Expand storage with a supported microSD™ card. See Memory card on page 104.

Night mode
Use a darker theme to keep your eyes comfortable at night. See Night mode on page 100.
Getting started

Galaxy A10e

Assemble your device

Start using your device
Galaxy A10e

Rear camera
Flash
SIM/microSD card tray
USB charger /Accessory port
Headset jack

Front camera
Volume key
Power key
Microphone
Speaker
Microphone
Assemble your device

Your device uses a nano-SIM card. A SIM card may be preinstalled, or you may be able to use your previous SIM card. Contact your carrier for more details.

Install SIM/microSD card
Place the SIM card and optional microSD card (sold separately) into the tray with the gold contacts facing down.

Charge your device
Before turning on your device, charge it fully.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Charge the battery

Your device is powered by a rechargeable battery. A charger (charging head and USB Type-C cable) is included with the device for charging the battery from a power outlet.

While charging, the device and the charger may become hot and stop charging. This usually does not affect the device’s lifespan or performance and is in the device’s normal range of operation.

💡 **TIP** Disconnect the charger from the device and wait for the device to cool down. For more information, visit [samsung.com/us/support/answer/ANS00076952](http://samsung.com/us/support/answer/ANS00076952).
Start using your device

Use the Power key to turn your device on or off. Do not use the device if the body is cracked or broken. Use the device only after it has been repaired.

- Press and hold the Power key.
  - To turn the device off, press and hold the Power key, and tap Power off. Confirm when prompted.
  - To restart your device, press and hold the Power key, and tap Restart.

Use the Setup Wizard

The first time you turn your device on, the Setup Wizard guides you through the basics of setting up your device.

Follow the prompts to choose a default language, connect to a Wi-Fi® network, set up accounts, choose location services, learn about your device’s features, and more.

Transfer data from an old device

Use Smart Switch™ to transfer contacts, photos, music, videos, messages, notes, calendars, and more from your old device. Smart Switch can transfer your data via USB cable, Wi-Fi, or computer.

Visit samsung.com/us/support/owners/app/smart-switch to learn more.

1. From Settings, tap Accounts and backup > Smart Switch.
2. Follow the prompts and select the content to transfer.

Visit samsung.com/smartswitch for more information.
Lock or unlock your device

Use your device’s screen lock features to secure your device. By default, the device locks automatically when the screen times out. For more information about screen locks, see Lock screen and security on page 111.

Power key
Press to lock. Press to turn on the screen, and then swipe the screen to unlock it.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Accounts

Set up and manage your email accounts, your Google™ Account, and Samsung account.

💡 TIP Accounts may support email, calendars, contacts, and other features. See your carrier for more information.

Add a Google Account

Sign in to your Google Account to access your Google cloud storage, apps installed from your account, and make full use of your device’s Android™ features.

1. From Settings, tap 🔄 Accounts and backup > Accounts.
2. Tap ➕ Add account > Google.

☀️ NOTE When you sign in to a Google Account, Factory Reset Protection (FRP) is activated. FRP requires your Google Account information when resetting to factory settings. For more information, see Factory reset protection on page 110.

Add a Samsung account

Sign in to your Samsung account to access exclusive Samsung content and make full use of Samsung apps.

1. From Settings, tap 🔄 Accounts and backup > Accounts.
2. Tap ➕ Add account > Samsung account.

💡 TIP To quickly access your Samsung account, from Settings tap 🆕 Samsung account.

Add an email account

Sign in to one or more of your email accounts to view and manage email messages.

1. From Settings, tap 🔄 Accounts and backup > Accounts.
2. Tap ➕ Add account > Email.
Set up voicemail

You can set up your voicemail service when you access it for the first time. You can access voicemail through the Phone app.

1. From Phone, tap Voicemail.
2. Follow the tutorial to create a password, record a greeting, and record your name.
Navigation

A touch screen responds best to a light touch from the pad of your finger or a capacitive stylus. Using excessive force or a metallic object on the touch screen may damage the tempered glass surface and void the warranty.

Tap

Lightly touch items to select or launch them.

- Tap an item to select it.
- Double-tap an image to zoom in or out.
Getting started

Swipe

- Lightly drag your finger across the screen.
  - Swipe the screen to unlock the device.
  - Swipe the screen to scroll through the Home screens or menu options.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Drag and drop

Touch and hold an item, and then move it to a new location.

- Drag an app shortcut to add it to a Home screen.
- Drag a widget to place it in a new location.
Getting started

Zoom in and out

Bring your thumb and forefinger together or apart to zoom in and out.

- Bring your thumb and forefinger together on the screen to zoom out.
- Move your thumb and forefinger apart on the screen to zoom in.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Touch and hold

Touch and hold items to activate them.

- Touch and hold a field to display a pop-up menu of options.
- Touch and hold a Home screen to customize the Home screen.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Getting started

Navigation bar

The Navigation bar, at the bottom of the screen, displays the navigation keys.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
**Navigation gestures**
To make more space on the screen, you can hide the navigation keys, and instead use gestures to navigate the device. Simply swipe up from the bottom of the screen to navigate the device.

- From Settings, tap ☀ Display > Navigation bar > Full screen gestures.
  - Tap Gesture hints to display lines at the bottom of the screen where gestures must be done for each navigation button.

💡 TIP You can also quickly switch between navigation gestures and navigation buttons using the Quick settings menu.

**Button order**
Personalize your device by changing where the Recent apps and Back buttons display on the Navigation bar.

- From Settings, tap ☀ Display > Navigation bar, and tap an option under Button order.
Customize your home screen

The Home screen is the starting point for navigating your device. You can place your favorite apps and widgets here. You can set up additional Home screens, remove screens, change the order of screens, and choose a main Home screen.

App icons

You can use app icons to launch an app from any Home screen.

- From Apps, touch and hold an app icon, and tap ‌Add to Home‌.

To remove an icon:

- Touch and hold an app icon, and tap ‌Remove from Home‌.

💡 NOTE Removing an icon does not delete the app, it just removes the icon from a Home screen.

Use folders

Organize App shortcuts in folders on an Apps screen or Home screen.

For more information, see Create and use folders on page 35.

Wallpapers

You can change the look of the Home and Lock screens by choosing a favorite picture or preloaded wallpaper.

1. From a Home screen, touch and hold the screen.
2. Tap ‌Wallpapers‌.
3. Tap an image to choose it.
   - Multi-pack wallpapers are applied to all screens.
   - Tap the screen or screens to which you want to apply the wallpaper.
4. Tap ‌Set as wallpaper‌, and confirm when prompted.
Getting started

Themes
Set a theme to be applied to your Home and Lock screens, wallpapers, and app icons.

1. From a Home screen, touch and hold the screen.
2. Tap Themes to customize.
3. Tap View all to see downloaded themes.
4. Tap a theme to preview and download it to My themes.
5. Tap a theme, and then tap Apply to apply the selected theme.

Icons
Apply different icon sets to replace the default icons.

1. From a Home screen, touch and hold the screen.
2. Tap Wallpapers > Icons to customize.
3. Tap View all to see downloaded icons.
4. Tap an icon set to preview and download it to My icons.
5. Tap an icon, and then tap Apply to apply the selected icon set.

Widgets
Add widgets to your home screens for quick access to info or apps.

1. From a Home screen, touch and hold the screen.
2. Tap Widgets, and then touch and hold a widget, drag it to a Home screen, and release it.

Customize Widgets
Once you have added a widget, you can customize where it's located and how it functions.

- From a Home screen, touch and hold a widget, and tap an option:
  - Remove from Home: Delete a widget from your screen.
  - Widget settings: Customize the function or appearance of the widget.
  - App info: Review the widget usage, permissions, and more.
Home screen settings

Customize your Home and Apps screens.

1. From a Home screen, touch and hold the screen.
2. Tap 📱 Home screen settings to customize:
   - **Home screen layout**: Set your device to have separate Home and Apps screens, or only a Home screen where all apps are located.
   - **Home screen grid**: Choose a layout to determine how icons are arranged on the Home screen.
   - **Apps screen grid**: Choose a layout to determine how icons are arranged on the Apps screen.
   - **Apps button**: Add a button to the Home screen for easy access to the Apps screen.
   - **App icon badges**: Enable to show badges on apps with active notifications. You can also choose the badge style.
   - **Lock Home screen layout**: Prevent items on the Home screen from being removed or repositioned.
   - **Add apps to Home screen**: Automatically add newly-downloaded apps to the Home screen.
   - **Quick-open notification panel**: Enable this feature to open the Notification panel by swiping down anywhere on the Home screen.
   - **Rotate to landscape mode**: Rotate the Home screen automatically when your device’s orientation is changed from portrait to landscape.
   - **Hide apps**: Choose apps to hide from the Home and App screens. Return to this screen to restore hidden apps. Hidden apps are still installed and can appear as results in Finder searches.
   - **About Home screen**: View version information.
Easy mode

The Easy mode layout has larger text and icons, making for a more straightforward visual experience. Switch between the default screen layout and a simpler layout.

1. From Settings, tap ☀ Display > Easy mode.
2. Tap Easy mode to enable this feature.
3. Tap Apply to confirm.

To disable Easy mode:

1. From Settings, tap ☀ Display > Easy mode > Standard mode.
2. Tap Apply to exit Easy mode.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Status Bar

The Status bar provides device information on the right side and notification alerts on the left.

Status Icons

- Battery full
- Battery low
- Charging
- Mute
- Vibrate
- Airplane mode
- Bluetooth active
- Wi-Fi active
- Location active
- Alarm

Notification Icons

- Missed calls
- Call in progress
- Call on hold
- New message
- Voicemail
- New email
- Download
- Upload
- Wi-Fi available
- App update

Configure display options for the Status bar.

- From Quick settings, tap > More options > Status bar for the following options:
  - **Show notification icons**: Choose how to display notification icons on the Status bar.
  - **Show battery percentage**: Display the battery charge percentage next to the battery icon on the Status bar.
**Notification panel**

For quick access to notifications, settings, and more, simply open the Notification panel.
View the Notification panel

You can access the Notification panel from any screen.

1. Drag the Status bar down to display the Notification panel.
2. Swipe down the list to see notification details.
   - To open an item, tap it.
   - To clear a single notification, drag the notification left or right.
   - To clear all notifications, tap Clear.
   - To customize notifications, tap Notification settings.
3. Drag upward from the bottom of the screen or tap Back to close the Notification panel.

Quick settings

The Notification panel also provides quick access to device functions using Quick settings.

1. Drag the Status bar down to display the Notification panel.
2. Drag — View all downward.
   - Tap a quick setting icon to turn it on or off.
   - Touch and hold a quick setting icon to open the setting.
   - Tap Search to search the device.
   - Tap Settings to quickly access the device's settings menu.
   - Tap More options to reorder Quick settings or to change the button layout.
3. Drag — View all upward to close Quick settings.

Bixby

Bixby is a virtual assistant that learns, evolves, and adapts to you. It learns your routines, helps you set up reminders based on time and location, and is built in to your favorite apps. Visit samsung.com/us/support/owners/app/Bixby for more information.

The Bixby Home page displays customized content based on your interactions. Bixby learns from your usage patterns and will suggest content you may like.

- From a Home screen, swipe right.
Digital wellbeing
You can monitor and manage your digital habits by getting a daily view of how frequently you use apps, how many notifications you receive, and how often you check your device. You can also set your device to help you wind down before going to bed.

○ From Settings, tap 📱 Digital wellbeing for the following features:
  • Screen time: Tap the time value in the dashboard circle for details on how long each app has been opened and used today.
  • Times opened: Tap the Unlocks number to see how many times each app has been opened today.
  • Notifications received: Tap the Notifications number to see how many notifications have been received from each app today.
  • Dashboard: View all dashboard information shown above. Each app can have a timer set to limit usage throughout the day.
  • Wind down: Enable to turn the screen to grayscale and limit notifications before going to bed.
  • Notifications: Configure notification settings for each app.
Flexible security

Use biometrics to securely unlock your device and log in to accounts.

Face recognition

You can enable Face Recognition to unlock your screen.

- Face recognition is less secure than Pattern, PIN, or Password. Your device could be unlocked by someone or something that looks like your image.
- Some conditions may affect face recognition, including wearing glasses, hats, beards, or heavy make-up.
- When registering your face, ensure that you are in a well-lit area and the camera lens is clean.

1. From Settings, tap Biometrics and security > Face recognition.
2. Follow the prompts to register your face.

💡 TIP To use your face to unlock your device, you must set a pattern, PIN, or password.

Face recognition management

Customize how face recognition works.

- From Settings, tap Biometrics and security > Face recognition.
  - Remove face data: Delete existing faces.
  - Face unlock: Enable or disable face recognition security.
  - Stay on Lock screen: When you unlock your device with face recognition, stay on the Lock screen until you swipe the screen.
  - Faster recognition: Turn on for faster face recognition. Turn off to increase security and make it harder to unlock using an image or video of your likeness.
  - Brighten screen: Increase the screen brightness temporarily so that your face can be recognized in dark conditions.
**Biometrics Preferences**

Configure your preferences for biometric security options.

- From Settings, tap Biometrics and security > Biometrics preferences for the following options:
  - **Screen transition effect**: Show a transition effect when you use biometrics to unlock your device.
Multi window

Multitask by using multiple apps at the same time. Apps that support Multi window™ can be displayed together on a split screen. You can switch between the apps and adjust the size of their windows.

1. From any screen, tap Recent apps.
2. Tap the app icon, and then tap Open in split screen view.
3. Tap an app in the other window to add it to the split screen view.
   • Drag the middle of the window border to adjust the window size.
Enter text

Text can be entered using a keyboard or your voice.

- Tap a field to display the Samsung keyboard.
  - Tap (_expand) Show predictive text to view suggested words while you type.
  - Tap (expand) Show toolbar functions to view all keyboard options.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Toolbar functions

The toolbar provides additional helpful functions.

○ From the Samsung keyboard, tap ••• Expand toolbar for the following options:
  • Clipboard: Access the clipboard.
  • 🎨 Emojis: Insert an emoji.
  • 🎥 GIF keyboard: Add animated GIFs.
  • 🎨 Modes: Select a keyboard layout.
  • 🛠 Settings: Access keyboard settings.
  • 🎨 Stickers: Add illustrated stickers.
  • 🔢 Text editing: Use an editing panel to help pinpoint text that you want to cut, copy, and paste.
  • 🎤 Voice input: Use Google Voice™ typing.

Configure the Samsung keyboard

Set customized options for the Samsung keyboard.

○ From the Samsung keyboard, tap 🛠 Settings for the following options:
  • Languages and types: Set the keyboard type and choose which languages are available on the keyboard.
    – To switch between languages, slide the Space bar sideways.
  • Smart typing: Use predictive text and auto-correction features to prevent common typing mistakes. Type by swiping between letters.
  • Keyboard layout and feedback: Customize the appearance and function of the keyboard.
  • Reset to default settings: Return keyboard to original settings and clear personalized data.
  • About Samsung keyboard: View version and legal information for the Samsung keyboard.
Use Google Voice typing
Instead of typing, enter text by speaking.

1. From the Samsung keyboard, tap Voice input.
2. Tap the screen and speak your text.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Configure Google Voice typing
Set customized options for Google Voice typing.

1. From the Samsung keyboard, tap Voice input.
2. Tap Settings for options.
   - Languages: Choose the language for the keyboard.
   - Offline speech recognition: Download languages for offline Google Voice typing.
   - Hide offensive words: Hide potentially offensive words with asterisks.

Emergency mode
Use Emergency mode to access helpful emergency features and conserve your device’s power during an emergency situation.

To save battery power, Emergency mode:
- Restricts application usage to only essential applications and those you select.
- Turns off connectivity features and Mobile data when the screen is off.

Activate Emergency mode
To activate Emergency mode:
1. Press and hold the Power key.
2. Tap Emergency mode.
   - When accessing for the first time, read and accept the terms and conditions.
3. Tap Turn on.

Emergency mode features
While in Emergency mode, only the following apps and features are available on the Home screen:
- Flashlight: Use the device’s flash as a steady source of light.
- Emergency alarm: Sound an audible siren.
• **Share my location:** Send your location information to your emergency contacts.
• **Phone:** Launch the call screen.
• **Internet:** Launch the web browser.

**Add**
- **Email:** Launch the Email app.
- **Maps:** Launch Google Maps™.

**Battery charge:** Displays estimated battery charge percentage.
**Estimated battery life:** Displays estimated remaining battery charge time based on current battery charge and usage.

**Emergency call:** Dial the emergency telephone number (for example, 911). This kind of call can be made even without activated service.

**More options:**
- **Turn off Emergency mode:** Disable Emergency mode and return to standard mode.
- **Remove apps:** Choose apps to remove from the screen.
- **Manage emergency contacts:** Manage your medical profile and ICE (In Case of Emergency) group contacts.
- **Settings:** Configure the available settings. Only a limited number of settings are enabled in Emergency mode.

**Turn off Emergency mode**

When emergency mode is turned off, the device returns to standard mode.

1. Press and hold the **Power** key.
2. Tap **Emergency mode**.

**NOTE** When Emergency mode is activated, Locating method is set to Battery saving. After Emergency mode is turned off, you may need to adjust your location settings. For more information, see **Location** on page 117.
Apps

Using apps

Samsung apps

Google apps

Carrier apps

Additional apps
Using apps

The Apps list displays all preloaded and downloaded apps. Apps can be downloaded from Galaxy Store and the Google Play™ store.

- From a Home screen, swipe the screen upward to access the Apps list.

Uninstall or disable apps

Installed apps can be removed from your device. Some apps that are preloaded (available on your device by default) can only be disabled. Disabled apps are turned off and hidden from the Apps list.

- From Apps, touch and hold an app, and tap Uninstall/Disable.

Search for apps

If you are not sure where to find an app or a setting, you can use the Search feature.

1. From Apps, tap Finder search, and enter a word or words. As you type, matching apps and settings appear as results on the screen.
2. Tap a result to go to that app.

⚠️ TIP You can customize the search settings by tapping More options > Finder settings.

Sort apps

App shortcuts can be listed alphabetically or in your own custom order.

- From Apps, tap More options > Sort for the following sorting options:
  • Custom order: Arrange apps manually.
  • Alphabetical order: Sort apps alphabetically.

⚠️ TIP When apps are arranged manually (Custom order), empty icon spaces can be removed by tapping More options > Clean up pages.
Create and use folders
You can make folders to organize App shortcuts on the Apps list.

1. From Apps, touch and hold an app shortcut, and then drag it on top of another app shortcut until it is highlighted.
2. Release the app shortcut to create the folder.
   • Enter folder name: Name the folder.
   • Palette: Change the folder color.
   • Add apps: Place more apps in the folder. Tap apps to select them, and then tap Add.
3. Tap Back to close the folder.

Copy a folder to a Home screen
You can copy a folder to a Home screen.

○ From Apps, touch and hold a folder, and tap Add to Home.

Delete a folder
When you delete a folder, the app shortcuts return to the Apps list.

1. From Apps, touch and hold a folder to delete.
2. Tap Delete folder, and confirm when prompted.

App settings
Manage your downloaded and preloaded apps.

1. From Settings, tap Apps.
2. Tap Menu to set which apps to view, and then choose All, Enabled, or Disabled.
3. Tap More options for the following options:
   • Sort by name/size: Sort the apps alphabetically by first letter or file size.
   • Default apps: Choose or change apps that are used by default for certain features, like email or browsing the Internet.
• **App permissions**: Control which apps have permissions to use certain features of your device.

• **Show/Hide system apps**: Show or hide system (background) apps.

• **Special access**: Select which apps can have special access permissions to features on your device.

• **Reset app preferences**: Reset options that have been changed. Existing app data is not deleted.

4. Tap an app to view and update information about the app. The following options may be displayed:

• **Uninstall/Disable**: Uninstall or disable the app. Some preloaded apps can only be disabled, not uninstalled.

• **Force stop**: Stop an app that is not working correctly.

• **Mobile data**: View mobile data usage.

• **Battery**: View battery usage since the last full charge.

• **Storage**: Manage the app’s storage usage.

• **Memory**: View memory usage.

• **Notifications**: Configure notifications from the app.

• **Permissions**: View permissions granted to the app for access to your device’s information.

• **Set as default**: Set the app as a default for a certain category of apps.

💡 **NOTE** Options vary by app.
Samsung apps

The following apps are either preloaded or downloaded over-the-air to your device during setup.

Galaxy Essentials

Galaxy Essentials is a collection of specially chosen applications available through Samsung apps. You can access and download a collection of premium content.

○ From Apps, tap More options > Galaxy Essentials.

Galaxy Store

Find and download premium apps that are exclusive to Galaxy devices. A Samsung account is required to download from Galaxy Store.

○ From Apps, tap Galaxy Store.

Samsung Members

Get more and do more from your Galaxy device. Enjoy DIY support tools and exclusive experiences and content — for Samsung members only. Samsung Members may be preloaded on your device, or you can download and install it from Galaxy Store or the Google Play store.

Visit samsung.com/us/support/owners/app/samsung-members to learn more.

○ From Apps, tap Samsung folder > Samsung Members.
Use Samsung Notes to create notes containing text, images with footnotes, voice recordings, and music. You can share your notes easily using social networking services.

Visit samsung.com/us/support/owners/app/samsung-notes to learn more.

- From Apps, tap Samsung Notes > + Create.
Edit notes

Make edits to notes you create.

1. From Samsung Notes, tap a note to view it.
2. Tap Edit, and make changes. When you are finished, tap Save.

Notes options

You can edit, share, or manage notes.

- From Samsung Notes, tap More options for the following options:
  - Edit: Select notes to share, delete, or move.
  - Sort: Change the way notes are organized.
  - View: Switch between Grid, List, or Simple list.

Notes menu

You can view your notes by category.

- From Samsung Notes, tap Menu for the following options:
  - All notes: View all notes.
  - Frequently used: Quick access to commonly used notes.
  - Shared notebooks: View notebooks shared with your contacts through your Samsung account.
  - Trash: View deleted notes.
  - Categories: View notes by category.
  - Settings: View settings for the Samsung Notes app.
Apps

Calculator

The Calculator app features both basic and scientific math functions, as well as a unit converter.

- From Apps, tap Calculator.

Unit Converter
Convert between measurements.

History
View past calculations.

Scientific mode
If the icon is not visible, turn your device to landscape.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
The Calendar app can be connected to your various online accounts to consolidate all your calendars in one place.

- From Apps, tap Calendar.

Change to other calendar views

Go to today’s date

Double-tap to edit event

Create new event

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Apps

Add calendars
Add your accounts to the Calendar app.

1. From 🔄 Calendar, tap 📌 Menu.
2. Tap 🔄 Settings > Add new account and select an account type.
3. Enter your account information and follow the prompts.

💡 TIP Accounts may also support email, contacts, and other features.

Create an event
Use your Calendar to create events.

1. From 🔄 Calendar, tap + Add to add an event.
2. Enter details for the event, and then tap Save.

Delete an event
Delete events from your Calendar.

1. From 🔄 Calendar, tap an event, and tap again to edit it.
2. Tap Delete, and confirm when prompted.
You can capture high-quality pictures and videos using the Camera app.

- From Apps, tap 📷 Camera.

💡 TIP If Quick launch is enabled, quickly press the Power key twice.
Navigate the camera screen
Take stunning pictures with your device’s front and rear cameras.

1. From 📷 Camera, set up your shot with the following features:
   - Tap the screen where you want the camera to focus.
     - When you tap the screen, a brightness scale appears. Drag the light bulb to adjust the brightness.
   - To quickly switch between the front and rear cameras, swipe the screen up or down.
   - To change to a different shooting mode, swipe the screen right or left.
   - To change camera settings, tap 📷 Settings.

2. Tap 📷 Capture.

Record videos
Record high-quality videos using your device.

1. From 📷 Camera, swipe right or left to change the shooting mode to Video.

2. Tap 📷 Capture to begin recording a video.
   - To take a picture while recording, tap 📷 Capture.
   - To temporarily stop recording, tap 🎬 Pause. To continue recording, tap 🎬 Resume.

3. Tap 🎬 Stop when you are finished recording.

Change shooting modes
The Camera is equipped with a variety of shooting modes to capture pictures and videos in specific scenarios.

- From 📷 Camera, the shooting modes are located in a row near the bottom of the screen.
  - To change the shooting mode, swipe the screen right or left.
  - To view the entire list of shooting modes and each mode’s description, touch and hold a shooting mode.
Configure shooting mode
Allow the camera to determine the ideal mode for your pictures or choose from several shooting modes.

- From 📷 Camera, touch and hold a shooting mode.
  - Panorama: Create a linear image by taking pictures in either a horizontal or vertical direction.
  - Pro: Manually adjust the ISO sensitivity, exposure value, white balance, and color tone while taking pictures.
  - Photo: Allow the camera to determine the ideal mode for the picture.
  - Video: Allow the camera to determine the ideal mode for the video.

Camera settings
Use the icons on the main camera screen and the settings menu to configure your camera’s settings.

- From 📷 Camera, tap kamal Settings for the following options:
  Pictures
    - Save options: Choose picture format and whether to flip your selfies.
  Videos
    - Rear video size: Select a resolution. Selecting a higher resolution for higher quality requires more memory.
    - Front video size: Select a resolution. Selecting a higher resolution for higher quality requires more memory.
    - High efficiency video: Record videos in HEVC format to save space.
  Useful features
    - HDR (rich tone): Enables the light sensitivity and color depth features of the device to produce a brighter and richer picture.
    - Grid lines: Display viewfinder grid lines to help compose a picture or video.
    - Location tags: Attach a GPS location tag to the picture.
    - Camera modes: Set the default camera mode. You can also reorder or hide your shooting modes.
• **Shooting methods:**
  - **Press Volume key to:** Use the Volume key to take pictures, record video, zoom, or control system volume.
  - **Floating shutter button:** Add an extra shutter button that you can move anywhere on the screen.
  - **Show palm:** Hold your hand out with your palm facing the camera to have your picture taken in a few seconds.

• **Storage location:** Select a memory location.
  - A memory card (not included) must be installed to view Storage location.

• **Quick launch:** Press the Power key twice in quick succession to open the camera.

• **Shutter sound:** Play a tone when taking a picture.

• **Reset settings:** Reset the camera settings.

• **About Camera:** View app and software information.
Store and manage your contacts. You can synchronize with personal accounts added to your device. Accounts may also support email, calendars, and other features.

- From Apps, tap 📞 Contacts > + Create contact.
**Edit a contact**

When editing a contact, you can tap a field and change or delete information, or you can add more fields to the contact’s list of information.

1. From 📞 Contacts, tap a contact.
2. Tap ✒ Edit.
3. Tap any of the fields to add, change, or delete information.
4. Tap Save.

**Call or message a contact**

You can quickly call or message a contact using their default phone number.

1. From 📞 Contacts, tap a contact.
2. Tap ☑ Call or ☑ Message.

**Favorites**

When you mark contacts as favorites, they are easily accessible from other apps.

1. From 📞 Contacts, tap a contact.
2. Tap ★ Add to Favorites to mark the contact as a favorite.
   - To remove the contact from Favorites, tap ★ Favorite.

**Share a contact**

Share a contact with others by using various sharing methods and services.

1. From 📞 Contacts, tap a contact.
2. Tap ◀ Share.
3. Tap either vCard file (VCF) or Text.
4. Choose a sharing method and follow the prompts.

💡 TIP: When viewing a contact, tap ☑ QR code to quickly share the information with friends or family. The QR code automatically updates when you change the contact information fields.
**Direct share**

Share content directly with your contacts from within any app. Once enabled, your frequent contacts are displayed in the Share window.

- From Settings, tap 📱 Advanced features > Direct share, and tap ☑️ to enable the feature.

**Groups**

You can use groups to organize your contacts.

**Create a group**

Create your own contact groups.

1. From ⌋ Contacts, tap ⚙ Menu > Groups.
2. Tap Create group, and then tap fields to enter information about the group:
   - Group name: Enter a name for the new group.
   - Group ringtone: Customize the sounds for the group.
   - Add member: Select contacts to add to the new group, and then tap Done.
3. Tap Save.

**Add or remove group contacts**

Add more contacts to a group, or remove contacts.

- From ⌋ Contacts, tap ⚙ Menu > Groups, and then tap a group.
  - To remove a contact, touch and hold a contact to select it, and then tap 🗑️ Delete.
  - To add a contact, tap ✎ More options > Edit group > Add member, and then tap the contacts you want to add. When finished, tap Done > Save.

**Send a message to a group**

Send a text message to members of a group.

1. From ⌋ Contacts, tap ⚙ Menu > Groups, and then tap a group.
2. Tap ✎ More options > Send message.
Send an email to a group
Send an email to members of a group.

1. From Contacts, tap Menu > Groups, and then tap a group.
2. Tap More options > Send email.
3. Tap contacts to select them, or tap the All checkbox at the top of the screen to select all, and then tap Done.
   - Only group members that have an email address in their records are displayed.
4. Choose an email account and follow the prompts.

Delete a group
Delete a group you have created.

1. From Contacts, tap Menu > Groups, and then tap a group.
2. Tap More options > Delete group.
   - To only delete the group, tap Group only.
   - To delete the group and the contacts in the group, tap Group and members.

Manage contacts
You can import or export contacts, as well as link multiple contacts into one contact entry.

Import contacts
Import contacts to your device as vCard files (VCF).

1. From Contacts, tap Menu > Manage contacts.
2. Tap Import/export contacts.
3. Tap Import and follow the prompts.
Export contacts

Export contacts from your device as vCard files (VCF).

1. From Contacts tap Menu › Manage contacts.
2. Tap Import/export contacts.
3. Tap Export and follow the prompts.

Link contacts

Consolidate contact information from multiple sources into one contact by linking entries into a single contact.

1. From Contacts, tap the contact to select it.
2. Tap More options › Link to another contact.
3. Tap contacts to choose them.
4. Tap Link.

To unlink contacts:

1. From Contacts, tap the contact to select it.
2. Tap More options › Add/remove linked contacts.
3. Tap Unlink beside contacts to unlink them from the main contact.

Delete contacts

Delete a single contact or multiple contacts.

1. From Contacts, touch and hold a contact to select it.
   • You can also tap other contacts to select them for deletion.
2. Tap Delete, and confirm when prompted.
The Clock app offers features for keeping track of time and setting alarms.

- From Apps, tap Clock, and tap a tab to use a feature.
Alarm

Use the Alarm tab to set one-time or recurring alarms and choose options for how to be notified.

1. From Clock, tap Add alarm.
2. Tap the following items to configure an alarm:
   - **Time**: Set a time for the alarm.
   - **Day**: Choose the day for this alarm.
   - **Alarm name**: Enter a name for the alarm.
   - **Alarm sound**: Choose a sound to play for the alarm and drag the slider to set the volume of the alarm.
   - **Vibration**: Choose whether the alarm uses vibration alert.
   - **Snooze**: Allow snoozing. Set interval and repeat values for the alarm while snoozing.
3. Tap Save to save the alarm.

Delete an alarm

You can delete an alarm that you created.

1. From Clock, touch and hold an alarm.
2. Tap Delete.
**World clock**

The World clock lets you keep track of the current time in multiple cities around the globe.

1. From 🕒 Clock, tap World clock.
2. Tap ➕ Add city > Search for city, and enter the name of the city.
3. Tap the city name in the list, and then tap Add.
   - To remove a city, touch and hold it, and tap 🗑️ Delete.

Devices and software are constantly evolving — the illustrations you see here are for reference only.
Time zone converter
Set a time in a city on your World clock list to see what the local times would be in the other listed cities.

1. From Clock, tap World clock.
2. Tap More options > Time zone converter.
3. Tap Menu to choose a different city.
   • To add a city to the list, tap Add city.
4. Swipe the hours, minutes, and period (AM or PM) on the clock to set a time. Local times for the other cities listed are automatically updated.
   • To return the clock to the current time, tap Reset.

Weather settings
Show weather information on your World clock.

1. From Clock, tap World clock.
3. Tap to enable.
4. Tap Unit to change from Fahrenheit to Celsius.

Stopwatch
The Stopwatch lets you time events down to a hundredth of a second.

1. From Clock, tap Stopwatch.
2. Tap Start to begin timing.
   • To keep track of lap times, tap Lap.
3. Tap Stop to end timing.
   • To continue timing after stopping the clock, tap Resume.
   • To reset the Stopwatch to zero, tap Reset.
**Timer**

Set a countdown timer for up to 99 hours, 59 minutes, and 59 seconds.

1. From 🕒 Clock, tap Timer.
2. Use the keypad and tap **Hours**, **Minutes**, and **Seconds** to set the Timer.
3. Tap **Start** to begin the Timer.
   - To temporarily stop the Timer, tap **Pause**. To continue, tap **Resume**.
   - To stop and reset the Timer, tap **Cancel**.

**Timer options**

You can customize the Timer options.

- From 🕒 Clock, tap **Timer** and choose an option:
  - Add preset timer: Save a preset timer with a custom name.
  - More options > Set timer sound: Choose the timer sound or create your own.
View and manage multiple email accounts in one app. To add an email account, see Add an email account on page 8.

- From Apps, tap Email.
Create and send an email

Compose and send email messages from your device.

1. From 📧 Email, tap 📦 Compose new email.
   - Different email account may have additional steps and options.
2. Tap the To field to add an email address or tap 🔄 Add from Contacts to select a recipient from your contacts.
   - When adding multiple recipients, separate them with a semicolon (;). More recipients can be added at any time before the message is sent.
   - If adding a recipient from your Contacts, tap the contact to place a checkmark, and then tap Done. The contact is displayed in the recipients field.
   - Tap ✔ Show additional fields to add Cc and Bcc fields.
3. Tap the Subject and Message fields to enter text.
   - Tap 📦 Attach to add files, images, audio, and more to your email.
   - Tap More options for additional email options.
4. Review your message and tap ✔ Send.

Manage the inbox

Organize and search your inbox.

- From 📧 Email:
  - Tap a message to read and reply or forward it.
  - Tap 🔍 to search for key words in your email inbox.
  - Tap More options > Edit for additional message options.
  - Tap More options > Sort to customize how messages display.
View multiple email accounts

You can view email you receive for multiple accounts, or you can view email accounts individually.

- From Email, tap for the following options:
  - [Account name]: View email for only one email account.
  - All accounts: View all email in a combined inbox.

💡 TIP  Accounts may also support calendars, contacts, and other features.

Email settings

Modify settings associated with using the Email app.

- From Email, tap > Settings.
  - Under General, tap an option, and then follow the prompts.
  - Tap an account to configure specific settings for only that account.

Remove email accounts

Should you need to remove an email account from your device, you can do so through the Settings menu.

1. From Email, tap > Settings.
2. Tap the account you want to remove.
3. Tap Remove, and confirm when prompted.
Go to the Gallery to look at all the visual media stored on your device. You can view, edit, and manage pictures and videos.

- From Apps, tap 🌟 Gallery.
**View pictures**

Pictures stored on your device are viewable in the Gallery app.

1. From 📱 Gallery, tap Pictures.
2. Tap a picture to view it. Swipe left or right to view other pictures or videos.
   - To mark the picture as a favorite, tap 💌 Favorite.
   - To access the following features, tap ☰ More options:
     - Details: View and edit information about the picture.
     - Set as wallpaper: Set the picture as wallpaper.
     - Move to Secure Folder: Move the picture to a Secure Folder.
     - Print: Send the picture to a connected printer.

**Edit pictures**

Enhance your pictures using the Gallery's editing tools.

1. From 📱 Gallery, tap Pictures.
2. Tap a picture to view it, and then tap ☰ Edit for the following options:
   - Transform: Rotate, flip, crop, or make other changes to the overall appearance of the picture.
   - Effects: Add color effects.
   - Stickers: Overlay illustrated or animated stickers.
   - Text: Add text to the picture.
   - Draw: Add handwritten text or hand drawn content.
   - Brightness: Adjust brightness image controls.
Play video

View the videos stored on your device. You can save videos as favorites, and view video details.

1. From 🌱 Gallery, tap Pictures.
2. Tap a video to view it. Swipe left or right to view other pictures or videos.
   - To mark the video as a favorite, tap ❤️ Favorite. The video is added to Favorites under the Albums tab.
   - To access the following features, tap ✂️ More options:
     - Details: View and edit information about the video.
     - Set as wallpaper: Set the video as wallpaper on the Lock screen.
     - Move to Secure Folder: Add this video to your Secure Folder.
3. Tap ⏮ Play video to play the video.

Edit video

Edit videos stored on your device.

1. From 🌱 Gallery, tap Pictures.
2. Tap a video to view it.
3. Tap ✂️ Edit to cut segments of the video.
4. Tap Save, and then confirm when prompted.

Share pictures and videos

Share pictures and videos from the Gallery app.

1. From 🌱 Gallery, tap Pictures.
2. Tap ✂️ More options > Share, and then tap pictures and videos to select them.
3. Tap ⍞ Share, and then choose an app or connection to use for sharing your selection. Follow the prompts.
Delete pictures and videos

Delete pictures and videos stored on your device.

1. From Gallery, tap More options > Edit.
2. Tap pictures and videos to select them, or tap the All checkbox at the top of the screen to select all pictures and videos.
3. Tap Delete, and confirm when prompted.

Take a screenshot

Capture an image of your screen. Your device will automatically create a Screenshots album in the Gallery app.

- From any screen, press and hold the Power and Volume down keys.
Samsung Internet is a simple, fast, and reliable web browser for your device. Experience more secure Web browsing features with Secret Mode, Biometric Web Login, and Contents Blocker.

- From Apps, tap **Internet**.

**Browser tabs**

Use tabs to view multiple web pages at the same time.

- From 🌐 Internet, tap New tab.
  - To close a tab, tap ✗ Close tab.

**Bookmarks**

The Bookmarks page stores Bookmarks, Saved pages, and your browsing History.

**Open a Bookmark**

Quickly launch a web page from the Bookmarks page.

1. From 🌐 Internet, tap ⬇️ Bookmarks.
2. Tap a bookmark entry.

**Save a web page**

Saving a web page stores its content on your device so that you can access it offline.

- From 🌐 Internet, tap ⬇️ > Add page to > Saved pages.

💡 **NOTE** To view saved web pages, tap ⬇️ > Saved pages.

**View history**

To view a list of recently visited web pages:

- From 🌐 Internet, tap ⬇️ > History.

💡 **TIP** To clear your browsing history, tap ✂️ More options > Clear history.

**Share pages**

Web pages can be shared with your contacts.

- From 🌐 Internet, tap ⬇️ > Share, and follow the prompts.
Secret mode

Pages viewed in Secret mode are not listed in your browser history or search history, and leave no traces (such as cookies) on your device. Secret tabs are a darker shade than the normal tab windows.

Any downloaded files remain on your device after you close the secret tab.

1. From Internet, tap Tabs > Turn on Secret mode.
2. Tap Set password to protect your Secret mode data with a password.

To turn off Secret mode:

○ From Internet, tap Tabs > Turn off Secret mode.

Internet settings

Modify settings associated with using the Internet app.

○ From Internet, tap > Settings.
Keep in touch with your contacts by using the Messages app to share photos, send emojis, or just say a quick hello.

- From Apps, tap Messages > Compose.

**Message search**

To quickly locate a message, use the search feature.

1. From Messages, tap Search.
2. Enter keywords in the Search field, and then tap Search on the keyboard.
Delete conversations

You can remove your conversion history by deleting conversations.

1. From Messages, tap More options > Edit.
2. Tap each conversation you want to delete.
3. Tap Delete, and confirm when prompted.

Emergency alerts

Emergency alerts notify you of imminent threats and other situations. There is no charge for receiving an Emergency alert message.

1. From Settings, tap Connections > More connection settings.
2. Tap Wireless emergency alerts > Settings to customize notifications for emergency alerts.

Send SOS messages

Send a message with your location to designated contacts when you are in an emergency situation.

1. From Settings, tap Advanced features > Send SOS messages, and then tap to enable this feature.
2. Tap Send messages to and add recipients by creating new contacts or selecting from Contacts.
   • To include a picture from your front and rear camera, tap Attach pictures.
   • To include a five-second audio recording in your SOS message, tap Attach audio recording.
3. Press the Power key quickly three times to send an SOS message.

Message settings

Configure the settings for text and multimedia messages.

○ From Messages, tap More options > Settings.
View and manage files stored on your device, including images, videos, music, and sound clips.

- From Apps, tap Samsung folder > My Files.
File groups
Files stored in the device are organized into the following groups:

- **Recent files**: View recently accessed files.
- **Categories**: View your files based on the file type.
- **Storage**: View files saved on your device, optional SD card, and cloud accounts.
  - Cloud drives vary depending on the services you sign in to.
- **Storage analysis**: See what’s taking up space in your storage.

My Files options
Use My Files options to search, edit, clear file history, and more.

- From **My Files**, the following options are available:
  - **Search**: Search for a file or folder.
  - **More options**:
    - **Storage analysis**: See what’s taking up space in your storage.
    - **Settings**: View settings for the app.
Phone

The Phone app does more than just make telephone calls. Explore the advanced calling features. See your carrier for more information.

- From a Home screen, tap 📞 Phone.
Calls

The Phone app allows you to make and answer calls from the Home screen, Recents tab, Contacts and more.

Make a call

Use your phone to make and answer calls from a Home screen.

- From Phone, enter a number on the keypad and tap Call.
  - Tap Keypad if the keypad is not displayed.

Enable swipe to call

Swipe a contact or number to the right to make a call.

1. From Settings, tap Advanced features > Motions and gestures > Swipe to call or send messages.
2. Tap ☑️ to enable this feature.

Make a call from Recents

All incoming, outgoing, and missed calls are recorded in the Call log.

1. From Phone, tap Recents to display a list of recent calls.
2. Tap a contact, and then tap Call.

Make a call from Contacts

Call a contact from the Contacts app.

- From Contacts, swipe your finger across a contact to the right to call the contact.

Answer a call

When a call is received, the phone rings and the caller’s phone number or name is displayed. If you are using an app, a pop-up screen is displayed for the incoming call.

- On the incoming call screen, drag Answer to the right to answer the call.

💡 TIP  On the incoming call pop-up screen, tap Answer to answer the call.
Decline a call
You can choose to decline an incoming call. If you are using an app, a pop-up screen is displayed for the incoming call.

- On the incoming call screen, drag Decline to the left to reject the call and send it to your voicemail.

Tips: On the incoming pop-up screen, tap Decline to reject the call and send it to your voicemail.

Decline with a message
You can choose to decline an incoming call with a text message response.

- On the incoming call screen, drag Send message upward and select a message.

Tips: On the incoming call pop-up screen, tap Send message and select a message.

End a call
- Tap End when you are ready to end your call.

Actions while on a call
You can adjust call volume, switch to a headset or speaker, and even multitask while on a call.

- Press the Volume keys to increase or decrease the volume.

Switch to headset or speaker
Listen to the call using the speaker or through a Bluetooth® headset (not included).

- Tap Speaker to hear the caller using the speaker or tap Bluetooth to hear the caller using a Bluetooth headset.
**Multitask**

If you exit the call screen to use another app, your active call is indicated in the Status bar.

To return to the call screen:

- Drag the Status bar down to display the Notification panel and tap the call.

To end a call while multitasking:

- Drag the Status bar down to display the Notification panel, and then tap ☑️ End call.

**Places**

Explore nearby business and venues to get contact information and directions.

1. From ☎️ Phone, tap Places.
2. Tap a category to search nearby.
3. Tap a location to view contact information and directions.

💡 NOTE  Location services must be enabled to use this feature.

**Manage calls**

Your calls are recorded in a call log. You can set up speed dials, block numbers, and use voicemail.

**Call log**

The numbers of the calls you have dialed, received, or missed are stored in the Call log.

- From ☎️ Phone, tap Recents. A list of recent calls is displayed. If the caller is in your Contacts list, the caller’s name is displayed.
Save a contact from a recent call

Use recent call information to create a contact or update your Contacts list.

1. From Phone, tap Recents.
2. Tap the call that contains the information that you want to save to your Contacts list, and tap Add to contacts.
3. Tap Create contact or Update existing.

Delete call records

To delete Call log entries:

1. From Phone, tap Recents.
2. Touch and hold the call you want to delete from the Call log.
3. Tap Delete.

Block a number

By adding a caller to your Block list, future calls from this number are sent directly to your voicemail, and messages are not received.

1. From Phone, tap Recents.
2. Tap the caller you want to add to the Block list.
3. Tap Details > Block, and confirm when prompted.

💡 TIP: You can also modify your Block list in Settings. From Phone, tap More options > Settings > Block numbers.

Speed dial

You can assign a shortcut number to a contact for speed dialing their default number.

1. From Phone, tap Keypad > More options > Speed dial numbers. The Speed dial numbers screen displays the reserved speed dial numbers.
2. Tap an unassigned number.
   • Tap Menu to select a different Speed dial number than the next one in sequence.
   • Number 1 is reserved for Voicemail.
3. Type in a name or number, or tap Add from Contacts to assign a contact to the number.
   - The selected contact is displayed in the Speed dial number box.

Make a call with Speed dial
You can make a call using Speed dial.

○ From Phone, touch and hold the Speed dial number.
   - If the Speed dial number is more than one digit long, enter the first digits, and then hold the last digit.

Remove a Speed dial number
You can remove an assigned Speed dial number.

1. From Phone, tap More options > Speed dial numbers.
2. Tap Remove by the contact you want to remove from Speed dial.

Voicemail
Use your phone’s voicemail feature.

For information on setting up voicemail, see Set up voicemail on page 9.

1. From Phone, tap Voicemail.
2. Follow the voice prompts from the voicemail center.
Emergency calls

You can dial the emergency telephone number in your region regardless of the phone’s service status. If your phone is not activated, you can only make an emergency call.

1. From Phone, enter the emergency telephone number (911 in North America) and tap Call.
2. Complete your call. During this type of call, you have access to most in-call features.

💡 TIP The emergency telephone number can be dialed even if the phone is locked, allowing anyone to use your phone to call for help in an emergency. When accessed from a locked screen, only the emergency calling feature is accessible to the caller. The rest of the phone remains secured.

Phone settings

These settings allow you to modify settings associated with the Phone app.

○ From Phone, tap More options > Settings.

Optional calling services

If available with your service plan, the following calling services are supported.

Place a multi-party call

If your service plan supports this feature, you can make another call while a call is in progress.

1. From the active call, tap Add call to dial the second call.
2. Dial the new number and tap Call. When the call is answered:
   • Tap Swap to switch between the two calls.
   • Tap Merge to hear both callers at once (multi-conferencing).
Video calls
To make Video calls:

- Tap Phone, enter a number, and then tap Video call.

NOTE Not all devices support video calling. The receiver has the option to accept the video call or answer the call as a regular voice call.

Wi-Fi calling
Make calls over Wi-Fi when you are connected to a Wi-Fi network. Contact your carrier for details.

1. From Phone, tap More options > Settings > Wi-Fi calling.
2. Tap to enable this feature.
3. Follow the prompts to set up and configure Wi-Fi calling.

Real Time Text (RTT)
Type back and forth in real time with the other person while on a call.

You can use RTT whenever you are calling someone whose phone also supports RTT or is connected to a teletypewriter (TTY) device. The RTT icon appears on all incoming RTT calls.

1. From Phone, tap More options > Settings.
2. Tap Real time text for the following options:
   - Always visible: Show the RTT call button on the keypad and during calls.
   - Use external TTY keyboard: Hide the RTT keyboard when an external TTY keyboard is connected.
   - TTY mode: Choose the preferred TTY mode for the keyboard in use.

NOTE To use RTT, you must be connected to a 4G LTE or Wi-Fi network.
Google apps

Carrier apps

Some apps require a data plan or paid subscription. Contact your carrier for additional information.

Call Protect
Take control over nuisance calls.

AT&T ProTech
Get support for your device, from device setup to troubleshooting.

AT&T Smart Wi-Fi
Maximize your battery performance, simplify access to AT&T Hot Spots and Wi-Fi networks, automate your Wi-Fi connections, and track your data use.

Device Help
Access online information to help with your device questions.

DIRECTV NOW
Sync your device to your DIRECTV® account, and start watching shows and videos on your device.

DriveMode
Auto reply when you are driving and do not want to answer the phone. You can auto reply to messages, emails, and phone calls. You can also allow up to five of your contacts to contact you while using DriveMode®.

Mobile Security
Configure and manage key security options, such as anti-virus and anti-malware technology.
myAT&T
Manage your AT&T account. You can review and pay your bill, check minutes and data usage, upgrade to a new device, or change your plan.

Secure Family
Locate family members, block apps and websites, and set limits on internet usage.

Setup & Transfer
Transfer your contacts, call logs, messages and media when switching phones.

Visual Voicemail
View and play voicemail messages, easily save important numbers to your Favorites list, and respond by calling or texting.
Additional apps

The following apps are preloaded or downloaded over-the-air to your device.

Amazon Shopping
Shop at amazon.com™ from your device.

Facebook
Keep up with friends and family with the Facebook™ app. Share updates, photos, and videos, as well as text, chat, and play games.
Settings

Access Settings

Connections

Sounds and vibration

Notifications

Display

Device maintenance

Lock screen and security

Accounts

Accessibility

Other settings
Access Settings

There are a couple of ways to access your device settings.

- Drag down the Status bar, and then tap 📷 Settings.
- From Apps, tap 📷 Settings.

Search for Settings

If you are not sure exactly where to find a certain setting, you can search for it.

1. From Settings, tap 🔍 Search, and enter keywords.
2. Tap an entry to go to that setting.

Connections

Manage connections between your device and a variety of networks and other devices.

Wi-Fi

You can connect your device to a Wi-Fi network to access the Internet without using your mobile data.

1. From Settings, tap 📱 Connections > Wi-Fi, and then tap ⬤ to turn on Wi-Fi and scan for available networks.
2. Tap a network, and enter a password if required.

Manually connect to a Wi-Fi network

If the Wi-Fi network you want is not listed after a scan, you can still connect to it by entering the information manually.

Ask the Wi-Fi network administrator for the name and password before you begin.

1. From Settings, tap 📱 Connections > Wi-Fi, and then tap ⬤ to turn on Wi-Fi.
2. Tap + Add network at the bottom of the list.
3. Enter information about the Wi-Fi network:
   • **Network name**: Type the exact name of the network.
   • **Security**: Select a security option from the list, and enter the password if required.
   • **Auto reconnect**: Choose this option if you want to automatically reconnect to this network whenever you are in range.
   • **Advanced**: Add any advanced options, such as IP and Proxy settings.

4. Tap **Save**.

**Advanced Wi-Fi settings**

You can configure connections to various types of Wi-Fi networks and hotspots, manage saved networks and look up your device's network addresses.

1. From Settings, tap **Connections > Wi-Fi**, and then tap **on** to turn on Wi-Fi.
2. Tap **Advanced**.
   • **Switch to mobile data**: When enabled, your device will switch to mobile data whenever the Wi-Fi connection is unstable. When the Wi-Fi signal is strong, it switches back to Wi-Fi.
   • **Turn on Wi-Fi automatically**: Turn on Wi-Fi in frequently-used locations.
   • **Auto connect to AT&T Wi-Fi**: Automatically connect to an AT&T Wi-Fi hotspot when detected.
   • **Network notification**: Receive notifications when open networks in range are detected.
   • **Manage networks**: View saved Wi-Fi networks and configure whether to auto reconnect to or forget individual networks.

3. Tap **View more** to see additional network settings.
   • **Wi-Fi control history**: View apps that have recently turned your Wi-Fi on or off.
   • **Hotspot 2.0**: Connect automatically to Wi-Fi networks that support Hotspot 2.0.
   • **Install network certificates**: Install authentication certificates.
Settings

- **MAC address**: View your device’s MAC address, which is required when connecting to some secured networks (not configurable).
- **IP address**: View your device’s IP address (not configurable).

**Wi-Fi Direct**

Wi-Fi Direct uses Wi-Fi to share data between devices.

1. From Settings, tap 🌐 Connections > Wi-Fi, and then tap 🌐 to turn on Wi-Fi.
2. Tap Wi-Fi Direct.
3. Tap a device, and then follow the prompts to connect.

🌟 TIP When sharing a file, tap 🌐 Wi-Fi Direct to use this feature.

**Disconnect from Wi-Fi Direct**

Disconnect your device from a Wi-Fi Direct device.

○ From Settings, tap 🌐 Connections > Wi-Fi > Wi-Fi Direct. Tap a device to disconnect it.

**Bluetooth**

You can pair your device to other Bluetooth®-enabled devices, like Bluetooth headphones or a Bluetooth-enabled vehicle infotainment system. Once a pairing is created, the devices remember each other and can exchange information without having to enter the passkey again.

1. From Settings, tap 🌐 Connections > Bluetooth, and then tap 🌐 to turn on Bluetooth.
2. Tap a device and follow the prompts to connect.

🌟 TIP When sharing a file, tap 📁 Bluetooth to use this feature.
**Rename a paired device**

You can rename a paired device to make it easier to recognize.

1. From Settings, tap **Connections > Bluetooth**, and then tap 🔄 to turn on Bluetooth.
2. Tap 📡 **Settings** next to the device name, and then tap **Rename**.
3. Enter a new name, and tap **Rename**.

**Unpair from a Bluetooth device**

When you unpair from a Bluetooth device, the two devices no longer recognize each other.

1. From Settings, tap **Connections > Bluetooth**, and then tap 🔄 to turn on Bluetooth.
2. Tap 📡 **Settings** next to the device, and then tap **Unpair**.

💡 TIP You will need to pair with the device again in order to connect to it.

**Advanced options**

Additional Bluetooth features are available in the Advanced menu.

1. From Settings, tap **Connections > Bluetooth**.
2. Tap **Advanced** for the following options:
   - **Media volume sync**: Sync the volume level set on the connected Bluetooth devices to your device.
   - **Ringtone sync**: Use the ringtone set on your phone when you receive calls through a connected Bluetooth device.
   - **Bluetooth control history**: View apps that have used Bluetooth recently.

**Airplane mode**

Airplane mode disconnects your device from all networks and turns off connectivity features.

1. From Settings, tap **Connections > Airplane mode**.
2. Tap 🔄 to enable this feature.
Mobile networks

Use Mobile networks to configure your device's ability to connect to mobile networks and use mobile data.

○ From Settings, tap 📱 Connections > Mobile networks.
  ● **Mobile data**: Enable mobile data usage.
  ● **International data roaming**: Change voice, text and data roaming settings for international roaming.
  ● **Allow 2G service**: Permit the use of 2G service in areas with limited cellular coverage.
  ● **Access Point Names**: Choose or add APNs, which have the network settings your device needs to connect to your provider.
  ● **Network operators**: Choose available and preferred networks.
  ● **AT&T mobile network diagnostics**: Collect diagnostic and usage data for troubleshooting.

💡 TIP Use these features to help manage connection settings that may affect your monthly bill.

Data usage

Check your current mobile and Wi-Fi data usage. You can also customize warnings and limits.

○ From Settings, tap 📱 Connections > Data usage.

Turn on Data saver

Use Data saver to reduce your data consumption by preventing selected apps from sending or receiving data in the background.

1. From Settings, tap 📱 Connections > Data usage > Data saver.
2. Tap 💡 to turn on Data saver.
   • To allow some apps to have unrestricted data usage, tap Allow app while Data saver on, and tap ☐ next to each app to specify restrictions.
Monitor mobile data

You can customize your mobile data access by setting limits and restrictions.

- From Settings, tap 📱 Connections > Data usage. The following options are available:
  - Mobile data: Use mobile data from your plan.
  - International data roaming: Enable mobile data services while roaming internationally.
  - Mobile data usage: View data usage over mobile connections over a period of time. You can view total usage as well as usage by app.
  - Billing cycle and data warning: Change the monthly date to align with your carrier’s billing date.

💡 TIP Use these features to keep an eye on your estimated data usage.

Monitor Wi-Fi data

You can restrict Wi-Fi data access by customizing usage limits and networks.

1. From Settings, tap 📱 Connections > Data usage.
2. Tap Wi-Fi data usage to view data usage over Wi-Fi connections over a period of time. You can view total usage as well as usage by app.

Mobile hotspot

Mobile hotspot uses your data plan to create a Wi-Fi network that can be used by multiple devices.

1. From Settings, tap 📱 Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap 🔌 to turn on Mobile hotspot.
3. On the devices you want to connect, activate Wi-Fi and select your device’s Mobile hotspot. Enter the Mobile hotspot password to connect.

💡 TIP Check with your carrier about service fees.
Change the mobile hotspot password

You can customize your Mobile hotspot password to make it easier to remember.

1. From Settings, tap Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap the password, enter a new password, and then tap Save.

Allowed devices list

Create a custom list of devices that are allowed to connect to your Mobile hotspot.

1. From Settings, tap Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap More options > Allowed devices, and then tap Add to enter the other device’s Device name and MAC address.
3. Tap Add to add the device.
   - To restrict connections to your Allowed devices list, tap Allowed devices only.

💡 TIP You need the device name and MAC address of devices that you want to add to the Allowed devices list.

Configure mobile hotspot settings

You can customize your mobile hotspot's security and connection settings.

1. From Settings, tap Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap More options > Configure mobile hotspot for the following settings:
   - Network name: View and change the name of your Mobile hotspot.
   - Hide my device: Prevent your Mobile hotspot from being discoverable by other devices.
   - Security: Choose the security level for your Mobile hotspot.
   - Password: If you choose a security level that uses a password, you can view or change it.
   - Show advanced options: Configure additional Mobile hotspot settings.
Timeout settings
You can set the Mobile hotspot to automatically turn off when there are no connected devices.

1. From Settings, tap Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap More options > Timeout settings, and then select an interval.

💡 TIP  This feature can help you manage your data usage.

Wi-Fi sharing
Turn on Wi-Fi sharing to quickly share your Wi-Fi network with other devices.

1. From Settings, tap Connections > Mobile hotspot and tethering > Mobile hotspot.
2. Tap Wi-Fi sharing to turn on this feature.

💡 TIP  Use this feature to share your Wi-Fi network without giving out your Wi-Fi password.

Tethering
You can use tethering to share your device’s Internet connection with another device.

1. From Settings, tap Connections > Mobile hotspot and tethering.
2. Connect the computer to the device using a USB cable, and then tap USB tethering.

Nearby device scanning
Easily set up connections to other available devices by turning on Nearby device scanning. This feature sends you a notification when there are available devices to connect to.

1. From Settings, tap Connections > More connection settings > Nearby device scanning.
2. Tap to turn on the feature.
Connect to a printer

Connect your device to a printer on the same Wi-Fi network to easily print documents and images from your device.

1. From Settings, tap Connections > More connection settings > Printing.
2. Tap Download plugin and follow the prompts to add a print service.
3. Tap the print service, and then tap More options > Add printer.

💡 TIP Make sure the app you want to print from supports printing.

Virtual Private Networks

A Virtual Private Network (VPN) allows you to connect to a private secured network from your device. You will need the connection information from your VPN administrator.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap More options > Add VPN profile.
3. Enter the VPN network information provided by your network administrator, and tap Save.

💡 TIP A secured screen lock is required to set up a VPN.

Manage a VPN

Use the VPN settings menu to edit or delete a VPN connection.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap Settings next to a VPN.
3. Edit the VPN and tap Save, or tap Delete to remove the VPN.

Connect to a VPN

Once you have set up a VPN, connecting to and disconnecting from a VPN is easy.

1. From Settings, tap Connections > More connection settings > VPN.
2. Tap a VPN, enter your log in information, and tap Connect.
   - To disconnect, tap the VPN, and then tap Disconnect.
**Private DNS**

You can configure your device to connect to a private DNS host.

1. From Settings, tap Connections > More connection settings > Private DNS.
2. Tap one of the available options to configure a private DNS connection.
3. Tap Save.

**Ethernet**

If wireless network connection is not available, you can use an Ethernet cable to connect your device to a local network.

1. Connect an Ethernet cable to your device.
2. From Settings, tap Connections > More connection settings > Ethernet, and follow the prompts.

💡 TIP  You need an adapter (not included) to connect an Ethernet cable to your device.
Sounds and vibration

You can control the sounds and vibrations used to indicate notifications, screen touches, and other interactions.

Sound mode

You can change the sound mode on your device without using the volume keys.

- From Settings, tap Sounds and vibration > Sound mode, and then choose a mode:
  - **Sound**: Use the sounds, vibrations, and volume levels you have chosen in Sound settings for notifications and alerts.
  - **Vibrate**: Use vibration only for notifications and alerts.
  - **Mute**: Set your device to make no sounds.
    - **Temporary mute**: Set a time limit for muting the device.

💡 TIP Use the sound mode setting instead of the volume keys to change the sound mode without losing your customized sound levels.

Easy mute

Quickly mute sounds by covering the screen or turning the device over.

- From Settings, tap Advanced features > Motions and gestures > Easy mute, and tap ☀️ to enable.

Vibrations

You can control how and when your device vibrates

1. From Settings, tap Sounds and vibration.
2. Tap options to customize:
   - **Vibrate while ringing**: Set your device to vibrate in addition to ringing when you receive a call.
   - **Vibration pattern**: Choose from preset vibration patterns.
Volume

Set the volume level for call ringtones, notifications, and other audio.

- From Settings, tap Sounds and vibration > Volume, and drag the sliders.

💡 TIP You can also use the Volume key to adjust the volume. Slide the volume controls to customize all volume options.

Use Volume keys for media

Set the default of the Volume key to control the media volume.

1. From Settings, tap Sounds and vibration.
2. Tap Use Volume keys for media to enable this feature.

Media volume limiter

Limit the maximum output of the device’s volume while using headphones or Bluetooth speakers (not included).

1. From Settings, tap Sounds and vibration > Volume.
2. Tap More options > Media volume limiter.
3. Tap to enable this feature.
   - To set the maximum output volume, drag the Custom volume limit slider.
   - To require a PIN to make changes to the volume setting, tap Set volume limit PIN.
**Ringtone**

Customize your call ringtone by choosing from preset sounds or adding your own.

1. From Settings, tap **Sounds and vibration** > **Ringtone**.
2. Tap a ringtone to hear a preview and select it, or tap **>Add** to use an audio file as a ringtone.

**Notification sounds**

Choose a preset sound for all notification alerts.

1. From Settings, tap **Sounds and vibration** > **Notification sounds**.
2. Tap a sound to hear a preview and select it.

💡 **TIP** You can also customize notifications sounds to be unique for each app using the App settings menu.

**System sounds**

Customize your device’s sounds and vibrations for actions like tapping the screen and charging the device.

- From Settings, tap **Sounds and vibration** > **System sounds** for the following options:
  - **Touch sound**: Play tones when you touch or tap the screen to make selections.
  - **Screen lock sound**: Play a sound when you unlock the screen.
  - **Charging sound**: Play a sound when a charger is connected.
  - **Dialing keypad tone**: Play a tone when dialing numbers on the Phone keypad.
  - **Keyboard sound**: Play a sound when typing with the Samsung keyboard.
Dolby Atmos

Enjoy Dolby Atmos quality when playing content that was specifically mixed for Atmos. This feature may only be available with a headset connected.

1. From Settings, tap Sounds and vibration > Advanced sound settings > Sound quality and effects.
2. Tap Dolby Atmos to experience breakthrough audio that flows above and around you.

Equalizer

Choose an audio preset that is customized to different genres of music, or manually change your audio settings.

1. From Settings, tap Sounds and vibration > Advanced sound settings > Sound quality and effects.
2. Tap Equalizer to choose a music genre.

Adapt sound

Customize the sound for each ear and enhance your listening experience.

1. From Settings, tap Sounds and vibration > Advanced sound settings > Sound quality and effects > Adapt sound.
2. Tap the sound profile that fits you best, and tap Settings to customize.

💡 TIP Tap Add personalized sound profile to take a hearing test and let your device identify the best sound for you.
Notifications

You can prioritize and streamline app alerts by changing which apps send notifications and how notifications alert you.

Manage notifications

You can configure notifications from apps and services.

- From Settings, tap 🗝 Notifications.
  - **App icon badges:** Identify which apps have active notifications with badges that appear on their icons. Tap to choose whether or not badges indicate the number of unread notifications.
  - **Do not disturb:** Block sounds and notifications while this mode is turned on. Specify exceptions for people, apps, and alarms.
  - **Status bar:** Modify how many notifications appear on the Status bar.
    - To block notifications from an app, tap ⏰ next to the app. Tap See all to open the complete list of apps.

Customize app notifications

You can change notification settings for each app.

1. From Settings, tap 🗝 Notifications > See all.
2. Tap an app for the following options:
   - **Show notifications:** Receive notifications from this app.
   - **App icon badges:** Show a badge on the icon when there are notifications.
   - **Categories:** Configure notification options that are specific to this app.

Smart alert

You can set the device to notify you about missed calls and messages by vibrating when you pick it up.

- From Settings, tap 🌟 Advanced features > Motions and gestures > Smart alert, and tap ⏰ to enable.
Display

You can configure the screen brightness, timeout delay, font size, and many other display settings.

Screen brightness

Adjust the screen brightness according to lighting conditions or personal preference.

1. From Settings, tap ☀ Display.
2. Customize options under Brightness:
   - Drag the Brightness slider to set a custom brightness level.
   - Tap Outdoor mode to increase the screen brightness for 15 minutes for greater visibility when outdoors.

Night mode

Night mode allows you to switch to a darker theme to keep your eyes more comfortable at night.

- From Settings, tap ☀ Display > Night mode for the following options:
  - Turn on now: Put your device in Night mode.
  - Turn on as scheduled: Configure Night mode for either Sunset to sunrise or Custom schedule.

Font size and style

You can change the font size and style to customize your device.

- From Settings, tap ☀ Display > Font size and style for the following options:
  - Drag the Font size slider to adjust the size of text.
  - Tap Font style to choose a different font.
    - Tap a font to select it, or tap + Download fonts to add fonts from Galaxy Store.
  - Tap Bold font to make all fonts appear with bold weight.
**Screen zoom**
Adjust the zoom level to increase or decrease the size of content on the screen.

1. From Settings, tap Display > Screen zoom.
2. Drag the Screen zoom slider to adjust the zoom level.

**Full screen apps**
You can choose which apps you want to use in the full screen aspect ratio.

- From Settings, tap Display > Full screen apps and tap apps to enable this feature.

**Screen timeout**
You can set the screen to turn off after a set amount of time.

- From Settings, tap Display > Screen timeout, and tap a time limit to set it.

**Touch sensitivity**
Increase the touch sensitivity of the screen for use with screen protectors.

- From Settings, tap Display > Touch sensitivity to enable.

**Screen saver**
You can display colors or photos when the screen turns off or while charging.

1. From Settings, tap Display > Screen saver.
2. Tap to enable the feature and configure the following options:
   - **Colors**: Tap the selector to display a changing screen of colors.
   - **Photo table**: Display pictures in a photo table.
   - **Photo frame**: Display pictures in a photo frame.
   - **Photos**: Display pictures from your Google Photos account.
3. Tap Preview for a demonstration of the selected Screen saver.

💡 TIP Tap Settings next to a feature for additional options.
Reduce animations

Decrease certain motion effects, such as when opening apps.

- From Settings, tap Advanced features > Reduce animations, and tap to enable the feature.

Smart stay

Smart stay uses the front camera to detect your face so that the screen stays on while you are looking at it.

- From Settings, tap Advanced features > Motions and gestures > Smart stay, and tap to enable the feature.

One-handed mode

You can change the screen layout to accommodate operating your device with one hand.

1. From Settings, tap Advanced features > Motions and gestures > One-handed mode.
2. Tap to enable the following:
   - Gesture: Swipe up diagonally from either bottom corner to reduce the display size.
   - Button: Tap Home three times in quick succession to reduce the display size.
Device maintenance

View the status of your device’s battery, storage, and memory. You can also automatically optimize your device’s system resources.

Quick optimization

The quick optimization feature improves device performance through the following actions:

- Identifying apps that use excessive battery power and clearing unneeded items from memory.
- Deleting unnecessary files and closing apps running in the background.
- Scanning for malware.

To use the quick optimization feature:

○ From Settings, tap Device care > Optimize now.

Battery

View how battery power is used for your various device activities.

○ From Settings, tap Device care > Battery for options:
  - Battery usage: View power usage by app and service.
  - Power mode: Select a power mode to extend battery life.
  - Usage by apps: View power usage by app today or over the past week.
  - More options > Settings: Configure advanced battery settings and notifications.
**Storage**

View the device storage and usage. You can also mount, unmount, or format an optional memory card (not included).

**Device storage**

Quickly optimize your device’s storage, increasing available memory.

- From Settings, tap `Device care > Storage > Clean now.`

**Memory card**

Once an optional microSD memory card (not included) has been installed in your device, the card memory is displayed in the Storage setting.

For more information, see *Assemble your device* on page 4.

**Mount a memory card**

When you install an optional memory card, it is automatically mounted (connected to the device) and prepared for use. However, should you unmount the card without removing it from the device, you need to mount it before it can be accessed.

1. From Settings, tap `Device care > Storage.`
2. Tap `More options > Storage settings.`
3. Under *Portable storage*, tap your SD card, and then tap *Mount*.

**Remove a memory card**

To prevent damage to information stored on the memory card, unmount the card before removing it from the device.

1. From Settings, tap `Device care > Storage.`
2. Tap `More options > Storage settings.`
3. Under *Portable storage*, tap your SD card, and then tap *Unmount*.
4. Remove your memory card from the device.
Format a memory card

When formatting an SD card, you should back up your music and photo files that are stored on the card because formatting the SD card deletes ALL stored files.

1. From Settings, tap 📦 Device care > Storage.
2. Tap ☰ More options > Storage settings.
3. Under Portable storage, tap your SD card, tap Format, and then follow the prompts.

Memory

Check the amount of available memory. You can close background apps and reduce the amount of memory you are using to speed up your device.

1. From Settings, tap 📦 Device care > Memory.
   • The used and available memory are shown.
2. To free up as much memory as possible, tap Clean now and follow the prompts.
   • The selected apps and services in the list will be closed.

Language and input

Configure your device’s language and input settings.

Change the device language

You can add languages to your list and organize them according to preference. If an app does not support your default language, then it will move to the next supported language in your list.

1. From Settings, tap ☰ General management > Language and input > Language.
2. Tap ☰ Add language, and select a language from the list.
3. Tap Set as default to change the device language.
   • To switch to another language on the list, drag ☰ Move next to the desired language to the top of the list, and then tap Apply.
**Default keyboard**

You can select a default keyboard for your device’s menus and keyboards. Additional keyboards can be downloaded from the Google Play store.

1. From Settings, tap General management > Language and input.
2. Tap Default keyboard, and select a keyboard.

**Google Voice typing**

Speak rather than type your text entries using Google Voice™ typing.

1. From Settings, tap General management > Language and input.
2. Tap On-screen keyboard > Google Voice typing to customize settings.

**Manage on-screen keyboards**

Enable or disable on-screen keyboards.

1. From Settings, tap General management > Language and input.
2. Tap On-screen keyboard > Manage keyboards.
3. Tap each keyboard to enable or disable.

**Physical keyboards**

Customize options when you have a physical keyboard connected to your device (sold separately).

1. From Settings, tap General management > Language and input.
2. Tap Physical keyboard, and then choose an option:
   - **Show on-screen keyboard**: Show the on-screen keyboard while a physical keyboard is also being used.
   - **Keyboard shortcuts**: Show explanations of the keyboard shortcuts on the screen.
Show keyboard button
Show a button on the Navigation bar to quickly switch between keyboards.

1. From Settings, tap General management > Language and input.
2. Tap Show keyboard button to enable this feature.

Autofill service
Save time entering information using autofill services.

1. From Settings, tap General Management > Language and input.
2. Tap Autofill service and select your preferred service.

Text-to-speech
Configure your Text-to-Speech (TTS) options. TTS is used for various accessibility features, such as Voice Assistant.

- From Settings, tap General management > Language and input > Text-to-speech for options:
  - Preferred engine: Choose either the Samsung or Google Text-to-speech engine. Tap Settings for options.
  - Language: Set the default speech language.
  - Speech rate: Set the speed at which the text is spoken.
  - Pitch: Set the pitch of the speech.
  - Play: Tap to play a short demonstration of speech synthesis.
  - Reset: Reset the speech rate and pitch.

Pointer speed
Configure pointer speed for an optional mouse or trackpad (not included).

1. From Settings, tap General management > Language and input.
2. Under Pointer speed, drag the slider to the right to go faster or to the left to go slower.
Primary mouse button

You can define which mouse button that you favor as primary.

1. From Settings, tap General management > Language and input.
2. Tap Primary mouse button, and choose either Left or Right.

Date and time

By default, your device receives date and time information from the wireless network. Outside of network coverage, you can set the date and time manually.

○ From Settings, tap General management > Date and time. The following options are available:
  • Automatic date and time: Receive date and time updates from your wireless network. When Automatic date and time is disabled, the following options are available:
    – Select time zone: Choose a new time zone.
    – Set date: Enter the current date.
    – Set time: Enter the current time.
  • Use 24-hour format: Set the format for displaying time.

Troubleshooting

You can also check for software updates, and if necessary, reset services on your device.

Software update

Check for and install available software updates for your device.

○ From Settings, tap Software update for the following options:
  • Check for updates: Manually check for software updates.
  • Continue update: Resume an update that was interrupted.
Reset
Reset device and network settings. You can also reset your device to its factory defaults.

Reset settings
You can reset your device to its factory default settings, which resets everything except the security, language, and account settings. Personal data is not affected.

1. From Settings, tap General management > Reset > Reset settings.
2. Tap Reset settings, and confirm when prompted.

Reset network settings
You can reset Wi-Fi, mobile data, and Bluetooth settings with Reset network settings.

1. From Settings, tap General management > Reset > Reset network settings.
2. Tap Reset settings, and confirm when prompted.

Reset accessibility settings
You can reset device accessibility settings. Accessibility settings in downloaded apps and your personal data are not affected.

1. From Settings, tap General management > Reset > Reset accessibility settings.
2. Tap Reset settings, and confirm when prompted.

Auto restart
Optimize your device by restarting it automatically at set times. Any unsaved data will be lost when the device restarts.

1. From Settings, tap General management > Reset > Auto restart.
2. Tap to activate Auto restart, and then set the following parameters:
   - Day: Select the day of the week to automatically restart your device.
   - Time: Set the time of day to restart your device.
**Factory data reset**

You can reset your device to factory defaults, erasing all data from your device.

This action permanently erases ALL data from the device, including Google or other account settings, system and application data and settings, downloaded applications, as well as your music, photos, videos, and other files. Any data stored on an external SD card is not affected.

💡 **NOTE** When you sign in to a Google Account on your device, Factory Reset Protection is activated. This protects your device in the event it is lost or stolen.

If you reset your device to factory default settings with the Factory Reset Protection (FRP) feature activated, you must enter the user name and password for a registered Google Account to regain access to the device. You will not be able to access the device without the correct credentials.

💡 **NOTE** If you reset your Google Account password, it can take 24 hours for the password reset to sync with all devices registered to the account.

Before resetting your device:

1. Verify that the information you want to keep has transferred to your storage area.
2. Log in to your Google Account and confirm your user name and password.

To reset your device:

1. From Settings, tap **General management > Reset > Factory data reset**.
2. Tap **Reset** and follow the prompts to perform the reset.
3. When the device restarts, follow the prompts to set up your device.

**Factory reset protection**

When you sign in to a Google Account on your device, Factory Reset Protection is activated. Factory Reset Protection (FRP) prevents other people from using your device if it is reset to factory settings without your permission. For example, if your device is lost or stolen and a factory data reset is performed, only someone with your Google Account username and password can use the device.
You will not be able to access the device after a factory data reset if you do not have your Google Account username and password.

⚠️ **CAUTION** Before sending your device to Samsung or taking it to a Samsung-authorized service center, remove your Google Account and then perform a factory data reset. For more information, visit [samsung.com/us/support/frp](http://samsung.com/us/support/frp).

**Enable factory reset protection**

Adding a Google Account to your device automatically activates the FRP security feature.

**Disable factory reset protection**

To disable FRP, remove all Google Accounts from the device.

1. From Settings, tap 🔄 Accounts and backup > Accounts > [Google Account].
2. Tap Remove account.

**Lock screen and security**

You can secure your device and protect your data by setting a screen lock.

**Screen lock types**

You can choose from the following screen lock types that offer high, medium, or no security: Swipe, Pattern, PIN, Password, and None.

💡 **NOTE** Biometric locks are also available to protect access to your device and sensitive data on your device. For more information, see Flexible security on page 25.

**Set a secure screen lock**

It is recommended that you secure your device using a secure screen lock (Pattern, PIN, or Password).

1. From Settings, tap Lock screen > Screen lock type and tap a secure screen lock (Pattern, PIN, or Password).
2. Tap ☐ to enable showing notifications on the lock screen. The following options are available:
   - **View style**: Display notification details or hide them and show only an icon.
   - **Hide content**: Do not show notifications in the notification panel.

3. Tap **Done** when finished.

4. Configure the following screen lock options:
   - **Smart Lock**: Unlock your device automatically when trusted locations or other devices have been detected. A secure screen lock is required for this feature.
   - **Secure lock settings**: Customize your secure lock settings. A secure screen lock is required for this feature.

**Clock and information**

You can configure features that appear on the Lock screen, like the clock and other useful information.

- From Settings, tap [Lock screen] for the following options:
  - **Clock style**: Set the type and color of the clock on the Lock screen.
  - **Roaming clock**: Change to digital clocks showing both local and home time zones when roaming.
  - **FaceWidgets**: Enable widgets on the Lock screen to get quick access to useful information.
  - **Contact information**: Show your contact information, such as your phone number or email address.
  - **Notifications**: Select which notifications to display on the Lock screen.
  - **App shortcuts**: Select which apps to open from the Lock screen.
  - **About Lock screen**: Update the Lock screen’s software.
Google Play Protect

You can configure Google Play Protect to regularly check your apps and device for security risks and threats.

1. From Settings, tap Biometrics and security > Google Play Protect.
2. Tap options to customize security features.

Find My Mobile

You can protect your device from loss or theft by allowing your device to be locked, tracked online, and for your data to be deleted remotely. For more information, visit samsung.com/us/support/owners/app/find-my-mobile.

💡 TIP  A Samsung account is required, and Google location service must be turned on in order to use Find My Mobile.

Turn on Find My Mobile

Before you can use the Find My Mobile feature, you must turn it on and customize the options. To access your device remotely, visit findmymobile.samsung.com.

1. From Settings, tap Biometrics and security > Find My Mobile.
2. Tap Add Samsung account and follow the prompts. The following options are available:
   - Remote controls: Turn on to access your device remotely.
   - Google location service: Turn on to enable Google location service to find your device.
   - Remote unlock: Allow Samsung to store your PIN, pattern, or password, allowing you to unlock and control your device remotely.
   - Send last location: Allow your device to send its last location to the Find My Mobile server when the remaining battery charge falls below a certain level.
**Security update**

You can easily check the date of the last installed security software update and find out if newer updates are available.

- From Settings, tap Biometrics and security > Security update to see the latest security update installed and check if a newer update is available.

**Install unknown apps**

You can allow installation of unknown third-party apps from selected apps or sources.

1. From Settings, tap Biometrics and security > Install unknown apps.
2. Tap an app or source, and then tap Allow from this source.

💡 TIP Installing unknown third-party apps could make your device and personal data more vulnerable to security risks.

**Secure Folder**

You can create a secure folder on your device to protect private content and apps from anyone who may be using your device.

- From Settings, tap Biometrics and security > Secure Folder and follow the prompts to secure content on your device.

💡 TIP You must sign in to your Samsung account, and use secured lock on your device to set up and use Secure Folder.

**Encrypt SD card**

You can encrypt your optional memory card (not included) to protect its data. This only allows the SD card information to be accessed from your device with a password.

1. From Settings, tap Biometrics and security > Encrypt SD card.
2. Tap Encrypt SD card and follow the prompts to encrypt all data on your memory card.
NOTE Performing a Factory data reset on your device prevents it from accessing an encrypted SD card. Before initiating a Factory data reset, make sure to decrypt the installed SD card first.

**Decrypt SD card**

You can decrypt an optional memory card (not included) if it was encrypted by this device. You may want to decrypt the memory card if you plan to use it with another device or before performing a Factory data reset.

1. From Settings, tap Biometrics and security > Decrypt SD card.
2. Tap Decrypt SD card and follow the prompts to decrypt all data on your memory card.

**Factory data reset password**

You can require a password to reset your device to factory default settings.

- From Settings, tap Biometrics and security > Other security settings > Set up/change password and enter a password.

**Set up SIM card lock**

You can set up a PIN to lock your SIM card, which prevents unauthorized use of your SIM card if someone attempts to use it another device.

- From Settings, tap Biometrics and security > Other security settings > Set up SIM card lock and follow the prompts.
  - Tap Lock SIM card to turn on the feature.
  - Tap Change SIM card PIN to create a new PIN.

**View passwords**

You can have characters displayed briefly in password fields as you type them.

- From Settings, tap Biometrics and security > Other security settings > Make passwords visible to turn on the feature.
Security update service

You can set your device to automatically check for security updates.

- From Settings, tap 🔄 Biometrics and security > Other security settings, and then tap Security policy updates to check for security updates.

Device administration

You can authorize security features and apps (like Find My Mobile) to have administrative access to your device.

1. From Settings, tap 🔄 Biometrics and security > Other security settings > Device admin apps.
2. Tap an option to turn it on as a device administrator.

Credential storage

You can manage the trusted security certificates installed on your device, which verify the identity of servers for secure connections.

- From Settings, tap 🔄 Biometrics and security > Other security settings for the following options:
  - Storage type: Select a storage location for credential contents.
  - View security certificates: Display certificates in your device’s ROM and other certificates you have installed.
  - User certificates: View user certificates that identify your device.
  - Install from device storage: Install a new certificate from storage.
  - Clear credentials: Erase credential contents from the device and reset the password.

Strong Protection

Better protect your device by encrypting it using a secure lock type.

- From Settings, tap 🔄 Biometrics and security > Other security settings > Strong protection, and then tap ☐ to enable this feature.
Advanced security settings

You can use these options to configure advanced security settings to better protect your device.

- From Settings, tap Biometrics and security > Other security settings for the following options:
  - **Trust agents**: Allow trusted devices to perform selected actions when connected.
    - This option is only displayed when a lock screen is turned on. For more information, see Set a secure screen lock on page 111.
  - **Pin windows**: Pin an app on your device screen, which prevents access to other features of your device.

Location

Location services use a combination of GPS, mobile network and Wi-Fi to determine the location of your device.

1. From Settings, tap Biometrics and security > Location.
2. Tap to turn on Location services.
3. Tap Improve accuracy to use other connections for determining your location:
   - **Wi-Fi scanning**: Allow apps and services to scan for Wi-Fi networks automatically, even when Wi-Fi is turned off.
   - **Bluetooth scanning**: Allow apps to scan for and connect to nearby devices automatically through Bluetooth, even when Bluetooth is turned off.

💡 TIP Some apps require location services be turned on for full functionality.

Recent location requests

View a list of apps that have requested your location.

1. From Settings, tap Biometrics and security > Location.
2. Tap to turn on Location services.
3. Tap an entry under Recent location requests to view the app’s settings.
**Location services**

Location services store and use your device’s most recent location data. Certain apps can use this data to improve your search results based on places that you have visited.

1. From Settings, tap 🚭 Biometrics and security > Location.
2. Tap an entry under Location services to see how your location information is used.

**App permissions**

Apps might access features of your device that you permit them to (like the camera, microphone, or location) when they are running in the background, not just when you are using the app. You can set your device to notify you when this happens.

1. From Settings, tap 🚭 Biometrics and security > App permissions.
2. Tap a category, and tap 🔄 next to the apps you want to be notified about.
   - Tap an app to select which permissions you want to be notified about.

**Send diagnostic data**

Send diagnostic information about your device to Samsung when you are having technical problems.

1. From Settings, tap 🚭 Biometrics and security > Send diagnostic data.
2. Read and accept the consent information to enable this feature.
Accounts

You can connect to and manage your accounts, including your Google Account, Samsung account, email, and social networking accounts.

Add an account

You can add and sync all your email, social networking, and picture and video sharing accounts.

1. From Settings, tap Accounts and backup > Accounts > + Add account.
2. Tap one of the account types.
3. Follow the prompts to enter your credentials and set up the account.
   - Tap Auto sync data to enable automatic updates to your accounts.

Account settings

Each account has its own custom settings. You can configure common settings for all accounts of the same type. Account settings and available features vary between account types.

1. From Settings, tap Accounts and backup > Accounts > [Account type].
2. Tap an account to configure that account’s sync settings.
3. Tap other available options for the account type.

Remove an account

You can remove accounts from your device.

1. From Settings, tap Accounts and backup > Accounts > [Account type].
2. Tap the account and then tap Remove account.
Backup and restore
You can configure your device to back up data to your personal accounts.

Samsung account
You can enable backup of your information to your Samsung account.

- From Settings, tap Accounts and backup > Backup and restore for options:
  - Back up data: Configure your Samsung account to back up your data.
  - Restore data: Use your Samsung account to restore your backup data.

Google Account
You can enable backup of your information to your Google Account.

- From Settings, tap Accounts and backup > Backup and restore for options:
  - Back up my data: Enable back up of application data, Wi-Fi passwords, and other settings to Google servers.
  - Backup account: Select a Google Account to be used as your backup account.
  - Automatic restore: Enable automatic restoration of settings from Google servers.

External storage transfer
You can back up your data to an SD card or a USB storage device, or restore backup data using Smart Switch. For more information, see Transfer data from an old device on page 6.

- From Settings, tap Accounts and backup > Backup and restore > External storage transfer.
**Samsung Cloud**

You can keep your data safe by backing up and restoring your device. You can also sync your data from multiple devices. For more information, visit [samsung.com/us/support/owners/app/samsung-cloud](https://www.samsung.com/us/support/owners/app/samsung-cloud).

1. From Settings, tap 🔄 Accounts and backup > Samsung Cloud.
   - If a Samsung account has not been added, the screens explain how to create or sign in to your account.
2. Once a Samsung account is configured, you can view and manage items stored in the Samsung Cloud.

**Google settings**

You can configure your device’s Google settings. Available options depend on your Google Account.

○ From Settings, tap Google, and select an option to customize.

**Accessibility**

There are accessibility settings for people who need help seeing, hearing, or otherwise operating their device. Accessibility services are special features that make using the device easier for everyone. For more information about Accessibility for Samsung products, please contact us at accessibility@sea.samsung.com.

**Screen Reader**

Use special controls and settings that let you navigate without needing to see the screen.

○ From Settings, tap Accessibility > Screen reader and tap an option:
  - **Voice assistant**: Receive spoken feedback when using your device, such as what you touch, select, or activate.
  - **Tutorial**: Learn how to use Voice assistant.
  - **Settings**: Configure Voice assistant to better assist you.
Visibility enhancements

You can configure Accessibility features to assist with visual aspects of your device.

Colors and clarity

You can adjust the colors and contrast of text and other screen elements for easier viewing.

○ From Settings, tap 📘 Accessibility > Visibility enhancements and tap an option:
  • **High contrast theme**: Adjust colors and screen fonts to increase the contrast for easier viewing.
  • **High contrast fonts**: Adjust the color and outline of fonts to increase the contrast with the background.
  • **High contrast keyboard**: Adjust the size of the Samsung keyboard and change its colors to increase the contrast between the keys and the background.
  • **Show button shapes**: Show buttons with shaded backgrounds to make them stand out better against the wallpaper.
  • **Remove animations**: Remove certain screen effects if you are sensitive to motion.
  • **Color inversion**: Reverse the display of colors from white text on a black background to black text on a white background.
  • **Color correction**: Adjust the color of the screen if you find it difficult to see some colors.
**Size and zoom**

You can increase the size of supported screen elements and create shortcuts for accessibility features on your device.

- From Settings, tap 🏷️ **Accessibility** > **Visibility enhancements** and tap an option:
  - **Magnifier window**: Magnify content shown on the screen.
  - **Magnification**: Use exaggerated gestures such as triple-tapping, double pinching, and dragging two fingers across the screen.
  - **Large mouse/touchpad pointer**: Use a large pointer for a connected mouse or touchpad (accessories not included).
  - **Font size and style**: Configure screen fonts.
  - **Screen zoom**: Configure the screen zoom level.

**Hearing enhancements**

You can configure Accessibility features to assist with audial aspects of the device.

**Sounds**

You can adjust audio quality when using hearing aids or earphones.

- From Settings, tap 🏷️ **Accessibility** > **Hearing enhancements** and tap an option:
  - **Real time text**: Activate real-time text (RTT) calling.
  - **Mute all sounds**: Turn off all notifications and audio for privacy.
  - **Hearing aid support**: Improve the sound quality to work better with hearing aids.
  - **Left/right sound balance**: Use the slider to adjust the left and right balance when listening to audio in stereo.
  - **Mono audio**: Switch audio from stereo to mono when using one earphone.
Text display
You can convert speech to text and watch closed captions when viewing multimedia.

○ From Settings, tap Accessibility > Hearing enhancements and tap an option:
  • Samsung subtitles (CC): Use Samsung subtitles with multimedia files when available.
  • Google subtitles (CC): Use Google subtitles with multimedia files when available.

Interaction and dexterity
You can configure Accessibility features to assist with limited dexterity when interacting with your device.

Alternate input
You can control your device using different kinds of inputs and controls.

○ From Settings, tap Accessibility > Interaction and dexterity and tap an option:
  • Universal switch: Control your device with your customized switches.
  • Assistant menu: Improve device accessibility for users with reduced dexterity.
  • Click after pointer stops: Automatically click on an item after the pointer stops over it.
Interactions
You can simplify the motions needed to answer phone calls or respond to notifications and alarms.

○ From Settings, tap Accessibility > Interaction and dexterity and tap an option:
  • Answering and ending calls:
    – Read caller names aloud: Hear callers’ names read aloud when using Bluetooth or headsets (not included).
    – Press Volume up to answer: Use the Volume keys to answer calls.
    – Answer automatically: Answer calls after a set duration when using Bluetooth or headsets (not included).
    – Press Power key to end: End calls by pressing the Power key.
  • Interaction control: Customize areas of screen interactions, hardkeys, and the keyboard.

Touch settings
You can adjust your screen to be less sensitive to taps and touches.

○ From Settings, tap Accessibility > Interaction and dexterity and tap an option:
  • Touch and hold delay: Select a time interval for this action.
  • Tap duration: Set how long an interaction must be held to be recognized as a tap.
  • Ignore repeated touches: Set a time duration in which to ignore repeated touches.
**Advanced settings**

You can customize additional accessibility features and services for your device.

💡 TIP Additional accessibility apps may be downloaded from the Google Play store.

**Direct access**

- From Settings, tap 🛒 Accessibility > Advanced settings and tap an option:
  - **Power and Volume up keys**: Configure selected Accessibility settings to open by quickly pressing the Power and Volume up keys at the same time.
  - **Volume up and down keys**: Configure selected services to turn on when you press and hold the Volume up and Volume down keys for three seconds.

**Notifications**

- From Settings, tap 🛒 Accessibility > Advanced settings and tap an option:
  - **Flash notification**: Flash either the camera light or the screen when you receive notifications or when alarms sound.
  - **Notification reminders**: Set periodic reminders for any unread notifications.

**Installed services**

You can install additional assistance services for your device.

- From Settings, tap 🛒 Accessibility > Installed services.

💡 NOTE Additional accessibility services are listed and configured here after they are installed.

**Other settings**

Configure features on your device that make it easier to use.

**Help**

View the user manual on your device.

- From Settings, tap 📖 Help.
**Dual Messenger**

Use two separate accounts for the same app.

1. From Settings, tap 🌟 Advanced features › Dual Messenger.
2. Tap next to supported apps to enable the feature for each app.
   - To select which contacts have access to the secondary messenger app, tap Use separate contacts list.

**About phone**

View information about your device, including current status, legal information, hardware and software versions, and more.

1. From Settings, tap 📖 About phone, and then view your phone number, model number, serial number, and IMEI information.
2. Tap additional items to view more information about your device.

💡 TIP You can view your device’s FCC ID from About phone › Status.

Find legal information on the mobile device

The full Arbitration Agreement, Standard Limited Warranty, End User License Agreement (EULA) and Health & Safety Information are also available on the device, in the Samsung legal section of Settings. The location depends on the device, and is usually in the “About device” or “About phone” section, for example:

- Settings > About phone or About device or About tablet > Legal information > Samsung legal
- Or, use the Search feature to search for “Legal”.

Intellectual property

All Intellectual Property, as defined below, owned by or which is otherwise the property of Samsung or its respective suppliers relating to the SAMSUNG mobile device, including but not limited to, accessories, parts, or software relating thereto (the “mobile device”), is proprietary to Samsung and protected under federal laws, state laws, and international treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship.

You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) modify, prepare derivative works of, reverse engineer, decompile, disassemble, or otherwise attempt to create source code from the software. No title to or ownership in the Intellectual Property is transferred to you. All applicable rights of the Intellectual Property shall remain with SAMSUNG and its suppliers.

Open source software

Some software components of this product, including but not limited to ‘PowerTOP’ and ‘e2fsprogs’, incorporate source code covered under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), OpenSSL License, BSD License and other open source licenses. To obtain the source code covered under the open source licenses, please visit: opensource.samsung.com
Disclaimer of warranties; exclusion of liability

The information below explains that a user accepts this Product as sold, including the hardware and software components as created and packaged for sale. If the user changes these parameters through a unique modification, Samsung will not be held responsible for damages or issues that result from these end-user changes.

Except as set forth in the Standard Limited Warranty that accompanies the Product, the purchaser takes the product “as is”, and Samsung makes no express or implied warranty of any kind whatsoever with respect to the Product, including but not limited to the:

- merchantability of the Product or its fitness for any particular purpose or use;
- design, condition or quality of the Product;
- performance of the Product;
- workmanship of the Product or the components contained therein; or
- compliance of the Product with the requirements of any law, rule, specification or contract pertaining thereto.

Nothing contained in the User Manual or any other document shall be construed to create an express or implied warranty of any kind whatsoever with respect to the Product. Neither Samsung nor the wireless carrier are responsible for, and the Standard Limited Warranty does not apply to, any damage or injury arising from disassembly or repairs by persons not authorized or approved by Samsung to service this Product. In addition, Samsung shall not be liable for any damages of any kind resulting from the purchase or use of the Product or arising from the breach of the express warranty, including incidental, special or consequential damages, or loss of anticipated profits or benefits.

Modification of software

Samsung is not liable for performance issues or incompatibilities caused by your editing of registry settings, or your modification of Operating System (OS) software.
Using custom OS software may cause your device and applications to work improperly. Your carrier may not permit users to download certain software, such as custom OS.

Diagnostic Software

This device is equipped with diagnostic software reporting usage and performance information used solely to deliver improved network quality and overall device experience to AT&T customers. Please refer to your AT&T Wireless Customer Agreement and/or the AT&T Privacy Policy (att.com/privacy) for more information.

Notice from AT&T

This device is intended for use exclusively on AT&T’s system. You agree that you won’t make any modifications to the Equipment or programming to enable the Equipment to operate on any other system. A voice plan is required on all voice-capable devices, unless specifically noted otherwise in the terms governing your agreement. Some devices or plans may require you to subscribe to a data plan.

Your device is designed to make it easy for you to access a wide variety of content. For your protection, AT&T wants you to be aware that some applications that you enable may involve the location of your device being shared. For applications available through AT&T, AT&T offers privacy controls that let you decide how an application may use the location of your device and other devices on your account. However, AT&T’s privacy tools do not apply to applications available outside of AT&T. Please review the terms and conditions and the associated privacy policy for each location-based service to learn how location information will be used and protected.

Your device may be used to access the Internet and to download, and/or purchase goods, applications, and services from AT&T or elsewhere from third parties. AT&T provides tools for you to control access to the Internet and certain Internet content. These controls may not be available for certain devices which bypass AT&T controls.

AT&T may collect certain types of information from your device when you use AT&T services to provide customer support and to improve its services.

For more information on AT&T’s Privacy Policy, visit: att.com/privacy.
Samsung Knox

Samsung Knox is Samsung’s security platform and is a mark for a Samsung device tested for security with enterprise use in mind. Additional licensing fee may be required. For more information about Knox, please refer to: samsung.com/us/knox.

Restricting children’s access to your mobile device

Your device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the device, or make calls that increase your device bill. Keep the device and all its parts and accessories out of the reach of small children.

Samsung Electronics America, Inc.

HEVC Advance™ Covered by Patents at patentlist.hevcadvance.com
Some multimedia (audio/video) files contain Digital Rights Management (DRM) technology to verify you have the right to use the files. Preloaded apps on your device may not be compatible with DRM-protected files.

Screen images are simulated. Appearance of device may vary.

The actual available capacity of the internal memory is less than the specified capacity because the operating system and default applications occupy part of the memory. The available capacity may change when you upgrade the device.

Please check with your service provider to verify qualifying services/features.
