CAUTION

RISK OF ELECTRIC SHOCK. DO NOT OPEN.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER ALL SERVICING TO QUALIFIED PERSONNEL.

- This symbol indicates that high voltage is present inside. It is dangerous to make any kind of contact with any internal part of this product.
- AC voltage: Rated voltage marked with this symbol is AC voltage.
- This symbol indicates that this product has included important literature concerning operation and maintenance.
- DC voltage: Rated voltage marked with this symbol is DC voltage.
- Class II product: This symbol indicates that a safety connection to electrical earth (ground) is not required. If this symbol is not present on a product with a mains lead, the product MUST have a reliable connection to protective earth (ground).
- Caution. Consult instructions for use: This symbol instructs the user to consult the user manual for further safety related information.
Electricity and Safety

The following images are for reference only. Real-life situations may differ from what is shown in the images.

⚠️ Warning

Do not touch the power plug with wet hands. Otherwise, an electric shock may result.

Do not bend or pull the power cable with force. Be careful not to leave the power cable under a heavy object. Product failure, an electric shock or fire may result from a damaged cable.

Do not connect multiple products to a single power socket. Overheated power sockets may cause a fire.

⚠️ Insert the power plug all the way in so it is not loose. An unsecure connection may cause a fire.

⚠️ Clean any dust around the pins of the power plug or the power socket with a dry cloth. A fire may result.

⚠️ Connect the power plug to a grounded power socket. (Except for devices that do not provide grounding) An electric shock or injury may result.

⚠️ Do not use a damaged power plug or a loose power socket. An electric shock or fire may result.
Caution

Hold the plug when disconnecting the power cable from the power socket.
An electric shock or fire may result.

When connecting the power plug to the port, be sure to connect it completely.
If the power plug is not completely connected to the port, the plug may be unexpectedly disconnected, or there is a risk of overheating due to overcurrent, leading to safety accidents.

Only use the power cable provided with your product by Samsung. Do not use the power cable with other products.
An electric shock or fire may result.

Keep the power socket where the power cord is connected unobstructed.
When a problem occurs with the product, the power cord must be unplugged to completely cut off power to the product. The power is not completely cut off by using only the Power button on the body of the product.

Do not disconnect the power cable while the product is being used.
The product may become damaged by an electric shock.

Warning

Before moving the product, turn off the power switch and disconnect the power cable and all other connected cables.
Damage to the cable may cause a fire or electric shock.

When installing the product, keep it at a distance from the wall so that it is well ventilated.
An increased internal temperature may cause a fire.

Do not install the product in a poorly ventilated space such as bookcase or closet.
An increased internal temperature may cause a fire.

Keep the plastic packaging out of the reach of children.
Children’s misuse of the plastic packaging may cause suffocation.

Do not install the power cable (DC power supply) and the product near head sources.
(Candles, mosquito repellents, cigarettes, sprays, heating devices, places exposed to direct sunlight, and more)
When installing the product, fix it firmly so that it does not fall.
If the product is not fixed firmly and a child touches the product while playing, the product may fall, causing damage to the product or injury to the child.

Do not install the product in a kitchen or near a kitchen counter.
Edible oil or oil vapor can damage or deform the product.

Have a technician install the wall-mount hanger.
Installation by an unqualified person can result in an injury. Only use approved cabinets.

If the product is installed in an unusual location, the surrounding environment may cause a serious quality problem. Therefore, be sure to contact Samsung Customer Service Center before installation.
(Places where many fine dusts are generated, places where chemicals are used, places with too high or low temperatures, places with a lot of moisture or water, transportation equipment such as vehicles, airports and stations used continuously for a long time, and more)

Caution

When lifting and moving the product, do not touch the screen display, and make sure that at least two people work together.
The product may fall, causing personal injury or product damage.

Do not lay down the product on its front.
The screen may become damaged.

Prolonged exposure to direct sunlight may discolor the surface of the screen display.
Operation

Warning

If the product generates a strange noise, a burning smell, or smoke, unplug the power plug immediately and contact your Samsung Customer Service Center. An electric shock or fire may result.

Keep the remote control batteries and the small accessories out of the reach of children. Ensure children do not swallow any of them. If children have had the battery in their mouths, consult your doctor immediately.

If the product is dropped or its appearance is damaged, turn off the power switch and disconnect the power cord. Then contact Samsung Customer Service Center. Continued use can result in an electric shock or a fire.

Do not move the product by pulling the power cord or any cable. Product failure, an electric shock or fire may result from a damaged cable.

Ensure the vents are not blocked by tablecloths or curtains. An increased internal temperature may cause a fire.

Do not apply an impact to the product.
- The screen display may be damaged.
- An electric shock or fire may result.

Do not insert metallic objects (chopsticks, coins, hairpins, etc) or objects that burn easily (paper, matches, etc) into the product (via the vent or input/output ports, etc).
- If foreign substances enter the product, be sure to power off the product and disconnect the power cord. Then contact Samsung Customer Service Center.
- Product failure, an electric shock or fire may result.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.
- If foreign substances such as water enter the product, be sure to disconnect the power cord. Then contact Samsung Customer Service Center.
- Product failure, an electric shock or fire may result.

During a lightning or thunderstorm, power off the product and disconnect the power cord. An electric shock or fire may result.

Do not leave heavy objects or items that children like (toys, sweets, etc.) on top of the product.
The product or heavy objects may fall as children try to reach for the toys or sweets resulting in a serious injury.
Do not hang on or climb on the product.
• The product may fall, causing personal injury or even death.
• Be especially careful that children do not hang on or climb on the product.

While the power plug is plugged into a power socket, do not insert a chopstick or other conductor into a remaining power socket. Also, after disconnecting the power plug from the power socket, do not touch the pins of the plug immediately. Otherwise, an electric shock may result.

There is a high voltage inside the product. Never disassemble, repair or modify the product yourself.
• Contact Samsung Customer Service Center for repairs.
• An electric shock or fire may result.

If a gas leakage is found, do not touch the product or the power plug, and ventilate the room immediately. Sparks can cause an explosion or fire.

Do not use humidifiers or stoves around the product. An electric shock or fire may result.

Caution

Insert each battery so that its polarity (+, –) is correct. If the polarity is not correct, the battery may rupture or the internal fluid may leak, causing contamination and damage to the surroundings, fire, or personal injury.

Do not place heavy objects on the product. Product failure or personal injury may result.

When you do not use the product for a long time due to vacation or other reason, disconnect the power cord from the power socket. Dust accumulation combined with heat can cause a fire, electric shock or electric leakage.

Use the product at the recommended resolution and frequency. Your eyesight may deteriorate.

The batteries (and rechargeable batteries) are not ordinary refuse and must be returned for recycling purposes. The customer is responsible for returning the used or rechargeable batteries for recycling. The customer can return used or rechargeable batteries to a nearby public recycling center or to a store selling the same type of the battery or rechargeable battery.

Rest your eyes for more than 5 minutes for every 1 hour of product use. Eye fatigue will be relieved.

Leaving the screen fixed on a stationary image for an extended period of time may cause afterimage burn-in or defective pixels. When you do not use the product for a long time, activate power-saving mode or set the screen saver to moving-picture mode.
Do not use or keep combustible spray or an inflammable substance near the product. An explosion or fire may result.

Use only the specified standardized batteries, and do not use a new battery and a used battery at the same time. Otherwise, the batteries may be damaged or cause fire, personal injury or damage due to a leakage of the internal liquid.

Do not watch the product screen too closely and continuously for a long time. Your eyesight may deteriorate.

Do not lift or move the product when it is in operation.

Do not touch the screen when the product has been turned on for an extended period of time as it will become hot.

When using headphones or earphones, do not turn the volume too high or use them for a long time. Damage to your hearing may result.

### Cleaning

**Warning**

Do not spray water or cleaner directly on the product.

- The product's surface may be damaged, or the markings may be erased.
- An electric shock or fire may result.

**Caution**

When cleaning, be sure to disconnect the power plug and wipe gently with a soft and dry cloth such as superfine fibers or cotton flannels to prevent scratches. The product's surface may be damaged, or the markings may be erased.

Be sure to use a soft and dry cloth such as superfine fibers or cotton flannels because the surface of the product and the screen display are vulnerable to scratches. The product's surface or the screen display can be easily scratched with foreign substances.

Do not apply chemicals containing alcohol, solvent, or surfactant such as wax, benzene, thinner, pesticide, air freshener, lubricant, or cleaner to the product. The product's exterior may be discolored or cracked, the surface of the panel may be peeled off, or the markings may be erased.
Storage and Maintenance

If dust or dirt from the supplied pen remains on the protective glass, clean it referring to the instructions below.

Cleaning the exterior and display

Wipe the surface with a slightly wet, soft cloth, and then wipe with a dry cloth.

![Cleaning Steps]

Precautions

Do not scratch the screen with nails or sharp objects. Scratches may leave marks or damage the product.

Do not spray water directly on any part of the product. Product failure, an electric shock or fire may result from water that enters the product.

Due to the characteristics of high-glossy products, using a UV humidifier nearby may create white-colored stains on the product.

• Removing a sticker attached on the screen may leave residues. Clean the residues before watching the screen.
• Do not strongly press and rub the product. Damage to the product may result.
• Do not wipe the screen with chemicals. Product failure may result.
• Contact Customer Service Center if the inside of the product needs cleaning (service fee will be charged).

Precautions for Use

Be careful that if you use the supplied pen with a load exceeding 2.5 kg, scratches may occur on the protective glass.

If you use a ballpoint pen other than the supplied pen, be careful that the screen may be stained with ink or damaged.

We recommend that you use the supplied pen. Do not use sharp, pointed objects other than the pen.
Contact the vendor where you purchased the product if any components are missing.

The appearance of the components may differ from the images shown.

A stand is not provided with the product. To install a stand, you can purchase one separately.

The RS232C adapter can be used to connect using the D-SUB(9-pin) to Stereo type RS232C cable.

Checking the Components

- Quick Setup Guide
- Warranty card (Not available in some locations)
- Regulatory guide
- Power cord
- Batteries (AAA x 2) (Not available in some locations)
- Remote Control
- RS232C adapter
- TOUCH PEN x 2
- USB cable
- HOLDER-RING x 4 (Supported model: QB75N-W)
The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

</tr>
</tbody>
</table>

**QB65H-TR/QB75H-TR**

- **Remote sensor**: Press a button on the remote control pointing at the sensor on the front of the product to perform the corresponding function.
- **Pen holder**: Keep the touch pen in place.
- **Network box mounting hole**: Used for mounting network boxes.
- **Speaker**: Turns the product on or off.
- **Panel Key**: Used for menu navigation.

Store used batteries out of reach of children and recycle.

Do not use a new and used battery together. Replace both batteries at the same time.

Remove batteries when the remote control is not to be used for an extended period of time.

To enhance the IR receiver performance, connect an External IR Sensor (sold separately) to the IR IN port.
The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

<table>

Using the touch function

The color and shape of parts may differ from what is shown. Specifications are subject to change without notice to improve quality.

1. To use the touch function with a Network box (sold separately) or computer connected to the product, use the USB cable to connect the TOUCH OUT port on the product to the USB port on the Network box or computer.

2. If you connect the TOUCH OUT port to a PC that uses multiple monitors, the touch function operates only on the primary monitor.

Anti-theft Lock

An anti-theft lock allows you to use the product securely even in public places. The locking device shape and locking method depend on the manufacturer. Refer to the user guide provided with your anti-theft locking device for details.

The following images are for reference only. Real-life situations may differ from what is shown in the images.

This function may not be supported depending on the model.

To lock an anti-theft locking device:

1. Fix the cable of your anti-theft locking device to a heavy object such as a desk.
2. Put one end of the cable through the loop on the other end.
3. Insert the locking device into the anti-theft lock slot at the back of the product.
4. Lock the locking device.

   - An anti-theft locking device can be purchased separately.
   - Refer to the user guide provided with your anti-theft locking device for details.
   - Anti-theft locking devices can be purchased at electronics retailers or online.
Remote Control

- Using other display devices in the same space as the remote control of this product can cause the other display devices to be inadvertently controlled.
- A button without a description in the image below is not supported on the product.

- Power on the product
- Power off the product
- Number buttons: Use to enter a PIN, enter a Date, etc.
- Mute the sound
- Adjust the volume
- Change the input source
- Display or hide the onscreen display menu, or return to the previous menu

Remote control button functions may differ for different products.
Remote control button functions may differ for different products.

Remove batteries when the remote control is not to be used for an extended period of time.

To place batteries in the remote control (AAA x 2)
Before Installing the Product (Installation Guide)

To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.

- Ensure that an authorized installation company installs the wall mount.
- Otherwise, it may fall and cause personal injury.
- Make sure to install the specified wall mount.

Tilting Angle

Contact Samsung Customer Service Center for further details.

This model is designed for use in landscape orientation only.

- The product can be tilted at a maximum angle of 5° from a perpendicular wall surface.

Ventilation

Contact Samsung Customer Service Center for further details.

Installation on a Perpendicular Wall

A Minimum 40 mm
B Ambient temperature: Under 35 °C

When installing the product on a perpendicular wall, allow at least 40 mm of space between the product and wall surface for ventilation and ensure that the ambient temperature is kept below 35 °C.

Installation on an Indented Wall

A Minimum 40 mm
B Minimum 70 mm
C Minimum 50 mm
D Minimum 50 mm
E Ambient temperature: Under 35 °C

When installing the product on an indented wall, allow at least the space specified above between the product and wall for ventilation and ensure that the ambient temperature is kept below 35 °C.
Installing the Wall Mount

Preparing before installing Wall-Mount

To install a wall-mount from another manufacturer, use the Holder-Ring.

Installing the Wall Mount

- The wall mount kit (sold separately) allows you to mount the product on the wall.
- The provided image is only for reference. For detailed information on installing the wall mount, see instructions provided with the wall mount.
- We recommend you contact a technician for assistance when installing the wall mount bracket.
- Samsung Electronics is not responsible for any damage to the product or injury to yourself or others if you select to install the wall mount on your own.
Wall Mount Kit Specifications (VESA)

Install your wall mount on a solid wall perpendicular to the floor. To install the product on the other wall area, contact the nearest agency. If you install the product on a slanted wall, it may fall and result in severe personal injury.

- Samsung wall mount kits contain a detailed installation manual and all parts necessary for assembly are provided.
- Do not use screws that are longer than the standard length or do not comply with the VESA standard screw specifications. Screws that are too long may cause damage to the inside of the product.
- For wall mounts that do not comply with the VESA standard screw specifications, the length of the screws may differ depending on the wall mount specifications.
- Do not fasten the screws too firmly. This may damage the product or cause the product to fall, leading to personal injury. Samsung is not liable for these kinds of accidents.
- Samsung is not liable for product damage or personal injury when a non-VESA or non-specified wall mount is used or the consumer fails to follow the product installation instructions.
- Do not mount the product at more than a 5 degree tilt.
- Always have at least two people mount the product on a wall.
- Standard dimensions for wall mount kits are shown in the table below.

<table>
<thead>
<tr>
<th>VESA screw hole specs (A * B) in millimeters (inches)</th>
<th>Standard Screw</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>400 × 400 (15.7 × 15.7)</td>
<td>M8</td>
<td>4</td>
</tr>
</tbody>
</table>

- Do not install your Wall Mount Kit while your product is turned on. It may result in personal injury due to electric shock.
Chapter 03
Using a touchscreen monitor

Touchscreen monitor

Control a PC by tapping the screen instead of using an input device such as a keyboard or mouse. The touchscreen functions by detecting a minute electric current that runs through your body (capacitive). Make sure to use the surface of your finger tip when tapping the screen.

Read below before using the product

- Take extra care to ensure an electrical substance does not contact the screen. The screen may not function properly if there is static.
- Do not press hard on the touchscreen with your finger tip. Do not use a sharp object when tapping the screen. The screen may break or get damaged.
- Do not tap the screen while wearing a glove, with a dirty finger, or using something sharp such as your fingernail or a ballpoint pen. The screen may not function properly.
- Take extra care to ensure the screen does not contact moisture. The touch sensor may not function properly.
- Displaying a still image on the screen for an extended period of time may cause after images (screen degradation) or stains. Switch off the screen when not in use.
- When using your palm as an eraser, put your fingers together.
Connecting the touchscreen monitor

The supported ports may vary depending on the model.

Connecting to a PC

1. Connect your PC to the product using a HDMI or HDMI-DVI cable.
   - Use the appropriate cable for the port to connect to.
   - Supported video ports: HDMI, DP(DisplayPort), DVI

Connecting the devices using a HDMI cable

Connecting the devices using a HDMI-DVI cable

2. Connect the power cable from the product to the power outlet.
3. Connect the TOUCH OUT port on the product to a USB port on the PC using the USB cable.
   - TOUCH OUT1 operates when the current screen is set to HDMI1, HDMI 2, DisplayPort, or DVI.
   - TOUCH OUT 2 operates when the current screen is set to HDMI 3.

If touchscreen control is not available after the devices are connected
- Make sure to connect the HDMI or HDMI-DVI cable before connecting the USB cable.
- If touchscreen control is still unavailable after the cables are connected properly, disconnect the USB cable and then connect it again.
Configuring the touchscreen monitor settings

To properly use the touch function of the product in Windows, go to Tablet PC Settings and calibrate the product.

1. First connect the touchscreen monitor before configuring the following settings.
2. The maximum number of touchscreen monitors that can be connected simultaneously varies, depending on the operating system and graphics card settings.
3. If Tablet PC Settings is not found in Control Panel, search for Tablet PC Settings from Search Control Panel.

Calibration

1. Instructions below are for Windows 8. The same method applies to both Windows 7, Windows 8 and Windows 10.
2. After changing the Picture Size from the OSD menu, you may need to calibrate the picture settings again.
3. In the occurrence of an error during calibration, go to Tablet PC Settings → the Display tab. Tap Reset, and calibrate again.
4. In dual monitor mode: If the following page does not appear on the product, press the Enter key to display the page.

In the Display tab, select Setup under Configure.

Touch this screen to identify it as the touchscreen.

If this is not the Tablet PC screen, press Enter to move to the next screen. To close the tool, press Esc.
3 Select the product from Display under Display options. Next, select Calibrate.

4 Perform calibration following the onscreen instructions displayed as shown in the image. To provide calibration samples, tap the crosshair each time that it appears on the screen. Right-click anywhere on the screen to return to the last calibration point. Press the Esc button to close the tool. Do not change your screen orientation until you have completed the calibration process.

5 After calibration is complete, the message Do you want to save the calibration data? appears. Select Yes.

6 The touchscreen monitor has been calibrated successfully. Selecting Reset will remove the calibration data.

Controlling the screen

Touchscreen gestures
Using touchscreen gestures is similar to using a mouse.

Tap

Lightly tap the screen.
Use this gesture to select a feature or menu item.

It is similar to clicking on a mouse.

Drag

Lightly touch and drag in any direction on the screen.
Use this gesture to move in a specific direction on a web page, map or photo.

It is similar to dragging a mouse.

Double tap

Tap the screen twice.
Use this gesture to run the selected program.

It is similar to double-clicking on a mouse.
Flick

Flick your finger on the screen as shown in the image.
Use this gesture to go to the previous or next picture or web page.

Zoom in/out

Spread or pinch your fingers on the screen as shown in the image.
Use these gestures to zoom in or out respectively on a web page, map or photo.

Notes

- To increase the touch input accuracy, enlarge the font or icons.
- Use a mouse as an additional input method in touchscreen mode for more precise control.
- For details on how to use the Whiteboard icons, tap the icon at the bottom of the screen, and then tap Quick Guide.
Connecting and Using a Source Device

Before Connecting

Pre-connection Checkpoints

- Also refer to the user guide for the source device you want to connect with. The number and location of ports available on the source device may vary.
- Do not connect the power cable until all connections are completed. Connecting the power cable during connection may damage the product.
- Check the types of ports of the product you want to connect.
- We recommend using authorized cables for HDMI or DP cable connections.

Connecting to a PC

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- A PC can be connected to the product in a variety of ways. Select a connection method suitable for your PC.

Connection Using an HDMI Cable

- Connecting parts may differ in depending on the model.
Connection Using an DP Cable

- Connecting parts may differ in depending on the model.

- Precautions for using DP
  - Some graphics cards that are not compliant with the DP standard may prevent the Windows Booting/Bios screen from being displayed when the product is in power-saving mode. If this is the case, make sure to turn on the product first before turning on your PC.
  - Using a DP cable that is not VESA compliant may cause the product to function improperly. Samsung Electronics shall not be held responsible for any issues from using a cable that is not VESA compliant.
  - Make sure to use a DP cable that is VESA compliant.
  - To use the optimal resolution (3840 x 2160 @ 60Hz) when the input source is DisplayPort, using a DP cable shorter than 5m is recommended.
  - Disabling power-saving mode when the input source is DisplayPort may import new resolution information and reset the task window size or location.

Connection Using a DVI Cable (Digital type)

- Connecting parts may differ in depending on the model.

- You can use the DVI port on the product as an HDMI port by using a DVI-HDMI adapter.
- When connecting the product (DVI) to a computer (HDMI) using a DVI-HDMI adaptor, configure the settings as shown below to use the video and audio from the computer.
  - Change Sound setting from HDMI Sound to AV(HDMI)
Connection Using an HDMI-DVI Cable

Connecting parts may differ in depending on the model.

After connecting a computer to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the computer.

- **Sound** → set **HDMI Sound to PC(DVI)**
Connecting to a Video Device

- Do not connect the power cable before connecting all other cables. Ensure you connect a source device first before connecting the power cable.
- You can connect a video device to the product using a cable.
- Press the SOURCE button on the remote control to change the source.
- When using the touch function, connect the external device to the product, tap Open, and then select the connected external device while the product is turned on.

Connection Using an HDMI-DVI Cable

- Connecting parts may differ depending on the model.
- Supported resolutions include 1080p (50/60Hz), 720p (50/60Hz), 480p, and 576p.
- Make sure to connect the same color connectors together. (white to white, red to red, etc.)
- Audio will not be enabled if the product is connected to a video device using an HDMI-DVI cable. To resolve this, additionally connect an audio cable to the audio ports on the product and video device.

- After connecting a video device to the product with an HDMI-DVI cable, make sure to configure the settings as shown below to enable the video and audio from the video device.
  - Sound → set HDMI Sound to AV(HDMI)
  - You can use the DVI port on the product as an HDMI port by using a DVI-HDMI adapter.
Connection Using an HDMI Cable

Connecting parts may differ in depending on the model.

Using an HDMI Cable or HDMI to DVI Cable (UHD 30Hz)

- An HDMI cable supports digital video and audio signals, and does not require an audio cable.
- The picture may not display normally (if at all) or the audio may not work if an external device that uses an older version of HDMI mode is connected to the product. If such a problem occurs, ask the manufacturer of the external device about the HDMI version and, if out of date, request an upgrade.
- Be sure to use an HDMI cable with a thickness of 14 mm or less.
- Be sure to purchase a certified HDMI cable. Otherwise, the picture may not display or a connection error may occur.
- A basic high-speed HDMI cable or one with ethernet is recommended. This product does not support the ethernet function via HDMI.

Connecting to an Audio System

Connecting parts may differ in depending on the model.

Make sure to connect the same color connectors together. (white to white, red to red, etc.)

Connecting the LAN Cable

Connecting parts may differ in different products.

- Use Cat7(*STP Type) cable for the connection. (10/100 Mbps)
  *Shielded Twist Pair
Changing the Input source

Open
- Using the remote control: SOURCE
- Using touchscreen control mode: Open

Applications
- IWB S5 / Web Browser / Screen Mirroring / Remote Workspace

Source
Source allows you to select a variety of sources and change source device names.
You can display the screen of a source device connected to the product. Select a source from source list to display the screen of the selected source.

- If using the remote control, connect an external device and press SOURCE on the remote control to select the device.
- When using the touch function, connect the external device to the product, tap Open, and then select the connected external device while the product is turned on.
- The screen may not display correctly if an incorrect source is selected for the source device you want to convert to.
- If there is no input from the selected external source device, the screen switches to the whiteboard after 30 seconds.

Available source devices may vary depending on the product.

Storage
- Internal Storage / USB

Available source devices may vary depending on the product.

- This menu is not displayed when you press the SOURCE button on the remote control.

The displayed image may differ depending on the model.
Remote Workspace

SOURCE → Remote Workspace → ENTER

This function allows you to connect your product to a remote PC or a cloud server. Enter the address of the PC or cloud server you want to connect to. Then, follow the on-screen instructions.

⚠️ Make sure that the product is connected to the network.
⚠️ This function is supported when the operating system of the PC or cloud server is Windows Vista or later.
⚠️ This function may not be supported depending on the model.
Chapter 05
Multiple Display Control

Control multiple display devices connected to a PC simultaneously.

# Control Codes

## Viewing control state (Get control command)

<table>
<thead>
<tr>
<th>Header</th>
<th>Command</th>
<th>ID</th>
<th>Data length</th>
<th>Checksum</th>
</tr>
</thead>
<tbody>
<tr>
<td>0xAA</td>
<td>Command type</td>
<td>0</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

## Controlling (Set control command)

<table>
<thead>
<tr>
<th>Header</th>
<th>Command</th>
<th>ID</th>
<th>Data length</th>
<th>Data</th>
<th>Checksum</th>
</tr>
</thead>
<tbody>
<tr>
<td>0xAA</td>
<td>Command type</td>
<td>1</td>
<td></td>
<td>Value</td>
<td></td>
</tr>
</tbody>
</table>

### Command

<table>
<thead>
<tr>
<th>No.</th>
<th>Command type</th>
<th>Command</th>
<th>Value range</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Power control</td>
<td>0x11</td>
<td>0~1</td>
</tr>
<tr>
<td>2</td>
<td>Volume control</td>
<td>0x12</td>
<td>0~100</td>
</tr>
<tr>
<td>3</td>
<td>Input source control</td>

Using MDC

Multiple display control "MDC" is an application that allows you to easily control multiple display devices simultaneously using a PC.

For details on how to use the MDC program, refer to Help after installing the program. The MDC program is available on the website. (http://displaysolutions.samsung.com)

If you press the On or Off button located at the top left of the screen, the product checks its status for about one minute. To run other commands, try after the one minute.

For details on how to connect devices for multiple display control, refer to page 42.

MDC Program Installation/Uninstallation

Installing and uninstalling steps can vary depending on the OS.

Installation

1. Click the MDC Unified installation program.
2. Click "Next".
3. When the "Welcome to the InstallShield Wizard for MDC_Unified" screen appears, click "Next".
4. In the "License Agreement" window displayed, select "I accept the terms in the license agreement" and click "Next".
5. In the displayed "Customer Information" window, fill out all the information fields and click "Next".
6. In the displayed "Destination Folder" window, select the directory path you want to install the program in and click "Next".
7. In the displayed "Ready to Install the Program" window, check the directory path to install the program in and click "Install".
8. Installation progress will be displayed.
9. Click "Finish" in the displayed "InstallShield Wizard Complete" window.
   - Select "Launch the program" and click "Finish" to run the MDC program immediately.
10. The MDC Unified shortcut icon will be created on the desktop after installation.
    - The MDC execution icon may not be displayed depending on the PC system or product specifications.
    - Press F5 if the execution icon is not displayed.

Uninstallation

1. Select Settings → Control Panel on the Start menu and double-click Add/Delete Program.
2. Select MDC Unified from the list and click Change/Remove.
Chapter 06  
Screen Adjustment

Configure the Picture settings (Backlight, Color Tone, etc.). The layout of the Picture menu options may vary depending on the product.

**Picture Mode**

MENU → Picture → Picture Mode → ENTER

<table>
<thead>
<tr>
<th>Picture Mode</th>
<th>Shop &amp; Mall</th>
</tr>
</thead>
<tbody>
<tr>
<td>Backlight</td>
<td>100</td>
</tr>
<tr>

</tr>
<tr>
<td>Tint (G/R)</td>
<td>G50 / R50</td>
</tr>
</tbody>
</table>

Select a picture mode (Picture Mode) suitable for the environment where the product will be used. Video/Image mode improves the picture quality of the video device. Text mode improves the picture quality of the computer.

- **Shop & Mall**  
  Suitable for shopping malls.  
  - Select either Video/Image or Text depending on the picture mode.

- **Office & School**  
  Suitable for offices and schools.  
  - Select either Video/Image or Text depending on the picture mode.

- **Terminal & Station**  
  Suitable for bus terminals and train stations.  
  - Select either Video/Image or Text depending on the picture mode.

- **Video Wall**  
  Suitable for environments where videowall display are used.  
  - Select either Video/Image or Text depending on the picture mode.

- **Calibration**  
  In this mode, the brightness, color, gamma and uniformity settings customized using the color calibration program Color Expert are applied.  
  - To apply the Calibration mode properly, make sure you configure the picture quality settings, such as brightness, color, gamma and uniformity, using the color calibration program Color Expert.  
  - To download the Color Expert program, visit www.samsung.com/displaysolutions.

The displayed image may differ depending on the model.

If HDR+ Mode is set to On, Picture Mode is disabled.
Backlight / Contrast / Brightness / Sharpness / Color / Tint (G/R)

Your product has several options for adjusting picture quality.

- You can adjust and store settings for each external device you have connected to the product.
- Lowering picture brightness reduces power consumption.
- To adjust Color and Tint (G/R), set Picture Mode to Video/Image.

The displayed image may differ depending on the model.
Color Temperature

MENU ➔ Picture ➔ Color Temperature ➔ ENTER

| Picture | Color Temperature | 10000 K |

It sets color temperature. The value and temperature increase simultaneously, so the ratio of blue color rises. (Range: 2800K–16000K)

- Enabled when Color Tone is set to Off.
- If Picture Mode is set to Calibration, Color Temperature is disabled.

The displayed image may differ depending on the model.
White Balance

Adjust the color temperature of the picture so that white objects appear brighter.

2 Point

Adjust red, green, and blue luminosity levels in two sections for precise white balance optimization.

- **R-Offset / G-Offset / B-Offset**: Adjust the proportion of each of red, green and blue colors in dark areas.
- **R-Gain / G-Gain / B-Gain**: Adjust the proportion of each of red, green and blue colors in bright areas.
- **Reset**: Suitable for environments where videowall display are used.

20 Point Settings

Controls the white balance in 20 point interval by adjusting the red, green, and blue brightness.

20 Point

Adjust red, green, and blue luminosity levels in twenty sections for precise white balance optimization.

- **Off (・) / On (●)**
- **Interval**: Select interval to adjust.
- **Red**: Adjust the red level.
- **Green**: Adjust the green level.
- **Blue**: Adjust the blue level.
- **Reset**: Restore the current level’s 20 point White Balance to the default values.

Some external devices may not support this function.
Gamma

MENU  Picture  Gamma  ENTER

<table>
<thead>
<tr>
<th>Picture</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Gamma</td>
<td>BT.1886</td>
</tr>
<tr>
<td>· BT.1886</td>
<td>0</td>
</tr>
</tbody>
</table>

Adjust the primary color intensity.
- **HLG / ST.2084 / BT.1886**
  - If Picture Mode is set to Calibration, Gamma is disabled.
  - The HLG, ST.2084, and BT.1886 sub functions of Gamma vary depending on the input picture and the HDR+ Mode value. When HDR+ Mode is set to On, all of HLG, ST.2084, and BT.1886 are available.

**HLG / ST.2084 / BT.1886**

Adjust the HLG, ST.2084, BT.1886 levels of the picture.

Calibrated Value

MENU  Picture  Calibrated Value  ENTER

<table>
<thead>
<tr>
<th>Picture</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Calibrated Value</td>
<td>Don't Apply</td>
</tr>
</tbody>
</table>

Select whether to apply the brightness, color, gamma and uniformity settings customized using the color calibration program Color Expert to the Information and Advertisement modes.
- **Don't Apply / Apply**
  - To download the Color Expert program, visit www.samsung.com/displaysolutions.
  - If Picture Mode is set to Calibration, Calibrated Value is disabled.

The displayed image may differ depending on the model.
Advanced Settings

MENU → Picture → Advanced Settings → ENTER

Advanced Settings

Contrast Enhancer
Automatically balance the contrast to prevent excessive differences between bright and dark areas.
- Off / Low / Medium / High

Black Tone
Select the black level to adjust the screen depth.
- Off / Dark / Darker / Darkest

Flesh Tone
Adjust the flesh tone color by increasing or decreasing red levels.
- Enabled when Picture Mode is set to Video/Image

RGB Only Mode
Fine-tune the saturation and tint of the red, green, and blue color channels.
- Off / Red / Green / Blue

The displayed image may differ depending on the model.
Advanced Settings

Color Space Settings
Configure color space settings to refine the spectrum of colors on your screen.

- Enabled when Picture Mode is set to Video/Image.

Color Space
Choose a color space.
- Auto / Native / Custom
- To adjust Color, Red, Green, Blue and Reset, set Color Space to Custom.

HDMI UHD Color
Enable to optimize picture quality for HDMI UHD connection.
- HDMI1 (Off / On)
- HDMI2 (Off / On)
- It supports only the models with UHD resolution.

Motion Lighting
Reduces power consumption by reducing screen brightness when the picture on the screen is in motion.
- Off / On

HDR+ Mode
Automatically provide an optimal HDR effect based on the video source.
- Off / On
### Picture Options

MENU → Picture → Picture Options → ENTER

<table>
<thead>
<tr>
<th>Picture Options</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Color Tone</td>
<td>Off</td>
</tr>
<tr>
<td>Digital Clean View</td>
<td></td>
</tr>
<tr>
<td>HDMI Black Level</td>
<td>Auto</td>
</tr>
<tr>
<td>Film Mode</td>
<td>Auto2</td>
</tr>
<tr>
<td>Dynamic Backlight</td>
<td>On</td>
</tr>
</tbody>
</table>

*The displayed image may differ depending on the model.*

### Color Tone

If **Picture Mode** is set to **Text**
- Off / Cool / Standard / Warm

If **Picture Mode** is set to **Video/Image**
- Off / Cool / Standard / Warm1 / Warm2

If **Picture Mode** is set to **Calibration**, **Color Tone** is disabled.

Settings can be adjusted and stored for each external device connected to an input on the product.

### Digital Clean View

Reduce picture noise to avoid distractions such as flickering.
- Off (○) / On (●)

If **Picture Mode** is set to **Calibration**, **Digital Clean View** is disabled.

Enabled when **Picture Mode** is set to **Video/Image**.
HDMI Black Level
Adjust the black level to optimize the HDMI picture brightness and contrast.
- Normal / Low / Auto

Film Mode
Make frame transitions from older video sources smoother. This function is only available when the input signal is HDMI (1080i).
- Off / Auto1 / Auto2
  ✣ Enabled when Picture Mode is set to Video/Image.

Dynamic Backlight
Automatically adjust the backlight to provide the best possible screen contrast under the current conditions.
- Off / On
  ✣ The default values of the Dynamic Backlight function in each Picture Mode are as follows:

<table>
<thead>
<tr>
<th>Dynamic Backlight</th>
<th>Picture Mode</th>
<th>Picture Mode settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Shop &amp; Mall, Office &amp; School, Terminal &amp; Station, Video Wall</td>
<td>Text</td>
</tr>
<tr>
<td></td>
<td>Video Wall</td>
<td>Video/Image</td>
</tr>
<tr>
<td></td>
<td>Calibration</td>
<td>-</td>
</tr>
<tr>
<td>On</td>
<td>Shop &amp; Mall, Office &amp; School, Terminal &amp; Station</td>
<td>Video/Image</td>
</tr>
</tbody>
</table>

The displayed image may differ depending on the model.
Picture Size Settings

Choose size and aspect ratio picture displayed on screen.

Picture Size

Different screen adjustment options are displayed depending on the current input source.

- Available functions may differ depending on the model.
- Supported picture sizes differ with the input signal.
- 16:9 Standard: Sets the picture to 16:9 Standard wide mode.
- Custom: Changes the resolution to suit the user’s preferences.
- 4:3: Sets the picture to basic (4:3) mode.
  - Do not set your product to 4:3 format for a long time.
  - The borders displayed on the left and right, or top and bottom of the screen may cause image retention (screen burn) which is not covered by the warranty.

Fit to Screen

Expand the picture to fit the screen. When selected, the full program image will be displayed. No part of the image will be cut off.

- Available functions may not be supported depending on the Picture Size setting.
- Off / On / Auto

Zoom and Position

Adjust the picture size and position. This option is available when the input source is set to DVI, HDMI 1, HDMI 2, HDMI 3 (1080i/1080p), DisplayPort. Picture Size must be set to Custom for the option to be available.

- If you want to reset the picture to its original position, select Reset in the Zoom and Position screen. The picture will be set to its default position.
- Available source devices may vary depending on the product.
Reset Picture

MENU → Picture → Reset Picture → ENTER

 Resets your current picture mode to its default settings.

The displayed image may differ depending on the model.
### Screen Protection

MENU → OnScreen Display → Screen Protection → ENTER

#### Auto Protection Time

If the screen displays a still image for a certain period of time you define, the product activates the screen saver to prevent the formation of burnt in ghost images on the screen.

- Off / 2 hours / 4 hours / 6 hours / 8 hours / 10 hours

#### Screen Burn Protection

To reduce the possibility of screen burn, this unit is equipped with Screen Burn Protection screen burn prevention technology.

Screen Burn Protection moves the picture slightly on the screen.

#### Pixel Shift

Minimize image retention by finely moving pixels horizontally or vertically.

- **Pixel Shift (Off [ ] / On [ ])**
  - Horizontal, Vertical and Time are enabled only when Pixel Shift is set to On.
- **Horizontal**: Sets how many pixels the screen moves horizontally.
- **Vertical**: Sets how many pixels the screen moves vertically.
- **Time**: Set the time interval for performing the horizontal or vertical movement, respectively.
Available Pixel Shift Settings and Optimum Settings.

<table>
<thead>
<tr>
<th></th>
<th>Available Settings</th>
<th>Optimum Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td>Vertical (pixels)</td>
<td>0 ~ 4</td>
<td>4</td>
</tr>
<tr>
<td>Time (minute)</td>
<td>1 minute ~ 4 minutes</td>
<td>4 minutes</td>
</tr>
</tbody>
</table>

The Pixel Shift value may differ depending on the model.

Displaying a still image or a 4:3 output for an extended period of time may cause image retention. This is not a defect in the product.
The displayed image may differ depending on the model.

**Screen Burn Protection**
- **Pixel Shift**
- **Timer**
- **Immediate Display**

**Timer**

You can set the timer for **Screen Burn Protection**. The **Screen Burn Protection** feature stops automatically after a specified period of time.

**Timer**

- **Off**
- **Repeat**: Display the image retention-preventive pattern set in **Mode** at specified time intervals (Period).
- **Interval**: Display the image retention-preventive pattern set in **Mode** for a specified period of time (from **Start Time** to **End Time**).

✓ **Mode**, **Period**, **Time**, **Start Time** and **End Time** are enabled only when **Timer** is set to **Repeat** or **Interval**.

- **Mode**: Select a screen protective pattern to display.
  - **Pixel**: Pixels on the screen alternate black continuously.
  - **Rolling Bar**: A vertical bar moves left to right.
  - **Fading Screen**: The entire screen becomes brighter, then darker.

✓ The **Rolling Bar** and **Fading Screen** patterns appear only once regardless of the specified repeat period or time.

- **Period**: Specify the time interval to activate the **Screen Burn Protection** function.
  ✓ The option is enabled when **Repeat** is selected for **Timer**.

- **Time**: Specify the duration to keep the **Screen Burn Protection** function on.
  ✓ Enabled when **Timer** is set to **Repeat** and **Mode** is set to **Pixel**.

- **Start Time**: Set the start time to activate the screen protection function.
  ✓ The option is enabled when **Interval** is selected for **Timer**.

- **End Time**: Set the end time to deactivate the screen protection function.
  ✓ The option is enabled when **Interval** is selected for **Timer**.
Immediate Display
Select the screen saver you want to display immediately.
- Off / Pixel / Rolling Bar / Fading Screen

Source Info
Select whether to display the source OSD when the input source changes.
- Off / On

MDC Message
Select whether to display the MDC OSD when the product is controlled by the MDC.
- Off / On
Language

Set the menu language.

* A change to the language setting will only be applied to the onscreen menu display. It will not be applied to other functions on your PC.

Reset OnScreen Display

This option returns the current settings under OnScreen Display to the default factory settings.
Chapter 08
Sound Adjustment

Configure the Sound settings for the product.

Sound Mode

MENU → Sound → Sound Mode → ENTER

You can select a sound mode to suit your personal preferences.
- **Standard**: Selects the normal sound mode.
- **Music**: Emphasizes music over voices.
- **Movie**: Provides the best sound for movies.
- **Clear Voice**: Emphasizes voices over other sounds.
- **Amplify**: Increase the intensity of high-frequency sound to allow a better listening experience for the hearing impaired.

If Sound Output is set to External, Sound Mode is disabled.

The displayed image may differ depending on the model.
Balance

MENU  →  Sound → Balance → ENTER
Adjust speaker volume levels for sound balance optimization.
• **Balance L/R:** Adjusts the balance between the left and right speaker.
• **Reset:** Resets the balance to its default settings.

If **Sound Output** is set to **External**, **Balance** is disabled.

Equalizer

MENU  →  Sound → Equalizer → ENTER
Adjust the equalizer to customize the volume and pitch, and enhance the richness of the sound output.
• **100 Hz / 200 Hz / 500 Hz / 1 kHz / 2 kHz / 5 kHz / 10 kHz** (Bandwidth Adjustment): Adjusts the level of specific bandwidth frequencies.
• **Reset:** Resets the equalizer to its default settings.

Available only when **Sound Mode** is set to **Standard**.

If **Sound Output** is set to **External**, **Equalizer** is disabled.

HDMI Sound

MENU  →  Sound → HDMI Sound → ENTER
Select whether to hear from AV(HDMI) or PC(DVI).
• **AV(HDMI) / PC(DVI)**

Sound Output

MENU  →  Sound → Sound Output → ENTER
Select speakers for sound output.
• **Internal / External**

When you set **Sound Output** to **External**, the products speakers are turned off. You will hear sound through the external speakers only. When the **Sound Output** is set to **Internal**, both the product speakers and the external speakers are on. You will hear sound through both.

If there is no video signal, both the products speakers and the external speakers will be mute.
Auto Volume

MENU → Sound → Auto Volume → ENTER

Automatically adjusts the volume level when you change video sources or content so the level remains the same.

- Off ( ) / On ( )

To use the volume control of a connected source device, set Auto Volume to Off.

If Sound Output is set to External, Auto Volume is disabled.

Reset Sound

MENU → Sound → Reset Sound → ENTER

Reset all sound settings to the factory defaults.
Network Status

MENU → Network → Network Status → ENTER
You can check the current network and Internet status.

Open Network Settings

MENU → Network → Open Network Settings → ENTER
Configure network settings to connect to an available network.

Network Type

• Wireless / Wired
Network Settings (Wired)

Connecting to a Wired Network

There are three ways to attach your product to your LAN using cable.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an external modem using a LAN cable. See the diagram below.

- You can attach your product to your LAN by connecting the LAN port on the back of your product to an IP Sharer which is connected to an external modem. Use LAN cable for the connection. See the diagram below.

- Depending on how your network is configured, you may be able to attach your product to your LAN by connecting the LAN port on the back of your product directly to a network wall outlet using a LAN cable. See the diagram below. Note that the wall outlet is attached to a modem or router elsewhere in your house.

If you have a Dynamic Network, you should use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway, and DNS values your product needs to access the Internet so you do not have to enter them manually. Most home networks are Dynamic Networks.

Some networks require a Static IP address. If your network requires a Static IP address, you must enter the IP address, subnet mask, gateway, and DNS values manually on your product IP Settings when you set up the network connection. To get the IP address, subnet mask, gateway, and DNS values, contact your Internet Service Provider (ISP).

If you have a Windows computer, you can also get these values through your computer.

You can use ADSL modems that support DHCP if your network requires a Static IP address.
Set the network connection to use Internet services such as perform software upgrades.

**Automatic Open Network Settings (Wired)**

Connect to the network using a LAN cable.
Make sure a LAN cable is connected first.

**How to set up automatically**

1. Set **Network Type** to **Wired** from the **Open Network Settings** page.
2. The network test screen appears and verifies the network connection.
   When the connection has been verified, the “**Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.**” message appears.

> If the connection process fails, check the LAN port connection.

> If the automatic process cannot find the network connection values or if you want to set the connection manually, go to the next section (Manual Open Network Settings (Wired)).

**Manual Open Network Settings (Wired)**

Offices may use static IP addresses.
If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

**Getting the Network Connection Values**

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the **Support** Tab, click the **Details** button. The Network connection values are displayed.

> The path to the settings depends on the installed OS.

---

**How to set up manually**

1. Set **Network Type** to **Wired** from the **Open Network Settings** page.
2. The network test screen appears and the verification process starts. Press **Cancel**. The verification process stops.
3. Select **IP Settings** on network connection screen. The **IP Settings** screen appears.
4. Select the field at the top, press **E**, and then set **IP Setting** to **Enter manually**. Repeat the entry process for each field in the **IP Address**.
   
   Setting **IP Setting** to **Enter manually** automatically changes **DNS Setting** to **Enter manually**.

5. When done, select **OK** at the bottom of the page, and then press **E**. The network test screen appears and the verification process starts.

6. When the connection has been verified, the “**Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.**” message appears.
Network Settings (Wireless)

Connecting to a Wireless Network

Samsung recommends using IEEE 802.11n. When you play video over a network connection, the video may not play smoothly.

- Select a channel for the wireless IP sharer that is not currently being used. If the channel set for the wireless IP sharer is currently being used by another device nearby, this will result in interference and communication failure.
- Your product supports only the following wireless network security protocols.
  - If you select the Pure High-throughput (Greenfield) 802.11n mode and the Encryption type is set to WEP, TKIP or TKIP AES (WPS2Mixed) on your AP or wireless router, Samsung products will not support a connection in compliance with new Wi-Fi certification specifications.
  - If your wireless router supports WPS (Wi-Fi Protected Setup), you can connect to the network via PBC (Push Button Configuration) or PIN (Personal Identification Number). WPS will automatically configure the SSID and WPA key in either mode.
- Connection Methods: You can setup the wireless network connection in three ways. Auto Setup (Using the Auto Network Search function), Manual Setup, Use WPS

Automatic Network Setup (Wireless)

Most wireless networks have an optional security system that requires devices that access the network to transmit an encrypted security code called an Access or Security key. The Security key is based on a Pass Phrase, typically a word or a series of letters and numbers of a specified length you were asked to enter when you set up security for your wireless network. If you use this method of setting up the network connection, and have a Security key for your wireless network, you will have to enter the Pass Phrase during the the automatic or manual setup process.

How to set up automatically

1. Set Network Type to Wireless from the Open Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
   - In the list of networks, press the ▲ or ▼ button to select a network, and then press the E button twice.
   - If the desired wireless router does not appear, select Refresh to search again.
   - If the router cannot be found after retrying, select the Stop button. The Add Network button appears.
3. If the Enter the password for (AP Name) screen appears, go to step 4. If you select a wireless router that does not have security, go to step 6.
4. If the router has security, enter the Enter the password for (AP Name). (Security key or PIN).
5. When done, use the right arrow button to move the cursor to Done, and then press E. The network connection screen appears and the verification process starts.
   - A connection with the router is established, but the Internet cannot be accessed.
6. When the connection has been verified, the “Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.” message appears.
Manual Network Setup (Wireless)

Offices may use static IP addresses. If this is the case, ask the network administrator for the IP address, subnet mask, gateway and DNS server address. Enter these values manually.

Getting the Network Connection Values

To view the Network connection values on most Windows computers, follow these steps.

1. Right click the Network icon on the bottom right of the screen.
2. In the pop-up menu that appears, click Status.
3. On the dialog that appears, click the Support tab.
4. On the Support Tab, click the Details button. The Network connection values are displayed.

How to set up manually

1. Set Network Type to Wireless from the Open Network Settings page.
2. The Network function searches for available wireless networks. When done, it displays a list of the available networks.
3. In the list of networks, press the ▲ or ▼ button to select a network, and then press the ✂ button twice.
   - If the desired wireless router does not appear, select Refresh to search again.
   - If the router cannot be found after retrying, select the Stop button. The Add Network button appears.
4. If the Enter the password for (AP Name) screen appears, go to step 5. If you select a wireless router that does not have security, go to step 7.
5. If the router has security, enter the Enter the password for (AP Name). (Security key or PIN).
6. When done, use the right arrow button to move the cursor to Done, and then press ✂. The network connection screen appears and the verification process starts.
7. Select Cancel while network connections are being attempted. This will stop the connection.
8. Select IP Settings on network connection screen. The IP Settings screen appears.
9. Select the field at the top, press ✂, and then set IP Setting to Enter manually. Repeat the entry process for each field in the IP Address.
   - Setting IP Setting to Enter manually automatically changes DNS Setting to Enter manually.
10. When done, select OK at the bottom of the page, and then press ✂. The network test screen appears and the verification process starts.
11. When the connection has been verified, the “Success! Your device is connected to the Internet. If you have any problems using online services, please contact your Internet service provider.” message appears.
Use WPS

How to set up using Use WPS

If your router has a Use WPS button, follow these steps.

1. Set Network Type to Wireless from the Open Network Settings page.
2. Select Use WPS, press Enter.
3. Press the WPS or PBC button on your wireless router within the next two minutes. Your product automatically acquires all the network setting values it needs and connects to your network.
   - If you want to use the WPS PIN, select WPS PIN.
     Go to your wireless router’s Settings, enter your PIN, and then select OK.
4. The network connection screen appears, and network setup is done.

Server Network Settings

MENU [Network] → Server Network Settings → ENTER

Proxy Server

Set up your proxy server connection and related functions.

- Off / On
- Address / Port / ID / Password
  - Address / Port / ID and Password are enabled only when Proxy Server is set to On.

Device Name

MENU [Network] → Device Name → ENTER

Select or enter a device name.
This name can be shown on network device over the network.

### Accessibility

**Voice Guide Settings**

- **Off**

**High Contrast**

- **Off** / **On**

**Enlarge**

- **Off** / **On**

### High Contrast

Set the background and font to high-contrast colors in Menu. Menu transparencies become opaque when the option is selected.

- **Off** / **On**

### Enlarge

Enlarge the size of the Menu area.

- **Off** / **On**

### Start Setup

Go through the initial setup steps like you did the first time you used this product.

- Enter your 4 digit PIN number. The default PIN number is “0-0-0-0”.
- If you want to change the PIN number, use the **Change PIN** function.
- Change the PIN to keep your device secure.

MENU → **System** → **Start Setup** → ENTER

**System**

- **Start Setup**
Time

You can configure Clock Set or DST. Configure various time-related settings.

Clock Set

Select Clock Set. Select Date or Time, and then press ENTER.

Use the number buttons to enter numbers or press the up and down arrow buttons. Use the left and right arrow buttons to move from one entry field to the next. Press ENTER when done.

You can set the time by pressing the number buttons on the remote control.

DST

Switches the DST (Daylight Saving Time) function on or off.

Off / On

- **Start Date**: Set the start date of Daylight Saving Time.
- **End Date**: Set the end date of Daylight Saving Time.
- **Time Offset**: Select the correct time offset for your timezone.

Note: Start Date, End Date and Time Offset are enabled only when DST is set to On.

Power On Delay

When connecting multiple products, adjust the power-on time for each product to prevent power overload (within the range 0–50 seconds).
Power Control

MENU → System → Power Control → ENTER

ID Settings

MENU → System → ID Settings → ENTER 

ID Settings

Device ID 0
PC Connection Cable RS232C cable

Device ID

Set a unique ID number for each product. (Range: 0~224)
- Press △/▼ to select a number, and press •.
- Enter the number you want using the number buttons on the remote control.

PC Connection Cable

Select which type of cable you are using to connect the display to the PC.
- RS232C cable
  Communicate with MDC via the RS232C cable (DB9 to Stereo type).
- RJ-45 (LAN)/Wi-Fi Network
  Communicate with MDC via the RJ45 cable.

Change PIN

MENU → System → Change PIN → ENTER 

System

Change PIN

Change your 4-digit Personal Identification Number (PIN).
Choose any 4 digits for your PIN and enter it in Enter a new PIN. Reenter the same 4 digits in Enter the PIN again.
The product has memorized your new PIN.
- The default PIN number is "0-0-0-0".
- Change the PIN to keep your device secure.
# Security

**MENU **  → **System** → **Security** → **ENTER**

## Safety Lock On

- Enter your 4 digit PIN number. The default PIN number is "0-0-0-0".
  - If you want to change the PIN number, use the **Change PIN** function.
- Change the PIN to keep your device secure.
  - Turn **Safety Lock On** on or off. **Safety Lock On** restricts the actions that can be carried out by the remote control. The correct PIN must be entered to turn **Safety Lock On** off.

## Power On Button

- Turn on this feature to enable the remote control’s Power button to turn on the product while **Safety Lock On** is enabled.
  - **Off / On**

## Button Lock

- This menu can be used to lock the buttons on the product.
  - Only the remote control can control the product if **Button Lock** is set to **On**.
  - **Off / On**

Smart Security

The security provided to protect your display device and connected storage devices against viruses includes.

Scan

Inspect your display device and connected storage devices to check for viruses.

Isolated List

This is the list of items that have been isolated for containing viruses.

HDMI Hot Plug

This feature is used to activate the time delay to turn on a DVI/HDMI source device.

- Off / On
Custom Logo

You can download, select, and set the display time of a custom logo that appears when the product turns on.

- **Custom Logo**
  - You can select a custom logo (image/video) or turn off the custom logo display.
  - You must download the custom logo from an external USB device to set the custom logo.

- **Logo Display Time**
  - If the type of custom logo is **Image**, you can set the **Logo Display Time**.

- **Download Logo File**
  - You can download a custom logo into the product from an external USB device.
  - The file name of the custom logo you want to download must be saved as "samsung" in all small letters.
  - When there are multiple numbers of external USB connections, the product will attempt to download the custom logo from the last device that has been connected to the product.

**Custom logo file restrictions**

- For image type custom logo, only bitmap files (aRGB 32bpp format) are supported.
- The resolution of the image type custom logo must be between a minimum of 64 x 64 and the maximum screen resolution. (Horizontal/Vertical values of the resolution must be multiples of 4.)
- For video type custom logo, only TS Stream types are supported.
- The maximum supported video file is 150 MB. The recommended length of a video file is 20 seconds or less.

The displayed image may differ depending on the model.

Support

Software Update

MENU → Support → Software Update → ENTER

The Software Update menu lets you upgrade your product software to the latest version.

⚠️ Be careful not to turn off the power until the upgrade is complete. The product will turn off and on automatically after completing the software upgrade.

⚠️ When you upgrade software, all video and audio settings you have made will return to their default settings. We advise you to write down your settings so that you can easily reset them after the upgrade.

Update Now

Update the software to the latest version.

⚠️ Current version: This is the software version already installed in the product.

Contact Samsung

MENU → Support → Contact Samsung → ENTER

You can view the address of the Samsung website, the call center phone number, your product’s model number, software version, Open Source License and other information.

⚠️ Go to Contact Samsung and find the product Model Code and Software Version.

Reset All

MENU → Support → Reset All → ENTER

This option returns all the current settings for a display to the default factory settings.
Requirements Before Contacting Samsung Customer Service Center

Check the followings.

</tbody>
</table>
### Screen issue

| The screen cannot be displayed in full screen. | A scaled SD (4:3) content file can cause black bars on both sides of an HD channel screen. A video with an aspect ratio different from the product can cause a black bar to appear at the top and bottom of the screen. Change the screen size setting to full screen on the product or source device. |

### Sound issue

| There is no sound. | Check the connection of the audio cable or adjust the volume. Check the volume. |
| The volume is too low. | Adjust the volume. If the volume is still low after turning it up to the maximum level, adjust the volume on your PC sound card or software program. |
| Video is available but there is no sound. | If an HDMI cable or a DP cable is connected, check the audio output settings on the PC. Go to **Sound** and change **Sound Output** to **Internal**. If a source device is used  
  • Make sure the audio cable is properly connected to the audio input port on the product.  
  • Check the audio output settings for the source device. (For example, if your monitor is connected to HDMI, you may need to change the audio option of your video output device to HDMI.)  
  If a DVI-HDMI cable is used, a separate audio cable is required.  
  If the product has a headphone port, make sure nothing is connected to it. Reconnect the power cable to the device and then reboot the device. |

| * For installing the enclosure, keep the internal temperature at 40 °C or below. |
| Humidity : 10% – 80%, non-condensing |

| Storage Temperature : -4 °F – 113 °F (-20 °C – 45 °C) |
| Humidity : 5% – 95%, non-condensing |
| * Applicable before the product package is unpacked. |

---

Plug-and-Play  
This monitor can be installed and used with any Plug-and-Play compatible systems. Two-way data exchange between the monitor and PC system optimizes the monitor settings. Monitor installation takes place automatically. However, you can customize the installation settings if desired.

Due to the nature of the manufacturing of this product, approximately 1 pixel per million (1ppm) may appear brighter or darker on the panel. This does not affect product performance.

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

For detailed device specifications, visit the Samsung Electronics website.

(USA only)  
Dispose unwanted electronics through an approved recycler. To find the nearest recycling location, go to our website: www.samsung.com/recyclingdirect or call, 1-800-SAMSUNG
Preset Timing Modes

This product can be set to only one resolution for each screen size to obtain the optimum picture quality due to the nature of the panel. Using a resolution other than the specified resolution may degrade the picture quality. To avoid this, it is recommended that you select the optimum resolution specified for your product.

### Horizontal Frequency
The time required to scan a single line from the left to the right side of the screen is called a horizontal cycle. The reciprocal number of a horizontal cycle is called horizontal frequency. Horizontal frequency is measured in kHz.

### Vertical Frequency
The product displays a single image multiple times per second (like a fluorescent light) to display what the viewer sees. The rate of a single image being displayed repeatedly per second is called vertical frequency or refresh rate. Vertical frequency is measured in Hz.

Checking the Resolution and Frequency

For modes that exceed the supported resolutions, the message "Not Optimum Mode" appears briefly. Set the PC resolution by referring to Preset Timing Modes.
The screen will automatically be adjusted if a signal that belongs to the following standard signal modes is transmitted from your PC. If the signal transmitted from the PC does not belong to the standard signal modes, the screen may be blank with the power indicator on. In such a case, change the settings according to the following table by referring to the graphics card user manual.

*The QB75N-W model are not available in the VESA 3840 x 2160 (DP).*
Responsibility for the Pay Service (Cost to Customers)

When the service is requested, in spite of in warranty, we may charge you for a visit from a service technician in the following cases.

Not a product defect

Cleaning of the product, Adjustment, Explanation, Re-installation and etc.
• If a service technician is requested to give instructions on how to use product or simply adjusts options without disassembling product.
• If a defect is caused by external environmental factors (Internet, Antenna, Wired Signal, etc.)
• If a product is reinstalled or devices are connected additionally after installing the purchased product for the first time.
• If a product is reinstalled to move to a different spot or to move to a different house.
• If the customer requests instructions on how to use another company’s product.
• If customer requests instructions on how to use the network or another company’s program.
• If customer requests software installation and setup for the product.
• If a service technician removes/cleans dusts or foreign materials inside of the product.
• If customer requests an installation additionally after purchasing a product through home-shopping or online.

A Product damage caused by customer's fault

Product damage caused by customer’s mishandling or wrong repair
If a product damage is caused by;
• External impact or drop.
• Use of supplies or separately sold product unspecified by Samsung.
• Repair from a person besides an engineer of outsourcing service company or partner of Samsung Electronics Co., Ltd.
• Remodeling or repairing the product by customer.
• Using it with incorrect voltage or non-authorized electrical connections.
• Not following the “cautions” in User Manual.

Others

• If product fails by natural disaster. (lightning, fire, earthquake, flood damage, etc)
• If consumable components are all used up. (Battery, Toner, Fluorescent lights, Head, Vibrator, Lamp, Filter, Ribbon, etc.)

If customer requests a service in case the product has no defect, service fee may be charged. So please read User Manual first.
Prevention of Afterimage Burn-in

What is afterimage burn-in?

Afterimage burn-in should not occur when the panel is operating normally. Normal operation refers to a continuously changing video pattern. If the panel displays a fixed pattern for an extended period of time a slight voltage difference may occur between the electrodes in pixels that control the liquid crystals. Such a voltage difference between electrodes increases with time and makes the liquid crystals thinner. When this occurs, a previous image can remain on the screen when the pattern changes.

This information is a guide to prevent afterimage burn-in. Viewing a fixed screen for an extended period of time may cause afterimage burn-in. This problem is not included in warranty.

Recommended prevention practices

Viewing a fixed screen for an extended period of time may cause afterimage burn-ins or smudges. If the product is not to be used for a long time, turn it off, or activate the Power Saving mode or Screen Saver with a moving image.

- Change the colors regularly.

Avoid combinations of a text color and background color of contrasting brightness.

避免使用对比度大的颜色（如黑与白，灰与黑）。

Avoid using colors of contrasting brightness (black and white; gray and black).
