contact Samsung and find the product Model Code and Software Version.
Go to Home

Accessible using the HOME button on the remote control.
MENU → Support → Go to Home → ENTER
Refer to the “Home feature” chapter for details on sub-menu items.
Go to Home to play a variety of content from a memory device or a connected network.

Video Wall

Customise the layout of multiple displays that are connected to form a video wall.
In addition, display part of a whole picture or repeat the same picture on each of the connected multiple displays.
To display multiple images, refer to MDC Help or the MagicInfo user guide. Some models may not support the MagicInfo function.

Picture Mode

Select a picture mode (Picture Mode) suitable for the environment where the product will be used.

On/Off Timer

You must set the clock before you can use On/Off Timer.
Set On Timer so that your product turns on automatically at a time and on a day of your choosing.
The power is turned on with the specified volume or input source.

Network Settings

View the network settings.

MagicInfo Player I

Change source to MagicInfo Player I.
MagicInfo Player I publishes and plays a variety of content, including created content and multimedia content (images, videos and audio content), from the server or a connected device.

ID Settings

Assign an ID to a set.
Press ▲/▼ to select a number, and press ENTER.

More settings

The picture settings menu appears.

Reset All

MENU → Support → Reset All → ENTER
This option returns all the current settings for a display to the default factory settings.
Requirements Before Contacting Samsung Customer Service Centre

Testing the Product

Check if your product is operating normally by using the product test function.
If the screen remains blank while the power LED blinks even when the product is correctly connected to a PC, perform product testing.

1. Power off both the PC and product.
2. Disconnect all the cables from the product.
3. Power on the product.
4. If No Signal is displayed, the product is operating normally.

Checking the Resolution and Frequency

Not Optimum Mode will briefly be displayed if a mode that exceeds a supported resolution is selected (refer to Supported Resolutions).
Check the followings.

Installation issue (PC mode)

| The screen keeps switching on and off. | Check the cable connection between the product and PC, and ensure the connection is secure. |
| Blank spaces are found on all four sides of the screen when an HDMI or HDMI-DVI cable is connected to the product and PC. | The blank spaces found on the screen have nothing to do with the product. Blank spaces on the screen are caused by the PC or graphics card. To resolve the problem, adjust the screen size in the HDMI or DVI settings for the graphics card. If the graphics card settings menu does not have an option to adjust the screen size, update the graphics card driver to the latest version. (Please contact the graphics card or computer manufacturer for further details about how to adjust the screen settings.) |

| PC is shown in Source when a PC is not connected. | PC is always shown in Source irrespective of whether or not a PC is connected. |

Screen issue

| The power LED is off. The screen will not switch on. | Make sure that the power cord is connected. |
| No Signal is displayed on the screen. | Check that the product is connected correctly with a cable. Check that the device connected to the product is powered on. |
| Not Optimum Mode is displayed. | This message is displayed when a signal from the graphics card exceeds the product's maximum resolution and frequency. Refer to the Standard Signal Mode Table and set the maximum resolution and frequency according to the product specifications. |
| The images on the screen look distorted. | Check the cable connection to the product. |

## Other issue

### HDMI-CEC does not work.

This product does not support the HDMI-CEC feature.

To use several external devices compatible with the HDMI-CEC feature that are connected to the HDMI1 and HDMI2 ports on the product, turn off the HDMI-CEC features on all the external devices. External devices include Blu-ray and DVD players.

Operating an external device when its HDMI-CEC feature is enabled may automatically stop other external devices.

To change HDMI-CEC settings, refer to the device user guide or contact the device manufacturer for assistance.

### The IR sensor is not functioning.

Make sure the sensor light turns on when a button is pressed on the remote control.

- If the sensor light does not turn on, turn the power switch off and then on again on the back of the product.
  (The power LED lights up red when the screen is switched off.)
  If the sensor light still does not turn on after the power switch is turned off and then on again, an internal jack may be disconnected.
  Contact your nearest service centre to have the product serviced.

- If the sensor light that is on does not flash red when a button is pressed on the remote control, the IR sensor may be defective.
  Contact your nearest service centre to have the product serviced.

- This function is available only when a source device, such as a DVD player and STB, is connected to the product via an HDMI (RGB signal) cable.

### When booting the PC with the input source set to DisplayPort the BIOS and booting screens do not appear.

- Boot the PC when the set is turned on or when the input source is not DisplayPort.
# Q & A

---

**Plug-and-Play**

This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimises the monitor settings. Monitor installation takes place automatically. However, you can customise the installation settings if desired.

---

**Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.**

---

**This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.**

---

**For detailed device specifications, visit the Samsung Electronics website.**
Preset Timing Modes

This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

Check the frequency when you exchange a CDT product (connected to a PC) for an LCD product. If the LCD product does not support 85 Hz, change the vertical frequency to 60 Hz using the CDT product before you exchange it with the LCD product.

The screen will automatically be adjusted if a signal that belongs to the following standard signal modes is transmitted from your PC. If the signal transmitted from the PC does not belong to the standard signal modes, the screen may be blank with the power LED on. In such a case, change the settings according to the following table by referring to the graphics card user manual.

- Horizontal Frequency
  The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

- Vertical Frequency
  The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

Responsibility for the Pay Service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect
Cleaning of the product, Adjustment, Explanation, Re-installation and etc.
- If a service technician gives instructions on how to use product or simply adjusts options without disassembling product.
- If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
- If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
- If a product is reinstalled to move to a different spot or to move to a different house.
- If customer requests instructions on how to use because of another company’s product.
- If customer requests instructions on how to use the network or another company’s programme.
- If customer requests software installation and setup for the product.
- If a service technician removes/cleans dusts or foreign materials inside of the product.
- If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer’s fault
Product damage caused by customer’s mishandling or wrong repair
If a product damage is caused by;
- External impact or drop.
- Use of supplies or separately sold product unspecified by Samsung.
- Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
- Remodeling or repairing the product by customer.
- Using it with incorrect voltage or non-authorised electrical connections.

Others
- If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
- If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
Prevention of Afterimage Burn-in

What is afterimage burn-in?

Afterimage burn-in should not occur when the panel is operating normally. Normal operation refers to a continuously changing video pattern. If the panel displays a fixed pattern for an extended period of time a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals.

Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes.

⚠️ This information is a guide to prevent afterimage burn-in. Viewing a fixed screen for an extended period of time may cause afterimage burn-in. This problem is not included in warranty.

Recommended prevention practices

Viewing a fixed screen for an extended period of time may cause afterimage burn-ins or smudges. If the product is not to be used for a long time, turn it off, or activate the Power Saving mode or Screen Saver with a moving image.

- Change the colours regularly.

- Avoid combinations of a text colour and background colour of contrasting brightness.

  Avoid using colours of contrasting brightness (black and white; grey and black).

### Terminology

480i / 480p / 720p / 1080i / 1080p. Each of the scanning rates above refers to the number of effective scanning lines that decides the screen resolution. The scanning rate may be indicated in i (interlaced) or p (progressive), depending on the scanning method.

- **Scanning**
  Scanning refers to a process of sending pixels that form an image progressively. A larger number of pixels will deliver a clearer and more vivid picture.

- **Progressive**
  In progressive scan mode, all lines of pixels are scanned one by one (progressively) on the screen.

- **Interlaced**
  In interlaced scan mode, every other line of pixels is scanned from top to bottom first and then the remaining lines of pixels (that were not scanned) are scanned.

**Non-interlace Mode and Interlace Mode**
Non-interlace mode (progressive scan) displays a horizontal line from the top to the bottom of a screen progressively. Interlace mode displays the odd number lines first and the even number lines next. Non-interlace mode is mainly used in monitors as it produces screen clarity and interlace mode is mainly used in TVs.

**Dot Pitch**
The screen consists of red, green and blue dots. A shorter distance between the dots produces a higher resolution. Dot pitch refers to the distance between the shortest distance between dots of the same colour. Dot pitch is measured in millimetres.

**Vertical Frequency**
The product displays a single image many times per second (like a fluorescent light that flickers) to display an image for a viewer to see. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.
E.g. 60Hz refers to a single image being displayed 60 times in one second.

**Horizontal Frequency**
The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

**Source**
Input source refers to a video source device connected to the product such as a camcorder or video or DVD player.

**Plug & Play**
Plug & Play is a function that allows the automatic exchange of information between a monitor and PC to produce an optimum display environment. The product uses VESA DDC (international standard) to execute Plug & Play.

**Resolution**
Resolution is the number of horizontal dots (pixels) and vertical dots (pixels) that form a screen. It represents the level of display detail. A higher resolution enables more data to be displayed on the screen and is useful to perform multiple tasks simultaneously.
E.g. A resolution of 1920 X 1080 consists of 1,920 horizontal pixels (horizontal resolution) and 1,080 vertical pixels (vertical resolution).

**DVD (Digital Versatile Disc)**
DVD refers to a CD-sized mass storage disk where you can save multimedia (audio, video or game) applications using MPEG-2 video compression technology.

**HDMI (High Definition Multimedia Interface)**
It is an interface that can be connected to a digital audio source as well as a high-definition video source by using a single cable without compression.

**Multiple Display Control (MDC)**
MDC (Multiple Display Control) is an application that allows multiple display devices to be controlled simultaneously using a PC. Communication between a PC and monitor takes place using RS232C (serial data transmission) and RJ45 (LAN) cables.
